Who we are

Coca-Cola Europacific Partners is one of the world's leading consumer goods companies – making, moving and selling some of the world's most loved drinks.

We make, move and sell the world's most loved drinks to millions of consumers, customers and communities every day.

Everything we do is built on three strategic pillars: great brands, great people and great execution. Done sustainably.

And our success is defined by the passion, hard work and commitment of the 32,000^(A) people who work here at Coca-Cola Europacific Partners (CCEP).

(A) As at 31 December 2023.

Performance indicators

Financial

Reported revenue

€18.3bn

Comparable and FX neutral revenue

€18.7bn

Reported revenue increased by 5.5%, or 8.0% on a comparable and FX neutral basis. Volumes were down 0.5%^(A) and revenue per unit case increased by 8.5%^(B). Volume remained resilient despite macroeconomic impacts on consumer spend and strategic SKU rationalisation, with strong underlying volume performance. Revenue per case growth reflected positive headline price and continued focus on promotional optimisation and revenue growth management initiatives.

Reported operating profit

€2.3bn

Comparable operating profit

€2.4bn

Reported operating profit increased by 12.0%, or 13.5% on a comparable and fx neutral basis, reflecting strong revenue growth, as well as the benefit of ongoing efficiency programmes and continuous efforts on discretionary spend optimisation.

Reported diluted earnings per share (EPS)

€3.63

Comparable diluted earnings per share

€3.71

Net cash flows from operating activities

€2.8bn

Comparable free cash flow

€1.7bn

Return on invested capital (ROIC)

9.5%

Comparable return on invested capital

10.3%

(A) On a comparable basis, No selling day shift in FY23.

(B) On a comparable and foreign exchange (FX) neutral basis.

Comparable volume, comparable and FX neutral revenue and revenue per unit case, comparable operating profit, comparable diluted EPS, comparable free cash flow, ROIC and comparable ROIC are non-IFRS performance measures. Refer to "Note regarding the presentation of alternative performance measures" on pages 81-82 for the definition of our non-IFRS performance measures and pages 83-90 for a reconciliation of reported to comparable results. Comparable free cash flow excludes net of tax cash proceeds of €89 million in connection with the royalty income arising from the ownership of certain mineral rights in Australia.

Performance indicators continued

Sustainability

Safety

Group: total incident rate
Number per 100 full time equivalent employees

0.84

Our target
Reduce our total incident rate (TIR) to below 1 by 2025
We are working towards world class safety standards and our Health, Safety and Mental Wellbeing policy is helping to ensure that we are adopting best practices.

Climate

Group: percentage greenhouse gas (GHG) emissions reduction across our entire value chain versus 2019

16.7%

Our targets
Reduce emissions across our entire value chain by 30% by 2030 (versus 2019)
Our short- and long-term targets to reduce emissions by 30% by 2030, and to reach Net Zero by 2040, were approved by the Science Based Targets initiative (SBTi) as being in line with climate science.

Water

Group: water replenished as a percentage of total sales volume

98.7%

Our target
Replenish 100% of water we use in our beverages
Together with The Coca-Cola Company (TCCC) and The Coca-Cola Foundation (TCCF), we continue to support replenishment programmes across our territories. In 2023, we supported 27 water replenishment projects in Europe and 9 in API.

Drinks

Percentage sugar per litre reduction

Region	Year	Percentage	Target
Europe ^(A)	2023	4.9%	10% reduction by 2025 (versus 2019)
	2022	5.0%	
Australia ^(B)	2023	14.9%	25% reduction by 2025 (versus 2015)
	2022	16.8%	
New Zealand ^(B)	2023	15.9%	20% reduction by 2025 (versus 2015)
	2022	15.9%	
Indonesia ^(B)	2023	36.2%	35% reduction by 2025 (versus 2015)
	2022	31.6%	

Our target
Reduce sugar in our drinks

Packaging

Group: percentage of rPET used

54.6%

Our target
50% recycled plastic in our PET bottles by 2023 (Europe) and 2025 (API)
We continued to exceed our target to use >50% recycled PET (rPET), reaching 54.6% across the Group in 2023. We also increased our use of rPET in Europe again, reaching 59.2%^(C). In API 41.5% of the plastic we used in our PET bottles was rPET.

Note: Our 2023 data was subject to independent limited assurance. A copy of our 2023 assurance statement, and assurance statements for prior years can be found on cocaolaep.com/sustainability/download-centre. See detail regarding restatement of our baseline GHG figures in our methodology statement on page 237.

(A) Sparkling soft drinks, non-carbonated soft drinks and flavoured water only. Does not include plain water or juice.

(B) Non-alcoholic ready to drink (NARTD) portfolio, including dairy. Does not include coffee, alcohol, beer or Freestyle.

(C) In 2019, we announced enhanced packaging targets for Europe, bringing forward the deadline to use at least 50% rPET from 2025 to 2023. Since 2021, our rPET use in Europe has been >50%.

Our portfolio

Great brands, innovation and value for customers

We work with our partners to offer consumers a wide range of quality drinks for every taste and occasion.

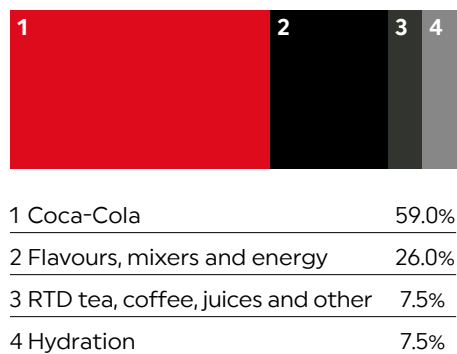

We continue to expand our portfolio by growing our core brands, while launching and scaling new products in categories like alcohol and coffee.

Our frontline sales force delivers execution and activation of our brands to support and create value for our customers throughout the year, particularly during key selling moments like Halloween, Christmas and the summer.

We are reducing the environmental impact of our manufacturing, distribution and packaging, as well as delivering on our commitment to reduce sugar across our portfolio and offering more low or no calorie drinks.

> This is Forward

2023 volume by brand category

Coca-Cola®

Our Coca-Cola brands come in a range of flavours and a great choice of packs, with or without sugar.

More flavours and innovation

In 2023, we provided even more flavour extensions and innovation with a number of limited editions including Coca-Cola® Y3000 Zero Sugar, co-created with human and artificial intelligence (AI), and Coca-Cola Movement.

Supermodel Gigi Hadid fronted a new global brand campaign, A Recipe for Magic, pairing Coca-Cola with special meal moments.

We also marked the FIFA Women's World Cup 2023 with promotions, limited edition pack designs and in store displays across our channels. This activity focused on attracting consumers and engaging fans across our markets.

We ended the year with engaging Christmas campaigns and promotions to mark the holiday season, which is an important selling moment for CCEP.

Key product 2023

Coca-Cola Zero Sugar continued to perform in 2023 and saw volume growth of

Our portfolio continued

Great brands, innovation and value for customers

Flavours, mixers and energy

Our flavours, mixers and energy category is driving growth for our business and providing a range of great tasting drinks for consumers.

2023 energy volume

Strong volume growth supported by continued distribution gains and exciting innovation such as Monster Zero Sugar.

New flavours, more low or no calorie options, and engaging activation

In partnership with Monster Energy, we launched new products including Monster Zero Sugar, Monster Juiced Aussie Lemonade, Monster Ultra Rosa and Monster Ultra Peachy Keen.

Fanta continued to grow. What The Fanta Zero Sugar returned with a new colour and mystery flavour, supported by on and off shelf execution. The brand celebrated Halloween, supported by marketing, promotions and in store and online execution.

Royal Bliss launched new flavours including Aromatic Berry in several markets.

RTD tea, coffee, juices and other

Ready to drink (RTD) remains an important category for our business, with ongoing innovation and quality brands introduced to new markets.

Growing our portfolio with alcohol ready to drink (ARTD)

We further grew our portfolio in the ARTD category in several European markets. We also announced the creation of Absolut Vodka and Sprite in 2024.

2023 key product

Jack Daniel's & Coca-Cola is the number 1 ARTD value brand in Great Britain.^(A)

#1

Hydration

Our hydration category provides consumers with a range of beverage choices for any occasion. It includes waters, flavoured waters, functional waters and isotonic drinks.

Category performance

Sports drinks volumes were up 11.3% and continue to be popular in both Europe and API, with growth in Powerade across all markets. To mark the FIFA Women's World Cup, we launched a new Powerade flavour, Powerade Fever Pitch.

(A) Combined portfolio of Jack Daniel's & Coca-Cola and Jack Daniels & Coca-Cola Zero Sugar, external data source NielsenIQ last 12 weeks ending 27 January 2024.

Acquisition of CCBPI

Faster growth

We were excited to announce a joint venture with Aboitiz Equity Ventures Inc. (AEV) during the year. Together, we acquired Coca-Cola Beverages Philippines, Inc. (CCBPI), a successful business with attractive profitability and growth prospects.

The acquisition continues to position us as the world's largest Coca-Cola bottler by revenue.

Read more in our s172(1) statement from the Directors on pages 65-67 and **Our strategy** on pages 14-47

We partner

We operate under bottler agreements with TCCC and other franchisors, and purchase the concentrates, beverage bases and syrups to make, sell and distribute packaged beverages to our customers and vending partners.

Associated risks: 2 8 9 11

We source

We use ingredients such as water, sugar, coffee, juices and syrup to make our drinks. We also rely on materials like glass, aluminium, PET, pulp and paper to produce packaging. On average in 2023, 84% of our spend was with suppliers based in our countries of operation.

Associated risks: 1 3 4 7 12

We make

Our production facilities make and bottle our wide range of drinks. Over 90% of the drinks we sell are produced in the country in which they are consumed.

Associated risks: 3 4 7 9 10 12

We recycle

Although 99.1% of our bottles and cans are recyclable, they don't always end up being recycled. That needs to change. We're determined to lead the way towards a circular economy for our packaging where, working with partners, we encourage packaging collection so that materials are recycled and reused.

Associated risks: 1 2 7

We sell

Our nearly 11,600 strong commercial team works with a wide range of customers, from small local shops, supermarkets and wholesalers to restaurants, bars and sports stadiums, so consumers can enjoy our great beverages. We also provide cold drink equipment (CDE) and supply vending machines.

Associated risks: 2 3 4 5 6 8 10

We distribute

We distribute our products to customers and vending partners directly, by working closely with logistics partners.

Associated risks: 1 3 6 10

Chairman and CEO

Damian Gammell,
CEO

Growing

faster together

2023 was another great year for CCEP. We have the momentum and platform, now including the Philippines, to go even further together."

— **Damian Gammell, CEO**

How would you reflect on CCEP's overall business performance in 2023?

Damian: I am delighted with our progress across the business in 2023. We continued to invest in our portfolio, people, technology, supply chain and sustainability, creating a solid growth platform for all our stakeholders. Financially we performed well, achieving strong top and bottom line growth, with value share gains and impressive comparable free cash flow generation. Furthermore, despite the macroeconomic and inflationary backdrop, our volume remained resilient.

Sol: We continued to sharpen our focus on driving profitable revenue growth and delivering best in class customer service. We are building on the strength of our brands, the great partnership we have with TCCC and our leading capabilities, all of which has reaffirmed CCEP as the number one value growth creator in fast moving consumer goods (FMCG) across Europe and NARTD in API, as well as being ranked as the number 1 supplier in 2023 across our large international retail customers.

Damian: Of course, none of this is possible without great people, and I would like to take this opportunity to say a very big thank you to everyone at CCEP for their tremendous commitment and hard work that has contributed so much to our success in 2023.

What were your personal highlights during the year?

Sol: I am really proud of the progress we've made against our sustainability targets, and in particular the practical measures we continue to take to both reduce and measure our impacts. We were delighted that the SBTi approved our GHG emissions reduction targets during the year, supporting our ambition to reach Net Zero by 2040.

Damian: Our performance reinforces the ongoing resilience and strength of our business. That aside, I am especially pleased with the progress we are making with our long-term transformation journey in Indonesia, a truly exciting market. Also, a call out to our joint acquisition of CCBPI with AEV, which aims to further expand our geographic footprint in the region and which continues to position us as the world's largest Coca-Cola bottler by revenue. Both of these markets are aligned with our long-term strategy of driving sustainable and stronger growth through diversification and scale.

Chairman and CEO continued In conversation

You mentioned CCEP's financial performance in 2023: what stood out for you?

Damian: All key financial metrics have been delivered in 2023. A strong top line, led by price and mix. We successfully executed pricing across all markets and continued to create value for our category. Our focus on revenue and margin growth management, along with our price and promotion strategy, drove solid gains in revenue per unit case during the year. Our volumes also remained resilient despite inflationary pressures. This was driven by great in market execution, leveraging our broad pack price architecture, and good underlying demand in developed markets, offset by the right strategic portfolio decisions for the long term.

Strong top line performance, alongside our continued focus on cost control and productivity efficiencies, drove strong operating profit growth and impressive comparable free cash flow generation. We also returned to the top end of our target leverage range. So, a great year all round.

What progress have you made on CCEP's strategy?

Damian: We have continued to grow our business and reach more households, from expanding our portfolio through the launch of Jack Daniel's & Coca-Cola in the exciting and fast growing ARTD category, and targeted innovation of our existing brands such as the launch of Monster Zero Sugar, to diversifying geographically through the acquisition of CCBPI.

We continued to invest for long-term growth as well as developing capabilities and driving efficiencies to support our mid-term objectives for the years ahead.

We also remained focused on driving shareholder value. This is made evident through the combination of driving solid top and bottom line growth, paying a record dividend, up almost 10% year on year, alongside delivering impressive total shareholder return (TSR) and entering the Nasdaq-100 at the end of the year.

Sol: The acquisition of CCBPI creates a more diverse footprint for CCEP geographically, which has prompted the renaming of API to APS^(A). It will provide the opportunity to leverage best practice and talent, including supporting Indonesia's transformation journey. It reinforces CCEP's aim of driving sustainable and stronger growth through diversification and scale, and underpins the Company's mid-term strategic objectives.

Image: Amandina PET recycling plant in Bekasi, West Java, Indonesia

How are you progressing with your sustainability commitments, and how do these support CCEP's strategic objectives?

Sol: Sustainability is integral to the success of our business. As a Board, we will continue to make decisions, which help us to make progress against our long-term commitments. More than ever, we are aware of the social and environmental challenges we face as a business, particularly around delivering our short- and long-term GHG emissions reduction targets, increasing recycled content in our packaging and improving our water use efficiency. Our progress continues to be recognised externally and we are proud to have retained our MSCI AAA rating and our inclusion on CDP's A List for Climate.

Damian: We have made strong progress against our This is Forward commitments in 2023 and are taking action where it matters most. On packaging, we have introduced 100% recycled PET bottles in Indonesia supported by our investment in PET recycling facilities in 2022, further boosting our use of recycled content in Indonesia.

We continued to invest in sustainability focused technology through CCEP Ventures and partnered with TCCC to create a sustainability focused venture capital fund.

(A) APS refers to Australia, Pacific and South East Asia.

Chairman and CEO continued

In conversation

The acquisition of CCBPI creates a more diverse footprint for CCEP geographically while providing the opportunity to leverage best practice and talent."

— Sol Daurella, Chairman

How have acquisitions contributed to the Group in 2023?

Damian: As mentioned earlier, geographic diversification is aligned to our long-term growth strategy, creating an even stronger platform for the future. Our acquisitions have also enabled us to leverage best practice and talent in a much bigger way than before. For example, we have taken 16+ years of experience of the ARTD market in Australia back to Europe as we accelerate into this exciting and fast growing category. This has already delivered great results.

Sol: From a Board perspective, we have been delighted with the progress made this year. We believe that bringing businesses together has created growth operationally and culturally, and will continue to do so. And, as Damian has already referred to, there has been a strong focus on sharing capabilities, as our people have embraced best practice and standardisation, which has in turn improved the service we provide to our customers.

How has your relationship with TCCC developed this year?

Sol: It's so important that we are fully aligned on strategy, with both companies sharing a common vision. Our strong relationship is also the foundation of our This is Forward sustainability strategy, which is fully aligned with TCCC's own global World Without Waste strategy.

Damian: We have always been closely aligned with TCCC strategically and that won't change. We continue to align our joint long-term growth plans and to pursue solid ways of working together with a joint investment mindset and aligned portfolio management across all territories.

A great example would be the joint acquisition of CCBPI from TCCC, in line with its stated intent to divest bottling operations.

What is the outlook for CCEP in 2024 and beyond?

Damian: We will continue to invest in the business to ensure we have the right capabilities to meet the needs of our customers, consumers and people, and to continue to provide world class execution and excellent service.

Consumer sentiment continues to be impacted by the economic environment, so, together with our brand partners, we will remain focused on staying affordable and relevant while creating value for our category and customers.

Sol: We continue to be the largest Coca-Cola bottler by revenue, and the CCBPI acquisition creates value for even more customers and reaches even more consumers.

What is consistent in our progress is the passion, dedication and diversity of our people, as demonstrated through our inclusion on the Bloomberg Gender Equality Index for the third year in a row. As we integrate CCBPI into the wider business, we expect to continue to focus on inclusion and the wellbeing of our people, as well as continuing to advance on our sustainability commitments.

What will determine CCEP's success?

Damian: It all comes back to great brands, great people, great execution, done sustainably. We have a strong business and have the tremendous privilege of making, moving and selling the world's most loved drinks to refresh consumers, now across 31 markets.

Together with our franchise partners, we're building on our deep consumer understanding to help us bring our great tasting drinks to even more households.

Sol: We will continue to invest, and have committed to almost €1 billion this year across technology, coolers, capacity and sustainability. This will include further investment through CCEP Ventures, which will help us to deliver our science based sustainability targets and harness new technology. We will also invest in the capabilities and tools to ensure our people can grow with our business.

We have delivered around €6 billion of shareholder returns since 2016, demonstrating our ability to deliver consistent shareholder value. Delivering continued shareholder value remains a key focus for 2024 and beyond.

FIFA Women's World Cup

Faster connections

Taking up Coca-Cola's campaign theme "Believing is Magic", CCEP is proud to have been involved with the FIFA Women's World Cup 2023, hydrating over 1.5 million players, coaches, officials, media and spectators during the tournament. Our commercial teams built engagement with consumers by helping customers create football themed activations in store, as well as online promotions.

Our market drivers

Our business is affected by a range of macroeconomic and market trends – from consumer and sustainability factors to the impact of new technology.

Our collaborative business model and culture means we can adapt and thrive in a changing environment, while our strategy enables us to respond to both current and future dynamics.

Consumer trends

Today's consumers are demanding more choice, and our evolving portfolio offers drinks for a wide variety of occasions. Demand for healthier alternatives continues to grow, which is reflected in the low and no calorie choices across our brands.

We believe strong brands supported by innovation are the key to meeting changing consumer needs.

The ongoing drive for value and convenience is coupled with the move to shopping more online and the desire for more drink choices. We address these consumer trends alongside the macroeconomic factors we face, the impact of technology and our focus on sustainability.

 [Read more in Our strategy](#) on page 14

Macroeconomic factors

Geopolitical volatility and high inflation continued to impact our business and our markets in 2023. We executed dynamic pricing strategies across our markets to offset the inflationary pressures we faced, while maintaining focus on productivity.

The economic environment continues to impact consumer sentiment, making affordability increasingly important for some consumers.

We actively manage our pricing and promotional spend to remain affordable and relevant to our consumers, and our broad price pack architecture helps us create the right balance between affordability and premiumisation.

While some markets are seeing trends towards more shopping in discounters, with a shift to some private label brands, we remain well placed within resilient categories and continued to grow volume and value share, maintaining our position as the number one FMCG value creator in Europe and NARTD in API.

Sustainability focus

There is an increasing interest in sustainability across our markets, particularly among younger consumers. Government commitments to new climate change and packaging-related regulations also continue to impact our business.

To ensure we meet the expectations on us, we are further expanding and creating new sustainability partnerships. For example, we have partnered with TCCC, other bottlers and Greycroft, a seed-to-growth venture capital firm, to create a venture capital fund focused on sustainability.

Through CCEP Ventures, we have also entered into a partnership with Swansea University to explore CO₂

upcycling technology to create ethylene, a key component of plastic bottle caps.

We continue to set our own ambitious sustainability targets and have received SBTi approval of our 2030 GHG emissions reduction and 2040 Net Zero targets.

 [Read more about This is Forward](#) on pages 14-47

Impact of technology

With the adoption of new digital channels now a firmly established trend, both consumers and customers are seeking to do more online and through these channels. We continue to win through online channels, building on our value share growth, and are accelerating our system capabilities to engage the digital shopper.

As consumer and channel trends are changing, the technology we use, and specifically the unique data insights we gain through our in house and partner digital platforms, are crucial. We continue to invest in our broader digital capabilities such as key account and revenue growth management tools alongside adopting AI across our organisation, from back office to supply chain.

These investments will collectively support our journey towards becoming the world's most digitised bottler.

Our strategy

CCEP is a market leader in a profitable and growing drinks market. Our aim is to always outperform the market, creating value for our customers and shareholders, while ensuring we limit our impacts on the world around us and support our people and communities.

Our strategy – **great brands, great people, great execution, done sustainably** – is core to delivering on our aim. **This is Forward**, our sustainability action plan, sits at the heart of our long-term business strategy.

This is Forward sets out the actions we are taking on six key social and environmental topics, where we know we can make a significant difference in the areas our stakeholders want us to prioritise.

 Great brands p16	 Great people p20	 Great execution p28
--	--	---

Forward on drinks pages 16-19 

Our diverse portfolio is built on our core brands like Coca-Cola, Fanta, Sprite and Monster, as well as targeted expansion into categories like coffee and alcohol. At CCEP, we're bringing new products to a new generation of consumers based on clear insights, while developing the classic brands our consumers know and love.

We are committed to reducing the sugar in our drinks and offering low or no sugar options – giving consumers even more choice.

Forward on society pages 20-27 

We take care of our talented, passionate and committed people who make our business successful, and support our suppliers, customers and communities. We want CCEP to be a great, engaging place to work, where everyone is welcome, has the opportunity to grow and can make a difference.

Forward on supply chain pages 28-35 

We support the growth of our two million customers through the quality of the service we provide, our understanding of their businesses, the strength of our sales force and the value our products create. We believe that the quality and integrity of our products and services depend on sustainable global supply chains with successful and thriving farming communities, where human rights are respected and protected.

 **Done sustainably** p36

Our ambition to create a better future, for people and the planet, sits at the heart of how we do business, and the decisions we take. Central to this are our targets to reduce GHG emissions by 30% by 2030 (versus 2019), and to reach Net Zero by 2040. Both targets have been validated by the SBTi as being in line with climate science.

We want every bottle or can we sell to be recycled or reused and we are working on improving collection and driving circularity. We have adopted a value chain approach to water stewardship, focusing on water efficiency within our own operations and working to protect the sustainability of the water sources that our business, our communities and our suppliers rely upon.

This is Forward – our sustainability action plan

Our headline commitments

Pillar	Strategy	Commitment	Target
Forward on drinks	Great brands	Sugar reduction	Reduce sugar by 2025: by 10% in Europe ^(A) , by 20% in New Zealand ^(B) , by 25% in Australia ^(B) , by 35% in Indonesia ^(B)
		Low or no calorie	Over 50% of sales to come from low or no calorie drinks by 2030 (Europe by 2025) ^(C)
Forward on society	Great people	Gender diversity management	45% of management positions to be held by women by 2030
		Gender diversity	A third of our workforce to be women by 2030
		Disabilities	10% of our workforce represented by people with disabilities by 2030 ^(D)
		Supporting skills development	Support the skills development of 500,000 people facing barriers in the labour market by 2030
Forward on supply chain	Great execution	Sustainable sourcing	100% of main agricultural ingredients and raw materials sourced sustainably
		Human rights	100% of suppliers to be covered by our Supplier Guiding Principles – including sustainability, ethics and human rights
Forward on climate	Done sustainably	Net Zero	Net Zero GHG emissions (Scope 1, 2 and 3) by 2040 ^(E)
		GHG emissions reduction	Reduce absolute GHG emissions (Scope 1, 2 and 3) by 30% by 2030 ^{(E)(F)}
		Renewable electricity	Use 100% renewable electricity across all markets by 2030
		Supplier engagement – GHG emissions	100% of carbon strategic suppliers ^(G) to set science based targets by 2023 (Europe) and 2025 (API)
		Supplier engagement – Renewable electricity	100% of carbon strategic suppliers to use 100% renewable electricity by 2025 (Europe) and 2030 (API)
Forward on packaging		Design	100% of our primary packaging to be recyclable by 2025
		Recycled plastic	50% recycled plastic in our PET bottles by 2023 (Europe) and 2025 (API)
		Virgin plastic	Stop using oil-based virgin plastic in our bottles by 2030
		Collection	Collect and recycle a bottle or a can for each one we sell by 2030
Forward on water		Water efficiency	10% water use ratio reduction ^(H) by 2030 ^(F)
		Replenish	Replenish 100% of the water we use in our beverages
		Regenerative water use	100% regenerative water use in leadership locations ^(I) by 2030

Note: For details on our approach to reporting and methodology, please see our 2023 Sustainability reporting methodology document on cocacolaep.com/sustainability/download-centre.

(A) Reduction in average sugar per litre in soft drinks portfolio versus 2019. Sparkling soft drinks, non-carbonated soft drinks and flavoured water only. Does not include plain water or juice.

(B) Reduction in average sugar per litre in NARTD portfolio versus 2015. Including dairy. Does not include coffee, alcohol, beer or Freestyle.

(C) Does not include coffee, alcohol, beer or Freestyle. Low calorie beverages ≤20kcal/100ml. Zero calorie beverages <4kcal/100ml.

(D) Calculated based on the total number of employees responding to our 2023 voluntary inclusion survey and the number of employees self-declaring as having a disability.

(E) Our GHG emissions reduction and Net Zero targets have been validated by the SBTi as being in line with climate science.

(F) Versus 2019.

(G) Carbon strategic suppliers account for ~80% of our Scope 3 GHG emissions (~200 suppliers in total).

(H) Water use ratio: litres of water per litre of finished product produced.

(I) NARTD production facilities which rely on vulnerable water sources or have high water dependency. We have nine leadership locations in Europe and four in API.

Great brands

Forward on
drinks

We are extremely privileged to make, move and sell the best brands in the world.

Key focus area for CCEP

We're focused on our great brands. In close collaboration with TCCC and other franchisors, we are committed to addressing evolving consumer needs through our diversified portfolio of products and packaging sizes.

We endorse the recommendations made by several leading health authorities, including the World Health Organization (WHO), advising people to limit their added sugar consumption to 10% of their total calorie intake.

We continue to reduce sugar across our portfolio, by reformulating our recipes and introducing new products, including new low and no calorie options.

We support transparency by providing customers with straightforward and easy to understand product information, and promote responsible marketing with no advertising of our products to children under 13, or an older age limit in specific regions aligned with local regulations.

Producing safe and high quality products that our consumers can trust is essential to what we do. We adhere to The Coca-Cola Operating Requirements (KORE), which define operational controls and prioritise the sustainable sourcing of ingredients.

Our ambitions

To have brands that people love and to be category leaders with great tasting drinks for every occasion.

To achieve that, we are investing in:

- strong and aligned partnerships with brand partners
- producing and delivering high quality and great tasting drinks
- a broad price pack architecture
- channel diversification

Our This is Forward commitments

Reduce average sugar per litre across our portfolio by 2025

- by 10% in Europe^(A)
- by 20% in New Zealand^(B)
- by 25% in Australia^(B)
- by 35% in Indonesia^(B)

Over 50% of sales to come from low or no calorie drinks by 2030 (Europe by 2025).^(C)

Achievements in 2023

Strengthened our guidelines for the marketing of all the brands and products manufactured or sold by CCEP to drive further transparency in everything we do. Rolled out specific training on our drinks containing alcohol to all our frontline sales force across our markets.

Our sales volume within the energy category increased by 14% versus previous year supported by solid distribution and exciting innovation. For example, we launched Monster Zero Sugar in France, Great Britain, the Netherlands and Sweden to promote choice and meet the growing consumer demand for a no calorie and no sugar variant of Monster Original with the same full-flavoured taste.

(A) Reduction in average sugar per litre in soft drinks portfolio versus 2019. Sparkling soft drinks, non-carbonated soft drinks and flavoured water only. Does not include plain water or juice.

(B) Reduction in average sugar per litre in NARTD portfolio versus 2015. Includes dairy. Does not include coffee, alcohol, beer or Freestyle.

(C) Does not include coffee, alcohol, beer or Freestyle. Low calorie beverages ≤20kcal/100ml. Zero calorie beverages <4kcal/100ml.

Total	100.0%	100.0%	(0.5)%

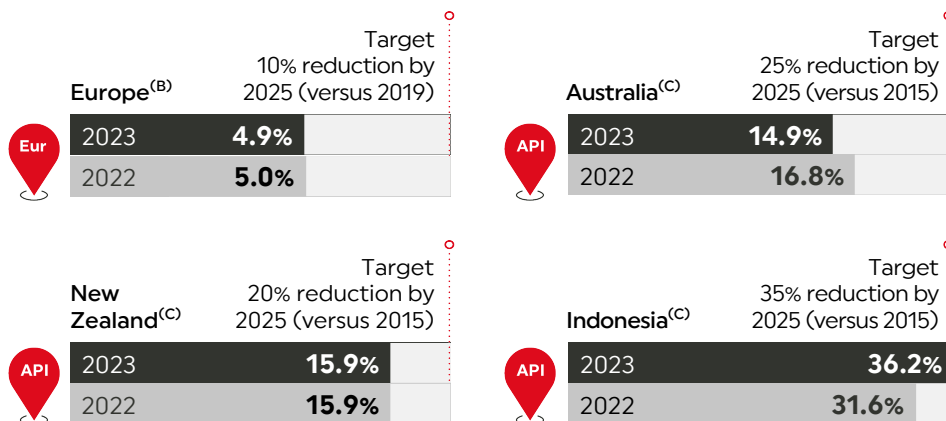

The plan for the year ahead

We remain confident in the resilience of our categories and will continue to actively manage our pricing and promotional spend to remain affordable and relevant to our consumers.

We will continue to monitor consumer trends and react to their changing needs for a greater variety of drinks for every occasion, including healthier alternatives. We'll do this by providing even more choice through innovation, the introduction of new low and no calorie drinks and the reformulation of our recipes. For example, in 2024, we will continue to reformulate Fanta Orange in some of our markets, to offer a broader range of beverage options, including zero calorie options.

We will drive engagement with our customers and consumers through our Coca-Cola trademark, Powerade, Fuze Tea and Costa brands at major sport events in 2024, including the Olympic Games in Paris and UEFA EURO in Germany.

Great brands continued

Our progress explained

Our product mix and consumer choice

We offer consumers drinks for every taste and occasion, including drinks with or without sugar, and drinks with ingredients which are Fairtrade or Rainforest Alliance certified.

Our portfolio ranges from carbonated and still soft drinks, energy drinks, and RTD teas, to flavoured dairy, organic soft drinks, beverages with nutritious benefits, coffee and alcohol.

We continue to expand our portfolio across our core brands, while also seeking to launch and scale new products in categories like alcohol and coffee, and engage with consumers through collected insights, dedicated research and consumer labelling.

We are further enhancing our product mix by providing a greater range of smaller packs, which are often more convenient for consumers and can help them to control their sugar intake. In 2023, 4.6% of our drinks were enjoyed in packages of 250ml or less.

Reducing sugar in our drinks

We are a long-standing member of the Union of European Soft Drinks Associations (UNESDA) and we are committed to reducing average added sugars in our soft drinks by a further 10% by 2025 (from 2019) across Europe, representing an overall reduction of 33% in the past two decades.

In 2023, in Spain, we reformulated Sprite, giving it a more intense taste, and introduced Sprite Zero. The brand has taken an important step towards greater circularity by replacing the iconic, hard to recycle green PET bottle, with a transparent and 100% recyclable PET bottle.

In our key API markets we also have ambitious 2025 sugar reduction targets as we aim to reduce the average sugar per litre in our NARTD portfolio by 20% in New Zealand, by 25% in Australia and by 35% in Indonesia (versus 2015).

Focus on low or no calorie drinks

Over the past year, we continued to encourage people to reduce their daily sugar intake, raising awareness of our low calorie drinks via our point of sale communications and by promoting low and no sugar options.

In API, we continue to introduce and promote more low and no sugar drinks with a focus on zero sugar sparkling drinks and water. For example, we are promoting Coca-Cola Zero Sugar in remote Indigenous communities in Australia in collaboration with our retail partners and their communities.

Following an assessment of the health impacts of aspartame, global health organisations, including the WHO, reaffirmed the safety of the ingredient. In 2023, we continued to use low and no calorie sweeteners in our products.

Find out more information on our approach to food safety and food additives on page 251

Clear, straightforward packaging information

We help people make informed choices by providing clear and transparent nutritional information, in particular on sugar and calorie content.

Our approach aligns with all global and local legislation. We pioneered Guideline Daily Amount (GDA) labelling and this has been on our drinks in Europe since 2009. In 2021, we adopted the voluntary front of pack Health Star Rating on all our non-alcoholic drinks in Australia and adopted the same approach in New Zealand in 2022.

We also make nutritional information for all of our drinks available on our websites in all our territories.

Responsible marketing

We are committed to the responsible marketing of our products.

Our responsible sales and marketing principles cover all media formats, point of sale materials and packaging types. They provide clear guidance for our commercial teams on how our products should be marketed, ensuring consumers are not mislead, and helping them to make informed choices.

Through these principles we also encourage responsible drinking of all our products, and ensure we comply with all relevant laws, regulations and industry codes on the marketing and sale of our products, including drinks that contain alcohol.

Together with TCCC, we have a clear policy not to advertise or market any of our products to children under 13, or an older age limit in specific regions aligned with local regulations. We play a proactive role in leading local industry coalitions to strengthen our actions, with a particular focus on the rapidly evolving digital and social media environment and school policies.

Case study Coca-Cola Zero launch in Indonesia

In 2023, we launched Coca-Cola Zero Sugar in Indonesia. The new drink in this market is part of our commitment to providing Indonesian consumers with a wider range of low and no calorie options.

The launch of Coca-Cola Zero Sugar introduced a new design bringing all variants of the Coca-Cola trademark under one brand identity.

The new packaging design is easily distinguishable and provides transparent nutrition information of each product.

Image: Coca-Cola Zero Sugar 390ml PET bottle and 250ml aluminium can

Jack & Coke

Faster on brands

Inspired by Jack & Coke, the classic bar cocktail known and enjoyed around the world, we were delighted to launch Jack Daniel's & Coca-Cola ARTD in Great Britain, the Netherlands and Spain in 2023. It is perfectly suited to meet consumer demand for ARTD mixers and create value for our customers.

Watch: Stephen Lusk, Chief Commercial Officer, on how we brought two iconic brands together. cocolaep.com/annual-report/case-study/fasteronbrands

Great people

We want CCEP to be a great place to work, where everyone is welcome, has the opportunity to grow and can make a difference.

Key focus area for CCEP

At CCEP, we have an engaging workplace, enabling our great people to do great business for our customers today and tomorrow.

We promote wellbeing, inclusion, diversity, development, innovation and respect, helping to ensure that our people at every level can be heard, grow and have a great experience.

We're committed to having a positive impact on our people and their communities by supporting economic mobility, and building resilience.

Some people in our local communities face significant socioeconomic barriers, including inequality, social exclusion and unemployment, while environmental challenges affect their daily lives. Across CCEP, we're tackling these issues and helping to remove people's barriers to the workplace.

Through our volunteering policy we empower our employees to engage with their communities.

Our ambitions

People

Wellbeing and safety of our people.

Talented, passionate and committed people who can deliver success for CCEP with winning capabilities, agility and a performance mindset.

Open, inclusive and respectful workplace.

Communities

Expand our contribution to society through employee volunteering and supporting local community partnerships.

Our This is Forward commitments

People

45% of management positions to be held by women by 2030.

A third of our workforce to be women by 2030.

10% of our workforce to be represented by people with disabilities by 2030.^(A)

Communities

Support the skills development of 500,000 people facing barriers in the labour market by 2030.

(A) Calculated based on the total number of employees responding to our voluntary 2023 inclusion survey (representing 38.4% of our workforce) and the number of employees self-declaring as having a disability.

Achievements in 2023

People

We developed critical leadership, commercial, customer service and supply chain capabilities through our respective academies.

We achieved strong employee engagement and delivered a second inclusion survey.

We expanded and made progress against our diversity commitments for gender balance, disability and social mobility.

Communities

Together with Coca-Cola Hellenic Bottling Company, TCCC and TCCF, we rolled out a Social Impact Framework and Toolkit to help measure the impact and progress of our community partnerships supporting people facing barriers in the labour market.

We also made financial donations to disaster relief organisations to support first responders during environmental disasters in Turkey, Syria and New Zealand.

Highlights from 2023

Case study Measuring inclusion across CCEP

During the year, we ran our second inclusion survey with over 13,000 employees taking part across CCEP.

This provided employees with the opportunity to give feedback on their inclusion experience at CCEP and declare personal diversity information. We saw improvements particularly in our people's sense of belonging, of being treated with dignity and respect, and in their belief that our leaders are committed to diversity. We expect the outcomes to enable us to better understand the diversity of our workforce, further improve inclusivity and embed equity in our infrastructure and people practices.

Image: Norwegian colleagues pictured in conversation

79

is our overall inclusion score, which considers how welcome, safe, included and respected our employees feel at CCEP

The plan for the year ahead

People

In 2024, we will continue to prioritise our people's physical and mental wellbeing, and provide an inclusive, safe and healthy work environment.

We will continue to invest in developing our people, strengthening our leadership, commercial, customer service and supply chain capabilities in particular.

Finally, we will invest further in creating a consistent experience for our people across our digital people platforms.

Communities

In 2024, we will celebrate the fifth anniversary of our Support My Cause initiative, which supports local charitable organisations nominated by our employees.

We will also continue to enhance our employee volunteering programme, ensuring that we continue to create positive social impact that genuinely improves the lives of millions of people in our communities.

We will be working with local markets to create roadmaps to help us reach our commitment to support the skills development of 500,000 people facing barriers in the labour market by 2030.

(A) CCEP full time, part time and temporary corporate employees. Full time equivalent employees as at 31 December 2023. Includes three employees who did not declare their gender.

(B) The members of the ELT and their direct reports consist of 56 women and 72 men.

(C) Directors of subsidiary companies comprising 27 women and 55 men are also included in the workforce diversity statistic under leadership.

Great people continued

Our progress explained

Forward on society

Our people

Safety

At CCEP the safety and wellbeing of our employees always come first. Our employees receive health and safety training, aligned with the Coca-Cola system health and safety procedures and local regulations.

We expect and encourage our people to follow our policies and procedures and take action if they become aware of any situation or behaviour affecting the physical or mental wellbeing of others. Managers are responsible for ensuring that our workplaces, processes and equipment are kept safe for our people.

Any potential hazard or work incident is investigated to identify and prioritise the short-, mid- and long-term action plans. In case of injuries or health issues, we make reasonable adjustments to our employees' duties and working environment to support their recovery and continued employment.

We measure our safety performance using total incident rate (TIR) and lost time incident rate (LTIR). This covers everyone working for us, including contractors and temporary workers. We aim to reduce our TIR to below 1 by 2025.

A contractor management system is in place across all our territories, requiring

contractors to pass a risk-based assessment before they are permitted to work at our sites. Tragically, in 2023, there was one contractor fatality in Indonesia. The incident was investigated with the local authorities and we continue to improve our safety procedures to prevent a reoccurrence.

Wellbeing

By the end of 2023, we had trained more than 1,250 Wellbeing First Aiders across CCEP. This has created an internal network for mental health support, with people trained to spot the signs of mental health conditions, listen free of judgement and direct colleagues to professional services when they need support.

Approximately 1,400 people benefited from our Employee Assistance Programme, an independent service in our workplace offering 24/7 free professional support for our people and their family. We also launched our new Wellbeing Hub in Europe, an online platform which offers our employees information and support to take care of their wellbeing. We aim to expand to API soon.

Through our Wellbeing Leadership training programme launched in 2023, we helped around 1,475 leaders across CCEP to understand their own wellbeing needs, and to develop the skills and confidence needed to keep their team safe and well.

For World Health Day 2023, we ran an internal campaign to support a proactive approach to health, with almost 5,000 people taking part.

Inclusion, diversity and equity

We believe that building a workforce that better represents the communities we serve will support our sustainable business growth. We prioritise inclusivity across five pillars: culture and heritage; disability; gender; LGBTQ+; and generations. Inclusion, Diversity and Equity (ID&E) at CCEP is supported by dedicated groups of employees and leadership sponsors centrally and locally who guide our initiatives.

We provide mandatory anti-harassment training for all people managers and members of the People and Culture team. This is also recommended for all employees. We also provide training on broader ID&E topics, for example inclusive leadership and allyship.

We are committed to being an equal opportunities employer. We have a policy of no discrimination and make decisions about recruitment, promotion, training and other employment issues solely on the grounds of individual ability, achievement, expertise and conduct. To ensure that line managers make appropriate pay decisions, we provide training and support. We monitor pay equity within our territories.

Promoting diversity in recruitment

To ensure we have a pipeline of diverse talent, we promote inclusion and diversity from recruitment and apprenticeships, to training, development and progression. This is supported by our clear anti-harassment and ID&E policy, as well as our Inclusive Recruitment Principles and Candidate Charter.

We use targeted attraction strategies and specialist jobs boards, aimed at under represented audiences, to promote content on our inclusive culture. We also share information and stories from our people on their inclusion experiences on social media and our careers website to showcase our philosophy that everyone is welcome, can be themselves and belong at CCEP.

In addition, we have introduced our new Disability Pledge, including our Company-wide commitment to support employees with disabilities, providing guidance and goals for local initiatives to help us achieve this commitment. The Disability Pledge includes embedding inclusivity into our processes and practices. We also work with external partners to reach under represented communities.

[Read more in our communities](#)
on page 26

Partnerships to support diversity

We partner with organisations and participate in activities that contribute to a fairer workplace and society. We are a signatory of the LEAD Network pledge and the Valuable 500 pledge to accelerate gender parity and disability inclusion. We support the UN Women's Empowerment Principles, promoting gender equality and women's empowerment. We are members of the Business Disability Forum, Stonewall's Diversity Champions programme and the Social Mobility Index.

Great people continued Our progress explained

Supporting and engaging our people

Good communication is essential to building a motivated, engaged workforce. We are committed to communicating clearly and transparently with our people and their representatives in local languages through digital platforms, printed materials and direct dialogue.

We engage in forums to ensure we hear the voice of our employees. We meet regularly with the European Works Council, national and local works councils, and trade unions that represent our people across our territories. Across our territories, 55 unions represent our employees.

We continue to innovate and extend our digital solutions for our people to make it easier for them to access what they need, such as policies, training and key data on pay and performance. Our policies are easy to understand, and are reviewed annually to align with legal requirements.

We want our people to enjoy a great experience at CCEP and feel engaged with our business aims and strategy. In June 2023, we conducted our annual employee engagement survey. The results showed sustained strong engagement levels, with more than 24,400 colleagues (76%) participating, which is up by 557 respondents compared to last year. Our strong engagement score has stayed stable at 77.

Find out more about our Board engagement with our people on page 61

Employee training, development and leadership

We believe that when our people learn and grow, our business grows too, so we continue to invest in learning and development across CCEP through our strategy, The Way We Grow. This includes developing capabilities in leadership, commercial, customer service and supply chain through our academies: The Way We Lead, The Way We Sell and The Way We Serve.

We progressed The Way We Lead academy with around 500 leaders gaining 360 feedback, helping them to grow self-awareness of their leadership style and enabling them to contribute to a feedback culture. More than 2,500 leaders participated in a series of virtual and in-person development modules including coaching and performance.

We are equipping our frontline managers through our new global Great People Manager Programme. Approximately 500 leaders participated in 2023. The rollout will continue in 2024.

We offer further training opportunities through our digital learning platforms Juice and Academy, supporting employee development of core capabilities in leadership, commercial, customer service and supply chain.

Our people can create their own talent profile and understand their objectives, feedback and development plan using our digital MyPerformance@CCEP platform.

Our digital Career Hub, live across Europe and soon to be rolled out in API, provides users with personalised recommendations for vacancies, career paths and networking opportunities. 64% of employees so far have created their profile. We have seen our employee engagement score increase by five points compared to last year's results, with new joiners and younger employees feeling more positively about our progress on growth and value, and enthusiastic about their career opportunities at CCEP.

We value and invest in our early career talent and support initiatives that help young people gain employability, skills and confidence. This includes offering internships, apprenticeships and graduate programmes. In 2023, we continued to partner with One Young World, the global forum for young leaders. 21 CCEP delegates attended the forum in Belfast, bringing back valuable experiences and ideas.

Employee benefits

We pay fairly and in line with appropriate market rates, and provide our people with benefits according to their country and level in the organisation, including packages to cover sickness, post-natal childcare, bereavement or a long-term illness in the family. We also offer pension plans, life insurance and medical plans, as well as many other flexible benefits.

Find out more about our remuneration on pages 127-143

Case study

Investing in our people's capabilities

We continue to invest in developing our commercial, customer service and supply chain capabilities.

Around 2,450 people in our commercial function have participated in The Way We Sell academy.

Alongside skills evaluations, which enable our people to build personalised learning journeys with their managers, there has been good participation across our modules including World Class Key Account Management, Sales Execution and Commercial Fundamentals.

We introduced The Way We Serve academy in our customer service and supply chain function and have equipped around 360 people with new capabilities in support planning.

Image: Sales colleague in conversation with a customer

Great people continued

Our progress explained

Respect for human rights

We consider human and workplace rights to be inviolable and fundamental to our sustainability as a business. We support the 10 principles of the UN Global Compact.

Our principles regarding human rights are set out in our Human Rights policy, which is aligned with accepted international standards and CCEP's Code of Conduct (CoC).

Further information on our principles regarding human rights is provided in our Supplier Guiding Principles (SGPs) and Principles for Sustainable Agriculture (PSA). These set out the requirements of our suppliers related to business ethics, human and workplace rights, the environment, and providing benefits to communities.

Modern slavery

We have a zero tolerance approach to modern slavery of any kind, including forced labour, and any form of human trafficking within our operations, and by any company that directly supplies or provides services to our business.

Our Modern Slavery Statement complies with the UK Modern Slavery Act 2015 and the Australian Modern Slavery Act 2018. It sets out the steps taken by CCEP to prevent, identify and address modern slavery risks across our business and supply chain.

[See our modern slavery statements at cocacolaep.com/about-us/governance](https://cocacolaep.com/about-us/governance)

Human rights risk assessment

We recognise that all our employees and supply partners have a role in identifying and mitigating human rights risks across our business. Employees and managers are empowered to recognise and address human rights risks and issues as they conduct their work, and this extends to the arrangements we agree with workers and trade unions.

The effective tracking and management of these risks also ensures compliance with relevant legislation.

We have mapped human rights-related laws, regulatory requirements and risks identified in human rights reports in each of our countries. Based on this, in 2024, we will refresh our human rights assessment strategy primarily focused on the countries where the highest human rights risks have been identified.

In 2023, we conducted human rights risk assessments in Germany and Norway. These assessments identified current and evolving human rights risks to ensure we develop proactive measures to manage risks before they occur. Human rights risk has been rated as low within our own operations in both Germany and Norway, however, risk in our supplier base remains.

During 2023, we also analysed the results of the human rights risk assessment conducted in Indonesia in 2022, and developed measures to improve our social dialogue and the conditions for women in our workforce.

As a result of human rights risks assessments that have been completed in Europe and API, we have identified 12 areas as priority issues for CCEP, as summarised in the human rights risk assessment table to the right.

[Find out more about our approach to human rights in our supply chain on page 33](#)

Ethics and compliance

Our ethics and compliance programme for all our employees and Directors is designed to ensure we conduct our operations in a lawful and ethical manner. It also supports how we work with our customers, suppliers and third parties.

Preventing bribery and corruption

We aim to prevent all forms of bribery and corruption in our business dealings. Our CoC sets out our principles and standards to prevent bribery and corruption, including conflicts of interest and the exchange of gifts and entertainment. Our Gifts, Entertainment and Anti-Bribery policy applies to all employees. There is a mandatory training for a targeted audience.

Forward on society

Our communities

Boosting skills development and social inclusion

We're determined to drive the economic empowerment of under-represented people, with a particular focus on people with disabilities, those from minority ethnic groups or lower socioeconomic backgrounds, and women, by providing employability skills and removing barriers to the workplace.

We support a wide variety of local community partnerships as part of our new Skills for Impact initiative launched in 2023.

For example, in 2023, we organised the third BORA Jovens programme in partnership with Portuguese NGO Ajuda em Ação to support young people at risk of social exclusion, in entering the labour market. Since the start of the programme in 2021, approximately 400 young people have participated, resulting in around 160 of them entering the labour market and almost 50 going back to school.

In Indonesia, in partnership with associations, universities, governments, and local NGOs, we provide mentorship programmes to support micro, small and medium enterprises within fashion, food and beverages, waste management and other sectors. In 2023, we delivered training and mentorships to approximately 1,000 people.

Protecting the environment and community wellbeing

We support programmes, projects and initiatives that help protect local environments, address climate adaptation and improve community wellbeing, including major disaster relief efforts, water replenishment projects and local litter clean up activities.

In 2023, supporting the Sea Life Trust on World Oceans Day, over 100 CCEP employees participated in beach and river clean ups across England and Scotland.

We also help address the needs of people in the community by donating surplus products and working with food banks. For example, in 2023, in Norway, we strengthened our partnership with Too Good to Go, a platform that aims to combat food waste. Through improved forecasting and employee volunteering we have managed to avoid the disposal of around 600 tonnes of finished goods.

Supporting local communities with our employees and customers

We empower our employees to take action for the environment and engage with their local communities through employee volunteering.

Our Support My Cause initiative enables employees to nominate local charities they feel passionately about to receive a donation from the business. Since 2019, we have donated €1.2 million to 200 local charities and community groups across our territories. In addition, in 2023, we donated over €400,000 to support 125 grassroots charitable and community partnerships located close to our sites and offices.

We also partner with our customers to support initiatives that tackle societal challenges within our communities. For example, in 2023, we joined forces with the German Foundation for Integration and DEHOGA, Germany's national association for restaurateurs and hoteliers, to start a mentoring programme in the hospitality industry. The programme supports our customers in developing talented young people.

[Find out more about Board engagement with communities on page 64](#)

Case study Volunteering for the Special Olympics

With TCCC, we are a long-standing supporter of the Special Olympics which is the world's largest sports organisation for children and adults with intellectual and physical disabilities.

Our support in Europe includes volunteering, financial support and product donations. In 2023, more than 250 CCEP and TCCC people volunteered locally or at the Special Olympics World Games Berlin.

We also established the Unified Business project in Great Britain, working with Special Olympics athletes to help develop their employability skills to break down the barriers they face when entering the workplace.

Apprenticeships

Faster career progress

We help people accelerate their careers with us by offering a wide range of different apprenticeship schemes, from Sales and Merchandising to Food Technology and Engineering. One of many who have joined us, Jennifer started as an Engineering Apprentice at our site in East Kilbride, Great Britain. Having now completed her qualification, she is responsible for helping to ensure our lines run as efficiently as possible.

Watch: Sharon Blyfield, Head of Early Careers at CCEP, talks about how we bring talent into the business.

Great execution

We want to win with our customers and suppliers, and maintain high customer service levels.

Key focus area for CCEP

We're working to deliver great execution for customers. We're driving growth, creating value and delivering results through close support and collaboration, while identifying new channels and implementing transformative new ways to do business.

To ensure we maintain high quality products and services for our customers we must promote reliability, consistency and sustainability throughout our supply chain.

We recognise the importance of having ethical and sustainable procurement practices that support our business and sustainability goals.

As a business, we rely upon a sustainable supply of ingredients like sugar, coffee, tea and juices as well as the raw materials we use for our packaging like glass, aluminium, plastic, pulp and paper. That's why we continue to invest in our capabilities and the long-standing and supportive relationships we have with our supply chain to provide even better service for our customers.

Our ambitions

Our customers

Strong and supportive customer service, known for our agility and flexibility.

Great digital tools enabled by high quality data and analytics, known to be easy to do business with and for our world class execution.

Our suppliers

A well invested supply chain and optimised portfolio.

Our This is Forward commitments

100% of our main agricultural ingredients and raw materials sourced sustainably.

100% of our suppliers to be covered by our Supplier Guiding Principles (SGPs) – including sustainability, ethics and human rights.

Achievements in 2023

Our customers

Our online customer portal, MyCCEP.com, received a new look and feel to make it easier to use for customers. New tools and functionalities are constantly being added to MyCCEP.com including point of sale materials and consumer insights to help customers grow their businesses.

Our suppliers

Following the launch of our Responsible Sourcing Policy (RSP) in 2022, we focused on actively engaging and communicating with our suppliers across our markets in Europe and API and aiming for 100% of our suppliers to understand and comply with our policy.

To reduce our Scope 3 GHG emissions, we continued to engage with our carbon strategic suppliers, asking them to set their own science based targets and transition to 100% renewable electricity. This will ensure more of our suppliers have strong SBTi targets in place across our territories and help to reduce their GHG emissions.

Our customers

Customers at the heart of our business

As the world's largest Coca-Cola bottler by revenue, we have built long-standing and supportive relationships with our customers.

We are committed to delivering great execution and creating value for them. We do this not just by focusing on growing our own portfolio of products, but by considering how we can grow the soft drinks category as a whole.

With the market continuously changing, it is more important than ever to have the right commercial strategies in place to be able to respond to this evolving landscape.

Our strong commercial team works with a wide range of customers, ranging from small local shops, supermarkets and wholesalers to restaurants, bars and sports stadiums, so consumers can enjoy our great tasting products.

We aim to be as close as possible to our customers, maintaining continuous relationships at every level and every function in order to understand their business. This enables us to identify opportunities and ensure these are aligned with the customer's ways of working.

Image: Colleague and customer in away from home (AFH) channel, the Netherlands

Our frontline field sales teams visit our customers on a daily basis providing in-store execution support, while our key accounts teams engage with customers on a national and international level on strategic product planning, addressing challenges and opportunities, supported by senior members of the leadership team.

Much of our ability to create value for our customers depends on the quality of the service we provide and how we deliver in the market.

Our focus is on ensuring our frontline sales teams are visiting and engaging with customers regularly, which we measure by tracking the number of

customer visits we complete each day. In Europe, we have about 1,600 sales representatives in the AFH channel who conduct up to 13 visits per day. This represents more than 20,000 daily accounts visits and more than 390,000 interactions with our customers on a monthly basis. In addition to our field sales teams, we also interact with our AFH customers via our call agents and digital teams, as part of our omni contact (face, voice and digital) strategy.

Driving digital growth

Our ability to win with our customers has been enhanced in recent years due to ambitious and targeted investments in our priority capabilities. These investments support our customers to adopt new technologies and to focus on digitisation. It also helps us to engage with them through multi contact strategies and by investing in knowledge and analytics to better tailor our action plans to their needs.

Today, 85% of our volume is digitally captured across our markets, mainly driven by electronic data interchange with our retail customers, B2B platforms and call centre inbound.

We also continue to drive incremental revenue growth in digital commerce channels through world class execution. This is supported by establishing high level digital capabilities within our teams, and by developing and deploying the next generation of tools to support our commercial strategy, which includes a clear multi-year roadmap.

[Read more in Our market drivers on page 13](#)

Great execution continued

Our customers continued

Driving stronger capabilities across our commercial teams

To accelerate our journey to deliver a great execution for our customers, we are enhancing the capabilities of our people.

We support the skills development of our employees across all functions and foster a culture of data-driven decision making, by driving stronger capabilities across our sales force and our key account management team.

Through our online learning platform Academy, we offer a wide range of trainings for our people. We continue to update the development programmes and to introduce new relevant courses designed to grow capabilities in specific areas such as sustainability, finance skills, negotiation and digital skills. In 2023, we launched a new academy on the coffee category.

[Find out more about training programmes for our people on page 24](#)

Partnering with customers to drive value

At CCEP, we are committed to creating value for our customers. Considering exactly what consumers need helps us identify opportunities for category growth, which is key to a successful commercial strategy.

In 2023, highlighting the strength of our customer relationships, we created more value than any other NARTD business.

We work with NielsenIQ and IRI3 – retail and consumer data and insight providers – to measure how much value we create for our customers, and how our individual brands support this value creation.

In 2023, across all our territories in Europe and API, we created €17.1 billion in value across our NARTD categories for our customers, a year on year increase of €1.2 billion.

In Europe, Coca-Cola is the highest value brand within FMCG (€8,980m) and the brand that has added the most absolute value year on year (€497m).

Winning with customers

Our retail customers include supermarkets and hypermarkets, which sell our drinks to consumers for consumption at home. They represent a significant amount of our volume, and we measure their satisfaction through the Advantage Group Survey.

The survey covers key retail customers, asking them to rank CCEP's performance across a variety of critical partnership areas including strategy, operations, customer service, marketing, innovation, people and sustainability.

We measure ourselves against our ambition to be our customers' number one supplier within the beverage industry and FMCG. The survey covers eight of our nine markets in Europe (Belgium and Luxembourg (Belux), France, Germany, Great Britain, the Netherlands, Portugal, Spain and Sweden^(A)) alongside Australia, New Zealand and Indonesia in API.

In 2023, CCEP secured the number one position within FMCG across six of our surveyed markets – Belux, Great Britain, the Netherlands, Portugal, Spain and Sweden^(A).

Image: Colleague and customer in retail in Norway

Our progress explained

Forward on supply chain

Collaborating with our suppliers

We work with our suppliers to procure high quality raw materials and services. At the heart of this is our integrated approach to sustainability – making improvements and launching initiatives that support responsible sourcing, climate resilience, water stewardship and biodiversity.

We engage with suppliers to identify common challenges and to decarbonise our business. The table on the right illustrates some of the requirements that we have put into place for our strategic and carbon strategic suppliers.

Our RSP is included in new contracts and sets out the mandatory guidelines that our direct and indirect suppliers must comply with in order to do business with CCEP. This includes our SGPs, which set out the minimum requirements we expect of all our suppliers in areas such as workplace policies and practices, health and safety, environmental protection, business integrity and human rights. It also includes our PSA, which apply to agricultural ingredients and raw material suppliers and cover human and workplace rights, environmental protection and sustainable farm management.

(A) Provides a leading solution for monitoring sustainability in global supply chains. Suppliers that have a low score are asked to develop an action plan and improve their performance. If suppliers do not improve their performance within a set timeframe, they may not be used in the future.

Priority ingredients

As climate change leads to more extreme weather and increased water stress, more sustainable agricultural practices will be vital to building resilience across our supply chain and for the communities that produce these ingredients.

Together with TCCC, we have identified 13 priority agricultural ingredients we rely on to make and package our beverages.

Managing the purchase of these ingredients together with TCCC and other Coca-Cola bottlers, helps us manage the challenges we face in our supply chain as a joint Coca-Cola system.

For more details on our priority ingredients see page 34

Supplier risk

Understanding what we buy and taking action when we encounter a risk is a key aspect of our supplier relationships.

We assess suppliers across multiple criteria such as financial value, efficiency, innovation and risk. For our strategic suppliers we carry out detailed financial and supplier risk assessments.

We hold regular meetings with suppliers to assess key issues such as performance, innovation and sustainability.

Great execution continued

Our progress explained

We proactively manage sustainability risks in our supply chain using data gathered through EcoVadis for strategic suppliers and EcoVadis IQ for non-strategic suppliers. In addition, we continue to use Resilinc software, an AI tool which helps us to proactively identify potential risks in our supply chain. Having used the software to map our tier 1 suppliers in 2022, we started a project to map our tier 2 suppliers using Resilinc in 2023.

In 2023, we also started using FRDM, a supply chain risk management tool, to monitor and mitigate human rights and climate-related risks in our supply chain.

Human rights in our supply chain

Protecting human rights is fundamental to how we run our business. We are committed to ensuring everyone who works at CCEP and in our supply chain is treated with dignity and respect.

In 2023, we continued to provide training on human rights to our employees, with specific training to procurement managers focused on the German Supply Chain Act.

We also conducted a human rights risk assessment in Germany and Norway in 2023, and published our first annual report for Norway under the Norwegian Transparency Act. In 2024, we will expand our reporting with our first annual report for Germany under the Act on Corporate Due Diligence Obligations in Supply Chains.

In 2023, we documented our processes and responsibilities related to human rights risk assessments, due diligence and remediation or mitigation. This sets the basis for a robust governance framework across CCEP for human rights related actions.

Supporting our suppliers in reducing GHG emissions

Our suppliers are responsible for over 80% of the GHG emissions in our value chain. We can only meet our own GHG emission reduction targets by working in partnership with them. That is why we have asked approximately 200 carbon strategic suppliers to set their own science based targets.

In 2023, 31% of our carbon strategic suppliers (Europe 50%, API 16%), had SBTi validated targets.

We also track the number of suppliers who have committed to set SBTi targets, including those who may have already submitted targets to the SBTi. In 2023, a further 48% of our carbon strategic suppliers (Europe 46%, API 48%) committed to set science based targets^(A).

We know that some of our suppliers will need support to measure their emissions accurately, so that they can develop a GHG emissions reduction roadmap, set a science based target, adopt GHG emissions abatement measures and disclose their progress.

To support them, we are working with TCCC to engage suppliers in the Supplier Leadership on Climate Transition (S-LOCT) programme, a cross industry collaboration that aims to provide suppliers with the resources, tools and knowledge they need to make progress on their own climate journeys.

In 2023, around 50 CCEP suppliers were engaged with the programme, and we continue to encourage and support more of our suppliers to join.

Sustainability supply chain finance programme with Rabobank

In 2022, we implemented a new sustainability supply chain finance programme, structured and operated by Rabobank.

The programme, one of the first of its kind in the global beverage industry, incentivises and rewards suppliers for improving their ESG performance.

In 2023, the multi-award winning programme grew significantly, more than doubling the supplier groups participating, and beating the peak financing target by 114%.

In partnership with the Rabo Foundation we invested in two local projects, focused on improving the sustainable production capabilities of smallholding farmers in Indonesia.

We also launched a similarly structured programme in Indonesia in partnership with Citibank, offering Indonesian suppliers incentives on financing interest rates.

 **Read about how we work with suppliers to reduce their emissions** on page 38

(A) Based upon carbon strategic supplier-survey information.

Great execution continued

Our progress explained

Supplier standards audits

We expect our suppliers to develop and implement appropriate internal business processes to ensure that they fully comply with our SGPs.

As part of the Coca-Cola system, we rely on independent third party audits commissioned by TCCC to monitor supplier compliance with our SGPs for ingredients and primary packaging directly purchased by CCEP and for juices and concentrates purchased from TCCC.

To date, these audits have covered more than 94% of our ingredients and primary packaging suppliers. If a supplier fails in any aspect of the SGPs, they are expected to implement corrective actions. TCCC conducts unannounced audits at its discretion and we reserve the right to terminate an agreement with any supplier that cannot demonstrate that it is upholding the SGPs' requirements.

PSA compliance is verified through adherence to a limited set of third party sustainable agriculture standards approved by TCCC. CCEP directly purchases sugar beet and sugar cane, pulp and paper, and tracks compliance with the PSA for these commodities through TCCC.

Our priority ingredients^(A)

Raw material	Procurement method	Quantity and brands	PSA aligned third party standards	Compliance and standards
Beet and cane sugar	Directly by CCEP	<ul style="list-style-type: none"> Approximately 700k tonnes of beet sugar Approximately 300k tonnes of cane sugar 	<ul style="list-style-type: none"> Bonsucro FSA Gold and Silver Redcert 2 	<ul style="list-style-type: none"> Europe: 99.9% third party standard and PSA compliant API: 97.3% third party standard and PSA compliant
Pulp and paper^(B)	Directly by CCEP	<ul style="list-style-type: none"> Europe: approximately 70k tonnes of board for secondary and tertiary packaging, and marketing materials API: approximately 40k tonnes of board for secondary and tertiary packaging^(B) 	<ul style="list-style-type: none"> Forest Stewardship Council (FSC) Certification endorsed by the Programme for the Endorsement of Forest Certification (PEFC) 	<ul style="list-style-type: none"> Europe: 99.8% FSC or PEFC certified and PSA compliant API: 99.7% FSC or PEFC certified and PSA compliant
Juice^(C)	TCCC	<ul style="list-style-type: none"> Orange and lemon juice from concentrate, not from concentrate and puree, are key ingredients in a number of our products (e.g. Minute Maid) 	<ul style="list-style-type: none"> Sustainable Agriculture Initiative Platform (SAI) 	<ul style="list-style-type: none"> Europe: 100% PSA compliance for orange and 100% for lemon API: 100% PSA compliance for orange and lemon

Done sustainably

Forward on climate

Forward on packaging

Forward on water

We take our responsibility to reduce our environmental impact seriously.

Key focus areas for CCEP

We are committed to decarbonising our entire business.

The Intergovernmental Panel on Climate Change (IPCC) has highlighted the need for urgent climate action^(A). We take our responsibility seriously, and have set GHG emissions reduction targets aligned to climate science.

We are taking urgent action to reduce the impact of our packaging.

Waste and pollution, particularly from plastic packaging, are significant global challenges, and we are reinventing the way we do business to progressively move away from a linear model and the waste it creates, towards a full circular model.

We have adopted a value chain approach to water stewardship.

Water is vital to our business. It is the main ingredient in our products, essential to our manufacturing processes and crucial for the agricultural ingredients we use. We prioritise water efficiency in our own operations, while safeguarding the sustainability of the water sources our business, communities and suppliers rely upon.

This is Forward commitments

Climate

Reduce our absolute GHG emissions (Scope 1, 2 and 3) by 30% by 2030 by 30% by 2030 (Versus 2019).^(B)

Net Zero GHG emissions (Scope 1, 2 and 3) by 2040.^(B)

Use 100% renewable electricity across all markets by 2030.

100% of carbon strategic suppliers^(C) to set science based targets in Europe by 2023 and in API by 2025.

100% of carbon strategic suppliers^(C) to use 100% renewable electricity in Europe by 2025 and in API by 2030.

Packaging

100% of our primary packaging to be recyclable by 2025.

50% recycled plastic in our PET bottles in Europe by 2023 and in API by 2025.

Stop using oil-based virgin plastic in our bottles by 2030.

Collect and recycle a bottle or a can for each one we sell by 2030.

Water

10% reduction in our manufacturing water use ratio^(D) by 2030 (versus 2019).

Replenish 100% of the water we use in our beverages.

100% regenerative water use in leadership locations^(E) by 2030.

Achievements in 2023

In 2023, our Group wide targets to reduce GHG emissions were approved by the SBTi. To assess how GHG emissions will reduce by 2030, we started to build a climate transition plan, including carbon reduction roadmaps with targeted investment through to 2030.

We became a Member of the Ellen MacArthur Foundation's network, the world's leading circular economy network that brings together businesses, policymakers, financial institutions, innovators and thought leaders to accelerate the transition to a circular economy.

In 2023, we set a new Group wide water use ratio (WUR) reduction target, aiming to reduce our water use ratio by 10% by 2030 (versus 2019). This target is an aggregation of site level WUR targets, which are set in line with the sites' water risk categorisation.

Done sustainably – Our environmental impact

Performance and progress against our This is Forward commitments

Forward on climate

14

PAS 2060 carbon neutral certified production facilities across our territories

The plan for the year ahead

We'll continue to drive the reduction of GHG emissions across our full value chain – empowering and supporting our suppliers to take climate action to reduce Scope 3 GHG emissions, while being fully transparent about our value chain GHG emissions and the climate risks we face.

We aim to evolve and continue to develop our climate transition plan, outlining how CCEP will decarbonise its full value chain by 2040, supported by long-term investment.

Through CCEP Ventures, our investment platform for sustainability initiatives, we will continue to invest in breakthrough solutions that could help us reach our Net Zero 2040 target.

We will also begin work to assess our Forest, Land and Agriculture (FLAG) emissions, and emissions from our business in the Philippines.

(A) Our 2023 data was subject to independent limited assurance. A copy of our 2023 assurance statement, and assurance statements for prior years can be found on cocacolaep.com/sustainability/download-centre. See detail regarding restatement of our baseline GHG figures in our methodology statement on page 237.

(B) See page 39 for renewable electricity purchased percentages for Group, Europe and API.

(C) Carbon strategic suppliers account for ~80% of our Scope 3 GHG emissions (~200 suppliers in total). A further 48% (Europe 46%; API 48%) have committed to set science based targets, including those who may have already submitted targets to the SBTi.

Done sustainably – Our environmental impact continued

Our progress explained

Developing a climate transition plan across our value chain

In 2023, we focused on building roadmaps to deliver against our short- and long-term GHG emissions reduction targets. This work included modelling reductions across the business, including plans from each market we operate in. It is the starting point for the development of our long-term climate transition plan.

Our carbon reduction roadmap has been aligned with our commercial long-term business planning, and we have worked to align decision making within our Capex planning processes.

To support our business planning, we have also embedded a carbon projection into our 2023-2025 long-term planning and 2023 business plan. This has helped us improve the connection between our commercial and carbon forecasts.

~€450m

Between 2023 and 2025, we expect to invest approximately €450m in energy, logistics and carbon reduction technologies in our operations to support our decarbonisation plan.

> Read more about our climate transition plan in our TCFD disclosure on pages 51-53

Reducing supplier GHG emissions

More than 80% of the GHG emissions in our value chain come from our supply chain (Scope 3).

To reduce these emissions we have asked around 200 carbon strategic suppliers to set their own science based targets and to transition to 100% renewable electricity by 2025 in Europe and by 2030 in API.

In 2023, around 80% of our Scope 3 GHG emissions were linked to suppliers with SBTi validated targets. In 2023, 31% of our suppliers have SBTi validated targets. A further 48% have committed to set science based targets.

We are also working together with TCCC to collect and validate supplier specific emission factors directly from our suppliers, initially focusing on packaging and ingredients suppliers, which are the largest contributors to GHG emissions. This work will be critical in helping us to reflect the impact of our suppliers' actions more accurately.

> Read more about our engagement on climate with suppliers on page 33

Reducing the carbon footprint of our packaging

One of the biggest drivers of carbon reduction comes from increasing the amount of recycled content in our packaging, and improving packaging collection rates across our markets.

We are committed to reducing our use of packaging where possible and ensuring that the equivalent of all the packaging we do use is collected, reused or recycled so that it does not end up as waste or litter.

> Read more about our packaging activities on pages 41-43

Reducing the carbon footprint of our ingredients

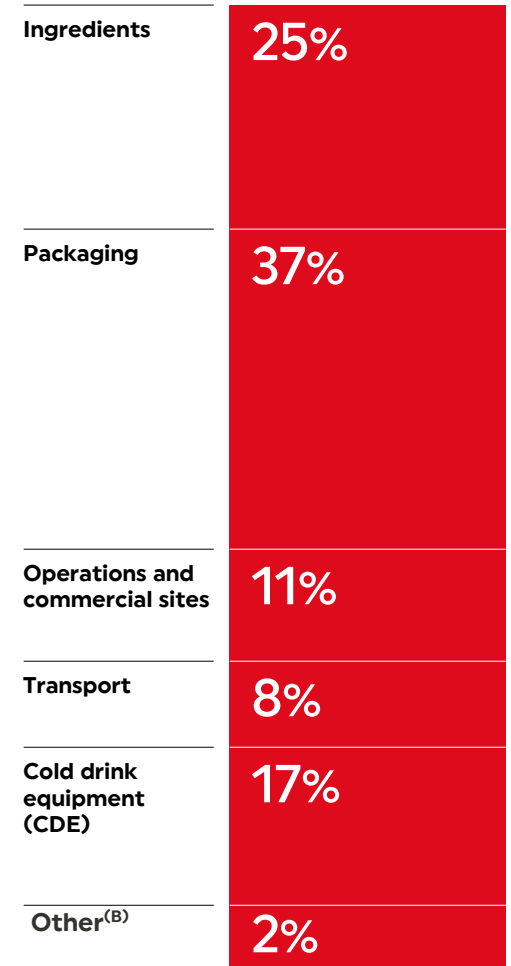

Our ingredients account for approximately 25% of our total carbon footprint, mostly from farming, processing and transportation.

We are working to collect more accurate carbon data from our suppliers and aiming for 100% compliance with our RSP, which includes the SGPs and PSA, and our expectations around carbon management.

In 2024, we will work to assess and set targets on our Forest, Land and Agriculture (FLAG) emissions, and finalise and embed a no-deforestation policy, in line with SBTi guidance.

> Read more about our engagement on ingredients with suppliers on pages 32-34

GHG emissions across our value chain (Group)^(A)

(A) Rounded to the nearest 1%. Calculated based upon the Scope 1, 2 and 3 emissions from each area. See our methodology document on cocacolaep.com/sustainability/download-centre.

(B) Other includes employee commuting, and IT and marketing spend.

Done sustainably – Our environmental impact continued

Our progress explained

Reducing the carbon footprint of our operations and commercial sites

Our operations and commercial sites account for around 11% of our total carbon footprint.

We are working to reduce GHG emissions from our production facilities by shifting to on- and off-site renewable electricity, improving energy efficiency, transitioning from fossil fuel powered equipment to electric machinery (such as boilers and manual handling equipment) and reducing our fugitive CO₂ losses.

In 2023, we invested approximately €28 million in energy, logistics and carbon reduction technologies within our operations. We estimate that this could save approximately 9,000MWh and 21,000 tonnes of CO₂e per year, potentially helping us reduce our annual electricity and natural gas costs by around €2 million per year. In Spain, we replaced an old PET bottle blower with a more energy efficient one at our production facility in Fuenmayor. In the Netherlands, we installed two new electric boilers, two heat pumps and a 4km stainless steel pipe network to help electrify our Dongen production facility.

In 2023, 14 of our production facilities were certified under the PAS 2060 standard as carbon neutral. Site certification follows significant efforts to reduce emissions, including converting forklift trucks from gas to lithium ion powered batteries, and switching lighting to lower power LEDs.

Remaining site emissions were offset using Verified Carbon Standard (VCS)-certified carbon credits.

Renewable electricity

Using renewable electricity is critical to our efforts to decarbonise the business.

As a member of the Climate Group's RE100 initiative, we are committed to using 100% renewable electricity across all of our markets by 2030. Investing in renewable electricity in API could be a major carbon reduction driver for CCEP.

In 2023, 98.9% of the electricity purchased and 97.8% of the electricity we consumed in Europe came from renewable sources^(A). This difference is due to a small amount of non-renewable electricity consumed in leased facilities where we do not directly control the electricity contracts.

In API, 33.7% of the electricity purchased and 35.8% of the electricity consumed was from renewable sources.

We continue to invest in renewable and low-carbon energy projects, including on-site and power-purchase agreements for solar, wind, combined heat and power (CHP), district heating and hydropower. For example, in 2023, we signed a three year Renewable Energy Certificate (REC) sale and purchase agreement with PT PLN in Indonesia. In 2023, 13 of our facilities sourced electricity from on-site solar, wind or hydro power, generating around 16,000 MWh of electricity.

79.1%

of the electricity purchased in 2023 was renewable

Carbon offsetting

While our focus is on decarbonising our business in line with a 1.5°C reduction pathway, we support a limited amount of carbon offsetting outside of our value chain in the short term.

We follow SBTi Net Zero guidance in this area, purchasing a limited amount of high quality carbon credits to offset GHG emissions where we cannot reduce further – for example, to offset remaining emissions for our carbon neutral production facilities.

In 2023, we retired 41,090 tCO₂e of carbon credits from the VCS-certified Katingan Mentaya Project, protecting peatland in Central Kalimantan, Indonesia. These credits were used to offset remaining emissions from our 14 carbon neutral production facilities. We plan to continue to support our carbon neutral sites in 2024, retiring carbon credits we have already purchased. Over the longer term, we will be working to directly invest in nature based solutions that remove carbon from the atmosphere.

^(A) See pages 238-239 for more information on the calculation of our renewable electricity and Scope 2 GHG emissions.

Case study Solar panels installation in Australia

In Australia, as part of our RE100 commitment to use 100% renewable electricity, we installed a rooftop solar system at our Darwin facility.

This project involved the installation of 641 solar panels, connected by over 8,000 metres of wire.

We estimate these panels will generate 420 MWh per year, covering approximately 75% of the site's electricity needs.

The site joins production facilities in Eastern Creek, Kewdale, Richlands and Salisbury that already have rooftop solar.

Image: Solar panels on the rooftop of our facility in Darwin, Australia

Done sustainably – Our environmental impact continued

Our progress explained

Reducing emissions from our own car fleet, vans and trucks

GHG emissions from our car fleet and vans account for approximately 22% of our Scope 1 emissions.

As members of the Climate Group's EV100 initiative, we are transitioning to electric vehicles (EVs) or ultra-low emission cars and vans for our own car fleet across our territories by 2030.

We offer workplace charging and make it convenient for employees to charge EVs at home and on the go.

In Europe, we increased our use of hybrid and electric cars and vans from 20% in 2022 to nearly 30% in 2023.

Reducing third party logistics emissions

Our third party distribution and transportation emissions account for approximately 7% of our Scope 3 GHG emissions.

We are reducing emissions by improving our warehouse capacity, working with suppliers to optimise the transportation of our products, and increasing our use of alternative fuels. Warehouse capacity expansions at our production facilities have reduced road miles and enabled direct to customer deliveries instead of using external warehouses.

Alternative fuels currently make up around 15% of the total kilometres driven by our third party logistics hauliers in Europe. This includes the use of HVO11, CNG, bioCNG and LNG. In Belgium, Luxembourg, Spain and Sweden we are delivering our

beverages to local customers using electric trucks.

By working with our suppliers, we have also cut the distance our ingredients and raw materials travel to reach our production facilities. Many of our own sites are located next to our can suppliers, eliminating the need to transport empty cans. Some of our production facilities, such as Grigny in France and Halle in Germany, manufacture their own PET bottle pre-forms. We also run front- and back-hauling programmes with customers and suppliers across Europe, which ensures that trucks never drive empty.

In 2023, we built a new €8 million warehouse at our production facility in Azeitão, Portugal, and opened an external warehouse in the Jordbro industrial area of Sweden. Increasing our storage capacity and improving our warehousing enables us to minimise our truck movements, lower costs and reduce our CO₂ footprint, while making our operations more flexible and efficient.

In 2023, in Spain, we joined Lean & Green, an initiative of the Association of Companies of Manufacturers and Distributors (AECOC), to reduce emissions associated with the transport and logistics sector. We are committed to implementing a comprehensive action plan to identify opportunities for improvement and implementing sustainable solutions working closely with our suppliers and logistics partners.

Reducing our emissions from cold drink equipment (CDE)

GHG emissions from our CDE account for 17% of our total carbon footprint.

In 2023, we reduced the energy use of our CDE equipment per unit across our markets by 4.2% versus 2022^(A). Our efforts to replace old and obsolete equipment also led to a reduction of 5.2% in the size of our CDE fleet and a 9.2% decrease in total energy consumption versus 2022. This helped drive a reduction of GHG emissions of 10.3% CO₂e from our CDE equipment in 2023.

All new coolers purchased in 2023 were hydrofluorocarbon (HFC)-free, meaning approximately 55% of our cooler fleet across our territories is now HFC-free. When we dispose of old equipment, we take full responsibility for its recycling and safe disposal.

In 2023, TCCC issued global cooler energy consumption guidance and targets for all bottlers to reduce GHG emissions related to our cooler fleet. Working with our suppliers we are further refining our portfolio to meet the guidance provided.

In API, our CDE can be one of our largest emissions sources, due to the use of fossil fuels in national electricity grids across these markets. In addition to working to improve the energy efficiency of our fleet across API, we strongly support the continued shift to renewable electricity across our

markets, which will help reduce emissions across our value chain.

Working with customers

We support our customers to reduce their own GHG emissions. For example in Great Britain, we continue to drive our Net Zero Pubs, Bars and Restaurants initiative in partnership with Pernod Ricard and Net Zero Now. The Net Zero Now online platform helps businesses reach Net Zero by providing tools to calculate, reduce and compensate for their GHG emissions. Certified businesses can communicate their Net Zero status to their stakeholders.

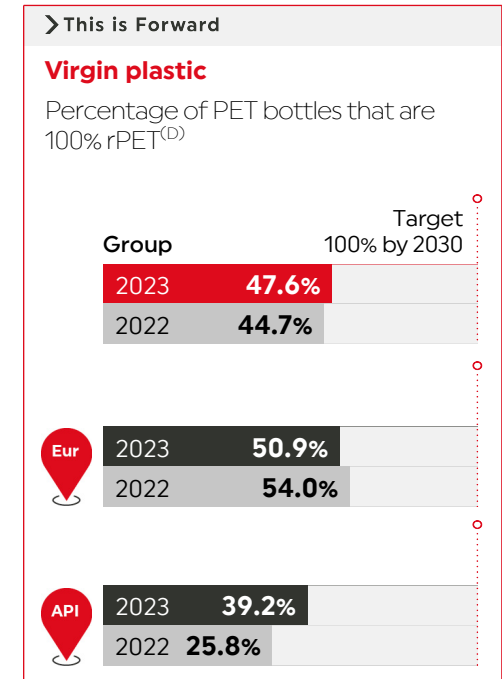

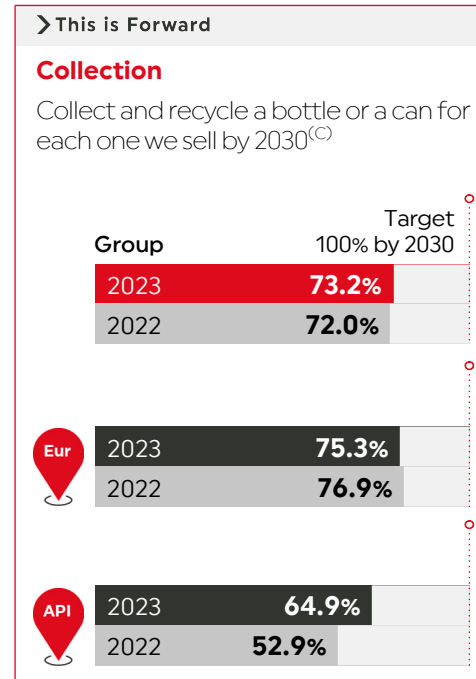

We also support the ECODES Foundation Community's HOSTELERIA #PorElClima platform to reduce the carbon footprint of Spain's hospitality sector. The platform provides tips and tools to reduce environmental impact and promotes the sector's commitment to sustainability.

(A) Calculated based upon average energy efficiency ratings of CDE equipment installed.

Done sustainably – Our environmental impact continued

Performance and progress against our This is Forward commitments

Forward on packaging

The plan for the year ahead

In 2024, we will continue to take action to drive down the footprint of our packaging as part of our journey to eliminate waste and reduce GHG emissions.

We'll do this through the key pillars of our packaging strategy: removing unnecessary packaging, innovating in refillable and dispensed solutions, working towards 100% collection so that packaging materials can be recycled or reused, and increasing the amount of recycled material we use in our packaging.

We'll continue to work closely with our Sustainable Packaging Office (SPO), which streamlines all the technical and exploratory sustainable packaging work across our territories, accelerates our innovation and supports progress towards our goals.

(A) Complete data for Group and API not available for 2022 reporting.
 (B) Percentage based on one way PET bottle sales (tonnes). This excludes labels and caps.
 (C) We have restated prior year 2022 national packaging collection rate in line with new EU methodology for calculating packaging collection rates.
 (D) Percentage based on one way PET bottle sales (individual consumer units).

Done sustainably – Our environmental impact continued

Our progress explained

Packaging life cycle

Through the use of life cycle analysis, we can assess the carbon footprint of our packaging, allowing us to make informed decisions and helping us prioritise our efforts to reduce the GHG emissions of our packaging.

Many factors can help to reduce the carbon footprint of our packaging, including higher collection rates, using more recycled content in our packaging, or changing from one packaging type to another.

> Read more about our climate activities on pages 37-40

Future pack mix

In 2023, we held workshops across our territories to assess the product carbon footprint of specific pack types within our current and future portfolio. This work informs a future pack mix strategy that is aligned with both our sustainability objectives to reduce GHG emissions and our long-term business strategy.

We recognise the important role that public policy has to play in developing a circular economy and we take into account upcoming legislation, which in selected markets or sub-channels will require us to reduce the use of single use plastic or introduce reusable packaging.

Refillable and reusable

Redesigning how to bring products to people in new ways will help us to become more resource efficient and is part of the solution to eliminating plastic pollution and reducing GHG emissions.

By 2030, TCCC aims to have at least 25% of its global volume sold in refillable glass or plastic bottles, or in reusable containers through Coca-Cola Freestyle or traditional fountain dispensers.

We are working to increase the share of reusable packaging in our portfolio and are conducting a deeper analysis across our business to ensure we can monitor and report our progress. For example, in France, we have developed a partnership with Carrefour which deployed a deposit system for refillable glass bottles in 150 of its Carrefour city stores across Paris.

47.6%
of the PET bottles we put on the market are 100% rPET

Dispensing delivery solutions

Dispensing systems allow consumers to enjoy our drinks more sustainably with less packaging and in reusable and recyclable cups or bottles. We continue to innovate our dispensed product offering and work with partners to develop new digitally advanced smart dispensing equipment.

We are engaging with customers and consumers to encourage more sustainable choices, such as switching from single use to reusable drinking vessels. For example, in France, Spain and Sweden we partner with Burger King to test dine-in reusable cups.

Across our markets, we are testing consumer behaviour to better understand the potential of dispensers and reusable cups to reduce waste and GHG emissions. In 2023, 6.9% of our volume was enjoyed via dispensed solutions (8.5% in Europe and 10.8% in API).

Lightweighting

Initiatives to reduce the weight of our packaging are critical to reducing packaging GHG emissions. We have a long-standing programme to reduce the weight of our packaging and optimise the materials we use. One key area of focus in 2023 was shifting from steel to aluminium cans in Europe, as aluminium is lighter than steel. By replacing around 360 million steel cans with aluminium cans we eliminated approximately 9,000 tonnes of CO₂e in 2023. In API, we only use aluminium cans.

Case study Expanding our RGB portfolio

In Germany we are boosting the availability of at-home refillable drinks options by expanding our returnable glass bottle (RGB) portfolio, switching to a universal bottle.

In 2023, we introduced 1L RGB for our Fanta, Sprite, Mezzo Mix, Vio Bio Limo and Fuze Tea brands.

We actively promoted refillable packaging through a consumer campaign creating awareness on our PET refillable portfolio.

Over the last five years, we have significantly invested in reusable bottles, including two new refillable glass bottling lines and new reusable crates.

Image: CCEP employees at our production facility in Lüneburg, Germany, where our 1L RGB Coca-Cola bottles are being produced

> Find out more at cococolaep.com/annual-report/case-study/refillables

Done sustainably – Our environmental impact continued

Our progress explained

100% recyclable

Recyclability is the first principle of the circular economy. For packaging to retain its value and for the material to be recycled, it must first be collected and be compatible with recycling infrastructure in practice and at scale.

We want to ensure our packaging is not just technically recyclable, but easy and feasible for consumers to recycle. For example, in Australia, after nearly 60 years, we replaced Sprite's iconic green PET bottles with clear plastic, making it easier to recycle them into new bottles locally.

Although we are focusing on making our primary packaging recyclable, we ultimately want to ensure all the materials we use are recyclable, preferably in a closed loop system. To achieve this, we are taking steps to make our secondary packaging, such as labels and the shrink wrap we use for multi packs, recyclable as well.

Recycled and renewable materials

Using recycled material in our bottles and cans keeps valuable resources in the circular economy and helps us move away from the use of new materials including virgin fossil based plastic.

We aim to achieve this by using recycled aluminium in our cans and recycled PET (rPET), PET from renewable sources or PET obtained through enhanced recycling. This is a core part of our strategy to demonstrate that PET beverage bottles can be fully circular.

Case study

Infinite recycling with CuRe Technology

In support of our ambition to eliminate oil-based virgin plastic from our bottles, through CCEP Ventures, we are investing in CuRe Technology.

The technology uses polyester rejuvenation to target plastics that cannot be recycled by mechanical recycling methods and prevents them from being incinerated or downcycled, or sent to landfill.

The low energy recycling process creates high quality rPET with a carbon footprint that is around 65% lower than virgin PET^(A). We intend to start using CuRe Technology's rPET in Europe from 2025, following the development of a new production facility.

(A) Based on CuRe's life cycle assessment, carbon footprint reductions compared to virgin: 2022 figure.

Image: rPET granulate

Find out more at cocacolaep.com/annual-report/case-study/recyclingtech

In 2023, through CCEP Ventures, we announced a new partnership with universities in Spain and the Netherlands to explore how captured CO₂ can be turned into useful products like packaging materials which are recyclable and thus contribute to a circular future.

We are working with suppliers to increase the recycled content in all packaging types, including secondary and tertiary packaging.

Packaging collection and infrastructure

Packaging collection for recycling once it has been used is critical to creating a low-carbon, fully circular economy and keeping plastic out of the environment. That is why we are supporting the creation of collection solutions across our markets, working with national and local governments and stakeholders.

For example, in Australia, together with Pact Group, Cleanaway Waste Management and Asahi Beverages, we invested in two state of the art PET recycling facilities: Albury–Wodonga facility in New South Wales opened in 2022 and Altona North facility in Victoria opened in 2023. Together, the two sites will have the capacity to recycle the equivalent of two billion 600ml PET bottles per year^(B).

Enhancing collection and recycling infrastructure is often complex, and collection solutions vary depending on the socioeconomic and legislative context in each market. They include

extended producer responsibility and beverage packaging return schemes which are driven by legislation, and voluntary schemes which support direct investment in local collection.

In markets where collection infrastructure is well developed, like Europe, Australia and New Zealand, we support industry led, well designed, beverage packaging return schemes, unless a proven alternative exists. In less developed markets, such as Indonesia, the Pacific Islands and Papua New Guinea, we are committed to proactive voluntary action, directly funding collection solutions to promote circular economy outcomes. For example, in Fiji, we launched the Mission Pacific recycling programme, which rewards customers when they redeem their bottles at a designated collection point.

The power of our brands and our people

We continue to use the power of our brands to encourage consumers to recycle our packaging via on pack messages.

We also support a wide range of anti-litter and clean up initiatives through local community partnerships and employee volunteering. As well as removing and preventing litter, these activities influence consumer behaviour and raise awareness about littering and recycling.

(B) Excluding caps and labels.

Find out more in our communities on page 26

Launching 100% rPET in Indonesia

Faster on recycling

In a first for Indonesia, we have launched bottles made from 100% rPET plastic^(A) for our Coca-Cola trademark brands, Fanta, Sprite in 390ml, and Sprite Waterlymon in 425ml. The material comes from our Amandina PET recycling plant and is collected via the Mahija Parahita Nusantara foundation's network of collection centres. This is a step towards a closed loop circular economy in the country and CCEP's goal of using 50% recycled plastic in its PET bottles by 2025 in API.

(A) This excludes the cap and label.

Watch: Joe Franses, VP Sustainability, on tackling plastic waste.

Done sustainably – Our environmental impact

Performance and progress against our This is Forward commitments

Forward on water

~€5m

We invested approximately €5 million in water efficiency and wastewater treatment technology in our operations in 2023

36

In 2023, together with TCCC and TCCF, we supported 27 water replenishment projects in Europe and 9 in API

64

out of 66 of our NARTD production facilities are certified under the ISO 14001 environment management standard^(F)

> This is Forward

Water efficiency

10% water use ratio^(A) reduction by 2030, versus 2019

The plan for the year ahead

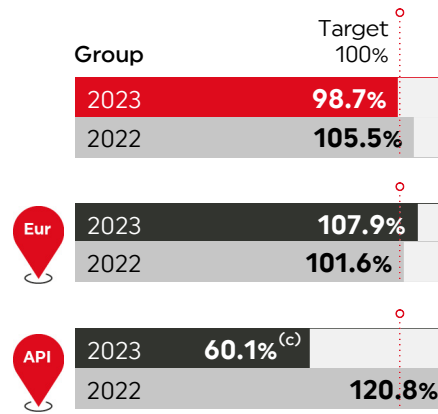

Water is critical to nature, our communities and our business. It is the main ingredient in our products, essential to our manufacturing processes, and is critical to ensuring a sustainable supply of the agricultural ingredients we depend upon.

In 2024, we will update our Facility Water Vulnerability Assessments (FAWVAs) across our production facilities to assess our local watershed based risks and vulnerabilities.

> This is Forward

Water replenishment

Replenish 100% of the water we use in our beverages^(B)

Through CCEP Ventures, our investment platform for sustainability initiatives, we will continue to review and invest in emerging technologies that will help us to improve water efficiency at our sites.

We also plan to implement seven new water replenishment projects across our markets in 2024.

> This is Forward

Regenerative water use^(D)

100% regenerative water use in leadership locations^(E) by 2030

(A) Water use ratio: litres of water per litre of finished product produced.
 (B) Based on the volume of water replenished through replenishment projects versus the sales volume of our ready to drink litres of finished beverages.
 (C) Reduction in replenishment volume versus prior year is due to one of our largest projects in Australia coming to an end (Project Catalyst) in 2023.
 (D) New target. Complete data not available for 2022 and 2023 reporting.
 (E) NARTD production facilities which rely on vulnerable water sources or have high water dependency. We have nine leadership locations in Europe and four in API.
 (F) All outstanding production facilities are located in Papua New Guinea where we are actively working towards certification.

Done sustainably – Our environmental impact

Our progress explained

Assessing water risk

Water-related risks continue to increase globally as the health of many watersheds continues to deteriorate. We map our water risks using a series of risk assessments, in line with TCCC.

All our production facilities have their baseline water risk assessed through a global Enterprise Water Risk Assessment (EWRA) using the World Resources Institute's (WRI) Aqueduct 3.0 tool. 21 of our 42 NARTD production facilities in Europe, and three out of 24 NARTD production facilities in API are located in areas of high baseline water stress.

In 2023, 8,067 million m³ (7,405 million m³ in Europe, and 662 million m³ in API) of our production volumes were sourced from areas of baseline water stress. This represented 49.8% of our total production volumes, (56.5% of our production volumes in Europe and 21.5% in API).

We also complete FAWVAs every three years, assessing further physical, regulatory and social risks at a production facility level. We will be updating this assessment across all of our NARTD production facilities in 2024.

We also assess potential risks in water quality and future availability to our business, the local community and the wider ecosystem through source water vulnerability assessments (SVAs), which we aim to complete every five years.

Sites address these risks through facility water management plans (WMPs). These are used to manage site targets, enhance climate resilience, and enable data sharing and reporting. In 2023, all our NARTD production facilities had SVAs and WMPs in place.

Setting context based targets

We use the insights from these risk assessments to categorise our sites, and set water efficiency and replenishment targets that are appropriate for the context of the watershed our sites operate in.

We categorise our sites as follows:

Leadership locations: Sites which rely on vulnerable water sources or have a high level of water dependency. These sites have the highest water use reduction targets, and must achieve 100% regenerative water use by 2030.

Advanced efficiency: Sites which operate in a water stressed context, and will be focused on achieving advanced water efficiency, and best in class water reduction targets.

Contributing locations: Sites which operate in the lowest water risk areas, and have water use ratio targets which meet industry benchmark standards.

Improving water efficiency

We work to improve our water efficiency across our operations, and measure progress through our WUR (the amount of water needed to produce a litre of product). We aim to reduce our total

water use ratio by 10% by 2030 (versus 2019). This target is an aggregate of the context based targets set at each production facility.

In 2023, we invested approximately €1 million in water efficiency technology and processes and €4 million in wastewater treatment technology in our sites. For example, in 2023, at our production facility in Barcelona, Spain, we optimised the water treatment process, saving approximately 15,000m³ per year.

We estimate that our 2023 investment in water efficiency projects could result in savings of approximately 145,000 m³ per year and will help us avoid annual water and wastewater treatment costs of approximately €300,000 per year.

Returning wastewater to the environment

We aim to safely return 100% of our wastewater to nature. Before wastewater is discharged from our production facilities, we apply high treatment standards which meet local regulations and TCCC's Operating Requirements (KORE).

In 2023, we discharged 9.1 million m³ of wastewater. Most of our production facilities pre-treat wastewater on site and send it to municipal wastewater treatment plants. 26 of our 66 NARTD production sites (17 in Europe, 9 in API) have on-site wastewater treatment plants.

Case study **Alliance for Water Stewardship**

In 2024, we became a member of the Alliance for Water Stewardship (AWS) to enhance our water stewardship performance across our sites and to ensure our continued contribution to the global water stewardship community.

Our joining follows several years of AWS site certification, recognising and rewarding good water stewardship performance. In 2023, our sites in Chaudfontaine, Belgium and Dongen, the Netherlands, which currently hold AWS platinum certification, began the process to re-certify their sites to the AWS standard in 2024. In addition, in 2024, our sites in Antwerp and Gent, Belgium, were also AWS platinum certified.

Image: Water replenishment project De Liskes near our production facility in Dongen, the Netherlands

Done sustainably – Our environmental impact

Our progress explained

Regenerative water use

At our leadership locations, where we face the highest water risk, we aim to not only achieve best in class water efficiency, but also reach 100% regenerative water use by 2030.

Sites achieve this through replenishment programmes within the minor river basin of the site and through beneficial use of their wastewater.

Across our 13 leadership locations, we withdrew 9.5 million m³ of water, and discharged 3.2 million m³ of wastewater in 2023.

Water replenishment

We aim to replenish 100% of the water we use in our beverages through a portfolio of projects in priority locations across our operations and our watersheds and within our communities.

These replenishment projects are managed in partnership with local NGOs and community groups and are funded together with TCCC and TCCF.

We focus our replenishment efforts on three priorities:

- **Operations:** Projects in our leadership locations which will contribute towards our 100% regenerative water use target.
- **Communities:** Investment in climate resilient water, sanitation and hygiene (WASH) projects in our priority communities.

- **Watersheds:** Water stewardship projects in our priority sourcing regions.

In 2023, together with TCCC and TCCF we supported 27 water replenishment projects across Europe, and 9 in API, replenishing 18.3 million m³ of water across our territories, including 16.2 million m³ in Europe, and 2.1 million m³ in API. This represents 98.7% of our total sales volume (107.9% in Europe, and 60.1% in API). This drop in replenishment volumes versus prior year is due to one of our largest projects in Australia, Project Catalyst, coming to an end.

In 2023, together with TCCF, we began a major replenishment project on the Canal des Moères located in the eastern part of Dunkirk, France, near one of our leadership locations. The project aims to restore surface water resources in a territory that suffers from recurring drought.

In the Netherlands, we are working with TCCC and Natuurmonumenten to safeguard future water supply and improve groundwater levels in the De Plateaux nature reserve. The project aims to secure the water supply to the area over the coming decade.

Collective action on water

As part of our commitment to responsible water stewardship, together with TCCC, we participated in the UN Water Conference in 2023 and joined 50 other companies in endorsing the CEO Water Mandates' Water Resilience Coalition Open Call to Accelerate Water Action. The aim of this is to achieve positive water impact in 100 vulnerable water basins globally by 2030.

We also became a member of the Alliance for Water Stewardship, and participated in World Water Week in Stockholm.

Aligning to the Science Based Targets Network

In 2023, in partnership with TCCC and Coca-Cola Hellenic Bottling Company, we assessed our nature-related impacts by completing Steps 1 and 2 of the Science Based Targets Network (SBTN) framework.

The goal of the SBTN is to foster corporate action to tackle biodiversity decline and nature loss, and ensure its full recovery by 2050.

In Steps 1 and 2, we began to identify our most significant impacts on nature, and where they occur along our value chain.

In 2024, we aim to carry out Step 3 of the methodology – measure, set and disclose targets to address our impact on nature and biodiversity.

Case study Regenerative water for agricultural use

In 2023, at our leadership location in Tenerife, Spain, together with TCCC, we kicked off a project to regenerate urban wastewater for agricultural use.

The project is located near the Anaga Rural Park, an area of natural beauty in the northern tip of Tenerife. It focuses on reusing treated wastewater for agricultural irrigation and the irrigation of public parks and gardens from the Punta de Hidalgo wastewater treatment plant.

This project is making water available for productive use in a region that continues to suffer from water scarcity. It is estimated that over 30,000m³ was replenished in 2023.

Image: Punta de Hidalgo wastewater treatment plant

Taking action on sustainability

Task Force on Climate-related Financial Disclosures (TCFD)

We acknowledge CCEP's role in addressing climate change, and are committed to decarbonising our business in line with climate science, and being transparent about the impacts, risks and opportunities that climate change poses to our business.

Our climate disclosures are based upon the four pillars and 11 recommendations of the TCFD's guidance. We consider our disclosure to be consistent with the TCFD recommendations and recommended disclosures.

In 2023, we evolved our scenario modelling as follows:

- Risks and opportunities were modelled across three potential emission pathways: > 4°C, +2.5°C and +1.5°C.
- Scenarios have been modelled on a gross-risk basis, assuming no mitigating actions, or progress on our This is Forward targets, such as our GHG emissions reduction targets^(A). Mitigation actions and related investments for physical and transition risks are listed on pages 57-58.
- Analysis has been completed over the short (five years), medium (2030) and long term (2040).
- Physical and transition risks have been disclosed quantitatively over the short term, and qualitatively over the medium and long term term.
- This work should not be viewed as a forecast, and will evolve in the coming years as we refine these scenarios.

Governance

Board-level governance

In alignment with the TCFD recommendations, our Board oversees climate risk and opportunities. The Board is supported in its oversight by its Committees, notably the ESG and Audit Committees, as outlined in our TCFD governance framework.

There is close collaboration across these Committees due to the role that both have in our ESG reporting, disclosure and assurance processes. A joint meeting of these Committees was held to discuss these matters, including this TCFD disclosure.

The Board oversees and assesses CCEP's Group wide strategy, including climate-related considerations, ensuring alignment with emerging regulatory mandates and market trends. It also approves significant financial commitments and plans to reduce GHG emissions.

Climate-related issues are considered as part of Board decision making. In 2023, we aligned our carbon reduction roadmaps with our business planning and Capex investment routines (see page 38), sustainability metrics were presented with asset management requests to the Audit Committee. The Remuneration Committee reviewed performance against CCEP's GHG emissions reduction targets to inform vesting outcomes for the Long-Term Incentive Plan (LTIP).

The Board also receives training and deep dives on climate-related issues. In 2023, this included a session on

sustainable packaging and the circular economy. An annual Board session focused solely on risk is held each December, and includes a review of climate-related risks, as well as other ESG-related risks.

Management supports the Board Committees throughout the year. For example, in 2023, the ESG Committee, following guidance from CCEP's leadership, recommended to the Board that we update our water strategy to include a Group water use efficiency target.

Management-level governance

Ownership and governance for sustainability-related risks and opportunities, and driving progress against our commitments, is embedded throughout our business. Risk management is a key responsibility for all senior leadership, who are assigned ownership of specific risks, including climate-related risks. Risks are evaluated regularly as part of our enterprise risk management process (see pages 68-69).

Key leadership and management with responsibility for climate-related issues, are outlined in the TCFD governance framework. The main discussion forum for the Executive Leadership Team (ELT) on climate matters is the Sustainability Steering Committee (SSC). Multiple cross functional working groups are focused on developing the strategy and delivering against our This is Forward targets. Working groups, led by key management, meet regularly, and will bring items for information, review and decision making to the SSC,

and to the Board Committees as required. In 2023, the SSC reviewed CCEP's carbon reduction roadmap, including progress against our 2030 trajectory, and agreed actions to address gaps. This work, combined with scenario risk modelling of our physical and transition risks, will support the development of CCEP's climate transition plan as it is developed in 2024. The SSC will continue to review development of our climate transition plan against relevant guidance like the UK's Transition Plan Taskforce (TPT).

➤ See our TCFD governance framework on page 50

Stakeholder engagement

We engage regularly with a wide range of stakeholders on ESG matters. Our stakeholders have high expectations of us to address many environmental and social issues. Our stakeholders are integral to every phase of our value chain, from the suppliers which provide raw materials to the communities where we operate, and the people involved in producing and selling our products. Their insights into our most material issues and impacts are crucial, and were integral to the development of our This is Forward sustainability action plan.

We advocate for climate-related issues, supporting governmental policies and private sector initiatives that support rapid and sustained decreases in GHG emissions. In 2023, we joined over 200 companies in signing the We Mean Business Coalition's Fossil to Clean letter advocating for a phase out of fossil fuels.

➤ Read more about our stakeholders on pages 61-64

Case study Engaging with local stakeholders

We are committed to ongoing engagement with our stakeholders.

In 2023, we hosted 6 Real Talk sessions in Europe and API, engaging with industry, NGOs, and government, in partnership with TCCC.

These dialogues, which are focused on building understanding between CCEP and key stakeholders on critical topics, including packaging or GHG emissions reduction, are crucial for building shared understanding.

Strategy

Climate change poses short-, medium- and long-term risks to our business. This includes physical risks that could disrupt our operations and supply chain through extreme weather events, such as floods and droughts. Transition risks, such as shifts in consumer preferences and increased regulations to address climate change, could be faced by our business.

In accordance with the TCFD recommendations, we have integrated science based climate scenario modelling with internal and insurance data to build a comprehensive regional climate analysis. This methodology enhances our decision making capabilities and understanding of potential climate vulnerabilities within our operations and value chain, fostering climate resilience across the organisation.

Our business and financial planning do not depend on a single emission pathway. Instead, our scenario analysis informs management's understanding of potential risks and opportunities, serving as a tool for informed deliberation rather than as definitive predictions of future events or outcomes.

Since 2022, we have partnered with Risilience, a specialised climate analytics company which uses technology pioneered by the Centre for Risk Studies at the University of Cambridge Judge Business School, to co-develop a digital twin platform, enabling the modelling of both physical and transition risks across our value

chain over a 20-30 year horizon, aligned with five global warming scenarios (including >4°C, +2.5°C and +1.5°C), using shared socioeconomic pathways (SSPs).

We also worked with external physical climate specialists Marsh Advisory to establish how climate change could impact the frequency and severity of climate-related weather events on our manufacturing and operations, under RCP 2.6 and 8.5 scenarios (~1.6°C and ~4.3°C respectively). This covers all major climate-induced threats (coastal inundation, river flooding, surface water flooding, extreme heat, extreme wind, wildfire and others) through 2100. In 2023, we worked with Marsh, using the Risilience platform, to complete a pilot assessment of the risk of reduced production yields from sugar beet for our supply in Great Britain, due to chronic climate change impacts, such as drought and changing weather patterns. We are reviewing the potential to scale this assessment across our business in the future.

Our work with Risilience and Marsh quantifies our exposure and potential financial impacts from climate change events across various emission pathways. We are also enhancing our risk management framework, incorporating AI-powered risk sensing techniques to identify and address emerging risks, including those associated with climate change.

We work in close collaboration with TCCC to assess climate-related risks and opportunities, driving innovation as a system to meet consumer demands for sustainable products and address climate change. The knowledge gained from these initiatives helps to inform our strategic business planning and investment decisions, and supports the delivery of our climate targets.

Business planning

We integrate climate-related considerations into our business strategy, planning, and risk management processes. The knowledge gained from our climate risk analysis helps inform our strategic business planning and investment decisions and supports the delivery of our climate targets. We have assessed the impact of climate change on multiple aspects of our business and financial planning, including on our supply chain and value chain, our products, operations, investment in research and development, for example through CCEP Ventures, and investment within our operations. As we continue to evolve our climate scenario analysis, we aim to expand climate risk assessments across all areas recommended within the TCFD Annex.

We are committed to mitigating climate-related risks through the delivery of our This is Forward sustainability targets. This includes our short-term target to reduce our absolute GHG emissions by 30% by 2030 (versus 2019), and our long-term target to reach Net Zero by 2040.

Both targets were approved in 2023 by the SBTi as being in line with climate science. We use a range of sustainability performance indicators to monitor our progress against our This is Forward targets, including KPIs tracking our GHG emissions, water use ratio and packaging data. Tracking progress against these KPIs also allows us to identify gaps and opportunities for improvement.

Climate Transition Plan Development

We have begun to develop a climate transition plan, to support the delivery of our short- and long-term climate targets and to address identified risks and opportunities. This includes the development of a carbon reduction roadmap, which outlines a potential reduction trajectory through 2030 and 2040, aligned with our long-term commercial plans and growth trajectories, and includes key decarbonisation initiatives by country, value chain area and reduction initiative.

Modelling has been outlined on an annual basis through 2030, with longer-term initiatives (2030-2040) also included. Estimated funding for Capex and Opex initiatives has been included, and we have aligned how we prioritise energy, water and GHG emissions saving projects with our Capex planning processes. In 2023, we also continued to pilot the use of an internal carbon price of €100/tCO₂e to inform and influence our strategic business decisions, such as Capex investment in sustainability initiatives.

Taking action on sustainability continued

Task Force on Climate-related Financial Disclosures (TCFD) continued

We also used our carbon roadmap to embed a carbon projection into our 2023-2025 long-range planning and 2023 business plan. This has helped us improve the connection between our commercial and carbon forecasts at Group and country levels.

In 2024, we will build upon the work completed so far, to develop a full climate transition plan. We are reviewing frameworks as they are introduced, e.g. UK TPT Disclosure Framework, and will aim to align our climate transition plan disclosures as relevant.

Investment

Through this work, we allocated over €300 million between 2020-2022 to support the ongoing decarbonisation of our operations and value chain, and have an investment plan of approximately €450 million for emissions reduction initiatives between 2023-2025. This includes continued investment in rPET which has a significant carbon reduction impact, as well as other carbon, energy and logistics saving initiatives.

Through these investments, we are working to mitigate the physical and transition risks we face, and realise opportunities coming from cost, energy and carbon savings. In 2023, we invested approximately €28 million in energy, logistics and carbon saving technologies, and expect that this could result in an annual energy and GHG emissions saving of approximately 9,000 MWh and 21,000 tCO₂e, potentially helping us reduce our

annual electricity and natural gas costs by around €2 million per year. Investment in energy and water savings projects also helps mitigate physical risks, such as drought, on a production site level. In 2023, we continued to invest in water saving projects at our sites in areas of high baseline water stress. For example, we updated our water treatment systems in Grigny, France, invested in the recovery of rinse water in La Coruña, Spain, and optimised the water treatment process in Barcelona, Spain. Our 2023 investment of approximately €5 million in water initiatives could save approximately 145,000m³ per year.

Identifying our transition risks through scenario analysis strengthens our resilience and helps to identify potential opportunities from the global transition to a low-carbon economy. This scenario analysis identified our greatest policy, market and reputation risks and opportunities as coming from packaging. Through our SPO, we continue to monitor risks and opportunities linked to various packaging models and regulations, including strategies to maximise return on investments and improve our strategy's resilience through a diverse packaging portfolio.

Our continued investment in recycled materials such as rPET provides CCEP with a significant opportunity to increase our use of recycled material and reduce our use of virgin PET. Our investment in rPET enabled us to reach our >50% rPET target four years early in Europe, and reduced GHG emissions in

2023 by approximately 115,000 tCO₂e^(A). rPET also provides CCEP with a significant opportunity to increase our recycled content level in specific countries, to mitigate potential taxes, and could help protect us against potential new taxation, marketing restrictions and bans on single use plastic bottles which do not contain recycled plastic.

Our investment in rPET and our target to eliminate the use of oil-based virgin plastic in our bottles by 2030, could also support an opportunity to provide lower carbon and lower waste options to consumers, a transition scenario outlined within our analysis. In 2023, we took a significant step forward by launching 100% rPET bottles,^(B) across Indonesia. In 2023, 47.6% of the PET bottles we sold were manufactured from 100% rPET,^(B) with Europe contributing 50.9% and API 39.2%.

Rapid decarbonisation will also require continued engagement on policy and regulatory shifts across our markets. In particular, regulatory shifts that support an expansion of renewable electricity capacity, shifts to a circular economy and rapid phase out of fossil fuels have been identified as opportunities, and we have supported these shifts as part of our public policy work in 2023.

Business resilience

We have reviewed the potential impacts of warming scenarios (>4°C, +2.5°C and +1.5°C) and are confident that we have an agile and resilient business strategy. Through this analysis, and careful planning in our supply chain,

commercial and procurement functions, we believe we have a considerable measure of resilience to climate change. We have assessed climate risk within our financial statements and have come to the conclusion that climate risk does not materially impact the valuation of our assets or liabilities.

Impairment testing of our intangible assets was completed over a five year time horizon, and we assessed that there was no material change from climate risk over this time horizon. We have also assessed the impact of climate change on the useful economic life of our property, plant and equipment, and no change was required based upon this analysis. See pages 56-57 for more information. Based upon these assessments, we anticipate that the impacts of climate change will not materially affect our going concern basis of preparation or the Group's viability over the ensuing three years, as reflected in our viability statement on page 79.

We will build upon this work in 2024, combined with continuing climate scenario modelling of physical and transition risks, to assess the resilience of our carbon reduction strategy and identify key opportunities to mitigate identified risks to our business.

 See our **Viability statement** on page 79

Task Force on Climate-related Financial Disclosures (TCFD) continued

Carbon reduction roadmap

We are working to build a climate transition plan to support the delivery of our short- and long-term GHG emissions reduction targets. In 2023, we built a carbon roadmap aligned to our business planning processes, to support our decarbonisation through 2030. In 2024, we will build upon this work, using continued climate scenario modelling of physical and transition risks, to assess the resilience of our strategy, identify opportunities to mitigate climate-related risks and ensure we have allocated the finance and resources to deliver our objectives.

Key actions and anticipated time horizons

Ingredients	● SKU rationalisation ● Reducing sugar across portfolio ● Sustainable agriculture
Packaging	● Accelerate rPET and rAluminium ● Lightweighting ● Increasing recycled content ● Increasing packaging collection ● Packaging mix shifts ● Future packaging solutions
Manufacturing	● Fugitive CO ₂ reduction ● Electric forklifts ● Increasing renewable electricity ● Reduction of fossil fuels ● Increasing renewable energy
Transport	● Alternative fuel use ● Network and route optimisation ● Electric vehicles ● Increased use of trains ● Increased vehicle efficiency ● Fleet / Third party logistics efficiency
CDE	● HFC free ● Replace OFUs ● Replace old equipment with energy efficient equipment ● Grid decarbonisation
Suppliers and partners	Supplier engagement including: – 100% of our carbon strategic suppliers to set science based targets by 2023 (Europe) and 2025 (API) – 100% renewable electricity by 2025 (Europe) and 2030 (API) Through CCEP Ventures, we are committed to seeking out and funding solutions designed to drive innovation and sustainability progress in line with CCEP's Net Zero 2040 ambition.
Advocacy and memberships	We are committed to fostering collaborative efforts within our industry, actively engaging with peer companies, industry associations and government bodies. To facilitate a rapid, fair transition to a low-carbon economy, we are engaging with key stakeholders to accelerate the following: – Fossil fuel phase out – Rapid shift to a circular economy – Renewable electricity across all markets

Notes. CDE = Cold drink equipment, also referred to as "coolers"; Fugitive CO₂ reduction refers to the loss of CO₂ as an ingredient that occurs when we cap our products. HFC = Hydrofluorocarbon. OFUs = Open fronted units (most have been retrofitted with doors), to be replaced with more energy efficient equipment.

Taking action on sustainability continued

Task Force on Climate-related Financial Disclosures (TCFD) continued

Risk management

Climate-related risks have been identified as a principal risk category for CCEP for many years, with a growing probability of affecting our existing business model, necessitating proactive mitigation strategies. Our risk management framework includes climate risks, as detailed on page 73. The Principal risks section of this report on pages 68-78 further outlines the various types of loss impacts and the potential influence of climate risks on our strategic objectives.

Climate risk is a principal strategic priority, linked to our This is Forward sustainability action plan. We assess and identify climate risks across business, functional and project levels, following our enterprise risk management process with local compliance reviews and annual enterprise risk assessments. We also review opportunities as part of our risk framework, and as part of our normal management routines.

Our approach drives progress towards meeting our GHG emission reduction targets and helps manage impacts from physical, transition and regulatory climate risks. Our commitment to this comprehensive risk management strategy underscores our dedication to long-term resilience and sustainability.

Our approach to climate scenario analysis

Partnering with Risilience, we developed a digital twin model for scenario analysis, blending CCEP's financial, operational, supply chain, product and environmental data. We modelled scenarios under different climate emission pathways. These pathways were defined by assumptions about policy change, energy outlooks, technological innovation and global temperature change, underpinned by Shared Socioeconomic Pathways (SSPs) widely used by the IPCC.

This physical climate materiality assessment is an important step to inform CCEP's climate resilience planning. Higher risk sites could be provided with operational adaptation plans and risk engineering improvements to mitigate against damage and business interruption.

 **See the emissions pathways and risks assessed** on page 55

Assessing physical and transition risks and opportunities

We evaluated physical and transition risks and opportunities over the short- (five years), medium- (2030) and long-term (2040 and beyond). This is in line with a slight extension of our business planning timeframes, and our short-(2030) and long-term (2040) GHG emissions reduction targets.

We analysed short-term financial impact over five years, during which we can influence outcomes through strategic, capital allocation, commercial and operational decisions. Given the uncertainty around the financial impacts of our climate scenario analysis beyond five years, we have confined our financial impact assessment to this period. We have also conducted a high level review of CCEP's long-term climate vulnerability, on a non-financial basis, to help us identify risks and opportunities, spot trends and support our strategic planning.

We assessed all of the physical and transition risks outlined by the TCFD. Out of the risks and opportunities assessed, seven (three physical, four transition) were determined to be significant based upon the quantitative and qualitative impact to our business. Some risks (for example, exposure to litigation or investor market risk) were assessed, but were not deemed critical. We will continue to update and refine our modelling of our climate-related risks and opportunities over the coming years.

 **See the physical and transition risks assessed** on pages 56-59

The financial and non-financial assessment of our climate scenario analysis was completed on a gross risk basis. Planned mitigating actions or opportunities linked to these risks, such as our actions to achieve our GHG emissions reduction targets through our climate transition plan, have not been taken into consideration when evaluating the risk.

We have grouped the potential five year discounted cash flow at risk estimations into low, medium and high bands, with each risk and opportunity assessed independently. Bands are based on a 5% profit before tax estimate on a five year cumulative basis.

In 2024, we will continue to refine our climate scenario modelling, as we continue to develop and refine our carbon reduction strategy, and identify opportunities to mitigate climate-related risks to our business. This will help us to better assess the resilience of our climate transition plan, and our business strategy, to ensure we are able to mitigate risks and take advantage of opportunities of shifting to a low-carbon economy over the medium to long term.

Taking action on sustainability continued

Task Force on Climate-related Financial Disclosures (TCFD) continued

Emissions pathway	>4°C emissions pathway	+2.5°C emissions pathway	+1.5°C emissions pathway
SSP	No Policy SSP 5-8.5	Stated Policy SSP 2-4.5	Paris Ambition SSP 1-1.9
Temperature rise by 2100	>4°C	+2.5°C	+1.5°C
Global CO₂ emissions	200% by 2100	-75% by 2100	Net Zero by 2050
Global action against climate change	Few or no steps taken to limit emissions. Current GHG emissions levels roughly double by 2050. The global economy is fuelled by exploiting fossil fuels and energy-intensive lifestyles.	Reliance on existing/ planned policies (not commitments). GHG emissions plateau around current levels before starting to fall mid-century, but do not reach Net Zero by 2100.	Coordinated action leads to reduced emissions and societal shifts towards sustainability. While extreme weather increases, the most severe climate impacts are avoided.
Likelihood	Low	High	Low

Scope and methodology to assess key climate-related risks and opportunities		
	Physical	Transition
What are physical and transition risks and opportunities?	Includes risk of both acute weather events (e.g. floods) and chronic long-term climate shifts (e.g. rising sea levels). Acute physical risks are already occurring – however, the frequency and severity of these is expected to increase.	Transitioning to a low-carbon economy presents risks and opportunities, with impacts varying by transition speed and nature. Opportunities arise as consumers increasingly prefer products with lower emissions and reduced use of water and resources.
CCEP scope	<ul style="list-style-type: none"> • CCEP sites and operations • Key areas of our supply chain • Downstream products 	
Quantification	Estimation of the five-year cumulative discounted cash flow at risk (without mitigation measures). This was completed independently per risk type, including operational disruption and asset damage (physical); and loss of revenue, increased cost implications (transition). Risks have been prioritised in line with our ERM process. (see pages 68-69).	

Taking action on sustainability continued

Task Force on Climate-related Financial Disclosures (TCFD) continued

Physical risk

We modelled how extreme weather events and chronic changes to weather patterns could pose a physical risk to our operations and supply chain. Our climate scenario modelling identified potential risks from extreme weather, such as drought or flooding at production sites or key suppliers. Chronic changes in temperature and precipitation patterns could have an impact on agricultural yields for key ingredients. Mitigating actions against these risks are reviewed as part of our business planning processes.

Short-term (five years) cumulative gross risk financial impact estimates (assuming no mitigation)

Potential cumulative discounted cash flow at risk

Low <€350m		Medium €350m–€700m		High >€700m
------------	--	--------------------	--	-------------

Short-term (five years) cumulative gross risk (assuming no mitigation)				
Physical risks	What could be expected	>4°C emissions pathway	+2.5°C emissions pathway	+1.5°C emissions pathway
Extreme weather events could cause disruption to facilities and logistics routes	Increased risks of site damage due to more frequent and severe extreme weather, including riverine and surface water flooding. Impacts could result in business interruption and asset damage at our production sites.	Low	Low	Low
		<ul style="list-style-type: none"> Acute weather events such as extreme heat or flooding could limit our ability to produce or distribute our products. Insurance premiums could increase to cover such events. 		
Increasing water stress or water scarcity	Droughts can lead to water scarcity and reduced quality in our territories, potentially raising production costs or limiting capacity, adversely impacting our production and sales.	Low	Low	Low
		<ul style="list-style-type: none"> Of our 66 NARTD production sites, 24 are in regions with baseline water stress per WRI Aqueduct 3.0 analysis. Previous droughts have impacted operations. We modelled the risk as a potential production restriction over a two month period occurring at our high risk sites. The risk escalates slightly in the >4°C and +2.5°C warming scenarios. 		
Changes to weather and precipitation patterns could cause disruption to supply of ingredients	Decreased agricultural productivity in some regions of the world as a result of changing weather patterns may impact the yield and/or quality of key raw ingredients (e.g. sugar beet, sugar cane, coffee or orange juice) that we use to produce our products.	Low	Low	Low
		<ul style="list-style-type: none"> Sugar yields could be negatively impacted across all emissions pathways. Sugar beet, as our modelling suggests, is the ingredient most vulnerable to short-term climate shifts. France is projected to have the most significant yield reduction due to expected increased rainfall. Our modelling indicated that orange and coffee yields are unlikely to be significantly impacted. 		
Scenarios are modelled assuming no mitigating actions or progress on our stated sustainability action plan. It assumes that CCEP's operational footprint, product portfolio and GHG emissions remain static. Our mitigation strategy and our This is Forward sustainability commitments are designed to mitigate climate-related risks.				

Medium- (2030) and long-term (2040 and beyond) non-financial assessment

In the >4°C warming scenario, physical risks at CCEP facilities, including operational and supply chain disruptions, increase significantly. A review of 27 critical facilities under this scenario revealed long-term flooding risks, especially in Belgium, Spain, and Indonesia. These risks, mainly coastal inundation, are expected to surge post-2050. Additionally, climate change may intensify water scarcity, affecting water quality in certain regions. Analysis using WRI Aqueduct 3.0 baseline water stress mapping identified 21 European facilities and three NARTD facilities in API as high risk for water stress.

Taking action on sustainability continued

Task Force on Climate-related Financial Disclosures (TCFD) continued

Our strategic response to physical risks

Physical risk	Value chain	How could this impact our business (assuming no mitigation)?	How are we addressing these risks? (Our mitigation strategy)
Extreme weather events could cause disruption to facilities and logistics routes	Manufacturing and operations	<ul style="list-style-type: none"> • Damage to property at production and warehouse facilities, as well as our logistics and distribution networks. • Compromised infrastructure and logistical channels due to facility and equipment damage could hinder our product manufacturing and delivery capabilities. • Notably, severe flooding in 2021 affected our Chaudfontaine, Belgium, and Bad Neuenahr, Germany production sites. In 2022, floods in Australia disrupted our distribution network. We anticipate flooding as a persistent physical risk across all emission scenarios. 	<ul style="list-style-type: none"> • Our proactive measures against climate-related risks, especially from extreme weather, include significant investments in: <ul style="list-style-type: none"> – Enhancing flood defences and climate adaptation measures at our facilities – Developing and refining our business continuity plans
Increasing water stress or water scarcity	Manufacturing and operations	<ul style="list-style-type: none"> • Water scarcity poses a risk to our production processes, potentially leading to regulatory constraints on water usage, which may affect our production capabilities. • Temporary water shortages could result in increased production expenses or limitations in production capacity, impacting our beverage production and sales, and elevating costs. • Of our 66 NARTD production facilities, 24 are situated in regions with baseline water stress, as identified by the WRI Aqueduct 3.0 water risk analysis. • In 2023, due to drought, local authorities in some of our markets in Europe (Spain and France) escalated water risk levels, which could have resulted in limits on industrial water usage. These restrictions did not directly affect our sites, and in some cases our water targets and demonstrated progress on improving water efficiency helped to mitigate water restrictions being imposed on our facilities. 	<ul style="list-style-type: none"> • We conduct continuous water risk assessments at our NARTD production facilities using tools like the WRI Aqueduct 3.0 baseline water risk assessment, Facility Water Vulnerability Assessments (FAWVAs), and Source Water Vulnerability Assessments (SVAs). • These risk assessments directly inform the context based water targets set at each of our NARTD facilities, and our aggregated target to reduce our WUR^(A) by 10% by 2030 (versus 2019). • At sites located in areas of higher water stress, we work with NGOs, local authorities and the local community to help protect the watersheds we use. • We aim to achieve 100% regenerative water use in our leadership locations^(B) by 2030. This includes reducing our water use ratio, finding a beneficial use for the sites' wastewater and funding replenishment projects near these leadership locations. • In 2023, we invested approximately €5 million in water efficiency technology, processes and wastewater treatment in our sites. We estimate that these could help us save annual water and waste treatment expenses of about €300,000 per year.
Changes to weather and precipitation patterns could cause disruption to supply of ingredients	Supply chain	<ul style="list-style-type: none"> • Changing weather patterns and/or extreme weather events could impact the yield and/or quality of our key ingredients and raw materials, such as sugar beet, sugar cane, orange juice or coffee. This could reduce the availability and quality, or increase the cost of ingredients. • Our primary sugar beet sourcing regions, including France, Great Britain, the Netherlands and Spain, are all potentially vulnerable to climate-related water scarcity issues, based upon WRI Aqueduct 3.0 water risk analysis. 	<ul style="list-style-type: none"> • We have asked our carbon strategic suppliers^(C) to set their own science based GHG emissions reduction targets, including our ingredients suppliers. • We aim for 100% of our key agricultural ingredients and raw materials to be sourced in compliance with our PSA. • We invest in water replenishment programmes in our key sourcing regions, which focus on supporting advance water management practices. • We aid our suppliers in measuring and setting emission reduction targets and enhancing their emission reduction capabilities through educational initiatives like the S-LOCT programme.

(A) Water use ratio: litres of water per litre of finished product produced.

(B) NARTD production facilities which rely on vulnerable water sources or have high water dependency. We have nine leadership locations in Europe and four in API.

(C) Carbon strategic suppliers account for ~80% of our Scope 3 GHG emissions (~200 suppliers in total).

Taking action on sustainability continued

Task Force on Climate-related Financial Disclosures (TCFD) continued

Transition risk

Our scenario analysis focused on the transition risks across our value chain, under three emissions pathways. Our analysis highlighted a greater potential impact from transition risks in the near term, compared to physical risks. The level of exposure to transition risks is driven by the warming scenario, with a +1.5°C scenario showing the highest potential transition risk. Mitigating actions against these risks are determined as part of our business planning processes.

Short-term (five years) cumulative gross risk financial impact estimates (assuming no mitigation)

Potential cumulative discounted cash flow at risk

Low <€350m

Medium €350m-€700m

High >€700m

		Short-term (five years) cumulative gross risk (assuming no mitigation)					
Transition risk	What could be expected?	>4°C emissions pathway		+2.5°C emissions pathway		+1.5°C emissions pathway	
Policy	Carbon pricing is used as a shadow mechanism through which governments can incentivise GHG emissions reductions. The scenarios assume the use of higher carbon prices across CCEP markets to price and penalise GHG emissions, including those linked to packaging materials, to drive decarbonisation.	Low		Low		Medium	
		Assumes negligible carbon taxes		Assumes an average €40/tCO ₂ e of carbon taxes in year five		Assumes an average €80/tCO ₂ e of carbon taxes in year five	
Market	Consumer awareness of environmental impact drives a shift towards more sustainable, lower-emission alternative products and services. The scenarios assume that consumer preferences will shift towards packaging options that are perceived to be more sustainable, transforming market demand.	Low		Low		Low	
		Assumes low consumer demand for packaging types that are perceived to be more sustainable		Assumes moderate demand for packaging types that are perceived to be more sustainable		Assumes rapid growing demand for packaging types that are perceived to be more sustainable	
Technology	Regulatory or market shifts may phase out fossil fuels and related equipment, leading to a devaluation of carbon-intensive assets and potential impairment or write-offs. CCEP's exposure is limited, primarily due to our fleet assets relying on fossil fuels.	Low		Low		Low	
		Assumes that development is fossil-fuel driven with little innovation		Assumes moderate investment and innovation in renewable energy		Assumes rapid decarbonisation, including a rapid shift to renewable energy	
Reputation	Levels of consumer activism could be influenced by how much climate action is taken by the beverage sector and by CCEP. This assumes a potential gross risk if CCEP falls behind the beverage sector, causing increased consumer activism relative to our competitors. This assessment does not include packaging changes likely to be required by legislation across the sector.	Low		Low		Low	
		Low level of consumer activism		Moderate climate activism. Assumes CCEP is perceived to be in line with the beverage sector		Assumes CCEP does not keep pace with the beverage sector, causing increased consumer activism	

Scenarios are modelled assuming no mitigating actions or progress on our stated sustainability action plan. It assumes that CCEP's operational footprint, product portfolio and GHG emissions remain static. Our mitigation strategy and our This is Forward sustainability commitments are designed to mitigate climate-related risks.

Medium- (2030) and long-term (2040 and beyond) non-financial assessment

Beyond a five-year time horizon, the level of uncertainty of transition risks increases. Transition risks are anticipated to have the greatest impact in the near to mid term. In the next five years, in light of the challenge of coordinating global climate action, modest political, economic and social changes will drive financial impact. More significant action from policymakers to stimulate the low-carbon transition would accelerate the rate and transition, and increase the magnitude of impacts to the business.

In the medium term, new regulations designed to decrease the use of packaging materials that contribute to GHG emissions, or that introduce quotas for refillable packaging could require additional investment in our packaging portfolio, manufacturing capabilities and distribution network. This could be accelerated by an increasing demand from consumers for more sustainable products. Our SPO monitors risks and opportunities linked to packaging and packaging regulation, and reviews ways to maximise return on investments through pricing, increasing our value share and the avoidance of potential packaging-related taxes.

Taking action on sustainability continued

Task Force on Climate-related Financial Disclosures (TCFD) continued

Our strategic response to transition risks

Transition risks	Value chain	How could this impact our business (assuming no mitigation)?	How are we addressing these risks? (Our mitigation strategy)
Policy	Packaging	<p>Introduction of carbon and/or packaging taxes or levies, aimed at reducing GHG emissions from packaging and waste, that could result in:</p> <ul style="list-style-type: none"> increased costs for packaging materials 	<ul style="list-style-type: none"> A target to collect and recycle a bottle or can for each one we sell by 2030. Enabled by collaboration across industries to increase collection and recycling rates and drive a circular economy. Targets to reach 50% rPET in our PET bottles, and a target to stop using oil-based virgin plastic in our bottles by 2030. Innovating in refillable and dispensed solutions to eliminate packaging waste and reduce our GHG emissions. We allocated over €300 million between 2020 and 2022 to support the ongoing decarbonisation of our operations and value chain, and have an investment plan of approximately €450 million for emissions reduction initiatives between 2023 and 2025. This includes continued investment in rPET, as well as other carbon, energy and logistics savings initiatives. Continued investment in rPET provides CCEP with a significant opportunity to increase recycled content levels in specific markets, mitigating potential taxes, marketing constraints or bans on single use plastic bottles which do not contain recycled plastic.
	Operations and raw materials	<p>Increase in carbon taxes, aimed at reducing GHG emissions within industry groups that could result in:</p> <ul style="list-style-type: none"> increased energy costs increased raw materials costs 	<ul style="list-style-type: none"> Short- and long-term GHG emissions reduction targets to reduce our absolute GHG emissions by 30% by 2030 (versus 2019) and to reach Net Zero by 2040. Use renewable electricity across all of our markets by 2030. Engaging and working with our carbon strategic suppliers to: <ul style="list-style-type: none"> set their own science based GHG emissions reduction targets by 2023 (Europe) and 2025 (API) use 100% renewable electricity in their operations by 2025 (Europe) and 2030 (API) share their carbon footprint data with us Aiming to source all our agricultural ingredients and raw materials sustainably by ensuring our ingredient suppliers meet our PSA requirements. During 2023, we invested approximately €28 million in energy and carbon saving technologies, saving approximately 9,000MWh and 21,000 tonnes of CO₂e annually. We estimate these investments could help us avoid annual operating costs of approximately €2 million.
Market (consumer)	Brands and portfolio	<ul style="list-style-type: none"> Loss of revenue and/or missed growth opportunities 	<ul style="list-style-type: none"> Regular review of products and business models, based upon their carbon emissions, packaging and water usage. Removing packaging materials where we can, and setting targets to collect all of the packaging we use, increase our use of recycled content and help to implement systems to drive circularity of packaging materials.
Technology	Operations	<ul style="list-style-type: none"> Asset write downs, investments in low-emission technology to meet market regulation 	<ul style="list-style-type: none"> Investing in manufacturing equipment and transportation systems that rely on low-emission or renewable energy sources. As part of our EV100 commitment, we aim to transition all of our own car and van fleet to electric or ultra-low emissions vehicles by 2030. Investing in the decarbonisation of our production facilities. In 2023, we invested approximately €28 million in energy and carbon saving technologies, saving approximately 9,000 MWh and 21,000 tonnes of CO₂e annually. Exploring and investing in new technologies through CCEP Ventures.
Reputation	Brands and portfolio	<ul style="list-style-type: none"> Loss of revenue and/or missed growth opportunities due to consumer activism against our sector and/or our products 	<ul style="list-style-type: none"> Short- and long-term GHG emissions reduction targets to reduce our absolute GHG emissions by 30% by 2030 (versus 2019) and to reach Net Zero by 2040. Increasing recycled content in packaging and increasing collection rates. Developing refillable and reusable product offerings for consumers. Collaborating with TCCC and other franchise partners, as part of a system approach driving the sustainability agenda of our brands.

Taking action on sustainability continued

Task Force on Climate-related Financial Disclosures (TCFD) continued

Metrics and targets

Through our sustainability reporting and disclosure, we track, measure and manage our sustainability targets and related metrics.

Our This is Forward sustainability action plan targets were developed from stakeholder insights, and our targets are focused on our most material issues. A full list of our sustainability metrics, our reporting approach and GHG emissions calculation methodology can be found in the Key performance data summary on pages 234-241. Stress scenarios regarding the ongoing viability of our business can be found on page 79. We are piloting the use of a carbon price of €100/tCO₂e, see page 51.

For our disclosure, we have considered the TCFD cross industry climate-related metrics and agriculture, food, and forest products group metrics.

Climate targets

In 2023, our short- and long-term GHG emissions targets were validated by the SBTi as being in line with climate science.

Our climate targets are as follows:

- Net Zero GHG emissions (Scope 1, 2 and 3) by 2040
- Reduce absolute GHG emissions (Scope 1, 2 and 3) by 30% by 2030 (versus 2019)
- Use 100% renewable electricity across all markets by 2030
- 100% of carbon strategic suppliers to set science based targets by 2023 (Europe) and 2025 (API)

- 100% of carbon strategic suppliers to use 100% renewable electricity by 2025 (Europe) and 2030 (API)

Our GHG emissions targets are tied to executive remuneration through our LTIP, see pages 133-135.

Water metrics and targets

We focus on water efficiency in our operations and helping to protect water sources for our business, communities and suppliers. Our key water targets are as follows:

- 10% reduction in our manufacturing water use ratio^(A) by 2030 (versus 2019)
- Replenish 100% of the water we use in our beverages
- 100% regenerative water use in leadership locations^(B) by 2030

In 2023, we improved our water use ratio by 4.9% versus 2019 by setting context based targets and improving our water efficiency.

Packaging metrics and targets

Packaging accounts for 37% of our total value chain carbon footprint, making it a key area where we can reduce emissions. Reducing unnecessary packaging and improving packaging circularity will help reduce our carbon emissions and support us in reaching our climate targets.

 **Read more about our actions on climate, packaging and water** on pages 36-47

Total water consumed (1,000m ³)		17,015	17,003		
Total production volumes from areas of baseline water stress (1,000m ³)		8,126	8,067		

Note: For details on our approach to reporting and methodology see our 2023 Sustainability reporting methodology document on cocaolaep.com/sustainability/download-centre.

(A) Measured as litres of water per litre of finished product produced. All beverage production facilities. (B) NARTD production facilities which rely on vulnerable water sources or have high water dependency. We have nine leadership locations in Europe and four in API. (C) The acquisition of API completed on 10 May 2021; however, the baseline metrics above are presented on a full year basis for 2019 to allow for better period over period comparability. 2019 baseline has been restated – as described in our Key performance data summary on pages 234-241. (D)(α) Subject to external independent limited assurance. See page 241 for details. (E) Equates to Great Britain for CCEP. (F) Scope 2 is market based approach only.

Our stakeholders

Our stakeholders are part of our business and play a vital role in our success at every stage in our value chain. From the suppliers that provide our raw materials, to the communities where we operate and the people who make and sell our products, we seek to work together to refresh our markets and make a difference.

Our people

CCEP depends on the great people who make, move and sell our products to customers every day.

A comprehensive annual engagement plan includes:

Townhalls, Speak Up channels, engagement surveys and the Employee Share Purchase Plan (ESPP)

Communications and campaigns, e.g. mental health, safety and inclusion, online platforms, work councils and training and development programmes

Board engagement:

The Remuneration Committee reviews the Group wide remuneration policy to ensure it remains aligned with the long-term strategic goals of the Company

The Nomination Committee's remit includes key people matters such as succession, diversity and culture

The Board engages directly with employees through Townhalls, facility tours, market visits, and presentations and deep dives at Board level

Impact/value created:

Our people create value for CCEP by making, moving and selling our great products

CCEP creates value for our people through providing a safe place to work with rewards and benefits

What matters to our people?

Being rewarded, valued and recognised

Development opportunities

Safety at work

Inclusion and diversity

Human rights

What is measured and monitored?

Total incident rate

ESPP enrolment

Percentage of women in management and total workforce

Attrition & Absenteeism

Percentage of workforce represented by people with disabilities, based on voluntary declaration

[Read more about our risks and mitigations](#) on pages 68-78

Outcomes of engagement:

Examples of different initiatives undertaken as a result of engagement can be found on pages 23-26, covering topics such as wellbeing, diversity, leadership and employee benefits.

Case study Listening to women in our supply chain

This year, we launched the Women's Listening Circles to unite women in customer service and supply chain, providing spaces for them to listen to each other's experiences and exchange ideas.

Image: some of our participants from Indonesia.

We aim to understand what makes working at CCEP great for women and identify areas where we can improve our gender balance, seeking feedback on three critical areas: safety, inclusion and development.

Our business units and functions have created 100-day action

plans to address the issues that matter most to our people.

We received an overwhelming response, hearing from over 1,000 women in our supply chain.

[Watch film at cocacolaep.com/annual-report/case-study/fasteroninclusivity](#)

[Read more about our people](#) on pages 23-25

[Read more about our risks and mitigations](#) on pages 68-78

Our stakeholders continued

Our shareholders

Shareholders provide the equity capital for our business and hold management to account on financial performance and key environmental, social and governance (ESG) issues.

A comprehensive annual engagement plan includes:

AGM, roadshows, analyst meetings, results presentations and webcasts

Brokers appointed to provide advice on market conditions and external communications

Shareholder-nominated Directors on the Board in accordance with Shareholders' Agreement

Board engagement:

The CEO, CFO, Chairman and IR team engage with investors and analysts throughout the year and provide updates to the Board on shareholder views, share register, share price performance and investor sentiment

The Remuneration Committee Chair engages on the remuneration policy

Impact/value created:

Shareholders create value for CCEP through voting at the AGM and continuing to invest in CCEP

CCEP creates value for shareholders by returning cash either by paying dividends or through share buybacks

What matters to our shareholders?

Financial performance, commodity costs and inflationary pressures

Sustainable long-term value

Market dynamics such as consumer behaviour and supply chain challenges

ESG challenges and regulatory changes

What is measured and monitored?

Number of meetings and % of equity investors covered by these interactions

Analyst notes and equity investor perceptions of strategy

[Read more about our risks and mitigations on pages 68-78](#)

Outcomes of engagement:

A key outcome of shareholder engagement in 2023 was the inclusion of CCEP in the Nasdaq-100 Index in December 2023, which demonstrates CCEP's commitment to continuing to create sustainable long-term value for shareholders.

Our franchisors

We conduct business primarily under agreements with franchisors that generally give us exclusive rights to make, sell and distribute beverages in approved packaging in specified territories.

Regular contact with franchisors includes:

Management contact at different functional levels, such as public affairs, communications and sustainability, supply chain, sales and marketing

Ongoing dialogue with General Managers and regular top to top meetings

Inviting franchisors to present annual business plans to customers

Board engagement:

Regular updates to the Board from the CEO and the Chief Commercial Officer via the ATC on franchisors, including on performance, relationships and any issues

Chairman engages directly with key franchisors including TCCC

Impact/value created:

CCEP gains value from the exclusive rights given by franchisors to make, sell and distribute their products

CCEP creates value for franchisors by driving sales to customers so franchisors' drinks are available where and when consumers want them

What matters to our franchisors?

Profitable growth and value share in our markets

Aligned strategy and incentives

Sustainable supply chains

Good continued engagement

What is measured and monitored?

Joint investment

Successful innovation

Category performance

Market share

[Read more about our risks and mitigations on pages 68-78](#)

Outcomes of engagement:

A key outcome of franchisor engagement in 2023 was the acquisition of CCBPI jointly with AEV from TCCC. The acquisition demonstrates TCCC's confidence in CCEP as a business and the continued strong relationship between the two companies. Further information can be found on pages 66-67.

Our stakeholders continued

Our consumers

Consumers drink the products we make, sell and distribute.

CCEP's ways of engaging with consumers include:

Collection of consumer insights from franchisors, customers or via dedicated research

Consumer labelling, social media, activation in store and day to day interaction via our sales teams when visiting outlets

Feedback from consumers on social media and via the consumer hotlines

Day to day interaction via our sales team when visiting outlets

Board engagement:

Indirectly through customers and franchisors

Direct engagement through market visits

Presentations on trends and behavioural patterns

Impact/value created:

Consumers create value when buying our products

CCEP creates value for consumers through providing a diverse portfolio of high quality, safe and great tasting drinks and by providing transparent labelling to help consumers make informed choices

What matters to our consumers?

Product quality and food safety

Environmental and affordability concerns

What is measured and monitored?

Low and no calorie drinks as a % of sales

% packaging that is 100% recyclable

Outcomes of engagement:

Examples of different initiatives undertaken as a result of engagement can be found on pages 16-18, covering topics such as expansion of our portfolio and reducing sugar in our drinks.

 [Read more about our risks and mitigations on pages 68-78](#)

Read more about our consumers on pages 17-18

Our customers

Customers sell our products to consumers.

Regular engagement with customers includes:

General Managers engaging with customers on strategy and planning and owning the customer relationship

Account managers' contact with customers on business development

Our sales teams calling on customers every day in the market

Supply chain in daily contact to ensure customers receive the best customer service

Board engagement:

Through management insights

Direct engagement through market visits held in Australia and New Zealand

Customer engagement session and dinner in Australia in 2023

CEO updates to the Board on pricing, negotiations, joint value creation and customer satisfaction metrics

Retail landscape session

Impact/value created:

Customers create value for CCEP by selling our products to consumers

CCEP creates value for customers through our customer centric operating model, portfolio diversity and quality of products and service

What matters to our customers?

New packaging solutions

Product offers to meet new shopper and consumer trends

Economic value creation

Customer service

What is measured and monitored?

Volume and revenue growth

Customer big data and advanced analytics, e.g. NielsenIQ and IRI3, measure brand/product performance and value creation

Advantage Group and Ipsos research (EU only) to evaluate customer satisfaction

Outcomes of engagement:

Examples of different initiatives undertaken as a result of engagement can be found on pages 28-31, such as better tailoring customer action plans through targeted investment into new technologies and focus on digitisation.

 [Read more about our risks and mitigations on pages 68-78](#)

Read more about our customers on pages 28-31

Our stakeholders continued

Our suppliers

Suppliers provide a wide range of commodities and services from ingredients, packaging, utilities, equipment, to facilities management, fleet, logistics and information technology.

Read more about our suppliers on pages 32-34

Processes to engage regularly with suppliers include:

Supplier relationship management programme through TCCC's procurement consortium

Partnering and collaborating with suppliers, in areas such as business continuity or sustainability, to foster strategic relationships

Board engagement:

Updates provided by the CEO and CFO on key supplier relationships

Development of SGPs setting requirements for suppliers in relation to human rights, health and safety and environment

Presentations to the Board on strategic topics such as carbon reduction and supply risk

Impact/value created:

Suppliers create value for CCEP by providing high quality, safe and sustainable products and services, and optimised supply chain and innovation partnerships

CCEP creates value for suppliers through long-term collaborative partnerships and provides support on sustainable practices and emission plans

What matters to our suppliers?

Exposure to variability in the marketplace such as pricing and consumer behaviours

Driving progress on sustainable supply chains

Long-term collaborative relations and ability to grow their long-term revenue streams

What is measured and monitored?

Quality standards and delivery times

TCCC audits to ensure adherence to SGPs and PSA

Commitment to set science based targets and to transition to 100% renewable electricity

Read more about our risks and mitigations on pages 68-78

Outcomes of engagement:

Examples of different initiatives undertaken as a result of engagement can be found on pages 32-34, covering topics such as achieving net zero, our RSP and sustainability-linked supply chain finance programme.

Our communities

Communities are where we operate and where our employees live and work.

Read more about community engagement on page 26

Regular engagement with our communities include:

Boosting skills development and social inclusion, e.g. youth development programmes, BORA Jovens programme, apprenticeships and collaborating with food banks

Protecting the local environment, e.g. water replenishment and litter clean up programmes

Supporting local communities, e.g. grassroots initiatives and disaster relief

Board engagement:

Board members engage with local projects and at CCEP events

The ESG Committee is responsible for overseeing CCEP's relationship with communities under the social pillar of its remit

Impact/value created:

Communities create value for CCEP through access to talented people, local water sources, connection with local policymakers and community groups

CCEP creates value for communities through access to employment, improving the local environment and investing in community causes

What matters to our communities?

Employment and social inclusion

Environmental impact

Corporate citizenship

What is measured and monitored?

Community investment contribution

Employee volunteering hours

Direct beneficiaries from skills programme

Read more about our risks and mitigations on pages 68-78

Outcomes of engagement:

Examples of different initiatives undertaken as a result of engagement can be found on page 26, covering topics such as skills development and social inclusion and community wellbeing

Section 172(1) statement from the Directors

During 2023, we acted in good faith to promote the long-term success of CCEP in our discussions and decision making for the benefit of CCEP's shareholders as a whole, and in doing so having regard to stakeholders and the matters set out in section 172 of the Companies Act, including:

The likely consequences of any decision in the long term

The Board recognises that its decision making will affect CCEP's long-term success. When taking decisions, particularly of strategic importance, the Board considers the likely consequences of any decision on CCEP's long-term, sustainable growth while endeavouring to balance the interests of all our stakeholders.

The interests of our people, and the need to foster business relationships with our key stakeholders

Our key stakeholders remain the same as last year, namely our people, shareholders, franchisors, consumers, customers, suppliers, and communities. How CCEP has engaged with our stakeholders more generally is explained on pages 61-64. We identify our key stakeholder groups as those with significant interactions with our business model and that we impact in the course of our business operations. We describe how our business interacts with our stakeholders, and the impacts of these interactions, throughout this Integrated Report. The Board strives to gain stakeholder perspectives to inform its decision making through direct engagement, where feasible, as well as through regular communication with senior management.

The impact of the Company's operations on the community and the environment

We recognise that to deliver our strategy in a sustainable way, we need to consider the commercial, social and environmental impacts of our business. During the year, we have monitored, assessed and challenged CCEP's progress against our annual business plan and our sustainability action plan. Information on our sustainability action plan and how we are implementing TCFD recommendations can be found on pages 48-60. Our sustainability governance framework guides the Board's decisions in this regard, as set out on page 50.

The desirability of the Company maintaining a reputation for high standards of business conduct

Ensuring our business operates responsibly is fundamental to ensuring our long-term success. The Board assesses and monitors the Group's culture to ensure it aligns with the Group's purpose, values and strategy set by the Board and oversees a corporate governance framework, as set out on page 103, that enables the right people to take the right decisions at the right time. This includes our CoC and system of delegated authorities.

 [Read our CoC at view.pagetiger.com/code-of-conduct-policy](http://view.pagetiger.com/code-of-conduct-policy)

The need to act fairly as between CCEP's shareholders

The Board supervises the profitable operation and development of CCEP to maximise its equity value over the long term, without regard to the individual interests of any shareholder. A minority of our Non-executive Directors (NEDs) were appointed by major shareholders of CCEP. However, each Director understands their responsibility under the Companies Act to act in a way that would promote the long-term success of the Company for all its shareholders.

During 2023, the CEO, CFO, Chairman and our IR team met with shareholders who provide updates to the Board on shareholder feedback at Board meetings.

 **How the Board engaged with stakeholders is set out** on pages 61-64

 **Specific examples of how the Board considered the views of its stakeholders in its decision making is set out** on pages 66-67

Section 172(1) statement from the Directors

Principal decisions

The Board made several principal decisions during 2023, where the Directors had regard to the relevant matters set out in section 172(1)(a)-(f) of the UK Companies Act 2006 (the Companies Act) when discharging their duties.

Here we outline how the Board approached the CCBPI acquisition and strategic portfolio choices as principal decisions.

Image: Leadership from the Coca-Cola system and AEV

Acquisition of CCBPI

On 23 February 2024, CCEP completed the acquisition of CCBPI jointly with AEV, underpinning CCEP's ambitious mid-term strategic objectives and solidifying CCEP's position as the world's largest Coca-Cola bottler by revenue. The proposed acquisition was announced on 2 August 2023 with final transaction documents approved by the Board on 15 November 2023.

The Board and M&A Committee (a subset of the Board with delegated powers from the Board) was supported in its decision making by recommendations from its Committees on certain topics, including:

- the ATC, which reviewed the key transaction documents, including the share purchase agreement and the Bottler's Agreement, together with the Fairness Opinion; and
- the Audit Committee, which reviewed the proposed capital structure and financing arrangements to finance CCEP's 60% stake.

In addition, management provided key support throughout, including through the establishment of a Value Realisation Committee to support the planned integration of the transaction and certain decisions in the lead up to completion.

As part of its approval process, the Board took into account numerous factors including the impact of the acquisition on the stakeholder groups below.

Shareholders

The transaction is aligned to CCEP's strategy of pursuing inorganic expansion opportunities and also supports the transformation journey in Indonesia. Management identified that value enhancing opportunities could be achieved through the implementation of CCEP's proven track record together with the support of AEV via its local market knowledge, capabilities and relationships in the Philippines.

The ATC was also provided with a Fairness Opinion from a third party which supported the enterprise value of \$1.8 billion for CCBPI. The consideration was paid in cash, and has a modest impact on CCEP's leverage.

Section 172(1) statement from the Directors

Principal decisions

From completion, the transaction is EPS accretive, and by working with AEV and TCCC, there is opportunity to unlock even more potential.

To support its decision making, the Board received an opportunity overview of CCBPI including scale, profitability, market environment, recent performance, key challenges and the current business plan. This was supported by an overview of partnership considerations including the shareholders agreement with AEV. Using these insights, the Board concluded that the acquisition would result in value creation for shareholders.

Employees

Engaging and retaining our people is a key consideration, ensuring that everyone has a voice and feels valued.

The acquisition will create an even more diverse workforce and provides an opportunity to scale knowledge, best practice and talent across CCEP. We will also benefit from combining our talent pools as well as sharing learnings and best practice on digital, technology, procurement and sustainability capabilities.

Franchisors

Franchisors are a key stakeholder group, given the importance of maintaining a strong relationship and alignment with TCCC. Due to the quality of interactions between TCCC, AEV and CCEP, TCCC as seller of CCBPI is confident in CCEP's ability to hold a majority stake and work collaboratively as a joint venture partner with AEV.

Consumers

The acquisition enhances our consumer reach. It also brings new brands to CCEP's portfolio.

Communities, environment and customers

CCBPI runs local community programmes including a number of partnerships to encourage the return of plastic bottles by consumers for recycling via collection hubs. CCBPI also has a joint venture with Indorama in a PET recycling scheme, consistent with CCEP's approach in Indonesia at our Amandina PET recycling plant.

Gaining deep local insights in all our territories remains a priority, including building experience and market understanding to meet specific stakeholder needs.

Strategic portfolio choices

The Board approved a number of strategic portfolio choices during 2023, such as the new collaboration with existing franchise partner, TCCC, and new brand partner Brown-Forman, to launch Jack Daniel's & Coca-Cola ARTD as part of the Coca-Cola system's ARTD strategy.

The Board was fully supportive of the expansion of CCEP's ARTD strategy across multiple markets by increasing CCEP's presence and assortment within this emerging category.

The partnership with Brown-Forman was deemed to be in the best interests of the Company's stakeholders, namely:

- **Shareholders:** due to the proposed incremental value to be generated
- **Franchisors:** particularly CCEP's key franchise partner TCCC to demonstrate CCEP's commitment to ARTD and to strengthen the relationship with TCCC

- **Customers:** through the value creation opportunity which expanding into this category brings
- **Consumers:** by offering a perfect mix of convenience and simplicity for in-home and on-the-go occasions

To assist the Board in its decision making, the Board received a report from the ATC and sought views of stakeholders via management, including the Chief Commercial Officer. The ATC had received materials which included information on the strategic objective, notably the desire to broaden the category penetration and CCEP's ARTD portfolio. The materials included the rationale and information on the contractual framework as well as projections on the financial and business impact. The Board considered the financial implications of the partnership and the proposed supply and distribution agreements, along with the potential to repurpose for other markets.

Principal risks

CCEP identifies, assesses and manages the principal risks we face as a business through strong risk management across the organisation, mitigating risk and pursuing the benefit of the related opportunities.

To support this, CCEP has developed an Enterprise Risk Management (ERM) framework to embed risk management within our key functions, activities and decision making.

An overview of our approach to risk management is provided in the diagram to the right.

1 Governance

The Board has overall responsibility for risk management at CCEP. Oversight and monitoring is provided by the Audit Committee with regular reports from management. The topic is led at the ELT by the General Counsel and Company Secretary working with management's Compliance and Risk Committee (CRC) and the One Risk Office, which brings together all leaders involved in risk, including the ERM team. Each principal risk has a risk owner at ELT level who is responsible for considering whether the risk is properly explained and has appropriate risk mitigation plans in place.

The governance structure, including risk management, is outlined on page 50 as part of our TCFD disclosure.

2 Identify and assess risks and opportunities

Our annual enterprise risk assessment (ERA) provides a top down strategic view of risks. The members of the Board, ELT and over 100 senior leaders carry out a risk survey and interviews to discuss current risks, opportunities and emerging risks.

One of the key focuses for 2023 was on mitigations, helping us to manage risks more effectively with better forward planning and controls.

Risk assessments are also carried out at business unit, functional and programme level. The local leadership teams review and update risk assessments, ensuring that risk management is incorporated into our business routines.

Once risks are identified, we analyse them to understand the likelihood, impact and velocity. In addition, we also understand how we manage our risks by measuring the effectiveness of mitigations and actions.

Horizon scanning helps us to identify global strategic and emerging risks, the effects of which are not yet fully known, and where the evolution of the risk is highly uncertain because it is rapid, non-linear or both. We monitor the evolution of such threats to ensure we are able to anticipate and manage potential impacts to our business. Examples include geopolitical conflicts and their impacts on the supply chain, macroeconomic conditions and impact on consumer sentiments, or disruptions from AI.

Sustainability risks can impact the way we do business, so we continue to work with external partners like Resilience to develop and analyse risk scenarios, e.g. for climate change, and help with reporting requirements. More details are on pages 48-60.

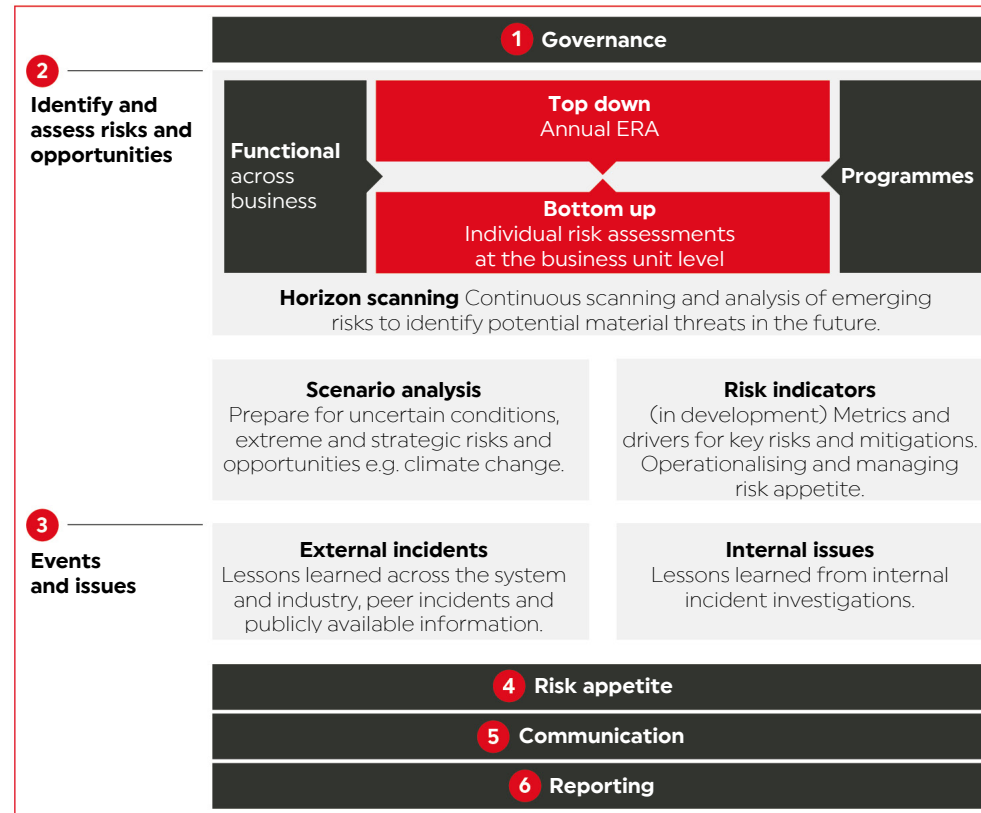

3 Events and issues

We use insights and data from internal and external sources to analyse incidents to improve the way we manage risks, i.e. risk sensing technology in supplier management or learnings from a crisis such as COVID-19.

4 Risk appetite

We define our appetite for each risk through risk appetite statements to support the business with decision making and resource allocation.

Overview of the CCEP ERM framework

Principal risks continued

The risk appetite statements are reviewed annually by the CRC and the Audit Committee. We are in the process of operationalising the statements through the implementation of risk indicators.

5 Communication

Our One Risk Office is a forum that brings together first, second and third line of defence representatives several times a year to share risk management knowledge across our functions and business units, per the diagram below.

Emerging risk themes and external factors that could impact our business are discussed. We regularly invite external risk experts (e.g. risk analysts to inform us on potential scenarios of the Middle East crisis) and risk leaders from other organisations to help us broaden our understanding of risk.

6 Reporting

An internal risk report is created and shared on a regular basis with leadership highlighting key risks, emerging trends and mitigation activities to support decision making.

The following pages set out a summary of our principal risks based on the findings of our most recent ERA. The Board has carried out a robust assessment of these principal risks.

This summary is not intended to include all risks that could impact our business and the risks are presented in no particular order. In this report, we show how each principal risk links to, and underpins the relevant aspect of our strategy.

Beyond principal risks, CCEP faces other operational risks which are managed as part of our daily routines. We are aware that due to the economic downturn the risk of fraud has increased. CCEP has embarked on an entity wide fraud risk assessment as part of its enhanced fraud management plan.

Case study How we strengthened our Business Resilience Framework (BRF)

We have strengthened our business continuity capability to manage a wide spectrum of disruptions in a proactive and effective way.

In 2023, we standardised and modernised our Business Continuity Planning through site by site training, impact analysis, scenario planning and testing as set out below:

We also achieved ISO 22301, the industry standard for business continuity and resilience (BCR) for our shared service centres.

Furthermore, the progress and business impact of the BCR programme was recognised externally by the Business Continuity Institute (BCI).

Statement from the judges at the 2023 BCI Global Awards:

"The winning exercise programme stood out to the judges due to its originality, complexity and wide global reach. The programme's impact was substantial, improving the organisation's business continuity management and cyber resilience capabilities. The exercise programme demonstrated the company's commitment to maintaining continuity readiness for any challenge and it's a testament to their dedication towards preparedness."

What does the programme look like?

Strategic alignment & planning

Engagement with sites

Site training to introduce the BRF and BCR templates

Site function workshops to complete BCR templates

Test & exercise

Continuous improvement

Principal risks continued

The table below shows our principal risks

Principal risk	Strategic objective	Description (What is the risk?)	Causal factors themes (What gives rise to the risk?)	Consequence themes (Potential impact of the risk)	Key control mitigations (How we manage it)	Trend
Business disruption 		The risk of prolonged, large scale natural and/or man made disruptive events	<ul style="list-style-type: none"> • Cyber attack or IT/operational technology system failure • Pandemics • Extreme weather events (floods, fires) • Natural disasters • Civil unrest, war and terrorism 	<ul style="list-style-type: none"> • Disruption to supply chains/operations • Safety and wellbeing of our people • Brand and reputation damage • Financial impact 	<ul style="list-style-type: none"> • TCCC Business Resilience Framework • CCEP BCR Governance Framework • CCEP Incident Management and Crisis Response (IMCR) process 	
Packaging 		The risks relating to packaging waste and plastic pollution, and single use plastic	<ul style="list-style-type: none"> • Stakeholder concern about the environmental impacts of single use plastic packaging, litter and packaging waste 	<ul style="list-style-type: none"> • Brand and reputation damage from not keeping up with community/customer expectations • Financial impact from increased taxes and on the costs of doing business • Regulatory and compliance impacts • Increased potential for activism and litigation 	<ul style="list-style-type: none"> • rPET roadmap • Advocacy to support container deposit and return schemes • Test, trial and learn approach to refillable packaging in multiple markets • Innovation on dispensed delivery solutions • Packaging design and innovation • CCEP Ventures investment in new recycling technologies • Industry collaboration

Internal control procedures and risk management

CCEP's internal controls are designed to manage rather than eliminate risk, and aim to mitigate risk of fraud and misstatements.

In addition to management responsibility, the Board has overall responsibility for the Company's system of internal controls and for reviewing its adequacy and effectiveness. To discharge its responsibility in a manner that complies with law and regulation and promotes effective and efficient operation, the Board has established clear operating procedures, lines of responsibility and delegated authority.

The Audit Committee has specific responsibility for reviewing the internal control policies and procedures associated with the identification, assessment and reporting of principal and emerging risks to check they are adequate and effective.

Our internal control processes include:

- Board approval for significant projects, transactions and corporate actions
- Either senior management or Board approval for all major expenditure at the appropriate stages of each transaction
- Regular reporting covering both technical progress and our financial affairs
- Board review, identification, evaluation and management of significant risks

➤ Read more about our approach to internal control and risk management in the Audit Committee report on pages 117-124

Cybersecurity

Risk management and strategy

Our management and Board recognise the critical importance that a robust cybersecurity programme and processes play in maintaining the integrity of CCEP's business applications and data. Our Chief Information Officer (CIO), and Chief Information Security Officer (CISO) lead our cybersecurity programme and regularly report to our Audit Committee and Board on cybersecurity matters, through which we assess, identify, and manage material risks from cybersecurity threats. We seek to promote a cybersecurity culture in which everyone feels a responsibility to prevent cyberattacks.

Our cybersecurity policies, standards, processes and practices are integrated into our risk management framework, which addresses the principal risks we face as a business and how we identify, assess and manage them. In addition, our CISO and his team utilise a risk analysis standard from the Information Security Forum (ISF), which is aligned with industry best practice standards to identify and assess IT security risks as well as numerous ISF controls and checks.

Our processes for detecting, monitoring, and addressing cybersecurity threats and incidents, and for ensuring timely compliance with applicable reporting requirements, include the following:

- Established risk based cyber strategy. Regular reporting of cyber risks and risk mitigation to the ELT, Audit Committee and the Board;
- Conducting regular training and awareness on information security and data privacy for employees, including regular phishing exercises. This is in addition to simulations run with the ELT on their ability to respond to cyber incidents;
- Continuous development and ongoing improvement of Business Continuity Planning (BCP) and disaster recovery programmes, including internal and external testing of security controls to identify vulnerabilities;
- Threat vulnerability management and threat intelligence: proactive monitoring of cyber threats and events and implementation of preventative measures is executed by operating a 24/7 security event logging and management system through a Global Security Operations Centre;
- Implementation of a hardware and software lifecycle;
- Third party risk assessments for certain key vendors to support third party risk management;
- Data Privacy Office including data governance and information classification and handling;
- IT change management processes to provide reasonable assurance that only appropriate, tested and approved changes are implemented into our IT landscape;
- Monthly Information Security Committee meetings which bring IT experts and governance teams together into a single forum to review, prevent, detect and monitor threats, incidents, and responses thereto; and
- Internal audit performs independent risk based audits to assess governance and oversight and test effectiveness of controls over critical cyber activities.

Principal risks continued

Following an initial evaluation for risk and business impact by our IT Security Director and in collaboration with the CISO, relevant cybersecurity incidents and threats are escalated to the corporate Incident Management Team (IMT) and communicated in a timely manner to our Disclosure Committee consisting of the Chairman, CEO, CFO, Group Company Secretary and General Counsel, and VP Investor Relations & Corporate Strategy. The Disclosure Committee is responsible for reviewing and making the determination regarding materiality and public disclosures pursuant to the SEC and exchange listing rules.

We use third party experts to support on certain aspects of our cybersecurity programme but maintain internal leadership and oversight of all, including in connection with our risk processes. We work with other bottlers and partners such as TCCC to share insights on potential threats.

We also monitor third party service providers, through:

- An internal controls assessment of our third party control framework
- Governance and performance through reporting requirements for major vendors
- Procurement third party risk management processes
- Identification and oversight by our CISO, supported by our Business Continuity and Resilience (BCR) team, of risks associated with those

third party service providers that are relevant to our Business Process and Technology (BPT) function

- Improvements in researching the emerging threat landscape
- Improving the security of our external attack surface; and
- Conducting due diligence into peers and trading partners

As at the date of this report, we are not aware of any risks from cybersecurity threats, including as a result of any previous cybersecurity incidents, that have materially affected us, our business strategy, results of operation or financial condition. For additional information concerning cybersecurity risks we face, refer to the risk factor subsection titled, "Cyber and IT resilience" on page 71.

Governance

In addition to having a dedicated cyber security team concerned with day to day cybersecurity operations, cybersecurity is also a critical area of focus at both our executive and Board levels, which helps ensure that the Board executes its oversight of cyber risks and that we consider security risks in our business strategy.

Our cybersecurity processes for managing and assessing cybersecurity risks, as described above, are managed and overseen by our Information Security Committee, which comprises the CIO, CCO, Chief Data Privacy Officer and other senior management members, and is coordinated by our

CISO who has been in situ for the past seven years, with 20 years' experience in cybersecurity and information security management. In addition, our CIO chairs the Information Security Committee, helping to steer it in implementing effective processes in response to information security and risks. Our Information Security Committee meets at least monthly to oversee, discuss and manage cybersecurity including topics such as but not limited to data privacy, (IT) business continuity and resiliency based on internal and external sources of information. Through these processes and ongoing communications, the Board via the Audit Committee are informed about and monitor the prevention, detection, mitigation and remediation of cybersecurity threats and incidents in real time.

As part of its general risk oversight function, the Audit Committee oversees CCEP's management of cybersecurity risk on behalf of the Board. The Committee receives regular updates from management on cybersecurity risks and our efforts to manage those risks, including reports on a biannual basis and more frequently as deemed appropriate by our CIO and regular receipt of feedback on the effectiveness of implementing cybersecurity awareness within company culture as a whole, such as the results of implementing employee training and phishing simulations.

Information regarding cyber risks and cyber risk management is reported to the Audit Committee, and subsequently communicated to the whole Board during the summary of Committee reports. One member of the Audit Committee has specific responsibility for cybersecurity. In 2023, the Audit Committee has been presented with detailed information on cybersecurity and internal controls, including improvements made in researching the emerging cyber risk landscape.

Viability statement

In accordance with provision 31 of the 2018 UK Corporate Governance Code (the Code), the Directors have assessed the prospects for the Group. The Directors have made this assessment over a period of three years, which corresponds to the Group's planning cycle.

The assessment considered the Group's prospects related to revenue, operating profit, EBITDA and comparable free cash flow. The Directors considered the maturity dates of the Group's debt obligations and its access to public and private debt markets, including its committed multi-currency credit facility. The Directors also carried out a robust review and analysis of the principal risks facing the Group, including those risks that could materially and adversely affect the Group's business model, future performance, solvency and liquidity.

Stress testing was performed on a number of scenarios, including different estimates for operating profit and comparable free cash flow. Among other considerations, these scenarios incorporated the potential downside impact of the Group's principal risks, including those related to:

- Legal and regulatory intervention, including in relation to plastic packaging
- Risk of cyber and social engineering attacks
- Economic and political uncertainty
- Climate change and water

Based on the Group's current financial position, stable cash generation and access to liquidity, the Directors concluded that the Group is well positioned to manage principal risks and potential downside impacts of such risks materialising, to ensure solvency and liquidity over the assessment period.

From a qualitative perspective, the Directors also took into consideration the Group's past experience of managing through adverse conditions and the Group's strong relationship and position within the Coca-Cola system. The Directors considered the extreme measures the Group could take in the event of a crisis, including decreasing or stopping non-essential capital investment, decreasing or stopping shareholder dividends, renegotiating commercial terms with customers and suppliers or selling non-essential assets.

Based upon the assessment performed, the Directors confirm that they have a reasonable expectation the Group will be able to continue in operation and meet all liabilities as they fall due over the three year period covered by this assessment.

Non-financial and sustainability information statement

This Integrated Report contains a combination of financial and non-financial reporting throughout.

As required by sections 414CA and 414CB of the Companies Act 2006 (the Companies Act), the following non-financial and sustainability information can be found as stated in the following table.

These pages contain, where appropriate, details of our policies and approach to each matter.

	Principal risks on pages 68-78

Business and financial review

Our business

CCEP is a leading consumer goods group in Western Europe and the Asia Pacific region, making, selling and distributing an extensive range of primarily NARTD beverages. We make, move and sell some of the world's most loved brands – serving nearly 600 million consumers and helping over two million customers across 31 countries grow. We combine the strength and scale of a large, multinational business with an expert, local knowledge of the customers we serve and communities we support.

Note regarding the presentation of alternative performance measures

We use certain alternative performance measures (non-IFRS performance measures) to make financial, operating and planning decisions and to evaluate and report performance. We believe these measures provide useful information to investors and, as such, where clearly identified, we have included certain alternative performance measures in this document to allow investors to better analyse our business performance and allow for greater comparability. To do so, we have excluded items affecting the comparability of period over period financial performance, as described below. The alternative performance measures included herein should be read in conjunction with and do not replace the directly reconcilable IFRS measures.

The alternative performance measures in this document have been calculated in a manner consistent with those set forth in CCEP's 2022 Annual Report on Form 20-F filed with the SEC on 17 March 2023, and the title of certain non-IFRS measures has been updated to better reflect their comparable nature.

For purposes of this document, the following terms are defined:

"As reported" are results extracted from our consolidated financial statements.

"Comparable" is defined as results excluding items impacting comparability, which include restructuring charges, income arising from the ownership of certain mineral rights in Australia, gain on sale of sub-strata and associated mineral rights in Australia, net impact related to European flooding, gains on the sale of property, accelerated amortisation charges, expenses related to legal provisions, impact of a defined benefit plan amendment arising from legislative changes in respect of the minimum retirement age and acquisition and integration related costs. Comparable volume is also adjusted for selling days.

"FX neutral" is defined as period results excluding the impact of foreign exchange rate changes. Foreign exchange impact is calculated by recasting current year results at prior year exchange rates.

"Capex" or "Capital expenditures" is defined as purchases of property, plant and equipment and capitalised software, plus payments of principal on lease obligations, less proceeds from disposals of property, plant and equipment. Capex is used as a measure to ensure that cash spending on capital investments is in line with the Group's overall strategy for the use of cash.

"Comparable Free cash flow" is defined as net cash flows from operating activities less capital expenditures (as defined above) and net interest payments, adjusted for items that are not reasonably likely to recur within two years, nor have occurred within the prior two years. Comparable free cash flow is used as a measure of the Group's cash generation from operating activities, taking into account investments in property, plant and equipment, non-discretionary lease and net interest payments while excluding the effects of items that are unusual in nature to allow for better period over period comparability. Comparable free cash flow reflects an additional way of viewing our liquidity, which we believe is useful to our investors, and is not intended to represent residual cash flow available for discretionary expenditures.

"Comparable EBITDA" is calculated as Earnings Before Interest, Tax, Depreciation and Amortisation (EBITDA), after adding back items impacting the comparability of period over period financial performance. Comparable EBITDA does not reflect cash expenditures, or future requirements for capital expenditures or contractual commitments. Further, comparable EBITDA does not reflect changes in, or cash requirements for, working capital needs, and although depreciation and amortisation are non-cash charges, the assets being depreciated and amortised are likely to be replaced in the future and comparable EBITDA does not reflect cash requirements for such replacements.

"Net Debt" is defined as borrowings adjusted for the fair value of hedging instruments and other financial assets/liabilities related to borrowings, net of cash and cash equivalents and short-term investments. We believe that reporting net debt is useful as it reflects a metric used by the Group to assess cash management and leverage. In addition, the ratio of net debt to comparable EBITDA is used by investors, analysts and credit rating agencies to analyse our operating performance in the context of targeted financial leverage.

"ROIC" or "Return on invested capital" is defined as reported profit after tax attributable to shareholders divided by the average of opening and closing invested capital for the year. Invested capital is calculated as the addition of borrowings and equity attributable to shareholders less cash and cash equivalents and short-term investments.

Business and financial review continued

"Comparable ROIC" adjusts reported profit after tax for items impacting the comparability of period over period financial performance and is defined as comparable operating profit after tax attributable to shareholders divided by the average of opening and closing invested capital for the year. Comparable ROIC is used as a measure of capital efficiency and reflects how well the Group generates comparable operating profit relative to the capital invested in the business.

"Dividend payout ratio" is defined as dividends as a proportion of comparable profit after tax.

Forward-looking alternative performance measures

Within this report, we provide certain forward-looking non-IFRS financial information, which management uses for planning and measuring performance. We are not able to reconcile forward-looking non-IFRS measures to reported measures without unreasonable efforts because it is not possible to predict with a reasonable degree of certainty the actual impact or exact timing of items that may impact comparability throughout the year.

Unless otherwise stated, percentage amounts are rounded to the nearest 0.5%.

Key financial measures ^(A) Unaudited, FX impact calculated by recasting current year results at prior year rates	Year ended 31 December 2023							
	€ millions			% change vs prior year				
	As reported	Comparable	FX impact	As reported	Comparable	FX Impact	Comparable FX Neutral	
Revenue	18,302	18,302	(396)	5.5%	5.5%	(2.5%)	8.0%

(A) See Supplementary financial information - Items impacting comparability on page 90 for a reconciliation of reported to comparable results.

Financial highlights

In 2023, our focus on leading brands, strong customer relationships and solid in-market execution served us well. Successful implementation of our revenue and margin growth management initiatives, along with our dynamic price and promotion strategies across a broad pack offering, drove revenue per unit case growth of 8.5%. Though headline pricing levels were ahead of pre-pandemic levels, covering cost inflation, we continued to prioritise relevance and affordability. Despite inflationary pressures in commodities and manufacturing, higher concentrate costs and continued investment in our capabilities, we delivered strong operating profit growth. This translated into strong comparable free cash flow generation and enabled us to continue to return cash to shareholders, as demonstrated by the dividend paid in the year.

The net impact of 2023 performance on our key financial measures^(A) can be summarised as follows:

- Reported revenue totalled €18.3 billion, up 5.5% on a reported basis and 8.0% on a comparable and FX neutral basis.
- Volume was down 0.5% on both a reported and comparable basis. Revenue per unit case increased 8.5% on a comparable and FX neutral basis.
- Reported operating profit was €2.3 billion, up 12.0%, or up 13.5% on comparable and FX neutral basis.
- Reported diluted earnings per share were €3.63 or €3.71 on a comparable basis, up 12.0% on a comparable and FX neutral basis.
- Net cash flows from operating activities were €2.8 billion. Full year comparable free cash flow^(B) was €1.7 billion.

(A) See Supplementary financial information - Items impacting comparability on page 90 for a reconciliation of reported to comparable results.

(B) See Liquidity and capital management on pages 87-90 for a reconciliation between net cash flows from operating activities and comparable free cash flow.

Operational review

Revenue

Revenue totalled €18.3 billion, up 5.5% versus prior year on a reported basis, and 8.0% on a comparable and FX neutral basis. Revenue per unit case increased by 8.5% in 2023 on a comparable and FX neutral basis. Volume declined by 0.5% on a comparable basis.

Revenue in millions of €	Year ended 31 December 2023			
	As reported	Comparable	Reported % change	FX neutral % change
Europe	14,553	14,553	7.5%	8.5%
API	3,749	3,749	(1.0%)	5.5%
Total CCEP	18,302	18,302	5.5%	8.0%

Comparable volume – selling day shift CCEP

In millions of unit cases, prior period volume recast using current year selling days^(A)

	Year ended 31 December		
	2023	2022	% change
Volume	3,279	3,300	(0.5%)
Impact of selling day shift	n/a	—	n/a
Comparable volume – selling day shift adjusted	3,279	3,300	(0.5%)

(A) A unit case equals approximately 5.678 litres or 24 eight ounce servings, a typical volume measure used in our industry.

Volumes were down 0.5% on both a reported and comparable basis. In Europe, strong in-market execution alongside continued consumer demand in our developed markets drove volume growth of 0.5%, despite mixed summer weather. API volumes were down 5.0% versus 2022, mainly driven by softer consumer spending in Indonesia and strategic stock keeping unit (SKU) portfolio rationalisation, partly offset by continued underlying volume growth in Australia and New Zealand reflecting strong in-market execution.

Comparable volume by category Change versus prior period	Year ended 31 December		
	2023 % of total	2022 % of total	% change
Sparkling	85.0%	84.5%	—%
Coca-Cola™	59.0%	58.5%	—%
Flavours, mixers and energy	26.0%	26.0%	1.0%
Stills	15.0%	15.5%	(5.0%)
Hydration	7.5%	8.0%	(7.0%)
RTD tea, coffee, juices and other ^(A)	7.5%	7.5%	(3.0%)
Total	100.0%	100.0%	(0.5%)

(A) RTD refers to ready to drink; Other includes alcohol and coffee.

On a brand category basis in 2023, Coca-Cola trademark volume was flat versus 2022 on a comparable basis. This reflected the strong performance of Coca-Cola Zero Sugar, with volumes ahead of 2022 (up 4.0%) supported by targeted campaigns and innovation, including strong activation during the FIFA Women's World Cup.

Flavours, mixers and energy volume increased by 1.0% versus 2022 on a comparable basis. Energy volumes were up 14.0% versus 2022, led by Monster continuing to gain distribution and share through exciting innovation. Fanta grew volume, reflecting strong consumer demand supported by flavour extensions.

Hydration volume decreased by 7.0% versus 2022 on a comparable basis. Water volume decreased by 13.5%, reflecting strategic portfolio choices, such as SKU rationalisation in Indonesia, the exit of large PET packs in Germany (Vio) and Iberia (Aquabona), and Mount Franklin bulk packs in Australia. Sports volume increased by 9.0%, reflecting continued favourable consumer trends mainly benefiting Powerade across listed markets.

RTD teas, coffees, juices and other drinks volume decreased by 3.0% versus 2022 on a comparable basis. This reflects the strategic SKU rationalisation in Indonesia, partially offset by strong volume growth in Fuze Tea across Europe (up 23.5%). In the ARTD category, Jack Daniel's & Coca-Cola has performed well since launch and is now the number one ARTD value brand in Great Britain.

Sweden	398	(5.5%)	2.0%
Iceland	84	(3.5%)	1.0%
Total Europe	14,553	7.5%	8.5%

(A) Iberia refers to Spain, Portugal and Andorra.

(B) France refers to continental France and Monaco.

Reported revenue in Great Britain was up 5.0% versus 2022. Foreign exchange translation negatively impacted revenue growth by 1.5%. The increase in revenue was mainly driven by revenue per unit case growth reflecting the headline price increase implemented at the end of the second quarter and positive brand mix, including growth of 16.5% in Monster and the successful launch of Jack Daniel's & Coca-Cola. From a category perspective, Coca-Cola Zero Sugar, Fanta, Monster and Dr Pepper showed strong volume growth.

Reported revenue in Germany was up 12.5% versus 2022. Volume was positively impacted mainly by solid performance in the home channel versus prior year. Additionally, revenue per unit case growth was driven by the headline price increase implemented in the third quarter, as well as positive brand mix, with Monster volumes up 34%. From a category perspective, Coca-Cola Zero Sugar, Fanta, Fuze Tea and Powerade also showed strong volume growth.

Reported revenue in Iberia was up 9.5% versus 2022. This was mainly driven by continued growth in the AFH channel and revenue per unit case growth, positively impacted by the headline price increase implemented in the first quarter in addition to favourable mix. From a category perspective, Coca-Cola Zero Sugar, Sprite and Monster showed strong volume growth.

Reported revenue in France was up 11.0% versus 2022. This was mainly driven by revenue per unit case growth supported by the headline price increase implemented in the first quarter. From a category perspective, Fuze Tea, Monster, Sprite and Powerade continued to grow volume.

Reported revenue in the Northern European territories (Belgium, Luxembourg, the Netherlands, Norway, Sweden and Iceland) was up 0.5% versus 2022. Foreign exchange translation negatively impacted revenue growth by 3.5%. The increase in revenue was mainly driven by revenue per unit case growth as a result of the headline price increase implemented across our markets and favourable package mix led by the recovery of the AFH channel, including growth of 4.5% in small glass. From a category perspective, Monster, Powerade and Aquarius showed strong volume growth.

Revenue by segment: API

Revenue API

In millions of €, except per case data which is calculated prior to rounding. FX impact calculated by recasting current year results at prior year rates.

Cost of sales per unit case	3.61	3.36	7.5%

(A) Amounts represent restructuring charges related to business transformation activities.

(B) Amounts represent the incremental expense incurred offset by the insurance recoveries collected as a result of the July 2021 flooding events, which impacted the operations of our production facilities in Chaufontaine and Bad Neuenahr.

(C) Amounts relate to the establishment of a provision in connection with an ongoing labour law matter in Germany.

Cost of sales in Europe increased in part due to higher volume, up 0.5% versus 2022 on a comparable basis. Cost of sales per unit case increased as well, primarily driven by continued levels of commodity and manufacturing inflation. Sugar and aluminium were the main drivers of commodity inflation, partially offset by lower recycled PET and energy price levels as well as strong hedge coverage throughout the year. Headline price increases were implemented across our markets in response to these inflationary pressures and, alongside promotional optimisation, drove increased revenue per unit case, resulting in increased concentrate costs. Mix was also adverse, driven mainly by continued volume growth in energy and cans.

Cost of sales in API reflected lower volumes, down 5.0% versus 2022 on a comparable basis, partially offset by similar inflationary pressures on commodities, transportation and freight, and increased revenue per unit case, resulting in higher concentrate costs.

Operating expenses

Reported operating expenses totalled €4.5 billion, up 6.0% versus prior year on a reported basis, and 8.5% on a comparable and FX neutral basis.

(A) Amounts represent restructuring charges related to business transformation activities.

(B) Amounts represent costs incurred in connection with the proposed acquisition of CCBPI for the year ended 31 December 2023 as well as integration costs related to the acquisition of Coca-Cola Amatil Limited (CCL) recognised during the year ended 31 December 2022.

(C) Amounts relate to the establishment of a provision in connection with an ongoing labour law matter in Germany.

(D) Amounts represent accelerated amortisation charges associated with the discontinuation of the relationship between CCEP and Beam Suntory upon expiration of the current contractual agreements.

(E) Amounts represent the impact of a plan amendment arising from legislative changes in respect of the minimum retirement age.

Business and financial review continued

Operating expenses in Europe increased, driven by continued inflationary pressures on labour and haulage, as well as optimised investment in trade marketing expenses to support our top line growth. With a third of operating expenses being variable in nature, the uplift in volume reflecting resilient consumer demand and strong in-market execution also impacted our cost base.

Similar to Europe, comparable operating expenses in API also reflected inflationary pressures on labour and haulage, and increased investment in trade marketing expenses contributed to the growth in operating expenses.

Discretionary spend optimisation and the delivery of our previously announced multi-year efficiency programme, which has now been closed out, maintained our operating expenses as a percentage of revenue versus 2022.

Restructuring

Restructuring charges of €9 million and €85 million were recognised within reported cost of sales and reported operating expenses, respectively, for the year ended 31 December 2023, related principally to severance charges arising from various transformation initiatives.

Restructuring charges of €19 million and €144 million were recognised within reported cost of sales and reported operating expenses, respectively, for the year ended 31 December 2022, which are primarily attributable to €82 million of expense recognised in connection with the transformation of the full service vending operations and related initiatives in Germany.

Effective tax rate

The reported effective tax rate was 24% and 22% for the years ended 31 December 2023 and 31 December 2022, respectively.

The increase in the reported effective tax rate to 24% in 2023 (2022: 22%) is largely due to the increase in the UK statutory tax rate to a weighted average of 23.5% and the review of uncertain tax positions.

The comparable effective tax rate was 24% and 22% for the years ended 31 December 2023 and 31 December 2022, respectively.

(A) Amounts represent the tax impact of restructuring charges related to business transformation activities.

(B) Amounts represent the tax impact of the incremental expense incurred offset by the insurance recoveries collected as a result of the July 2021 flooding events, which impacted the operations of our production facilities in Chaudfontaine and Bad Neuenahr.

(C) Amounts represent the tax impact of a plan amendment arising from legislative changes in respect of the minimum retirement age.

(D) Amounts represent the tax impact of royalty income arising from the ownership of certain mineral rights in Australia. The royalty income was recognised as "Other income" in our consolidated income statement for the years ended 31 December 2023 and 31 December 2022, respectively.

(E) Amounts represent the tax impact of gains mainly attributable to the sale of property in Germany. The gains on disposal were recognised as "Other income" in our consolidated income statement for the year ended 31 December 2023.

(F) Amounts represent the tax impact related to the establishment of a provision in connection with an ongoing labour law matter in Germany.

(G) Amounts represent the tax impact of accelerated amortisation charges associated with the discontinuation of the relationship between CCEP and Beam Suntory upon expiration of the current contractual agreements.

Return on invested capital

For the year ended 31 December 2023, ROIC increased by 116 basis points on a reported basis, to 9.5%, versus 2022. On a comparable basis, ROIC increased by 120 basis points versus 2022, reflecting the increase in comparable operating profit and continued focus on capital allocation. Comparable ROIC is used as a measure of capital efficiency and reflects how well the Group generates comparable operating profit relative to the capital invested in the business.

(A) Reconciliation from reported to comparable operating profit is included in the Supplementary Financial Information - Items impacting comparability section on pages 91-92.

(B) Tax rate used is the comparable effective tax rate for the year (2023: 24%, 2022: 22%).

Liquidity and capital management

Liquidity

Liquidity risk is actively managed to ensure we have sufficient funds to satisfy our commitments as they fall due. Our sources of capital include, but are not limited to, cash flows from operating activities, public and private issuances of debt securities, and bank borrowings. We believe our operating cash flow, cash on hand and available short- and long-term capital resources are sufficient to fund our working capital requirements, scheduled borrowing payments, interest payments, capital expenditures, benefit plan contributions, income tax obligations and dividends to shareholders for both the next 12 months and the longer term period thereafter. Counterparties and instruments used to hold cash and cash equivalents are continuously assessed, with a focus on preservation of capital and liquidity. Based on information currently available, the Group does not believe it is at significant risk of default by its counterparties.

The Group has amounts available for borrowing under a €1.80 billion multi currency credit facility (2022: €1.95 billion) with a syndicate of 12 banks. This credit facility matures in 2029 and is for general corporate purposes and supporting the Group's working capital needs. Based on information currently available, there is no indication that the financial institutions participating in this facility would be unable to fulfil their commitments to the Group as at the date of this report. The Group's current credit facility contains no financial covenants that would impact its liquidity or access to capital. As at 31 December 2023, the Group had no amounts drawn under this credit facility.

Net cash flows from operating activities were €2,806 million in 2023, a decrease of 4.3%, or €126 million, from €2,932 million in 2022, reflecting the impact of increased revenue performance offset by cycling the impact of working capital improvement initiatives. These cash flows were primarily generated from our operations and included restructuring cash outflows of €104 million.

In 2023, we continued to monitor our investment in capital expenditure programmes, given continued uncertainty. Our 2023 capital spend on property, plant and equipment and capitalised software as part of our business capability programme was €812 million, compared to €603 million in 2022.

Comparable free cash flow generation for the year was strong, totalling €1,734 million, after adjusting for €89 million net of tax cash proceeds received in connection with the royalty income arising from the ownership of certain mineral rights in Australia. The decrease relative to our 2022 total of €1,805 million was largely driven by cycling the impact of working capital improvement initiatives.

Business and financial review continued

Comparable free cash flow

In millions of €

	Year ended 31 December	
	2023	2022
Net cash flows from operating activities	2,806	2,932
Less: Purchases of property, plant and equipment	(672)	(500)
Less: Purchases of capitalised software	(140)	(103)
Add: Proceeds from sales of property, plant and equipment	101	11
Less: Payments of principal on lease obligations	(148)	(153)
Less: Net interest payments	(124)	(130)
Adjust: Items impacting comparability ^(A)	(89)	(252)
Comparable free cash flow	1,734	1,805

(A) During the year ended 31 December 2023, the Group has received net of tax cash proceeds of €89 million in connection with the royalty income arising from the ownership of certain mineral rights in Australia. During the year ended 31 December 2022, €252 million of cash proceeds were received from the regional tax authorities of Bizkaia (Basque Region), in connection with the ongoing dispute in Spain regarding the refund of historical VAT amounts related to the period 2013-2016. The proceeds associated with these specific events have been included within the Group's net cash flows from operating activities for the years ended 31 December 2023 and 31 December 2022, respectively. Given the unusual nature and to allow for better period over period comparability, our comparable free cash flow measure excludes the cash impact related to these items.

In 2023, total borrowings decreased by €511 million. This was driven by repayments on third party borrowings of €1,159 million and payments on the principal and interest from lease obligations of €165 million, partially offset by proceeds from third party borrowings of €694 million. Movement as a result of fair value hedges resulted in an increase of borrowings by €40 million. Additions and other movements on leases further increased borrowings by €191 million. All this was partially offset by currency translation and other non-cash changes of €112 million.

The following bonds were repaid on maturity: US\$850 million 0.5% Notes 2023, repaid in May 2023; US\$25 million 4.34% Notes 2023 and US\$25 million 4.34% Notes 2023, both repaid in October 2023; and €350 million 2.625% Notes 2023, repaid in November 2023. In December 2023, the Group issued €700 million 3.875% Notes 2030 in connection with the proposed acquisition of CCBPI, which mature in December 2030.

Capital management

The primary objective of our capital management strategy is to ensure strong ratings and to maintain appropriate capital ratios to support our business and maximise shareholder value. Our credit ratings are periodically reviewed by rating agencies. We regularly assess debt and equity capital levels against our stated policy for capital structure. Our capital structure is managed and, as appropriate, adjusted in light of changes in economic conditions and our financial policy.

Credit ratings

As of 14 March 2024	Moody's	Fitch Ratings
Long-term rating	Baa1	BBB+
Outlook	Stable	Stable

Note: Our credit ratings can be materially influenced by a number of factors including, but not limited to, acquisitions, investment decisions and working capital management activities of TCCC and/or changes in the credit rating of TCCC. A credit rating is not a recommendation to buy, sell or hold securities and may be subject to revision or withdrawal at any time.

- (A) Net debt includes adjustments for the fair value of derivative instruments used to hedge both currency and interest rate risk on the Group's borrowings. In addition, net debt also includes other financial assets/liabilities relating to cash collateral pledged by/to external parties on hedging instruments related to borrowings.
- (B) Cash and cash equivalents as at 31 December 2023 and 31 December 2022, includes €42 million and €102 million, respectively, of cash in Papua New Guinea kina. Presently, there are government-imposed currency controls which impact the extent to which the cash held in Papua New Guinea can be converted into foreign currency and remitted for use elsewhere in the Group.
- (C) Short-term investments are term cash deposits with maturity dates when acquired of greater than three months and less than one year. These short-term investments are held with counterparties that are continually assessed with a focus on preservation of capital and liquidity. Short-term investments as at 31 December 2023 and 31 December 2022 includes €33 million and €49 million, respectively, of assets in Papua New Guinea kina, subject to the same currency controls outlined above.

Business and financial review continued

The ratio of net debt to comparable EBITDA is used by investors, analysts and credit rating agencies to analyse our operating performance in the context of targeted financial leverage, and so we provide a reconciliation of this measure. Net debt enables investors to see the economic effect of total borrowings, fair value impact of related hedges and other financial assets/liabilities, cash and cash equivalents, and short-term investments in total. Comparable EBITDA is calculated as EBITDA after adding back items impacting the comparability of year over year financial performance.

Comparable EBITDA does not reflect our cash expenditures, or future requirements for capital expenditures or contractual commitments. Further, comparable EBITDA does not reflect changes in, or cash requirements for, our working capital needs, and, although depreciation and amortisation are non-cash charges, the assets being depreciated and amortised are likely to be replaced in the future and comparable EBITDA does not reflect cash requirements for such replacements.

Net debt to comparable EBITDA

Comparable EBITDA in 2023 totalled €3.1 billion and increased relative to 2022 by €217 million. The increase versus 2022 was primarily driven by the increase in reported operating profit, reflecting increased revenue. The ratio of net debt to comparable EBITDA is 3.0 versus 3.5 in 2022, reflecting the decrease in net debt due to the repayment of borrowings and the increase in comparable EBITDA.

Dividends

In line with our commitments to deliver long-term value to shareholders, we paid a first half interim dividend of €0.67 per share in May 2023 and a second half interim dividend of €1.17 per share in December 2023, based on comparable diluted earnings per share, maintaining a payout ratio of approximately 50% in line with our dividend policy. For the year ended 31 December 2023, dividend payments totalled €841 million (2022: €763 million).

Share buyback

No Shares were repurchased in 2023 and 2022.

Chairman's introduction

On behalf of the Board, I am pleased to present the corporate governance report for the year ended 31 December 2023.

The report describes CCEP's corporate governance framework and procedures, and summarises the work of the Board and its Committees to illustrate how we have discharged our duties during the year.

It was another busy year, with the Board taking the opportunity to visit our colleagues in Australia and New Zealand and witness first hand, once again following the Board's visit to Indonesia in 2022, the positive integration and successful collaboration with our teams in API.

It was also announced in August 2023 that CCEP, together with AEV, had entered into a non-binding Letter of Intent to jointly acquire CCBPI, which we are delighted to say completed on 23 February 2024. The acquisition

of CCBPI solidifies CCEP's position as the world's largest Coca-Cola bottler by revenue.

Some key areas of focus and decisions of the Board during 2023 are outlined below.

Managing and mitigating the effects of the macroeconomic environment

2023 was another challenging year as a result of the effects of the war in Ukraine, the conflict in the Middle East and other economic factors. The Board provided strategic oversight and guidance to management to mitigate the impacts arising from commodity prices and inflationary pressures. Adaptability and agility during 2023 were key and will continue to be important into 2024.

Culture

The Board plays a critical role in shaping the culture of the Company by promoting growth focused and values-based conduct and aims to create a culture where everyone feels welcome to be themselves and that they are valued and belong. To monitor this during the year, the Board received outputs from engagement surveys, CoC reporting, diversity statistics and health and safety indicators.

Health, safety and wellbeing

The Board's key priority remained the safety of our people, customers and communities. A number of measures continued to be put in place to support the physical and mental wellbeing and health of our people. This included enhancing the number of wellbeing First Aiders to a new total of over 1,250.

The Board was also pleased to see an improvement in lost time incident rate.

[Read more in Great people](#) on page 20-26

ESG

The Board continues to recognise the growing importance of ESG to its stakeholders, including the focus on clear and quantifiable commitments. The Board supported the move during the year to an independent third party to provide limited assurance over selected This is Forward KPIs. The Board also approved a new water use ratio reduction target.

Board changes

A key aspect of my role as Chairman is ensuring that collectively the Board has the skills, knowledge, diversity and experience it requires. As announced on 14 December 2023, we are delighted to welcome Guillaume Bacuvier to the Board. He offers a wealth of relevant skills and experience and succeeds Garry Watts. Garry has been a strong and valued Board member, and we thank him for his invaluable contribution throughout his tenure.

[Read more about Board changes](#) on page 99 and 113-114

Board evaluation

We again conducted a review of the effectiveness of the Board and Board Committees, which helps to support their continuous improvement. The process was led by our Senior Independent Director and Company Secretary and involved the completion

of online surveys provided by Lintstock, tailored for the Board and each of its Committees.

The Board also approved the appointment of Dr Tracy Long of Boardroom Review to conduct the external evaluation in 2024. This is in line with the Code requirements to appoint an external evaluator at least once every three years.

[Read more about the outputs of the Board evaluation](#) on page 111

Digital and innovation

Digital and innovation continue to be key priorities for consideration by the Board and reflect the increasing role that technology plays in delivery to our customers. It is critical that our governance enables the Board to effectively shape and oversee progress against our technology strategy. In order to do this, CCEP has an established Digital Advisory Committee steered by management and with external experts as members.

The Board has access to the Committee papers and in addition receives first hand outputs of matters discussed through the CEO report. This is in addition to deep dives and KPIs in respect of the digital transformation programme. This enables the Board to have a clear understanding of the progress and challenges in implementation of strategy and the impact on key stakeholders.

Sol Daurella, Chairman

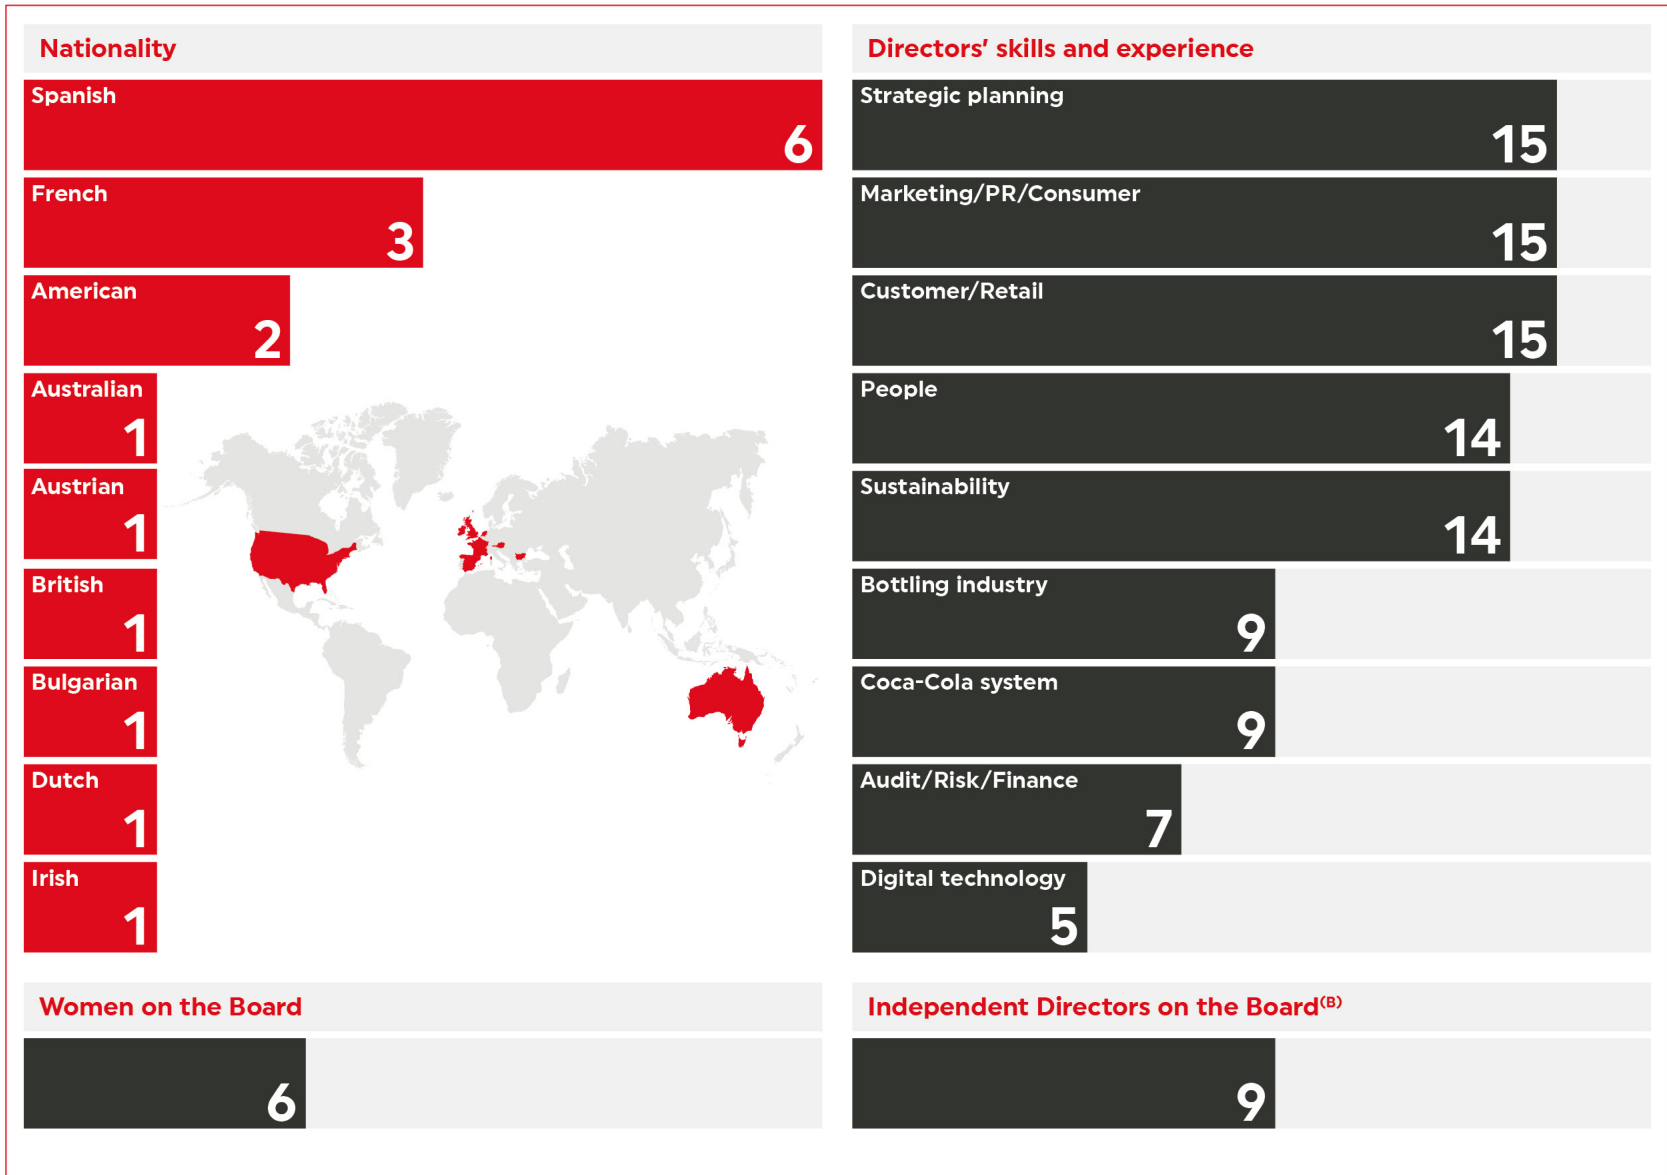

15 March 2024

Board of Directors

Our Board of Directors^(A) is diverse, experienced and knowledgeable, bringing together the skills needed for our long-term success in line with our skills matrix.

Total number of Directors on the Board

17

(A) Based on Directors as at 29 February 2024.
(B) Excluding the Chairman.

Board of Directors

- 1. Sol Daurella
- 2. Damian Gammell
- 3. Manolo Arroyo

Effective 31 December 2023, Garry Watts resigned from the Board.

2024 Board and Committee changes

Effective 1 January 2024:

- Guillaume Bacuvier was appointed to the Board
- Nicolas Mirzayantz was appointed to the Audit Committee

Senior management

1. Nik Jhangiani 2. Clare Wardle 3. José Antonio Echeverría
4. Peter Brickley 5. Stephen Lusk 6. Ana Callol 7. Víctor Rufart
8. Véronique Vuillod 9. Leendert den Hollander 10. John Galvin
11. Francesc Cosano 12. Stephen Moorhouse 13. Peter West

Senior management continued

Our senior management team and Damian Gammell together constitute the members of the Executive Leadership Team (ELT).

1

Nik Jhangiani

Chief Financial Officer (CFO)
Appointed **May 2016**

Nik has more than 30 years of finance experience, including 20 years within the Coca-Cola system, previously as Senior Vice President and CFO for Coca-Cola Enterprises, Inc. Nik started his career in New York at accountancy firm Deloitte & Touche before spending two years at Bristol-Myers Squibb as International Senior Internal Auditor. He then joined the Colgate-Palmolive Company in New York where he was appointed Group Financial Director for the Nigerian operations, before moving to TCCC in Atlanta. He is a Certified Public Accountant. Nik is also the culture and heritage inclusion executive sponsor at CCEP.

2

Clare Wardle

General Counsel and Company Secretary
Appointed **July 2016**

Clare leads legal, risk, compliance, security and company secretariat. Prior to joining CCEP, she was Group General Counsel and Company Secretary at Kingfisher plc, Commercial Director, General Counsel and Company Secretary at Tube Lines and held senior roles at the Royal Mail Group. She began her career as a barrister before moving to Hogan Lovells. Clare is the Senior Independent Director of The City of London Investment Trust plc and chair of the Royal British Legion Industries' Development Board. Clare is also the LGBTQ+ inclusion executive sponsor at CCEP.

3

José Antonio Echeverría

Chief Customer Service and Supply Chain Officer
Appointed **September 2019**

José Antonio leads CCEP's end to end supply chain and customer service. He is focused on creating a superior experience for our customers, while delivering an expanded and sustainable portfolio of drinks and packaging. He has been a part of the Coca-Cola system since 2005, serving in multiple roles including Vice President of Strategy and Transformational Projects for the Iberia business unit, and Vice President, Strategy and Coordination for Supply Chain across CCEP. José Antonio is also the disability inclusion executive sponsor at CCEP.

4

Peter Brickley

Chief Information Officer (CIO)
Appointed **November 2016**

Peter leads the business process and technology function at CCEP, including steering CCEP's investments in technology solutions. Peter has over 25 years' experience leading technology for global businesses including Heineken, Centrica and BAT. Before CCEP, he was Global CIO and Managing Director of Global Business Services at SABMiller. Peter is a trustee of the Brain and Spine Foundation and chair designate of the Chorley Building Society. Previously, Peter was chair of the Newbury Building Society.

5

Stephen Lusk

Chief Commercial Officer
Appointed **March 2021**

Stephen is responsible for advancing and shaping our commercial strategy and capabilities and driving our performance in the market and with customers. He works closely with business unit General Managers to build future commercial capability and with our franchise partners to bring their brands and products to life. Stephen has spent the last 30 years in the Coca-Cola system, holding senior positions in supply chain, sales and marketing and general management in Europe and Asia. Before joining CCEP, he led the Coca-Cola bottler in Singapore, Malaysia and Brunei.

6

Ana Callol

Chief Public Affairs, Communications and Sustainability (PACS) Officer
Appointed **January 2022**

Ana leads CCEP's sustainability strategy, effective communication with stakeholders and employees and engagement with media, policymakers and communities. Ana has worked within the Coca-Cola system for over 22 years in roles across the spectrum of marketing, commercial, sustainability, communications and public affairs. Her consumer and customer orientation and leadership experience helps CCEP accelerate its sustainability action plan, This is Forward, and strengthens the development and growth of PACS capabilities.

Senior management continued

7

Victor Rufart

Chief Integration Officer
Appointed **October 2016**

Victor leads business strategy and business transformation. Prior to joining CCEP, he was CEO of Coca-Cola Iberian Partners, S.A. and spent 25 years at Cobega, S.A. While with Cobega, S.A. he held a number of senior roles including Director of New Business, Head of Finance, advisor in the formation of the Equatorial Coca-Cola Bottling Company and Head of Tax Planning.

8

Véronique Vuillod

Chief People and Culture Officer
Appointed **November 2020**

Véronique heads CCEP's People and Culture function. Having joined the Coca-Cola system and bottling operations 25 years ago, she has worked in many human resources (HR) positions across business units, commercial and supply chain functions overseeing HR strategy and partnering with business leaders, as well as specialist positions in talent, people growth and engagement. She began her career as a management consultant with PricewaterhouseCoopers. She is an advocate for human centred workplaces, supports the promotion of inclusion and diversity, HR best practices in leadership and workplace, and innovations networks.

9

Leendert den Hollander

General Manager, France
and Northern Europe
Appointed **September 2020**

Leendert is responsible for CCEP's business units in France and Northern Europe, which includes our businesses across France, Benelux and Nordics. Previously, he was General Manager of Great Britain. Prior to CCEP, Leendert was CEO of Young's Seafood and Managing Director at Findus Group Ltd. Earlier in his career, Leendert spent 15 years at Procter & Gamble in senior marketing positions. Leendert is also the gender balance and equality executive sponsor at CCEP.

10

John Galvin

General Manager, Germany
Appointed **June 2022**

John leads CCEP's business unit in Germany. John joined the business in 2019 and, prior to his appointment as General Manager of Germany, held the role of Vice President, Sales and Marketing for Germany. Previously, John led Coca-Cola İçecek's business in Pakistan, and he began his career with Diageo. He has held sales, marketing and general management roles across Europe and Asia, and brings significant international experience and leadership in the beverage sector to CCEP.

11

Francesc Cosano

General Manager, Iberia
Appointed **May 2016**

Francesc leads CCEP's business unit in Spain, Portugal and Andorra. He was previously the Operations Director then Managing Director of Coca-Cola Iberian Partners, S.A. Francesc has been part of the Coca-Cola system for over 30 years and involved in a number of sales management positions, ultimately as Sales Director then Deputy General Manager. He has also worked as Regional Director for the Leche Pascual, S.A. Group, in Anglo Española de Distribución, S.A.

12

Stephen Moorhouse

General Manager, Great Britain
Appointed **September 2020**

Stephen is responsible for CCEP's business unit in Great Britain. He has over 25 years' experience in the Coca-Cola system, leading business operations and supply chain. Stephen has held a number of other senior executive roles throughout Europe, most recently as General Manager of Northern Europe. Prior to joining, he worked overseas for the Swire Group in the US and Asian Pacific region. Stephen is a member of the CEO Forum of the Institute of Grocery Distribution and of the British Soft Drinks Association. Stephen is also the multi-generational inclusion executive sponsor at CCEP.

13

Peter West

General Manager, Australia, Pacific
and Indonesia
Appointed **May 2021**

Peter was appointed Vice President and General Manager of the API business unit in May 2021, following the Acquisition. Peter originally joined CCL as Managing Director, Australian Beverages in April 2018. Prior to this role, Peter was Managing Director of Lion's Dairy and Drinks business in Australia and has held several senior roles at Arnott's Biscuits Ltd. and Mars Confectionery, including Regional President for Continental Europe for Mars Chocolate.

Corporate governance report

Governance framework

Our corporate governance framework is summarised below, with further detail provided on the following pages.

		> Delegation >			
Stakeholders Including our people, shareholders, franchisors, consumers, customers, suppliers and communities	Board of Directors Provides overall leadership and independent oversight of performance and is accountable to shareholders for the Group's long-term success	Audit Committee	Monitors the integrity of the Group's financial statements and results announcements, the effectiveness of internal controls and risk management, as well as managing the external auditor relationship and material CoC matters.	>	Read more about our Audit Committee on pages 117-124
		Environmental, Social and Governance (ESG) Committee	Oversees performance against CCEP's strategy and goals for ESG, reviews ESG risks facing CCEP, including health and safety and climate change risks, and the practices by which these risks are managed and mitigated, recommends to the Board for approval sustainability commitments and targets, and monitors and reviews public policy issues that could affect CCEP and CoC matters.	>	Read more about our ESG Committee on pages 125-126
		Nomination Committee	Sets selection criteria and recommends candidates for appointment as Independent Non-executive Directors, reviews Directors' suitability for election/re-election by shareholders, considers Directors' potential conflicts of interest, oversees development of a diverse senior management pipeline and Director succession, and oversees wider people matters for the Group, including culture, diversity, succession, talent and leadership.	>	Read more about our Nomination Committee on pages 113-116
		Remuneration Committee	Recommends remuneration policy and framework to the Board and shareholders, recommends remuneration packages for members of the Board to the Board, approves remuneration packages for senior management, reviews workforce remuneration and related policies and principles, and governs employee share schemes.	>	Read more about our Remuneration Committee on pages 127-143
		Affiliated Transaction Committee (ATC)	Has oversight of transactions with affiliates and makes recommendations to the Board (affiliates are holders of 5% or more of the securities or other ownership interests of CCEP).		
		Ad hoc committees	<ul style="list-style-type: none"> • Disclosure Committee • Results and Dividend sub committee 		
		< Accountability <			
				Culture Embodied by our CoC and ways of working Strategy built on three pillars: great brands, great people, great execution. Done sustainably.	
				CEO Empowered by authority of the Board to put agreed strategy into effect and run CCEP on a day to day basis	
				ELT Team members with defined areas of responsibility support and report to the CEO	
				People 32,000 ^(A) employees making, selling and distributing great brands	

(A) As at 31 December 2023

Corporate governance report continued

Statement of compliance

The governance framework of the Company is set out in its Articles of Association (the Articles) and the Shareholders' Agreement. These provide a high level framework for the Company's affairs, governance and relationship with its stakeholders including its shareholders. The Articles, Shareholders' Agreement and frequently asked questions about the governance framework are available on the Company's website at cocacolaep.com/about-us/governance.

Statement of compliance with the 2018 UK Corporate Governance Code (the Code)

We follow the Code on a comply or explain basis. CCEP is not subject to the Code, as it has a standard listing of ordinary shares on the Official List. However, we have chosen to comply with the Code where possible and explain areas of non-compliance to demonstrate our commitment to good governance as an integral part of our culture. Save as set out below, CCEP complied with the Code during the year ended 31 December 2023.

A copy of the Code is available on the Financial Reporting Council's (FRC) website: www.frc.org.uk/library/standards-codes-policy/corporate-governance/uk-corporate-governance-code/

Chairman

Code provision 9

The Chairman, Sol Daurella, was not considered independent on her appointment. However, we benefit from her vast knowledge of, and long-term commitment to the Coca-Cola system, and her extensive experience and leadership skills, gained from her roles as director and CEO of large public and private institutions across many different sectors.

Annual re-election

Code provision 18

Sol Daurella, the Chairman, will not be subject to re-election during her nine year tenure following the completion of the merger in 2016. This recognises the importance of her extensive experience and knowledge of the beverage industry, and the significant shareholding of Olive Partners, S.A. (Olive Partners) in the Company.

CCEP follows governance best practice, with all other Directors standing for re-election annually at the Annual General Meeting (AGM).

Remuneration

Code provision 32

The Remuneration Committee is not composed solely of INEDs, although it comprises a majority of INEDs. The Shareholders' Agreement requires that the Remuneration Committee includes at least one Director nominated by:

- Olive Partners, for as long as it owns at least 15% of the Company
- European Refreshments Unlimited Company (ER), a subsidiary of TCCC, for as long as it owns at least 10% of the Company

The Remuneration Committee, and its independent Chairman, benefit from the nominated Directors' extensive understanding of the Group's market.

Remuneration

Code provision 33

The Remuneration Committee is not solely responsible for setting the remuneration of the Chairman and CEO. Instead, the Board (excluding any Director whose remuneration is linked to the decision) determines their remuneration, including the Non-executive Directors (NEDs), on the recommendation of the Remuneration Committee and following rigorous analysis and debate. To date, the Board has followed all of the Remuneration Committee's recommendations. All executives recuse themselves from decision making when discussing executive remuneration.

Differences between the Code and the Nasdaq corporate governance rules (the Nasdaq Rules)

The Company is classed as a Foreign Private Issuer (FPI). It is therefore exempt from most of the Nasdaq Rules that apply to domestic US listed companies, because of its voluntary compliance with the Code. Under the Nasdaq Rules, the Company is required to disclose differences between its corporate governance practices and those followed by domestic US companies listed on Nasdaq. The differences are summarised below.

Director independence

The Nasdaq Rules require a majority of the Board to be independent whilst the Code requires at least half of the Board (excluding the Chairman) to be independent. The independence of CCEP's NEDs is reviewed by the Board on an annual basis, taking into account the guidance contained in the Code and the criteria established by the Board. It has been determined that a majority of the Board is independent under the Code and INED criteria, without explicitly taking into consideration the independence requirements outlined in the Nasdaq rules.

Corporate governance report continued

Board Committees

CCEP has a number of Committees whose purpose and composition are broadly comparable to the requirements of the Nasdaq Rules for domestic US companies. However, other than the Audit Committee, committee members are not all INEDs, although in all cases the majority are. Each committee has its own terms of reference (broadly equivalent to a charter document) which are reviewed annually and can be found on our website at cocacolaep.com/about-us/governance/committees.

Audit Committee

More information about the Audit Committee is set out in its report, including compliance with the requirements of Rule 10A-3 under the US Securities Exchange Act of 1934, as amended, and Rule 5605(c)(2)(A) of the Nasdaq Rules.

The Audit Committee comprised only INEDs (who are also deemed independent under the Nasdaq Rules). However, the responsibilities of the Audit Committee (except for applicable mandatory responsibilities under the Sarbanes-Oxley Act) follow the Code's recommendations rather than the Nasdaq Rules, although they are broadly comparable. One of the Nasdaq's similar requirements for the Audit Committee states that at least one member of the Audit Committee should be a financial expert.

The Board determined that Dessi Temperley, John Bryant and Dagmar Kollmann possess such expertise and are therefore deemed financial experts as defined in Item 16A of Form 20-F. It was further determined that none of the Audit Committee members had participated in the preparation of the financial statements of the Company or any of its subsidiaries.

Code of Conduct

The Nasdaq Rules require relevant domestic US companies to adopt and disclose a code of conduct applicable to all Directors, officers and employees. The CCEP CoC applies to all employees, Directors and the senior financial officers of the Group. Our CoC seeks to ensure that we act with integrity and accountability in all our business dealings and relationships. Our policies also drive compliance with relevant legislation. The CoC covers issues such as anti-bribery, data protection, environmental regulation, human rights, health, safety, wellbeing and respect for others. It aligns with the UN Global Compact, the US Foreign Corrupt Practices Act, the UK Bribery Act, the Code, the EU General Data Protection Regulation, the Spanish and Portuguese Criminal Codes and Sapin II.

We also expect all third parties who work on our behalf to act in an ethical manner consistent with our CoC and to comply with our SGPs.

All employees are required to undergo CoC training, which is also a part of the induction process for new employees. Training on specific topics related to their roles is provided where needed. Our CoC specifically calls out manager responsibilities and includes a matrix to help with decision making and guidance on situations such as bullying and harassment.

If the Board amends or waives the provisions of the CoC, details of the amendment or waiver will appear on the website. No such waiver or amendment has been made or given to date.

 See our CoC at view.pagetiger.com/code-of-conduct-policy

CCEP considers that the CoC and related policies address the Nasdaq Rules on the codes of conduct for relevant domestic US companies.

Shareholder approval of equity compensation plans

The Nasdaq Rules for domestic US companies require that shareholders must be given the opportunity to vote on all equity compensation plans and material revisions to those plans. CCEP complies with UK requirements that are similar to those of the Nasdaq Rules.

NED meetings

The Nasdaq Rules require INEDs to meet without the rest of the Board at least twice a year. The Code requires NEDs to meet without the Chairman present at least once annually to appraise the Chairman's performance. The NEDs have regular meetings without management present and, in 2023, there were two separate meetings of INEDs.

Corporate governance report continued

Board leadership and company purpose

Role of the Board

The Board is primarily responsible for the Group's strategic plan, risk appetite and oversight, systems of internal control and corporate governance policies, to ensure the long-term success of the Group, underpinned by sustainability.

> Read more about the Board's role in risk oversight in Principal risks on pages 68-78 **TCFD** on pages 48-60 **and the Audit Committee report** on pages 118-124

To retain control of key decisions and ensure there is a clear division of responsibilities, there is a formal schedule of matters reserved to the Board, which sets out the structure under which the Board manages its responsibilities, and provides guidance on how it discharges its authority and manages its activities. Reserved matters include strategic decisions, approval of annual and long-term business plans, suspension, cessation or abandonment of any material activity of the Group, and material acquisitions and disposals.

The Board, through the Nomination Committee, assesses and monitors the Group's culture to ensure it aligns with the Group's purpose, values and strategy set by the Board.

> Read more about our strategy on page 14 **and read our Nomination Committee's report** on pages 114-116

Table 1
Roles on the Board

Role	Responsibilities
Chairman	<ul style="list-style-type: none"> Operating, leading and governing the Board Setting meeting agendas, managing meeting timetables Promoting a culture of open debate between Directors and encouraging effective communication during meetings Creating the conditions for overall Board and individual Director effectiveness
CEO	<ul style="list-style-type: none"> Leading the business Implementing strategy approved by the Board Overseeing the operation of the internal control framework
SID	<ul style="list-style-type: none"> Advising and supporting the Chairman by acting as an alternative contact for shareholders and as an intermediary to NEDs
NEDs	<ul style="list-style-type: none"> Providing constructive challenge, strategic guidance, external insight and specialist advice to the Board and its Committees Holding management to account Offering their extensive experience and business knowledge from other sectors and industries
Company Secretary	<ul style="list-style-type: none"> Assisting the Chairman by ensuring that all Directors have full and timely access to relevant information Advising the Board on legal, compliance and corporate governance matters Organising the induction and ongoing training of Directors

Stakeholders

The Board recognises the importance of stakeholders to CCEP – both their inputs to our business and our impact on them. We use a matrix to help ensure Directors have the right engagement and information to enable them to consider stakeholders' interests in their decision making.

> Read more about stakeholders on pages 61-64

Training and development

To ensure constructive challenge to management by the Board, training and development opportunities are provided to the Board in a wide range of topical areas in multiple formats, including:

- Briefings – to focus on matters of interest to CCEP such as innovation as well as on relevant ESG, commercial, legal and regulatory developments
- Deep dive sessions – to address requests from Directors to better understand CCEP or the environment in which it operates such as its markets
- Site visits – to Group businesses, production facilities and commercial outlets to enhance knowledge of CCEP operations and meet employees, suppliers and customers
- External speakers – to receive insights from experts and engage with stakeholders

> Some highlights from the programme for 2023 are set out on page 108

Corporate governance report continued

Board activities

Key topics discussed by the Board during 2023

The Chairman sets the Board agenda, which consists of discussion topics described in the table adjacent that align with its strategic objectives towards its aim of promoting the long-term success of CCEP.

In addition, at Board meetings the Directors receive reports back from Committee Chairs, business and commercial updates from the CEO (including on digital, technology and innovation), finance reports from the CFO, reports covering governance and regulatory updates from the Company Secretary, and updates on business performance and initiatives from other key senior executives.

Strategy was also a key focus of discussions, and the Board considered and debated consumer trends focusing on developments in AI, the status of the current global market, performance and opportunities in the API region and the retail landscape.

Link to strategy

Great brands

Great people

Great execution

Done sustainably

Area of focus	Discussion topics	Strategic objectives
Risk	• Assessment of market uncertainty, sanctions, risks and increased costs as a result of the war in Ukraine, Middle East and other economic factors	
	• Changes to retail environments and customer challenges	
	• Review of competitors, global market analysis and insights	
People	• People strategy, including focus on employee wellbeing, employee engagement, talent, learning and development and future ready leadership	
	• Promoting employee inclusion, diversity and equity	
	• Review of wider workforce remuneration	
	• Prioritising the safety of our people by piloting new technologies	
Sustainability	• Continual monitoring of our progress against our sustainability strategy	
	• Progression of our packaging initiatives	
	• Created new sustainable partnerships	
	• Consideration of the expanding framework of sustainability reporting requirements	
Commercial	• Progress towards improving route to market	
	• Expanding presence in API by exploring exciting new opportunities in the region, as evidenced by the acquisition of CCBPI	
	• Increasing consumer choice by growing our portfolio of products into exciting new categories such as alcoholic ready to drink (ARTD)	
	• Development of relationship with TCCC and other franchisors	
Finance	• Approval of capital expenditure and dividend payments	
	• Support for developments in innovation with CCEP Ventures, our dedicated investment fund	
	• Progress made on the implementation of our digital transformation programme	
	• Monitoring pricing challenges and opportunities in the current market	

Corporate governance report continued

Board activities

This timeline highlights some of the training and development opportunities received by the Board in 2023.

March 2023

Market and production facility tours in Sydney, Australia and Auckland, New Zealand

During the March 2023 Board meeting, Board members attended tours of the Northmead production facility and the market in the Paramatta region of the city, gaining insights into the wider business in Australia, as well as a market visit in Auckland, New Zealand.

April 2023

Opening of new office in Sofia, Bulgaria

Board members and senior management attended the opening of the new, state of the art office in Sofia. The agenda for this visit included an ID&E lunch with local employees.

Image: New Sofia office being officially opened by Chairman, Sol Daurella, and CFO, Nik Jhangiani

May 2023

Great Britain Business Unit (BU)

Board members received a deep dive into the Great Britain BU during the May Board meeting. To supplement the insights received in this session, they also took part in a local market visit.

May 2023

Sidcup production facility tour

As part of their induction programmes, board members Nicolas and Mary were welcomed to the Sidcup production facility in GB.

Image: Colleagues with Board members, Nicolas Mirzayantz and Mary Harris, during their visit

September 2023

Artificial Intelligence (AI)

The Board received an informative session on the recent revolutions in the capabilities of AI and innovation, including its potential uses, risks and impacts on CCEP during the September strategy meeting.

September 2023

API

As a part of the September strategy session, Board members received a deep dive into API gaining insights on the territory from members of senior management. Part of this session focused on the market in the Philippines to provide insight to the Board ahead of the joint acquisition of CCBPI.

October 2023

Plastics and packaging

Board members received a deep dive into our packaging strategy, which included updates on refillable packaging and packageless to support delivery of CCEP's sustainability action plan, This is Forward.

October 2023

Seville production facility tour

The October Board meeting included a visit to the Coca-Cola Rinconada production facility in Seville, Spain.

Image: Board member, José Ignacio Comenge, and Chief Customer Service and Supply Chain Officer, José Antonio Echeverría, during visit

December 2023

Digital tools demo

Board members were given demonstrations of multiple digital tools used within the business, including MyCCEP.com and Customer Demand and Supply Planning (CDSPP).

Corporate governance report continued

Division of responsibilities and conflicts of interest

Governance structure

The Board, led by the Chairman, is responsible for the leadership of the Group. While both the Executive Director and NEDs have the same duties and constraints, they have different roles on the Board (see Table 1 on page 106). There is a clear, written division of responsibilities between the Chairman and the CEO. The Board has approved a framework of delegated authority to ensure an appropriate level of Board contribution to, and oversight of, key decisions and the management of daily business that support its long-term sustainable success. This framework has been designed to enable the delivery of the Company's strategy and is outlined in our governance framework on page 103.

The Board delegates certain matters to its Committees. Each Committee has its own written terms of reference, which are reviewed annually. These are available at cocacolaep.com/about-us/governance/committees.

The CEO with the ELT manages the day to day business. All decisions are made in accordance with our chart of authority, which defines our decision approval requirements and ensures that all relevant parties are notified of decisions impacting their area of responsibility.

Board support

Board meetings are generally scheduled at least one year in advance, with ad hoc meetings arranged to suit business needs. Meetings are held in a variety of locations, reflecting our engagement with all aspects of our international business.

The agenda of Board meetings follow our annual Board programme. This sets out the standing items at each meeting, such as periodic activities (including results and AGM documentation), business plan and the assessment of Board evaluation results.

Before the Board meeting, the Chairman, CEO and Company Secretary agree the final agenda. This covers discussion items such as the status of ongoing projects and stakeholder considerations. Comprehensive briefing papers are circulated electronically to all Directors, to allow time to review the matters which are to be discussed.

Throughout the year, Directors have access to the advice and services of the Company Secretary and independent professional advice, at the Company's expense.

Independence of Non-executive Directors

The Board reviewed the independence of all the NEDs against the Code and also considered the requirements of SEC Rule 10A-3 in relation to the Audit Committee.

It determined that Guillaume Bacuvier, John Bryant, Nathalie Gaveau, Mary Harris, Thomas H. Johnson, Dagmar Kollmann, Nicolas Mirzayantz, Mark Price, and Dessi Temperley are independent and continue to make effective contributions.

The Board recognises that the remainder of CCEP's NEDs, including the Chairman, cannot be considered independent. However, they continue to demonstrate effective judgement when carrying out their roles and are clear on their obligations as Directors, including under section 172 of the Companies Act.

Our CEO, Damian Gammell, is not considered independent because of his executive responsibilities to the Group.

Consequently, the majority of the Board are independent.

Conflicts of interest

The UK Companies Act 2006 (the Companies Act), the Articles and the Shareholders' Agreement allow the Directors to manage situational conflicts (situations where a Director has an interest that conflicts, or may conflict, with our interests). The ATC exists to oversee transactions with affiliates. The Nomination Committee considers issues involving potential situational conflicts of interest of Directors. Each Director is required to declare any interests that may give rise to a situational conflict of interest with CCEP on appointment and subsequently as they arise. Directors are required to review and confirm their interests annually. The Board is satisfied that the systems for the reporting of situational conflicts are operating effectively.

Corporate governance report continued

Board and Committee meetings

The Board held seven formal meetings during 2023, with additional ad hoc meetings with Board and Committee members held in line with business needs. Directors are expected to attend every meeting. If a Director is unable to attend, the relevant papers are provided to that Director in advance so that comments can be given to the Chairman or Committee Chairman, as applicable, who relays them at the meeting. Afterwards, the Chairman or Committee Chairman, as applicable, also briefs the Director on the matters discussed.

Attendance during 2023 is set out in Table 2. The Chairman attends most Committee meetings. There is cross membership between the Audit Committee and Remuneration Committee. This helps ensure remuneration outcomes align with the underlying performance of CCEP. This reflects CCEP's joined up approach to investing in and rewarding our people.

Table 2

Meeting attendance by Board and Committee members^(A)

(A) The maximum number of scheduled meetings in the period during which the individual was a Board or Committee member is shown in brackets.

(B) Nominated pursuant to the Articles of Association and terms of the Shareholders' Agreement.

(C) Jan Bennink, Christine Cross and Brian Smith each stepped down from the Board effective 24 May 2023. Garry Watts stepped down from the Board effective 31 December 2023.

(D) Effective 24 May 2023, Mary Harris, Nicolas Mirzayantz and Nancy Quan were appointed to the Board.

(E) Effective 24 May 2023, Nathalie Gaveau was appointed as a member of the Affiliated Transaction Committee.

(F) Effective 24 May 2023, Mary Harris was appointed as a member of the Remuneration and Nomination Committees.

(G) Effective 24 May 2023, Nancy Quan and Nicolas Mirzayantz were appointed to the ESG Committee.

(H) Brian Smith was unable to attend the March 2023 Board and ESG Committee meetings due to other pre-agreed commitments.

(I) One meeting was a joint meeting of the Audit Committee and ESG Committee held in February 2023.

(J) Chairman of the Committee.

Corporate governance report continued

Composition, succession and evaluation

Board diversity and composition

The composition of the Board and its Committees is set out on page 110. As their biographies on pages 95–99 show, our Board members have a range of backgrounds, skills, experience and nationalities, demonstrating a rich cognitive diversity.

> See an overview of our Directors' skills and experience on page 93

> Read more about the Group's approach to ID&E on page 23

Our commitment to diversity begins at the top, with clear leadership from our Board, and is embedded at every level of our business through our, Board Diversity Policy, Inclusion, Diversity and Equity Policy, This is Forward and the CoC.

> Read more about Board succession and Board diversity on pages 113–116

Board evaluation

In line with best practice, we conduct an external Board evaluation at least once every three years. We did this last in 2021 and have begun the process of conducting the external evaluation in 2024.

Following the strong feedback and outputs following the internal 2022 Board evaluation, it was determined that a similar process was appropriate for 2023. The Board followed the Chartered Governance Institute's Principles of Good Practice for Listed Companies when appointing Lintstock to support in the questionnaire-based exercise, alongside interviews with all Directors by the SID. Lintstock has no other connection with CCEP or any individual Director.

The questionnaire and interview responses were collated and reports produced on the performance and effectiveness of the Board, each Committee and the Directors. The Board discussed the results openly and constructively.

Overall, the Board confirmed that it continued to perform effectively. Board culture, its relationship with senior management and Board support were highly rated, but some areas for further improvement were identified. These are set out in Table 3.

Table 3
2023 Board evaluation findings and actions

	Disruptive technologies	Strategic topics	Emerging markets	ESG
2023 findings	Show preparedness for the impacts of disruptive technologies and how to harness them.	Review Board focus on strategic topics including in relation to AI, competition and consumer insights.	Demonstrate capability and skill in emerging markets, including measuring and assessing success in existing territories.	Provide additional insights into ESG topics such as sweeteners, carbon reduction, and water resources.
Actions undertaken in 2023	The Board received an overview of the digital transformation programme in September 2023. Board training sessions on innovation and the future of frontline have been scheduled for 2024.	Board meetings throughout the year, as well as the Board strategy session held in September 2023, provided the Board with greater visibility of competitor analysis and consumer trends. The Strategy meeting also included a session on AI.	Board members received deep dive sessions on Indonesia, the Philippines and inorganic M&A during the strategy meeting in September 2023, which provided detailed insights into the markets, including risks and opportunities.	The Board received a deep dive into plastics and packaging as part of the October 2023 Board meeting. The ESG Committee received a presentation about sweeteners in May 2023.

Corporate governance report continued

Election and re-election of Directors

The Board has determined that the Directors, subject to continued satisfactory performance, shall stand for election or re-election at the May 2024 AGM with the exception of the Chairman, as explained on page 104. The Board is confident that each Director will carry on performing their duties effectively and remain committed to CCEP.

The NED terms of appointment are available for inspection at the Company's registered office and at each AGM. Among other matters, these set out the time commitment expected of NEDs. The Board is satisfied that the other commitments of all Directors do not interfere with their ability to perform their duties effectively.

 See the significant commitments of our Directors in their biographies on pages 95-99

Audit, risk and internal control and Remuneration

Disclosures of compliance with provisions of the Audit, risk and internal control and Remuneration sections of the Code are located in this Integrated Report. These disclosures include descriptions of the main features of CCEP's internal control and risk management systems as required by Rule 7 of the Disclosure Guidance and Transparency Rules (DTRs). Table 4 sets out where each respective disclosure can be found.

Annual General Meeting

The AGM continues to be a key date in our annual shareholder calendar.

The 2024 AGM of the Company will be held on 22 May 2024. The Notice of AGM will set out further details and a full description of the business to be conducted at the meeting. This will be available on our website from the time of its posting to shareholders in April 2024.

The Chairman, SID and Committee Chairmen are available to shareholders for discussion throughout the year to discuss any matters under their areas of responsibility, by contacting the Company Secretary.

At our 2023 AGM, we were pleased that all resolutions were passed by >80%, save for the resolution relating to the whitewash under Rule 9 of the Takeover Code, which permits buyback authorities without obliging Olive Partners to make a general offer for the entire issued share capital of the Company. The resolution provides CCEP with the mechanics and flexibility to return cash to shareholders by buying back shares and thus ultimately increasing shareholder value. Since the AGM, CCEP has continued to engage where appropriate with its shareholders to address any concerns they may have. The Company has also communicated with Institutional Shareholder Services on their standing policy to recommend a vote against a Rule 9 waiver which we believe may be influencing investor decisions in this regard. The Board maintains that the resolution remains in the best interest of all stakeholders and is comforted by the security of CCEP's governance arrangements in protecting the Company's position.

Sol Daurella,
Chairman

15 March 2024

Nomination Committee Chairman's letter

We want CCEP to be a great place to work, with a strong and inspiring workplace culture."

Dear Shareholder

I am pleased to report on the work of the Nomination Committee during 2023.

People and Culture

The Committee continued to play an important role in overseeing CCEP's approach to culture and its people. This was facilitated through updates from management on ID&E and wellbeing initiatives, talent management and capabilities for CCEP's next generation technology architecture. In particular, in 2023 the Committee was pleased to receive regular updates on CCEP's inclusivity commitments, with the Company making progress towards all targets, including the aim to have 45% women in management roles and

above by 2030. We also met our commitment to have 10% of the workforce with self-declared disabilities^(A).

The Committee also heard about how the Company was accelerating its great leadership through the development of programmes to enhance the skills of its leaders to better support their people. Insights were provided into how CCEP continued to embed its "Everyone's Welcome" philosophy to encourage and implement an inclusive culture and ensure engagement from all levels of the business up to the senior leadership.

In addition, the Committee received data and actionable insights about our people from the Group's employee engagement survey and monitored progress through a regular scorecard.

[Read more about our people](#) on pages 20-26

Board succession

A key focus of the Committee is to ensure that the Board and its Committees have the right composition and balance of skills, experience, knowledge and diversity.

As announced on 14 December 2023, we welcomed Guillaume Bacuvier to the Board with effect from 1 January 2024 and announced the resignation of Garry Watts. I would like to thank Garry for his invaluable contribution to CCEP. When considering the appointment, the Committee noted the existing skills on the Board and the desirability of

expertise in consumer behaviours and strategy, as well as significant experience in API and technology, all of which Guillaume brings. In addition, the Committee determined that Guillaume had sufficient time to commit to the Board and no conflicts of interest.

The Committee also reviewed the composition of the Board Committees, and as a result Nicolas Mirzayantz succeeded Garry as member of the Audit Committee with effect from 1 January 2024.

[Read more about succession planning](#) on page 114 and [Committee changes](#) on page 99

INED induction

The Committee reviewed the arrangements for the induction of the new INEDs appointed in 2023, Nicolas and Mary, and for Guillaume, appointed in 2024.

[Read more about Nicolas' and Mary's inductions](#) on page 115

Board and Committee effectiveness

The Committee completed a questionnaire to assess its effectiveness in 2023 and determined that the Committee continued to operate effectively. The Committee agreed a number of outputs from the review, including further focusing on the executive talent pipeline.

Availability to shareholders

I am available to shareholders throughout the year to answer any questions on the work of the Committee.

Thomas H. Johnson,
Chairman of the
Nomination Committee

15 March 2024

Looking forward to 2024

- Continue to focus on securing a strong pipeline of INED candidates to firstly enhance the Board's diversity of skills, and secondly ensure an effective induction process for Guillaume Bacuvier and training for all Directors
- Monitor and drive relevant This is Forward people and societal goals
- Assess and monitor the strategy for talent management to grow our capabilities
- Continue to support management to foster a culture that supports the physical and mental safety of all our people, and develops them effectively to meet business needs and drive an engaged workforce passionate about our business
- Ensure continued focus on employee voices, and inclusion and diversity policies and goals

(A) Calculated based on the total number of employees responding to our 2023 voluntary inclusion survey and the number of employees self-declaring as having a disability.

Nomination Committee report

Nomination Committee role

The key duties and responsibilities of the Committee are set out in its terms of reference. These are available at cocacolaep.com/about-us/governance/committees and include:

- Reviewing and making recommendations to the Board on Board appointments, re-elections, and Board and Committee composition
- Overseeing the evaluation of the Board
- Ensuring and overseeing succession planning of the Board and senior management talent pipeline
- Assessing and monitoring culture and ensuring effective engagement with our people

Activities of the Nomination Committee during the year

Table 1 on page 115 sets out the matters considered by the Committee during 2023. Further detail is provided in this report. The Committee met six times during the year.

 [See details of attendance at meetings on page 110](#)

Board composition and diversity

As delegated by the Board, the Committee continuously keeps the composition of the Board under review, aiming to maintain a well-balanced Board with a mix of individuals who bring a wide range of expertise, experience and diversity to align with the Group's long-term strategy.

Board Diversity policy

The Board and the Nomination Committee recognise the benefits that diverse characteristics have to offer to all aspects of governance. In 2023, the Board's Diversity policy was updated to make it clear that, in respect of appointments not only to the Board, but to Committees that it recognises the benefits of having diversity with regard to a wide range of characteristics such as age, gender, ethnicity, sexual orientation and disability, as well as educational and professional background. The policy drives balance and alignment with CCEP's purpose, strategy and values, through agreed principles and targets which reflect the measures the Board will take when considering its own membership and approach.

The Board has set an overall target within the policy of at least 33% of the Board to be represented by women by 2023 with a longer-term aim of 40%, in line with the FTSE Women Leaders. In addition, we aim to have at least one Director from a minority ethnic background in line with the Parker Review.

 [See our diversity policy including INED selection criteria at \[cocacolaep.com/about-us/governance\]\(https://cocacolaep.com/about-us/governance\)](#)

In respect of the Listing Rule 14.3, as at 31 December 2023, we remain pleased to report that we have met the target to have at least one Board leadership position held by a woman (the Chairman) and one Director from an ethnic minority background. Unfortunately, we have not met the target of 40% representation by women on the Board but will, with our stakeholders, work towards that as a longer-term aim. The Board was pleased that representation by women on our Board increased to 35.3% in 2023 from 29.4% in 2022, and will remain mindful of the Listing Rule requirements during its next INED recruitment process, whilst also considering the necessary skills and experience required on the Board at such time.

Our Board-level diversity statistics are disclosed in accordance with the Nasdaq Rules in Table 2 and in accordance with Listing Rules (LR) in Table 3 and Table 4 on page 116.

The gender of senior management and their direct reports can be found on page 22.

Non-executive Director succession

During the year, the Committee considered the Board roles that would need to be recruited for as current INED appointments approached the maximum terms envisaged by the Code, taking into account the review of Directors' skills as well as actions identified in the Board evaluation.

Due to Garry Watts' resignation from the Board in December 2023, external recruitment consultant firm MWM Consulting was appointed to help identify a longlist of potential INED candidates with the correct candidate specifications. MWM Consulting has no other connection to CCEP and has no connection to any individual Director.

The Chairman and other Committee and Board members met with a shortlist of candidates during 2023. This process resulted in the Committee's recommendation to the Board and subsequent approval by the Board that Guillaume Bacuvier be appointed to the Board on 1 January 2024. Guillaume's skills complement the existing expertise of the Board well, providing experience in many desired fields. His appointment was announced to the market on 14 December 2023. Guillaume's biography can be found on page 99.

You can find the list of Non-executive Directors determined to be independent on page 109.

 [See an overview of our Directors' diversity, skills and experience on page 93](#)

Nomination Committee report continued

Director inductions

The Nomination Committee reviews the induction programme for new Directors. All new Directors receive a suite of induction materials as well as mentorship from established Directors. Meetings with members of the Board and the ELT, and site visits in a number of our markets are also arranged. Over 2023, the newly appointed INEDs' induction programme included attending the March Board meeting in Australia and New Zealand, attending an ID&E event in the new Bulgaria office, and market visits in GB, Sweden and Australia. They also attended a market visit and production facility tour in France and received bespoke training on CCEP's franchisor agreements and governance documents.

Senior management succession

The Committee is committed to supporting the development and progression of diverse talent at senior management level and acknowledges the recommendations of the Parker Review in developing ethnic diversity targets for senior management. The Committee considers and recommends succession plans for the Group's ELT to the Board.

Over 2023, the Committee oversaw a change to the structuring of the European BUs, with Leendert den Hollander assuming an expanded role to incorporate the France BU as part of his responsibilities in Northern Europe.

(B) Senior positions on the Board include the Chairman, Chief Executive Officer or Senior Independent Director. The Chief Financial Officer is not a member of the Board. The data in the above tables was collected voluntarily through the annual Directors & Officers ("D&O") questionnaires. The data is used purely to satisfy CCEP's Board and leadership diversity disclosure requirements under the UK's Financial Conduct Listing Rules and Nasdaq requirements. The Board was asked to self-report their data through questions raised in the D&O questionnaire on gender identity, sexual orientation and ethnic background.

Thomas H. Johnson,
Chairman of the Nomination Committee
15 March 2024

Audit Committee Chairman's letter

Supporting the successful acquisition of CCBPI was a key role of the Committee during 2023."

Dear Shareholder

I am very pleased to introduce the Audit Committee report setting out the key matters and issues considered in 2023.

Committee membership

The Committee was pleased to welcome Nicolas Mirzayantz to the Committee following the retirement of Garry Watts on 31 December 2023.

CCBPI acquisition

The Committee reviewed the financing and structuring and also hedging strategy to support the acquisition by CCEP of its 60% share of CCBPI, as well as the related disclosures in the 2023 financial statements.

SEC correspondence

The Committee reviewed the Company's correspondence with the SEC on its long-standing policy of accounting for the TCCC bottling rights

as indefinite-lived intangible assets, as well as the associated disclosure included in the FY23 preliminary results published on 23 February 2024. On 7 March 2024, the SEC staff completed its review with no further comments raised to CCEP.

External auditor re-tender

The Committee considered the mandatory 2025 audit re-tender including discussing and approving the proposed approach to the tender. The Committee leveraged best practice insights on how companies approached this in addition to the learnings from the FRC's Best Practice Guide to Audit Tendering.

ESG

During 2023, in addition to receiving regular ESG regulatory updates, the Committee agreed with the ESG Committee those matters that would warrant consideration by the joint meeting of the Committees including the TCFD statement, year end ESG reporting and disclosure, and assurance of ESG performance data. In addition, the Committee supported the transition to EY as assurance provider for FY23 for CCEP's This is Forward metrics.

Risk management

During 2023, on behalf of the Board, risk management remained a priority with ongoing discussions on:

- ERM framework, including identification and assessment of principal and emerging risks, risk

factors, associated mitigations and processes and their appropriateness

- Water scarcity assessment, including scenario analysis and mitigations
- The cybersecurity programme and associated risks
- Business continuity and resilience
- Fraud prevention and detection
- A number of tax topics

The above was driven by the impact from the wider macroeconomic environment, the war in Ukraine and the conflict in the Middle East, including inflation, volatility in commodity prices and currency fluctuations, increased recession risk and the enhanced cyber threat.

Other

The Committee continued to monitor governance developments such as the BEIS Consultation on Restoring Trust in Audit and Corporate Governance, GDPR compliance and with the support of management the Committee were given comfort that they met the FRC guidance on Audit Committee minimum standards.

Auditor effectiveness

The Committee completed a questionnaire to assess the effectiveness of the auditor with positive feedback from the Committee.

[Read more about our auditors on page 123](#)

Committee effectiveness

The Committee completed a questionnaire to assess its effectiveness in 2023. The review determined that the Committee continued to operate effectively, with minor action areas identified and subsequently closed during the year including an appetite for further training on developing areas such as ESG and cybersecurity.

Availability to shareholders

I am available to shareholders throughout the year to answer any questions on the work of the Committee.

Dessi Temperley, Chairman of the Audit Committee

15 March 2024

Looking forward to 2024

- Overseeing the inclusion of CCBPI in the Groups' consolidated financial statements and the finalisation of the Purchase Price Allocation exercise
- Continued focus on ESG reporting and regulatory matters, including the European Corporate Sustainability Reporting Directive (CSRD)
- Concluding the external auditor re-tender
- Further heightened attention on cyber, fraud, anti-bribery, resilience, business continuity and internal control

Key responsibilities

The roles and responsibilities of the Audit Committee are set out in the terms of reference, which are available at cocacolaep.com/about-us/governance/committees, and are reviewed annually by the Committee. Key responsibilities are detailed below.

Accounting and financial reporting

- Monitoring the integrity of the Group's annual audited financial statements and other periodic financial statements
- Reviewing any key judgements contained in them relating to financial performance

Systems of internal control and risk management

- Reviewing the adequacy and effectiveness of the Group's internal control processes
- Overseeing the Group's compliance, operational and financial risk assessments as part of the broader ERM programme
- Overseeing the Group's business capability and cybersecurity programmes
- Overseeing climate risks as part of the ERM programme
- Reviewing and assessing the scope, operation and effectiveness of the internal audit function

Relationship with external auditor

- Reviewing and assessing the relationship
- Reviewing their independence
- Agreeing terms of engagement and remuneration
- Assessing the effectiveness of the external audit process
- Reviewing reports from the external auditor and management relating to the financial statements and internal control systems
- Making recommendations to the Board in respect of the external auditor's appointment, reappointment or removal

Other

- Supporting the Board in relation to specific matters, including oversight of dividends, capital structure, and capital expenditures

The Committee Chairman reports back at most Board meetings on matters of particular relevance and the Board receives copies of the Committee papers and minutes of meetings.

Committee governance

The Committee keeps the Board informed and advised on matters concerning the Group's financial reporting requirements to ensure that the Board has exercised oversight of the work carried out by management, internal audit and the external auditor.

The Group follows UK corporate governance practices, as allowed by the Nasdaq Rules for FPIs. In accordance with the Code, the Committee comprised four NEDs in 2023, each of whom the Board has deemed to be independent. The Board is satisfied that the Committee as a whole has competence relevant to the FMCG sector, in which the Group operates.

In accordance with SEC Rules, as applicable to FPIs, the Group's Audit Committee must fulfil the independence requirements set out in SEC Rule 10-3A. The Board has determined that the majority of the Audit Committee satisfies these requirements and that those members may each be regarded both as an Audit Committee financial expert and as independent, as defined in Item 16A of Form 20-F. It was further determined that no Audit Committee member had participated in the preparation of the financial statements of the Company or any of its subsidiaries.

Audit Committee report continued

Matters considered by the Audit Committee during 2023

The Committee met eight times during the year and held one joint meeting with the ESG Committee. Reports from the internal and external auditors were presented as standing agenda items, along with reports from senior management on the following topics in the Committee's remit:

- Accounting and reporting matters
- Accounting for TCCC bottling rights
- Oversight of SOX compliance
- Legal matters
- Corporate integrity programme
- Business continuity management and cybersecurity
- Enterprise Risk Management
- Capital projects, including review of sustainability metrics
- Tax and treasury matters
- Climate risk disclosures
- External auditor re-tender
- Oversight of CCBPI acquisition process and related financing

The Committee's interactions with the internal audit function and the external auditor during the year are discussed in more detail later in this report. A summary of key matters considered by the Audit Committee in 2023, in addition to standing items, is set out in Table 1 on page 120.

Financial reporting, significant financial issues and material judgements

During 2023, the Committee considered the significant accounting judgements and estimates, and their appropriateness and disclosure, including the Group's long-standing policy and judgement on accounting for the TCCC bottling rights as indefinite-lived intangible assets.

The Committee met regularly with management during 2023 to consider the financing and hedging strategies in relation to the CCPBI acquisition.

For the remaining matters, the Committee agreed with management that the appropriate accounting considerations had been given and the impact of each item was not material to the Group's financial statements.

 See our **Viability statement** on page 79

Audit Committee assessment of the 2023 Integrated Report

The Committee undertook a review of a developed draft of the 2023 Integrated Report and provided its feedback, which was reflected in the report.

The Committee considered whether the Group's position, strategic approach and performance during the year were accurately and consistently portrayed throughout the 2023 Integrated Report. As part of its review, the Committee referred to the management reports it had received and considered during the year, together with the findings and judgements of the internal and external auditor.

The estimates and judgements made on the significant financial reporting matters regarding the financial statements are summarised in Table 2 on page 121 and 122. The Committee reviewed these in depth, along with management's assessment of the Group as a going concern and the statement of long-term viability contained in the Strategic Report.

The Committee concluded that they are appropriate and acceptable in light of the risks facing the business and all significant matters brought to the Committee's attention during the year.

The 2023 Integrated Report is, in the opinion of the Committee, fair, balanced and understandable, and provides the information necessary for shareholders to assess CCEP's performance, business model and strategy.

- Reviewing the 2023 preliminary Q4 and full year results and the 2023 Integrated Report, including its significant estimates and judgements, accounting policies, viability and going concern statements
- Advising the Board on whether, in the Committee's opinion, the 2023 Integrated Report is fair, balanced and understandable
- Independent auditor's report on the 2023 full year results
- Approval of this Audit Committee report
- Progress on SEC comment letter on TCCC bottling rights

(B) During February 2024, a joint meeting of the Audit Committee and ESG Committee was held to undertake a review of the TCFD statement and listing rule compliance as well as an update on EY assurance over selected This is Forward KPI's.

Audit Committee report continued

Table 2

Significant reporting matters in relation to financial statements considered by the Audit Committee during 2023

Accounting area	Key financial impacts	Audit Committee considerations
Accounting for TCCC bottling rights	TCCC franchise intangibles at 31 December 2023: €11.8 billion	<p>The Group's bottling agreements with TCCC contain performance requirements and convey the rights to distribute and sell products within specified territories. The agreements in each territory are for initial terms of 10 years that can be renewed for another 10 years. The Group believes that its interdependent relationship with TCCC and the substantial cost and disruption to TCCC that would be caused by non-renewal ensure that these agreements will continue to be renewed and, therefore, are essentially perpetual. The Group has never had a bottling agreement with TCCC terminated due to non-performance of the terms of the agreement or due to a decision by TCCC to terminate an agreement at the expiration of a term. After evaluating the contractual provisions of the bottling agreements as at 31 December 2023, the Group's mutually beneficial relationship with TCCC and history of renewals, indefinite lives have been assigned to all of the Group's TCCC bottling agreements.</p> <p>During 2023, the Committee reviewed the Group's long-standing policy and judgment on accounting for the TCCC bottling rights as indefinite-lived intangible assets confirming its appropriateness and continued disclosure as a significant judgment.</p>
Deductions from revenue and sales incentives	Total cost of customer marketing programmes in 2023: €5.4 billion Accrual at 31 December 2023: €1.3 billion	<p>The Group participates in various programmes and arrangements with customers designed to increase the sale of products. Among the programmes are arrangements under which allowances can be earned by customers for attaining agreed upon sales levels or for participating in specific marketing programmes.</p> <p>For customer incentives that must be earned, management must make estimates related to the contractual terms, customer performance and sales volume to determine the total amounts earned. Under IFRS 15, these types of variable consideration are deducted from revenue. There are significant estimates used at each reporting date to ensure an accurate deduction from revenue has been recorded.</p> <p>Actual amounts ultimately paid may be different from these estimates. At each reporting date, the Committee received information regarding the total customer marketing spend of the Group along with period end accruals. The Committee also discussed and challenged management on key judgements and estimates applied during the period.</p>
Tax accounting and reporting	2023 book tax expense: €534 million 2023 cash taxes: €509 million 2023 effective tax rate: 24.2%	<p>The Group evaluated a number of tax matters during the year, including legislative developments across tax jurisdictions, risks related to direct and indirect tax provisions in all jurisdictions, the deferred tax inventory and potential transfer pricing exposure. Throughout the year, the Committee received information from management on the critical aspects of tax matters affecting the Group, considered the information received, and gained an understanding of the level of risk involved with each significant conclusion.</p> <p>The Committee also considered and provided input on the Group's disclosures regarding tax matters.</p>

Audit Committee report continued

Accounting area	Key financial impacts	Audit Committee considerations
Asset impairment analysis	<p>Indefinite lived intangible assets at 31 December 2023: €11.8 billion</p> <p>Goodwill at 31 December 2023: €4.5 billion</p>	<p>The Group performs an annual impairment test of goodwill and intangible assets with indefinite lives, or more frequently if impairment indicators are present. The testing is performed at cash generating units (CGUs) level, which for the Group are based on geography and generally represent the individual territories in which the Group operates.</p> <p>The Committee received information from management on the impairment tests performed, focusing on the most critical assumptions such as the terminal growth rate, the discount rate and operating margin, as well as changes from the prior year. The Committee reviewed and challenged the various sensitivity analyses performed by management, including the impact of climate change, in order to assess the impact of changes in critical assumptions on test results.</p> <p>The Committee was satisfied with the assumptions used by the Group and also considered and reviewed the Group's disclosures about its impairment testing.</p>
Restructuring accounting	<p>Restructuring cost recorded in 2023: €94 million</p>	<p>The Committee was regularly updated by management on the nature of restructuring initiatives and key assumptions underpinning the related provision in the financial statements.</p> <p>The Committee reviewed the Group's restructuring expense of €94 million as well as the restructuring provision balance of €116 million as at 31 December 2023, and continued to agree that it does not contain significant uncertainty.</p> <p>The Committee was satisfied with the appropriateness of the restructuring accounting during the year and the disclosures included in the financial statements.</p>
Other items impacting operating profit comparability	<p>Remaining items impacting operating profit comparability recorded in 2023: €60 million (credit)</p>	<p>The Committee reviewed the remaining items impacting operating profit comparability for the year, primarily related to royalty income arising from the ownership of certain mineral rights in Australia, the sale of the sub-strata and associated mineral rights in Australia and the sale of property in Germany, partly offset by accelerated amortisation charges associated with the discontinuation of the relationship between CCEP and Beam Suntory upon expiration of the current contractual agreements.</p> <p>The Committee was satisfied with the classification of the items impacting comparability as well as the related disclosures in the financial statements.</p>

Audit Committee report continued

External audit Effectiveness of the external audit process

The Committee has responsibility and oversight of the Group's relationship with its external auditor, EY, and for assessing the effectiveness of the external audit process. EY was appointed as the external auditor in 2016 and the lead audit partner is Sarah Kokot, who was appointed following completion of the 2020 Audit. In accordance with the UK and SEC external auditor independence rules, Sarah Kokot would face mandatory rotation as lead audit partner following the completion of the 2025 audit.

The Committee acknowledges the provisions contained in the Code and the Statutory Audit Services for Large Companies Market Investigation (Mandatory Use of Competitive Tender Processes and Audit Committee Responsibilities) Order 2014 in respect of audit tendering. In light of the mandatory 2025 Audit re-tender, the Committee has begun the process of re-tendering the role of external auditor.

In 2023, the Committee agreed the approach and scope of the audit work to be undertaken by EY for the financial year. It also reviewed EY's terms of engagement and agreed the appropriate level of fees payable in respect of audit and audit-related services.

See details of the amounts paid to the external auditor in Note 17 to the consolidated financial statements on page 200.

EY provided the Committee with regular reports on the status of the audit, its assessment of the agreed areas of audit focus and findings, and conclusions to date. EY had regular discussions with management to identify the potential business and financial risks for CCEP and ensure that correct accounting treatment was adopted in response.

The Committee used a questionnaire to review the effectiveness of the external auditor and focused on four key areas: the audit partner, audit planning and execution, reporting by the auditor and the role of management. The review determined the audit to be very effective, with some minor areas for improvement which will be reviewed and implemented in 2024.

External auditor independence

The continued independence of the external auditor is important for an effective audit. The Committee has developed and implemented policies that govern the use of the external audit firm for non-audit services and limit the nature of the non-audit work that may be undertaken. The external auditor may, only with pre-approval from the Committee, undertake specific work for which its expertise and knowledge of CCEP are important. It is precluded from undertaking any work that may compromise its independence or is otherwise prohibited by any law or regulation.

The Committee received a statement of independence from EY in March 2023 confirming that, in its professional judgement, it is independent and has complied with the relevant ethical requirements regarding independence in the provision of its services. The report described EY's arrangements to identify, manage and safeguard against conflicts of interest.

The Committee reviewed the scope of the audit-related services proposed by EY during the year, to ensure there was no impairment of judgement or objectivity, and subsequently monitored the non-audit work performed to ensure it remained within the agreed policy guidelines. It also considered the extent of non-audit services provided to the Group. The Committee determined, based on its evaluation, that the external auditor was independent.

Reappointment of the external auditor

The Committee has responsibility for making a recommendation to the Board regarding the reappointment of the external auditor. Based on its continued satisfaction with the audit work performed to date and EY's continued independence, the Committee has recommended to the Board, and the Board has approved, that EY be proposed for reappointment by shareholders as the Group's external auditor at CCEP's 2024 AGM.

Audit Committee report continued

Internal audit

The internal audit function provides an independent and objective assessment of the adequacy and effectiveness of the Group's integrated internal control framework, which combines risk management, governance and compliance systems. The internal audit function reports directly to the Audit Committee and comprises approximately 40 full time, professional audit staff based in London, Berlin, Madrid, Sofia and Sydney, with a range of business expertise working across multiple disciplines.

Effectiveness of the internal audit function

At the start of the year, the Committee reviewed the internal audit plan for 2023 and agreed its scope, budget and resource requirements for the year. The Committee continued to monitor the plan and forward-looking audit radar to make sure recommendations remained appropriate for the year ahead.

Through regular management reports containing key internal audit observations, proposed improvement measures and related timeframes agreed with management, the Committee monitored the effectiveness of the internal audit function against the approved internal audit plan. The Chief Audit Executive attended the scheduled meetings of the Committee during 2023 to raise any key matters with the Directors.

Internal control and risk management

The Group depends on robust internal controls and an effective risk management framework to successfully deliver its strategy. The Audit Committee is responsible for monitoring the adequacy and effectiveness of the Group's internal control systems, which includes its compliance with relevant sections of the Code and the requirements of SOX, specifically sections 302 and 404, as it applies to US FPIs.

Effectiveness of the internal control and risk management systems

Regular reports were presented to the Committee on the Group's internal audit assessments of the adequacy and effectiveness of CCEP's integrated internal control framework, risk management, governance and compliance functions. The Committee was provided updates on the internal control framework, including any proposed updates and amends and the remediation of any identified control deficiencies during the year.

In 2023, management undertook a top down enterprise risk assessment including business units and functions. This included an assessment of the Group's risk appetite across identified enterprise risks, to gauge and promote alignment of risk appetite with CCEP's long range plan. The Committee reviewed the findings, approved changes to the enterprise risk management assessments and concluded that management's

approach to risk and to risk appetite was satisfactory.

The Group's material controls were deemed to be designed and operating effectively during the year.

 **Read more about the Board's role in risk oversight of principal risks** on pages 68-78 **and TCFD** on pages 48-54

Raising concerns

In each of our territories, we have established ways for our people and others to raise concerns in relation to possible wrongdoing in financial reporting, suspected misconduct, or other potential breaches of our CoC. These include options to seek advice from the line manager and/or raise a report through our internal Speak Up resources and/or our dedicated and confidential external Speak Up channels. In December 2022, it was agreed that certain CoC topics would be covered within the remit of the ESG Committee, with any matters above the materiality threshold to be referred to the Audit Committee, which provides the Board with key information for its consideration as appropriate.

 **View our CoC** at view.pagetiger.com/code-of-conduct-policy

Investigations into potential breaches of our CoC are overseen in each BU by the BUs CoC Committee, chaired by the BUs Vice President, Legal. All potential CoC breaches and corrective actions are overseen by the Group CoC Committee, which is a sub committee of the Compliance and Risk Committee, a management committee chaired by the Chief Compliance Officer (CCO). The Group CoC Committee also:

- Ensures that all reported breaches have been recorded and investigated in a timely manner and a conclusion reached
- Evaluates trends
- Ensures consistent application of the CoC across CCEP

As required under the Spanish Criminal Code, the Iberia BU has an Ethics Committee formed of members of the Iberia BU leadership team. It is responsible for any ethics and compliance activities, including overseeing the local crime prevention model. It reports to the board of the Iberia BU and the CCO.

There were no whistleblowing matters that required Audit Committee or Board attention in 2023.

Dessi Temperley, **Chairman of the Audit Committee**

15 March 2024

ESG Committee Chairman's letter

The Committee dedicated significant time to discussing progress against the This is Forward sustainability action plan across Europe and API."

Dear Shareholder

I am very pleased to introduce the ESG Committee report setting out the key matters and issues considered for 2023.

Committee membership

The Committee was pleased to welcome Nancy Quan and Nicolas Mirzayantz following the conclusion of the 2023 AGM.

This is Forward

The Committee's main focus during 2023 was the oversight of CCEP's This is Forward sustainability action plan. The Committee received updates on all our six action areas: climate, packaging,

water, society, drinks and supply chain. We put a particular focus on CCEP's carbon reduction roadmap, packaging collection and approach to water stewardship, efficiency and replenishment. Our gender diversity and disability roadmap were also key focus areas.

The Committee also spent significant time focusing on CCEP's Forward on drinks commitments relating to sugar reduction and low and no calorie sweeteners (LNCS) across CCEP's markets. In May 2023, the Committee met with representatives from TCCC to undertake a deep dive into TCCC-led advocacy and innovation on LNCS.

Carbon reduction roadmap

Following CCEP's 2030 GHG emissions reduction target, and the Net Zero 2040 target being validated by the Science Based Targets initiative (SBTi) as being in line with climate science, the Committee spent significant time reviewing CCEP's 2030 GHG emissions trajectory and carbon roadmap. A deep dive was held into Scope 3 GHG emissions to understand the key drivers of CCEP's emissions which would be factored into the development of a climate transition plan.

Read more on our updated SBTi targets on page 60

Customers and sustainability

The Committee spent time discussing trends in CCEP's customer sustainability expectations and priorities including the renewed focus of many to set

science based carbon reduction targets beyond Scope 1 and 2 to Scope 3 GHG emissions.

Regulation

The Committee also reviewed the latest developments in ESG reporting and disclosure including the EU Corporate Sustainability Reporting Directive (CSRD).

Given the fast evolving ESG reporting landscape and the interconnectivity with the Audit Committee, a joint committee meeting was held in February 2023 to agree the matters for joint consideration including the TCFD statement and assurance.

Other

We reviewed assessments of water-related risks at key facilities, and endorsed an update to CCEP's water use efficiency target.

The Committee also discussed and assessed the potential impact of the Extended Producer Responsibility (EPR) legislation in the Philippines following announcement of the proposed CCBPI acquisition and endorsed a new approach and metric to evaluating health and safety performance.

Code of Conduct

The Committee reviewed the adequacy of the CoC arrangements and how to ensure they allow appropriate follow up action and onward reporting.

We received and considered reports from management regarding concerns raised by our people and provided the Board with key information for its consideration as appropriate.

Committee effectiveness

The Committee completed a questionnaire-based exercise to assess its effectiveness in 2023. The review determined that it continued to operate effectively. Progress has been made to action outputs around training, remit and composition.

Mario Rotllant Solá,
Chairman of the ESG Committee
15 March 2024

Looking forward to 2024

- Continue to develop climate transition plan and ensure alignment with the disclosure framework for climate transition plans published by the UK's Transition Plan Taskforce (TPT)
- Track evolving regulation across our markets on sustainability action and ESG reporting
- Continue to review CCEP's approach to deforestation, biodiversity and nature
- Water remains a high priority, and we will oversee this year's update of our FAWWAs and roadmaps to improve our water use efficiency across markets

ESG Committee report

Membership*

	Member since
Mario Rotllant Solà (Chairman)	May 2022
Nathalie Gaveau	January 2019
Nicolas Mirzayantz	May 2023
Mark Price	May 2019
Nancy Quan	May 2023

* Jan Bennink and Brian Smith were members of the Committee until 24 May 2023

ESG Committee role

The key duties and responsibilities of the Committee are set out in its terms of reference. These are available at cocacolaep.com/about-us/governance/committees.

ESG activities in 2023

The Committee met six times in 2023, including a joint meeting with the Audit Committee. The main focus of the Committee was monitoring CCEP's progress against its sustainability action plan, This is Forward, but it did consider other matters, which are detailed below.

Reporting and regulatory updates

- Review of FY22 reporting and performance
- Limited assurance of FY22 sustainability performance data
- During the joint meeting with the Audit Committee in February 2023, the Committee reviewed the TCFD statement with consideration to listing Rule compliance and TCFD

recommendations and considered a report by internal audit on ESG reporting readiness.

[Read more on TCFD reporting on pages 48-60](#)

- Updates included on:
 - CSRD
 - EU proposed Directive on Corporate Sustainability Due Diligence
 - International Sustainability Standards Board (ISSB)
 - UK mandatory reporting requirements such as TCFD and TPT
 - EPR legislation in the Philippines

Climate

- Deep dive on GHG emissions and carbon reduction pathways
- Reviewing progress against CCEP's science based emissions reduction targets across Europe and API

Packaging

- Update on cross system strategic approach to packaging collection and tracking progress against the TCCC aligned collection target
- Deep dive into cross system strategic approach to collection in Indonesia

Social

- Approval of Modern Slavery Statement
- CoC reporting compliance
- Discussions on customer sustainability expectations and priorities
- Anti-bribery update

Image: CCEP has committed to switch all of its cars and vans to electric vehicles, or ultra-low emission vehicles where electric vehicles are not viable by 2030

Governance

- Overview of the Committee's sustainability priorities including:
 - Decarbonisation and carbon reduction roadmap
 - Carbon offset and removal strategy
 - Accelerated focus on 100% collection throughout Europe and API
- Committee terms of reference
- Review of Committee effectiveness
- Corporate reputation update
- Legal and compliance communications and training
- Update on approach to health and safety

Other

- Update on the role of CCEP Ventures in supporting This is Forward sustainability action plan and CCEP's Net Zero 2040 target
- TCCC's approach to consumer-focused sustainability marketing and communications
- Water Stewardship Strategy

Mario Rotllant Solà,
Chairman of the ESG Committee
15 March 2024

Statement from the Remuneration Committee Chairman

Remuneration outcomes for 2023 reflect strong overall business performance."

Dear Shareholder

On behalf of the Board, I am pleased to present the Directors' remuneration report for CCEP for the year ended 31 December 2023. This includes a summary of our remuneration policy (page 129), which shareholders approved at our 2023 AGM. We have also set out our Annual report on remuneration (ARR) (pages 131-143), which outlines how we implemented the policy during 2023 and how we intend to do so in 2024. This will be subject to an advisory vote at our 2024 AGM.

Remuneration outcomes for 2023 Annual bonus

The strong overall business performance outlined in the Strategic Report has been reflected through the annual bonus, with performance against all three financial metrics being above target. Revenue and comparable operating profit increased year on year by 5.5% and 11.0%, respectively. This, alongside strong comparable free cash flow generation, has resulted in an overall Business Performance Factor (BPF) of 165% of target being achieved. The strong business performance is also a reflection of the exceptional leadership of the CEO throughout 2023, which resulted in an Individual Performance Factor (IPF) of 1.15x being awarded to him. The final bonus payment to the CEO was 79% of maximum. Further details are provided on pages 131-132 of the ARR.

2021 Long-Term Incentive Plan

The 2021 Long-Term Incentive Plan (LTIP) award, granted in September 2021, was subject to earnings per share (EPS), return on invested capital (ROIC) and CO₂e reduction performance targets over the three year period to 31 December 2023. Around 275 senior executives and management participated in the scheme, including the CEO.

CCEP has performed very strongly over the last three years, with cumulative EPS growth of 20.5% per annum^(A) and outperformance of our ROIC and CO₂e reduction targets. This level of performance results in a formulaic vesting outcome of 2.0x target.

In assessing the formulaic vesting outcome, the Committee also undertook a holistic assessment of overall performance over the three year period to determine whether the level of vesting was a fair reflection of broader CCEP performance. In the course of its assessment, the Committee noted that:

- As with EPS and ROIC, CCEP's performance against its other key financial indicators had been equally strong, as disclosed in more detail on pages 2-3 of the Strategic Report
- CCEP had delivered +50% total shareholder return over the performance period, which was upper decile versus our sector and ahead of the FTSE 100, Euronext 100 and S&P 500 indices
- The wider stakeholder experience, including that of our employees, had been positive, with no material areas of concern identified
- CCEP had delivered strongly against our sustainability initiatives, as disclosed in more detail on page 134 of the ARR

As a result of the assessment, the Committee determined that the overall performance of the business continued to be strong. Nonetheless, it was recognised that when the CO₂e reduction targets were set in 2021 there remained a degree of uncertainty about what represented appropriately stretching performance for the business. The Committee had been keen to include the metric, given its importance to CCEP's sustainability agenda, but as a relatively new measure there remained a number of moving parts. Reflecting now, the Committee considers it appropriate to follow a similar approach to the 2020 LTIP and apply downwards discretion in respect of the final vesting level to cap the outcome at target. This reduces the overall vesting level to 1.85x target and the Committee believes this to be a fair reflection of overall performance.

This is estimated to have a final vesting value for the CEO of £7.4 million, which includes £1.2 million of benefit from the strong share price growth and dividend delivery over the performance period, which has delivered more than £6 billion of value to shareholders.

All references to revenue, operating profit, operating free cash flow, EPS and ROIC targets refer to those measures that are defined within the ARR

(A) Comparable and on a tax and currency neutral basis, adjusted for brand sales.

Statement from the Remuneration Committee Chairman continued

Implementation of remuneration policy in 2024

The Committee considers that our overall remuneration framework remains fit for purpose and will implement our remuneration policy for 2024 on the same basis as for 2023 (see pages 141-142 for further details).

The Committee has approved a 2.0% salary increase for the CEO, effective 1 April 2024, which is significantly lower than the 3.5% merit increase for the wider GB workforce.

The structure of the 2024 annual bonus will be unchanged from last year, with the business performance element being based on stretching performance targets for operating profit, revenue and operating free cash flow. These targets will include the performance of the Philippines business following the successful acquisition of CCBPI. For the CEO, his individual element will be assessed against objectives aligned to the key strategic areas of focus of the business, which include: market share, operational objectives, ESG and people targets.

The 2024 LTIP award will continue to be based on a mix of EPS, ROIC, and CO₂e reduction. Due to the timing of the acquisition of CCBPI, and to enable robust targets to be set for the combined business, the awards will be made in Q2. The targets will be set at stretching levels taking into account both our long-term plan and external forecasts. Targets will be fully disclosed in next year's ARR.

Following the end of the performance period, LTIP awards will be subject to an additional two-year holding period.

Looking ahead

We regularly monitor the performance of our remuneration policy and will continue to engage with shareholders where necessary to ensure we are implementing the policy in a way which is aligned with both good governance and commercial best practice.

While the targets for the 2023 LTIP were substantially increased to reflect our CO₂e reduction trajectory at the time of grant, the Committee is conscious that the targets for the 2022 LTIP (due to vest in March 2025) were set in a consistent manner with those for the 2020 and 2021 awards. As such, the Committee will keep performance against the 2022 targets under review and ensure that the overall outcome appropriately reflects underlying performance at the point of vesting.

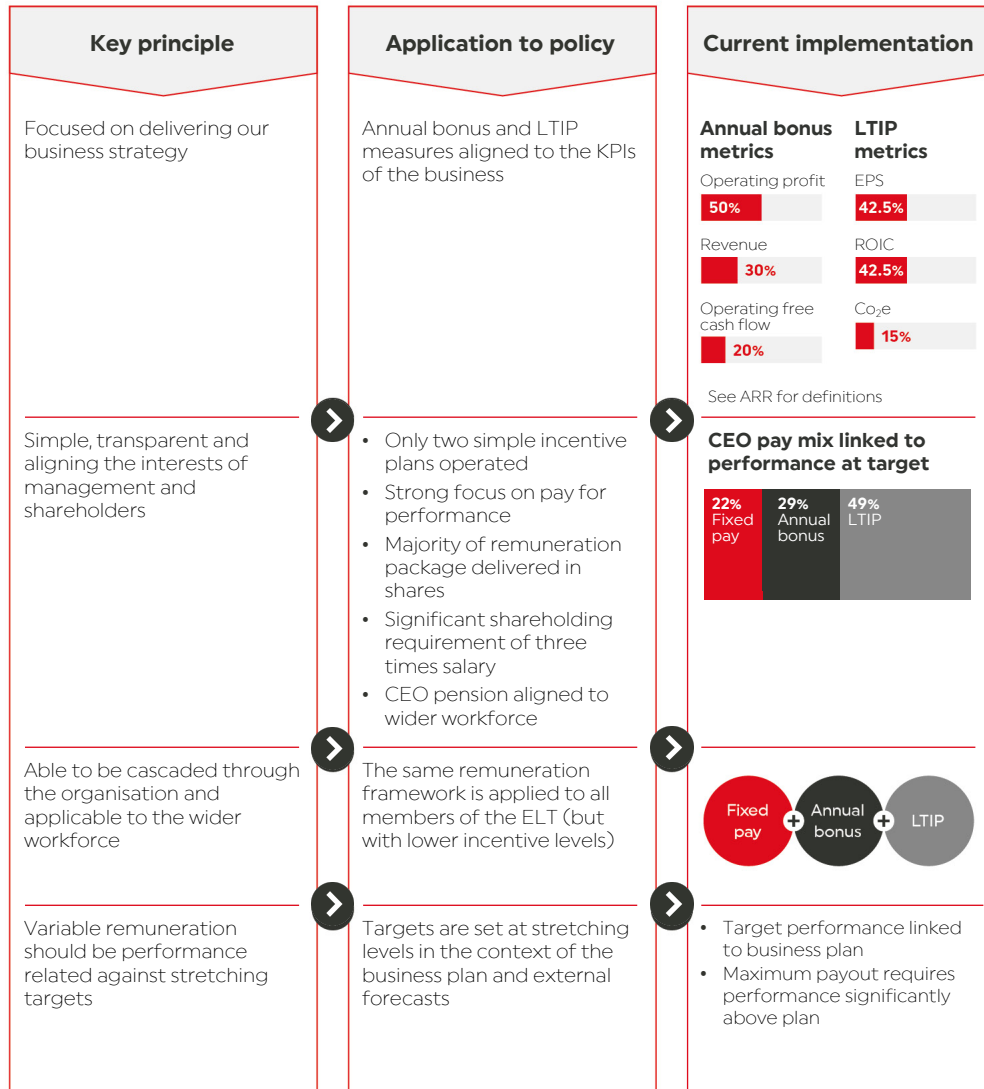

Our remuneration policy and outcomes reflect a strong emphasis on performance-related pay, aligned to shareholder interests and our strategic aims. I hope we continue to receive your support in respect of our ARR at our forthcoming AGM in May 2024.

John Bryant,
Chairman of the
Remuneration Committee

15 March 2024

Annual report on remuneration

Remuneration outcomes for 2023

The following pages set out details of the remuneration received by Directors for the financial year ending 31 December 2023. Prior year figures have also been shown. Audited sections of the report have been identified.

The Directors' remuneration in 2023 was awarded in line with the remuneration policy, which was approved by shareholders at the AGM in May 2023.

Single figure table for Executive Directors (audited)

Individual	Year	Salary (£000)	Taxable benefits (£000)	Pension (£000)	Fixed pay (£000)	Annual bonus (£000)	Long-term incentives (£000)	Variable remuneration (£000)	Total remuneration (£000)
Damian Gammell	2023	1,235	99	27	1,361	3,525	7,396 ^(A)	10,921	12,282
	2022	1,208	135	26	1,369	3,730	7,054 ^(B)	10,784	12,153

(A) Estimated value based on three month average share price and exchange rate at 31 December 2023 of US\$61.15 (£49.25) and includes £589,000 cash payment in respect of dividend equivalents to be paid on the vested Shares. Number will be restated in next year's single figure table to show the final value on the vesting date of 15 March 2024. Around £650,000 of the vest value is attributable to share price appreciation.

(B) Restated from £6,720,000 in last year's single figure table to reflect actual share price on vesting date of \$55.09 (£45.25) on 17 March 2023 applied to 144,544 vested Shares and £513,000 cash payment in respect of dividend equivalents paid on the vested Shares.

Notes to the single figure table for Executive Directors (audited)

Base salary

Damian Gammell received a salary increase of 2.0% from £1,217,098 to £1,241,440 effective from 1 April 2023. This increase was significantly lower than the merit increase provided to the wider GB workforce of 6.0%.

Taxable benefits

During the year, Damian Gammell received the following main benefits: car allowance (£14,000), financial planning allowance (£10,000), schooling allowance (£50,000 net) and family private medical coverage (£7,000).

Pension

The pension provisions that apply to Damian Gammell are aligned to all other GB employees. Damian Gammell elected to receive a contribution into the pension scheme up to the annual allowance with the balance up to the maximum allowed by the Remuneration Policy as a cash allowance. This equates to a total payment of £30,000 from CCEP inclusive of employer National Insurance contributions (i.e. the actual benefit received by Damian Gammell is less than £30,000 per year).

Annual bonus

Around 12,000 people across the organisation participate in the annual bonus (~38% of our total workforce). Around 70% of our employees participate in annual variable remuneration plans in total, including the annual bonus, sales incentive plans (~22% of our people), and local incentive plans (~25% of our people).

Overview of CCEP's annual bonus design

The 2023 CCEP annual bonus plan was designed to incentivise the delivery of the business strategy and comprised the following elements:

Business Performance Factor (BPF) – Provides alignment with our core objectives to deliver strong financial performance against our main financial performance indicators of operating profit (50%), revenue (30%) and operating free cash flow (20%).

Individual Performance Factor (IPF) – Individual objectives were also set for Damian Gammell, focused on a number of areas which are aligned to key longer-term strategic objectives of the business.

In line with the remuneration policy, Damian Gammell had a target bonus opportunity of 150% of salary. Actual payments range from zero to a maximum of 360% of salary depending on the extent to which business and individual performance measures were achieved.

Annual report on remuneration continued

2023 annual bonus outcome – BPF

As set out in the Statement from the Remuneration Committee Chairman (page 127) overall performance in 2023 has been strong. This has been reflected in the annual bonus outcome, with performance for all three financial measures being above target.

Measure	Weighting	Performance targets			Performance outcomes	
		Threshold (0.25x multiplier)	Target (1x multiplier)	Maximum (2x multiplier)	Actual outcome	Multiplier achieved
Operating profit ^(A)	50%	€2,135m	€2,286m	€2,437m	€2,423m	1.91x
Revenue ^(B)	30%	€17,772m	€18,636m	€19,254m	€18,655m	1.03x
Operating free cash flow ^(C)	20%	€2,074m	€2,305m	€2,489m	€2,481m	1.95x
Total	100%					1.65x

(A) Comparable operating profit on a FX neutral basis at budget rates.

(B) Revenue on a FX neutral basis at budget rates.

(C) Comparable operating profit before depreciation and amortisation and adjusting for capital expenditures, restructuring cash expenditures and changes in operating working capital, on an FX neutral basis at budget rates.

2023 annual bonus outcome – IPF

To determine an appropriate IPF, the Chairman of the Board assesses Damian Gammell's performance against the individual performance objectives that were set at the start of the year. The outcome is then discussed with and recommended by the Committee for final approval by the Board.

Damian Gammell once again provided exceptional leadership of the business during 2023 within a very challenging external environment. He delivered strongly against his individual objectives outlined below, and the Board determined that his IPF should be set at 1.15x for the year.

Further details of some of the specific objectives, which link to our strategy pillars (great brands, great people, great execution, done sustainably) achieved, are included in the table below:

2023 objectives	Performance delivered	Strategic objective
Value share growth in sparkling	<ul style="list-style-type: none"> Full year sparkling volume maintained versus 2022. Value share growth target in sparkling not met. NARTD value share gains across measured channels both in-store & online 	
M&A	<ul style="list-style-type: none"> Acquisition of CCBPI completed in February 2024 	
Competitiveness	<ul style="list-style-type: none"> Delivered savings significantly ahead of target 	
Diversity and inclusion	<ul style="list-style-type: none"> Increase in senior management gender ratio Exceeded disability inclusion target^(A) 	

(A) Calculated based on the total number of employees responding to our voluntary 2023 inclusion survey (representing 38.4% of our workforce) and the number of employees self-declaring as having a disability.

Great brands

Great people

Great execution

Done sustainably

2023 annual bonus outcome – calculation

Based on the level of performance achieved, as set out above, this resulted in a cash bonus paid following the year end to Damian Gammell as follows:

Annual report on remuneration continued

Long-term incentives

Awards vesting for performance in respect of 2023

The 2021 LTIP award was subject to EPS, ROIC and CO₂e reduction performance targets measured over the three year performance period from 1 January 2021 to 31 December 2023.

Measure	Weighting	Performance targets ^(D)			Actual performance outcome	Final vesting level
		Threshold (25% vesting)	Target (100% vesting)	Maximum (200% vesting)		
EPS ^(A)	42.5%	€3.04	€3.41	€3.67	€3.78	2.00x
ROIC ^(B)	42.5%	8.3%	9.2%	9.9%	10.4%	2.00x
CO ₂ e reduction ^(C)	15%	6.0% per litre	8.0% per litre	10.0% per litre	17.4% ^(α) per litre	2.00x
Total formulaic vesting level						2.00x
Total vesting after discretion						1.85x

(A) Comparable and on a tax and currency neutral basis, adjusted for brand sales.

(B) ROIC calculated as comparable operating profit after tax attributable to shareholders, on a tax and currency neutral basis, divided by the average of opening and closing invested capital for the year, adjusted for brand sales and material non-cash equity accounting adjustments. Invested capital is calculated as the addition of borrowings and equity attributable to shareholders less cash and cash equivalents and short-term investments.

(C) Target based on entire value chain in Europe.

(D) Straight-line vesting between each vesting level shown.

(α) This metric was subject to external independent limited assurance for the year ended 31 December 2023. Please see cocacolaep.com/sustainability/download-centre for our 2023 assurance statement.

In assessing the formulaic vesting outcome of the 2021 LTIP, the Committee additionally undertook a holistic assessment of overall performance over the three year period to determine whether the formulaic outcome was an appropriate vesting level for all participants (around 275 people who occupy the most senior roles in the business) and reflected underlying Company performance. The Committee took into account a wide range of performance reference points, including financial performance, returns to shareholders, the stakeholder experience and our sustainability achievements, as described below.

As a result of the assessment the Committee determined the overall performance of the business to be strong. However, as outlined in the Statement from the Remuneration Committee Chairman (page 127) the Committee considered it appropriate to follow a similar approach to that used for the 2020 LTIP and apply downwards discretion in respect of the final vesting level for the CO₂e reduction measure and cap this at target. This reduced the overall vesting level to 1.85x target, and the Committee believes this to be a fair reflection of overall performance.

As the award does not vest until 15 March 2024, the final value of the award has been estimated based on the average share price over the three month period from 1 October 2023 to 31 December 2023 of US\$61.15 (£49.25). This would result in a final pay out of around £7.4 million including the value of the cash payment to be received in respect of dividend equivalents accrued during the performance period. As outlined in the Chairman's letter, this value included the benefit of the significant increase in share price over the three year performance period, which has delivered over £6 billion of value to shareholders over the same period. The actual value on the vesting date will be reported in next year's ARR.

Annual report on remuneration continued

Holistic review of overall performance over 2021 LTIP performance period

Overall business performance

- NARTD value share growth over the performance period (2021 = +40bps, 2022 = +10bps, and 2023 = +10bps).
- Largest FMCG value creator in Europe, and largest NARTD value creator in Australia and New Zealand – created over €1.3 billion of value in 2023 for our customers in Europe, Australia and New Zealand. Across the three year performance period, we created over €3.2 billion of value for customers across our markets, by focusing on core brands, in-market execution and revenue growth management initiatives.
- Strong revenue per unit case (FY23 +8.5%, Europe: +8.0% and API: +11.0%) driven by positive headline price increases and promotional optimisation alongside favourable mix.
- We committed to rebasing our cost base versus pre-pandemic levels. As a % of revenue, our comparable operating expenses are lower now (FY23: 24%), in-line with last year (FY22: 24%), mitigating inflationary pressures with productivity initiatives and more importantly below 2019 (FY19: 26%).
- Strong comparable free cash flow generation of €1.7 billion in 2023, in-line with our medium-term objective of at least €1.7 billion.

Shareholder experience

- Share price performance – highest share price in history of company of \$66.82 achieved during the performance period, and exceeded in early 2024. Share price as at the date of signing the report remains over 25% above the grant price.
- Significant value delivered to shareholders through continued payments of dividends – FY23 dividend per share of €1.84 (+9.5% versus 2022), and cumulative dividends of €2.2 billion over the period, maintaining an annualised dividend pay-out ratio of approximately 50%.
- Strong TSR growth – 50% growth over the three year period, which was top decile performance versus FMCG peers and out-performed the FTSE 100 (32%), Euronext 100 (37%) and S&P 500 (34%).

Successful acquisition and integration of CCL

- Completed the acquisition of Coca-Cola Amatil (CCL) in May 2021 to become a truly global bottler and solidify our position as the largest Coca-Cola bottler by revenue in the world.
- Integration now well advanced, with portfolio reorientation initiatives completed, and strong financial performance in 2023 (achieving both revenue and operating profit growth versus last year^(A)).

^(A) On a comparable and FX neutral basis

Continued delivery of our sustainability agenda

- CCEP's focus on long-term value creation and innovation positions sustainability at the heart of everything we do. Over the 2021 LTIP performance period we delivered the following:
 - 16.7% reduction across our Scope 1, 2 and 3 GHG emissions since 2019.
 - Reduction in our Group Water Use Ratio of 4.9% versus 2019.
 - Continued to exceed our target to use >50% rPET, reaching 54.6% across the Group, and 59.2% in Europe in 2023.
 - 48.3% of our volume sold came from low or no calorie products, making progress against our target to reach 50% by 2030.

Wider workforce and other stakeholder experiences

- Our primary focus throughout the performance period, in the context of the global COVID-19 pandemic and macro geopolitical environment, was on the safety and wellbeing of our colleagues. This included emotional and mental wellbeing support through a COVID-19 support hub, an expanded EAP, and a significant Mental Health First Aider programme to provide ongoing support to all employees.
- In recognition of the rising cost of living, one-off payments were delivered in 2022 to our lowest paid colleagues in selected markets.
- As disclosed in previous remuneration reports, there was limited financial impact on all employees during the COVID-19 pandemic, with continued frontline and Group incentive payouts, limited use of government support schemes, with a total value received of less than 0.2% of total employee expenditure, and continued salary increases for over 75% of employees in 2021.

Annual report on remuneration continued

- In 2022, we launched the new global Employee Share Purchase Plan (ESPP), which gives our employees the opportunity to buy Shares in CCEP on a regular basis. For every share an employee purchases, CCEP will provide a matching share, up to an agreed limit. In Great Britain, we offer a similar opportunity under an employee share plan, which makes use of a tax-efficient opportunity for employees to become shareholders through salary sacrifice arrangements. Around 43% and 75% of eligible employees were participating in the global ESPP and Great Britain share plan, respectively, on 31 December 2023.
- Focus on our communities – Our employees in Europe volunteered 32,500 hours with a total of €14.8 million in community investment in Europe and API. Our Support My Cause initiative enables employees to nominate local charities they feel passionately about for a donation from the business. Since 2019, we have donated €1.2 million to 200 local charities and community groups across our territories. In addition, in 2023, we donated over €400,000 to support 125 grassroots charitable and community partnerships located close to our sites and offices.
- Focus on our customers – We have an unrivalled customer coverage with which we jointly create value, with more than €3 billion added to the FMCG industry since 2021.

Awards granted in 2023 (audited)

A conditional award of performance share units (PSUs) was granted under the CCEP LTIP to Damian Gammell on 13 March 2023, with a target value of 250% of salary in line with the remuneration policy. The performance measures were unchanged from the prior year and continued to align with the long-term strategy – EPS, ROIC and CO₂e reduction. Financial targets were set at stretching levels and on the same basis as in prior years, taking into account both our long-term plan and external forecasts. Targets for CO₂e reduction were significantly increased versus those used for prior awards.

Further details are set out below:

Individual	Date of award	Maximum number of Shares under award	Target number of Shares under award ^(A)	Closing Share price at date of award	Face value	Performance period	Normal vesting date
Damian Gammell	13 Mar 2023	130,738	65,369	US\$55.20	US\$7,216,738	1 Jan 2023 – 31 Dec 2025	13 Mar 2026

(A) Number of Shares awarded calculated using 10 day average share price to the normal grant date (13 March 2023) of US\$55.13.

The vesting of awards is subject to the achievement of the following performance targets:

Measure	Definition	Weighting	Vesting level ^(D) (% of target)		
			25%	100%	200%
EPS ^(A)	EPS achieved in the final year of the performance period (FY 2025)	42.5%	€3.63	€4.07	€4.37
ROIC ^(B)	ROIC achieved in the final year of the performance period (FY 2025)	42.5%	10.8%	12.0%	13.1%
CO ₂ e reduction ^(C)	Relative reduction in total value chain GHG emissions since 2022 (gCO ₂ e/litre)	15%	12.0% per litre	14.5% per litre	17.0% per litre

(A) Comparable and on a tax and currency neutral basis, adjusted for brand sales. Should there be share repurchases during the performance period, an adjustment will be made to neutralise for the impact of share repurchases and will be fully disclosed at the time of vesting.

(B) ROIC calculated as comparable operating profit after tax attributable to shareholders, on a tax and currency neutral basis, divided by the average of opening and closing invested capital for the year, adjusted for brand sales and material non-cash equity accounting adjustments. Invested capital is calculated as the addition of borrowings and equity attributable to shareholders less cash and cash equivalents and short-term investments.

(C) Target based on entire Group value chain.

(D) Straight-line vesting between each vesting level (shown).

Any award vesting for the CEO will be subject to a two year post-vesting holding period.

Annual report on remuneration continued

Historical TSR performance and CEO remuneration outcomes

The chart below compares the TSR performance of CCEP from admission up until 31 December 2023 with the TSR of the Euronext 100, the FTSE 100 and the S&P 500. These indices have been chosen as recognised equity market indices of companies of a similar size, complexity and global reach as to CCEP.

30 trading day average data: against S&P 500, Euronext 100 and FTSE 100

Total shareholder return data

The following table summarises the historical CEO's single figure of total remuneration and annual bonus pay out as a percentage of the maximum opportunity over this period:

	2016 ^(A)	2016 ^(A)	2017	2018	2019	2020	2021	2022	2023
	John Brock	Damian Gammell	Damian Gammell	Damian Gammell	Damian Gammell	Damian Gammell	Damian Gammell	Damian Gammell	Damian Gammell
CEO single figure of remuneration ('000)	US\$3,890	£27	£3,716	£3,821	£7,839	£5,513	£7,672	£12,153 ^(B)	£12,282
Annual bonus pay out (as a % of maximum opportunity)	31.23%	40.6%	60.7%	63.1%	43.7%	35.3%	84.1%	85.8%	79.3%
LTI vesting (as a % of maximum opportunity)	N/A	N/A	N/A	N/A	59.0%	36.5%	45.0%	92.5%	92.5%

(A) The figures for 2016 are in respect of the period for which each individual served as CEO during the year. John Brock served as CEO from 29 May to 28 December 2016. Damian Gammell served as CEO from 29 December to 31 December 2016.

(B) Restated from last year's single figure to reflect the actual share price on vesting date for the 2020 LTIP.

(A) Appointed to the Board on 26 May 2021.

(B) Resigned from the Board on 24 May 2023.

(C) Appointed to the Board on 1 January 2021.

(D) Appointed to the Board on 24 May 2023.

(E) Appointed to the Board on 27 May 2020.

(F) Appointed to the Board on 9 July 2020.

(G) Resigned from the Board on 31 December 2023.

(H) Reduction and increases in taxable benefits reflect the impact of travel restrictions across 2020, 2021 and 2022.

(I) No increase was applied for 2021, but small increase reflects the 2020 salary increase applying only from 1 April 2020.

Annual report on remuneration continued

Relative importance of spend on pay

The table below shows a summary of distributions to shareholders by way of dividends and share buyback as well as total employee expenditure for 2023 and 2022, along with the percentage change of each.

	2023	2022	% change
Total employee expenditure	€2,433m	€2,318m	5.0%
Dividends ^(A)	€841m	€763m	10.2%

(A) There were no share buybacks in 2022 or 2023.

CEO pay ratio

The table below shows the ratio of the CEO's single figure of remuneration for 2023 to the 25th percentile, median and 75th percentile total remuneration of full time equivalent GB employees. The ratio is heavily influenced by the fact that the CEO participates in the LTIP. If the LTIP were excluded from the calculation, then the median ratio would be 75:1. The main reason for the increase in the ratio from 2022 to 2023 is driven by a change in the disclosed LTIP value for the CEO.

Year	Method	25 th percentile ratio	Median ratio	75 th percentile ratio
2023	Option B	246:1 ^(A)	189:1 ^(B)	150:1 ^(C)
2022		281:1	171:1	130:1
2021		221:1	162:1	92:1
2020		175:1	105:1	83:1
2019		250:1	169:1	111:1

(A) The individual used in this calculation received total pay and benefits of €50,000 (of which €36,000 was salary).

(B) The individual used in this calculation received total pay and benefits of €65,000 (of which €52,000 was salary).

(C) The individual used in this calculation received total pay and benefits of €82,000 (of which €56,000 was salary).

The Committee has chosen Option B (hourly gender pay gap information as at 5 April 2023) to determine the ratios, as that data was already available and provides a clear methodology to calculate full time equivalent earnings. No component of pay and benefits has been omitted for the purposes of the calculations.

The Committee is satisfied that the individuals whose remuneration is used in the above calculations are reasonably representative of employees at the three percentile points, having also reviewed the remuneration for individuals immediately above and below each of these points, and noted that the spread of ratios was acceptable. No adjustments were made to the three reference points selected.

The Committee believes the median ratio is consistent with the pay and reward policies for CCEP's GB employees. CCEP is committed to offering an attractive package for all employees. Salaries are set with reference to factors such as skills, experience and performance of the individual, as well as market competitiveness. All employees receive a wide range of employee benefits and a large number are eligible for an annual bonus. Our LTIP is designed to link remuneration to the delivery of long-term strategic objectives and therefore participation is typically offered to senior employees who have the ability to influence these outcomes. The 25th percentile, median and 75th percentile employees identified in the above calculation do not participate in the LTIP. As the CEO participates in the LTIP, the ratio will be influenced by vesting outcomes and will likely vary year on year. In consideration of these points, the Committee considers that the levels of remuneration are appropriate.

There were no payments to past Directors during the year.

Payments for loss of office (audited)

There were no payments for loss of office during the year.

Statement of Directors' share ownership and share interests (audited) Interests of the CEO

The CEO is required to hold 300% of their base salary in Shares. The guideline is expected to be met within five years of appointment. Until the guideline is met, 50% of any vested Shares from incentive awards (after tax) must be retained. The guideline continues to apply for one year following termination of employment.

Share ownership requirements and the number of Shares held by Damian Gammell are set out in the table below.

	Interests in Shares at 31 December 2023	Interests in share incentive schemes subject to performance conditions at 31 December 2023 ^{(A)(B)(C)}	Interests in share option schemes ^{(A)(B)}	Share ownership requirement as a % of salary	Share ownership as a % of salary achieved at 31 December 2023	Shareholding guideline met
Damian Gammell ^(D)	510,907	443,920	324,643	300%	2,156%	✓

(A) For further details of these interests, please refer to footnote (C) of the outstanding awards table below.

(B) Do not count towards achievement of the share ownership guideline.

(C) The CEO has no interests in share incentive schemes not subject to performance conditions at 31 December 2023.

(D) A further 138,201 shares will vest under the 2021 LTIP on 15 March 2024.

Details of the CEO's share awards are set out in the table below.

Director and grant date	Form of award	Exercise price	Number of Shares subject to awards at 31 December 2022	Granted during the year	Vested during the year	Exercised during the year	Lapsed during the year	Number of Shares subject to awards at 31 December 2023	End of performance period	Vesting date
Damian Gammell ^(A)										
17 Mar 2020	PSU ^(B)	N/A	156,264	–	144,544	N/A	11,720	–	31 Dec 2022	17 Mar 2023
29 Sep 2021	PSU ^{(C)(D)}	N/A	149,406	–	–	N/A	–	149,406	31 Dec 2023	15 Mar 2024
10 Mar 2022	PSU ^(C)	N/A	163,776	–	–	N/A	–	163,776	31 Dec 2024	10 Mar 2025
13 Mar 2023	PSU ^(C)	N/A	–	130,738	–	N/A	–	130,738	31 Dec 2025	13 Mar 2026

(A) In addition, the CEO has 324,643 vested but unexercised options with an expiry date of 5 November 2025 and an exercise price of US\$39.00. No options were exercised by the CEO during the year.

(B) The performance condition was satisfied at 92.5% of maximum on 31 December 2022. Award vested on 17 March 2023.

(C) The number of Shares shown is the maximum number of Shares that may vest if the performance targets are met in full.

(D) The 2021 PSU awards will vest at 185% of target (138,201 shares) on 15 March 2024.

Annual report on remuneration continued

Interests of other Directors (audited)

The table below gives details of the Share interests of each NED either through direct ownership or connected persons.

	Interests in Shares at 31 December 2023
Sol Daurella ^{(A)(B)}	33,385,384

Garry Watts ^(F)	10,000

(A) Shares held indirectly through Olive Partners. The number of Shares increased slightly during the year as a result of a reduction in Olive Partners' share capital.

(B) For the purposes of Schedule 8 of the Large and Medium-sized Companies and Groups (Accounts and Reports) Regulations 2008 (as amended), Sol Daurella (and her connected persons within the meaning of section 252 of the Companies Act) are deemed to be interested in the shares held by Olive by virtue of their indirect minority interest in Cobega SA, which indirectly owns 57.5% of Olive.

(C) Resigned from the Board on 24 May 2023. Share interests stated are as at the date of resignation.

(D) José Ignacio Comenge's Share interests increased to 7,855,504 on 12 February 2024 following an increase to his overall holding in Olive Partners.

(E) Appointed to the Board on 24 May 2023.

(F) Resigned from the Board on 31 December 2023. Share interests stated are as at the date of resignation.

Dilution levels

The terms of the Company's share plans set limits on the number of newly issued Shares that may be issued to satisfy awards. In accordance with guidance from the Investment Association, these limits restrict overall dilution under all plans to under

10% of the Company's issued share capital over a 10 year period in relation to the Company's issued share capital, with a further limitation of 5% in any 10 year period on discretionary plans.

Single figure table for NEDs (audited)

The following table sets out the total fees and taxable benefits received by the Chairman and NEDs for the year ended 31 December 2023. Prior year figures are also shown.

Annual report on remuneration continued

Implementation of remuneration policy for 2024

Base salary

Damian Gammell will receive a 2.0% salary increase effective 1 April 2024. This is lower than the average merit increase provided to the wider GB workforce of 3.5%.

Individual	2023 salary	2024 salary (effective from 1 April)	% increase
Damian Gammell	£1,241,440	£1,266,269	2.0%

Taxable benefits

No significant changes to the provision of benefits are proposed for 2024. The main benefits for Damian Gammell will continue to include allowances in respect of: a car, financial planning, schooling and private healthcare.

Pension

No changes are proposed in respect of the pension provision for Damian Gammell. He will continue to receive a contribution into the pension scheme up to the annual allowance, with the balance up to the maximum allowed by the Remuneration Policy (£30,000 inclusive of employer National Insurance contributions) as a cash allowance.

Annual bonus

No changes have been made to the structure of the annual bonus plan for 2024, and the opportunity for Damian Gammell will remain unchanged at 150% of salary for target performance and 360% for maximum performance.

Performance will continue to be assessed against financial and individual performance measures on a multiplicative basis as set out on page 131. The financial measures and relative weightings will also remain unchanged.

Measure	Definition	Weighting
Operating profit	Comparable operating profit on a FX neutral basis at budget rates	50%
Revenue	Revenue on a FX neutral basis at budget rates	30%
Operating free cash flow	Comparable operating profit before depreciation and amortisation and adjusting for capital expenditures, restructuring cash expenditures and changes in operating working capital, on a FX neutral basis at budget rates	20%

In determining the IPF for Damian Gammell for 2024, he will be assessed against a number of objectives which are aligned to the key longer-term strategic objectives of the business, which include:

Objectives include:	Strategic objective
• Growth in volume and volume share aligned with the business plan	
• Succession planning	
• Operational targets relating to our recent acquisitions	
• Sustainability objectives	

Link to strategy

Great brands

Great people

Great execution

Done sustainably

The actual financial targets are not disclosed prospectively, as they are deemed commercially sensitive. We intend to disclose them in next year's ARR. A fuller description of individual performance objectives, including specific quantitative measures (where appropriate) and their outcomes, will also be disclosed in next year's ARR.

Annual report on remuneration continued

Long-term incentive

Damian Gammell's long-term incentive opportunity for 2024 will be aligned with the limits set out in the remuneration policy. He will be granted a target award of 250% of salary and may receive up to two times this target award if the maximum performance targets are achieved.

The 2024 LTIP award will continue to be based on a mix of EPS, ROIC and CO₂e reduction, unchanged from last year, and the targets will be set at stretching levels taking into account both our long-term plan and external forecasts.

Due to the timing of the acquisition of CCBPI, and to enable robust targets to be set for the combined business, the awards will be made in Q2. Full details of the targets will be disclosed in next year's ARR.

Following the end of the performance period, awards will be subject to an additional two year holding period.

Chairman and NED fees

The NED base fee, Chairman fee were increased by 3.5% with effect from 1 April 2024, as outlined below, alongside increases to the additional fee for the Senior Independent Director and Committee membership fees. Fees were last increased with effect from 1 April 2022, other than for the Nomination Committee which were last increased with effect from 1 April 2023.

Role		Current fees	Fees effective 1 April 2024
Chairman		£582,000	£602,250
NED basic fee		£85,000	£88,000
Additional fee for Senior Independent Director		£31,750	£32,750
Additional fee for Committee Chairman	Audit and Remuneration Committees	£37,250	£37,250
	Affiliated Transaction, Nomination and ESG Committees	£36,000	£36,000
Additional fee for Committee membership	Audit and Remuneration Committees	£16,000	£16,500
	Affiliated Transaction, Nomination and ESG Committees	£15,500	£16,000

The Remuneration Committee

The entire Board determines the terms of the compensation of the CEO and fees for the NEDs and Chairman and approves the remuneration policy, all on the Committee's recommendation. The Committee is also responsible for setting the remuneration for each member of the ELT reporting to the CEO.

The Terms of Reference can be found on our website at cocacolaep.com/about-us/governance/committees.

Remuneration Committee members and attendance

In line with the Shareholders' Agreement, the Committee has five members, as set out on pages 95-99. There are three independent NEDs, one Director nominated by Olive Partners and one Director nominated by ER. The Committee formally met five times during the year. Attendance is set out in Table 2 on page 110 of the Corporate governance report.

As described in the remuneration policy, the Committee receives an annual report in respect of wider workforce remuneration, including pay and reward policies, which informs its decisions on executive pay. The Committee does not engage directly with employees on the issue of executive pay; however, within CCEP, employee groups are regularly consulted about matters affecting employees, including our strategy, Company performance, culture and approach to reward, and this feedback informs decisions on people matters and other activities.

Support for the Remuneration Committee

Deloitte was appointed by the Remuneration Committee in 2016 following a selection process. During the year, Deloitte provided the Committee with external advice on executive remuneration. Deloitte is a member of the Remuneration Consultants Group and has voluntarily signed up to the Remuneration Consultants' Code of Conduct relating to executive remuneration consulting in the UK. The Committee is satisfied that the engagement partner and team that provide advice to the Committee do not have connections with CCEP or individual Directors that may impair their independence. During 2023, the wider Deloitte firm also provided CCEP with other tax and consultancy services.

Total fees received by Deloitte in relation to the remuneration advice provided to the Committee during the year amounted to £61,400 based on the required time commitment.

Annual report on remuneration continued

Remuneration Committee key activities

The table below gives an overview of the key agenda items discussed at each scheduled meeting of the Remuneration Committee during 2023:

Meeting date	Key agenda items	
February 2023	<ul style="list-style-type: none"> Approval of financial performance outcome for 2022 annual bonus Approval of final vesting outcome for 2020 LTIP 	<ul style="list-style-type: none"> Approval of 2022 annual bonus outcome for the ELT Review of ELT individual objectives in respect of the 2023 annual bonus
March 2023	<ul style="list-style-type: none"> Approval of 2023 annual bonus financial performance measures and targets Approval of 2023 LTIP opportunities Review of Chairman and NED fees 	<ul style="list-style-type: none"> Approval of 2023 ELT Remuneration packages Review of 2022 Remuneration Report
May 2023	<ul style="list-style-type: none"> Review of Committee effectiveness Advisor review 	<ul style="list-style-type: none"> AGM voting update Deloitte Market Update
October 2023	<ul style="list-style-type: none"> Review of 2023 annual bonus and 2021 LTIP performance Review of Malus and Clawback Policy 	<ul style="list-style-type: none"> Review of executive shareholding guidelines Review of annual report on wider workforce remuneration
December 2023	<ul style="list-style-type: none"> Review of first draft of the 2023 Remuneration Report Performance update for 2023 annual bonus 	<ul style="list-style-type: none"> Base pay design for 2024 Incentive design for 2024

The Chairman, CEO, CFO and the Chief People and Culture Officer attended meetings by invitation of the Committee to provide it with additional context or information, except where their own remuneration was discussed.

Summary of voting outcomes

The table below shows how shareholders voted in respect of the ARR and the remuneration policy at the AGM held on 24 May 2023:

Resolution	Votes for (%)	Votes against (%)	Number of votes withheld
Approval of the ARR	81.46%	18.54%	477,284
Approval of the remuneration policy	99.10%	0.90%	70,554

This Directors' remuneration report is approved by the Board and signed on its behalf by

John Bryant,
Chairman of the Remuneration Committee
15 March 2024

Directors' report

The Directors present their report, together with the audited consolidated financial statements of the Group, and of the Company, for the year ended 31 December 2023.

This Directors' report has been prepared in accordance with the applicable disclosure requirements of the following:

- Companies Act
- Listing Rules (LRs) and DTRs
- Statutory Audit Services for Large Companies Market Investigation (Mandatory Use of Competitive Tender Processes and Audit Committee Responsibilities) Order 2014, as published by the UK Competition and Markets Authority (with which the Company complies voluntarily)
- Rules promulgated by the US Securities and Exchange Commission

Additional information and disclosures, as required by the Companies Act, LRs and DTRs, are included elsewhere in this Integrated Report and are incorporated into this Directors' report by reference in Table 1.

This Directors' report, together with the Strategic Report on pages 1-90, represent the management report for the purpose of compliance with DTR 4.1.5R(2) and 4.1.8R.

Directors

Appointment and replacement of Directors

The Articles set out certain rules that govern the appointment and replacement of the Company's Directors. These are summarised as follows:

- A Director may be appointed by either an ordinary resolution of shareholders or by the Board
- Olive Partners and ER may each appoint a specified number of Directors, up to a set maximum, in accordance with their respective equity holding proportions in the Company
- Replacement INEDs must be recommended to the Board by the Nomination Committee
- The Board shall consist of a majority of INEDs
- Directors (other than the initial Chairman, CEO and INEDs) must retire at each AGM, and may, if eligible, offer themselves for re-election
- The minimum number of Directors (disregarding alternate Directors) is two

Table 1

Other information that is relevant to the Directors' report, and which is incorporated by reference into this report, can be located as follows:

Read more about the re-election and election of Directors in the Corporate governance report on page 112

Directors' report continued

Powers of Directors

The Directors may exercise all powers of the Company, in accordance with, and subject to, the Company's Articles and any applicable legislation.

Read more about the roles and responsibilities of the Board and the main Committees of the Board in the Governance and Directors' Report on pages 103-146

Directors' indemnity arrangements

Qualifying third party indemnities were in place throughout 2023, and remain in place as at the date of this Integrated Report. Under these indemnities, the Company has agreed to indemnify the Directors of the Company, to the extent permitted by law, against losses and liabilities that may be incurred in executing the powers and duties of their office.

Amendment of Articles

The Articles may only be amended by a special resolution of the Company's shareholders in accordance with the Companies Act. Certain provisions of the Articles are entrenched and may only be amended or repealed with the prior consent of Olive Partners, ER or a majority of the INEDs (as applicable). In particular, the requirement under the Articles that the Board shall, at all times, contain a majority of INEDs may only be amended or repealed with the prior consent of a majority of the INEDs. The Articles are available at cocacolaep.com/about-us/governance.

Political donations

The Group made no political donations or contributions during 2023 (2022: nil). It is our policy not to make political donations or incur political expenditure. However, there may be uncertainty as to whether some normal business activities fall under the wide definitions of political donations, organisations and expenditure used in the Companies Act. We will therefore continue to seek shareholder approval to make political donations or incur expenditure as a precaution to avoid any inadvertent breach of the Companies Act.

Shares

Rights and obligations

The rights and obligations relating to the Company's Shares (in addition to those set out by law) are contained in the Articles.

Restrictions on transfer of securities

Olive Partners and TCCC are both subject to certain restrictions relating to the acquisition or disposal of Shares under the terms of the Shareholders' Agreement. Other than those set out in the Shareholders' Agreement, we are not aware of any agreements between shareholders that may result in a restriction of the transfer of securities or voting rights in the Company.

Employee share schemes

Shares issued under the Company's employee share schemes rank *pari passu* with the existing Shares of the Company. Voting rights attached to Shares held on trust on behalf of participants in the GB Employee Share Plan are exercised by the trustee as directed by the participants.

Significant shareholdings

In accordance with DTR 5.8, Table 2 below shows the significant interests in Shares of which the Company has been notified as at 31 December 2023, and the date of this report. The shareholders identified have the same voting rights as all other shareholders.

Share buyback programme

The Company announced a share buyback programme on 13 February 2020, under which it proposed to reduce share capital by up to €1 billion through the purchase and cancellation of its own Shares (the Buyback Programme). Share purchases for the Buyback Programme were undertaken pursuant to shareholder authority granted at the 2019 AGM.

In light of the significant and unprecedented macroeconomic uncertainty brought about by the outbreak of COVID-19, on 23 March 2020, the Company announced a suspension of the Buyback Programme. To maintain flexibility, the shareholder authority to purchase Shares was renewed at the 2023 AGM, under which the Company may purchase up to 45,826,533 Shares, representing 10% of the Company's issued share capital at 5 April 2023, reduced by the number of Shares purchased or agreed to be purchased between 5 April and 24 May 2023. No Shares were purchased under this authority in 2023.

We intend to seek to renew the authority to purchase Shares at the 2024 AGM.

For more details, see the Share buyback programme section in Other Group information on page 254

Directors' report continued

Table 2
Interests in Shares of which the Company has been notified

Shareholder	Percentage of total voting rights notified to the Company as at the year end ^(C)	Number of voting rights notified to the Company as at the year end	Percentage of total voting rights notified to the Company as at the date of this report ^(C)	Number of voting rights notified to the Company as at the date of this report
Cobega, S.A. ^(A)	36.1%	166,128,987	36.1%	166,128,987
TCCC ^(B)	19.01%	87,950,640	19.01%	87,950,640

(A) Held indirectly through its 56.03% owned subsidiary, Olive Partners.

(B) Held indirectly through European Refreshments Unlimited Company.

(C) Percentage interests disclosed calculated as at the date on which the relevant disclosure was made. These have not been updated to reflect changes in the total voting rights since notification and so may not represent the percentage interest as at 31 December 2023 or the date of this report.

Change of control

There are no agreements in place which provide compensation for loss of office or employment to any Director in the event of a takeover, except for certain provisions under the employee share plans, which may provide that certain outstanding awards may vest early in such an event.

The Board considers that a change of control might have an impact on the following significant agreements:

- Bottling agreements between the Group and TCCC
- A bank credit facility agreement, under which the maximum amount available at 31 December 2023 was €1.8 billion
- Note and guarantee agreement in relation to the A\$250 million 4.20% Notes 2031
- Note and guarantee agreement in relation to the US\$50 million 4.34% Notes 2023

Research and development

TCCC's second-largest innovation centre is based in Belgium, where products for Europe, the Middle East, Africa and part of South Asia are developed. CCEP does not have its own research and development centre, but the Company invests in and undertakes certain activities for the development of innovative solutions (such as packaging concepts or less energy, water and carbon intensive beverage manufacturing technology), digital capabilities and advanced analytics to drive the simplification of applications and platforms, and to support and grow its business in both its manufacturing and non-manufacturing operations.^(D)

(D) This policy has applied for the last three years.

Independent auditor

Disclosure of information to auditors

Each of the Directors in office as at the date of this Integrated Report, confirms that:

- so far as he or she is aware, there is no relevant audit information (as defined by section 418 of the Companies Act) of which the Company's auditor is unaware.
- he or she has taken all the reasonable steps that he or she ought to have taken as a Director to make himself or herself aware of any relevant audit information and to establish that the Company's auditor is aware of that information.

Auditor reappointment

EY has expressed willingness to continue in its capacity as independent auditor of the Company. The Directors plan to recommend a resolution to reappoint EY at the 2024 AGM.

Going concern

As part of the Directors' consideration of the appropriateness of adopting the going concern basis in preparing the Parent Company and consolidated financial statements, the Directors have taken into account the Group's overall financial position, exposure to the principal risks and future business forecasts. For the Parent Company, the Directors also considered the ability of its subsidiaries to remit earnings. At 31 December 2023, the Group had cash and cash equivalents of €1.4 billion and had access to a €1.8 billion undrawn committed credit facility, which is free of financial covenants and in place until at least January 2029. The Directors have also considered the stress testing performed as part of the assessment of viability set out on page 79.

On this basis, the Directors have a reasonable expectation that the Group and Parent Company have adequate resources to continue in operational existence for a period of 12 months from the date of signing these accounts.

This Directors' Report has been approved by the Board and signed on its behalf by

Clare Wardle Company Secretary

15 March 2024

Coca-Cola Europacific Partners plc

Directors' responsibilities statement

Responsibility for preparing financial statements

The Directors are responsible for preparing the Integrated Report and the financial statements in accordance with applicable United Kingdom (UK) law and regulations.

UK company law requires the Directors to prepare financial statements for each financial year. Under that law, the Directors have prepared Group and Parent Company financial statements in accordance with UK-adopted International Accounting Standards. In preparing the consolidated Group financial statements the Directors have also elected to comply with International Financial Reporting Standards (IFRS) as adopted by the European Union, and International Financial Reporting Standards as issued by the International Accounting Standards Board (IASB).

Under section 393 of the Companies Act, the Directors must not approve the financial statements unless they are satisfied that they give a true and fair view of the state of affairs of the Company and of the Group and of the profit or loss of the Company and of the Group for that period.

In preparing the Company financial statements, the Directors are required to:

- Select suitable accounting policies and apply them consistently

- Make judgements and accounting estimates that are reasonable and prudent
- Follow UK-adopted International Accounting Standards, International Financial Reporting Standards as adopted by the European Union, and International Financial Reporting Standards as issued by the IASB
- Prepare the financial statements on a going concern basis unless it is inappropriate to presume that the Company will continue in business

In preparing the Group financial statements the Directors are required to:

- Select suitable accounting policies and apply them consistently
- State whether UK-adopted International Accounting Standards, International Financial Reporting Standards as adopted by the European Union, and International Financial Reporting Standards as issued by the IASB have been followed, subject to any material departures disclosed and explained in the financial statements
- Present information, including accounting policies, in a manner that provides relevant, reliable, comparable and understandable information
- Provide additional disclosures when compliance with the specific requirements in IFRS are insufficient to enable users to understand the impact of particular transactions,

other events and conditions on the entity's financial performance

- Make an assessment of the Group's ability to continue as a going concern

The Directors are responsible for keeping adequate accounting records that are sufficient to show and explain the Group's and Company's transactions and disclose with reasonable accuracy at any time the financial position of the Group and the Company and enable them to ensure that the financial statements comply with the Companies Act. They are responsible for safeguarding the assets of the Group and Company and hence for taking reasonable steps for the prevention and detection of fraud and other irregularities.

Under applicable law and regulations, the Directors are also responsible for preparing a Strategic Report, Directors' report, Annual report on remuneration, and Corporate governance report that comply with that law and those regulations. The Directors are responsible for the maintenance and integrity of the corporate and financial information included on the Company's website.

Legislation, regulation and practice in the UK governing the preparation and dissemination of financial statements may differ from legislation, regulation and practice in other jurisdictions.

Responsibility statement

The Directors, whose names and functions are set out on pages 95-99, confirm that to the best of their knowledge:

- The consolidated financial statements, prepared in accordance with UK-adopted International Accounting Standards, International Financial Reporting Standards as adopted by the European Union and International Financial Reporting Standards as issued by the IASB, give a true and fair view of the assets, liabilities, financial position and profit or loss of the Company and the undertakings included in the consolidation taken as a whole
- The Strategic Report includes a fair review of the development and performance of the business and the position of the Company and the undertakings included in the consolidation taken as a whole, together with a description of the principal risks and uncertainties they face
- The Integrated Report and financial statements, taken as a whole, are fair, balanced and understandable and provide the information necessary for shareholders to assess the Company's position and performance, business model and strategy

Independent auditor's report to the members of Coca-Cola Europacific Partners plc

Opinion

In our opinion:

- Coca-Cola Europacific Partners plc's Group financial statements and Parent Company financial statements (the "financial statements") give a true and fair view of the state of the Group's and of the Parent Company's affairs as at 31 December 2023 and of the Group's and the Parent Company's profit for the year then ended;
- the Group and Parent Company financial statements have been properly prepared in accordance with U.K. adopted International Accounting Standards; International Financial Reporting Standards ('IFRS') as adopted by the European Union and International Financial Reporting Standards as issued by the International Accounting Standards Board ('IASB'); and
- the financial statements have been prepared in accordance with the requirements of the Companies Act 2006.

We have audited the financial statements of Coca-Cola Europacific Partners plc (the 'Parent Company') and its subsidiaries (the 'Group') for the year ended 31 December 2023 which comprise:

Group	Parent Company
Consolidated statement of financial position as at 31 December 2023	Statement of financial position as at 31 December 2023
Consolidated income statement for the year then ended	Statement of comprehensive income for the year then ended
Consolidated statement of comprehensive income for the year then ended	Statement of cash flows for the year then ended
Consolidated statement of changes in equity for the year then ended	Statement of changes in equity for the year then ended
Consolidated statement of cash flows for the year then ended	Related notes 1 to 11 to the financial statements including material accounting policy information
Related notes 1 to 29 to the financial statements, including material accounting policy information	

The financial reporting framework that has been applied in their preparation is applicable law, UK adopted International Accounting Standards, IFRS as adopted by the European Union and International Financial Reporting Standards as issued by the IASB.

Basis for opinion

We conducted our audit in accordance with International Standards on Auditing (UK) (ISAs (UK)) and applicable law. Our responsibilities under those standards are further described in the Auditor's responsibilities for the audit of the financial statements section of our report. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

Independence

We are independent of the Group and Parent in accordance with the ethical requirements that are relevant to our audit of the financial statements in the UK, including the FRC's Ethical Standard as applied to listed public interest entities, and we have fulfilled our other ethical responsibilities in accordance with these requirements.

The non-audit services prohibited by the FRC's Ethical Standard were not provided to the Group or the Parent Company and we remain independent of the Group and the Parent Company in conducting the audit.

Conclusions relating to going concern

In auditing the financial statements, we have concluded that the Directors' use of the going concern basis of accounting in the preparation of the financial statements is appropriate. Our evaluation of the Directors' assessment of the Group and Parent Company's ability to continue to adopt the going concern basis of accounting included:

- In conjunction with our walkthrough of the Group's financial close process, we confirmed our understanding of management's going concern assessment process.
- We obtained management's going concern assessment, including the liquidity forecast for the going concern period which covers a year from the date of signing this audit opinion. The Group has modelled downside scenarios in their liquidity forecasts in order to incorporate unexpected changes to the forecasted liquidity of the Group. They have also considered the impact of the acquisition of Coca-Cola Beverages Philippines, Inc completed in February 2024. We understood the factors and assumptions included in each modelled downside scenario and assessed the plausibility of these in the context of our understanding of the Group and its principal risks, including climate-related risks.
- We tested the clerical accuracy of the model used to prepare the Group's going concern assessment.
- We considered the appropriateness of the methods used to calculate the cash forecasts and determined through inspection and testing of the methodology and calculations, that the methods utilised were appropriate.

Independent auditor's report to the members of Coca-Cola Europacific Partners plc continued

- We confirmed the cash and cash equivalents balance of €1.4 billion as at 31 December 2023 and verified the cash flows from operating activities of €2.8 billion in the year. We obtained evidence of the Group's €1.8 billion multi-currency credit facility which is available through to January 2029, noting no associated financial covenants. The facility is undrawn as at 15 March 2024.
- We reviewed the debt maturity ladder and concluded that all debt repayments were included in the forecasts. We also checked that the Group is forecast to have sufficient liquidity to repay debt which matures in the 12 months after the going concern period.
- We considered whether the Group's forecasts used in the going concern assessment were consistent with other forecasts used by the Group in its accounting estimates, including those used in the annual impairment test.
- We assessed the ability of the subsidiaries of the Group to remit earnings to the Parent Company.
- We reviewed the Group and Parent Company going concern disclosures included in the Directors' Report on page 146 and Note 1 to the consolidated and Parent Company financial statements on pages 167 and 227, respectively, in order to assess that the disclosures were appropriate and in conformity with the reporting standards.

Based on the work we have performed, we have not identified any material uncertainties relating to events or conditions that, individually or collectively, may cast significant doubt on the Group and Parent Company's ability to continue as a going concern for a period of 12 months from when the financial statements are authorised for issue.

In relation to the Group and Parent Company's reporting on how they have applied the UK Corporate Governance Code, we have nothing material to add or draw attention to in relation to the Directors' statement in the financial statements about whether the Directors considered it appropriate to adopt the going concern basis of accounting.

Our responsibilities and the responsibilities of the Directors with respect to going concern are described in the relevant sections of this report. However, because not all future events or conditions can be predicted, this statement is not a guarantee as to the Group's ability to continue as a going concern.

Overview of our audit approach

Audit scope	<ul style="list-style-type: none"> • We performed an audit of the complete financial information of seven components and audit procedures on specific balances for a further six components. • The components where we performed full or specific audit procedures accounted for 91% of adjusted profit before tax (measure used to calculate materiality), 86% of revenue and 89% of total assets.
Key audit matters	<ul style="list-style-type: none"> • Accrued customer marketing costs. • Accounting for uncertain tax positions.
Materiality	<ul style="list-style-type: none"> • Overall Group materiality of €100m which represents 4.8% of the adjusted profit before tax.

Independent auditor's report to the members of Coca-Cola Europacific Partners plc continued

An overview of the scope of the Parent Company and Group audits Tailoring the scope

Our assessment of audit risk, our evaluation of materiality and our allocation of performance materiality determine our audit scope for each reporting component within the Group. Taken together, this enables us to form an opinion on the consolidated financial statements. We take into account size, risk profile, the organisation of the group and effectiveness of Group-wide controls, changes in the business environment, the potential impact of climate change and other factors such as recent internal audit results when assessing the level of work to be performed at each company.

In assessing the risk of material misstatement to the Group financial statements, and to ensure we had adequate quantitative coverage of significant accounts in the financial statements, of the 68 reporting components of the Group (17 of which are trading components), we selected 36 components covering 25 corporate components and 11 trading components, which represent the principal business units within the Group.

Of the 36 components selected, we performed an audit of the complete financial information of seven components ("full scope components") which were selected based on their size or risk characteristics. For six components ("specific scope components"), we performed audit procedures on specific accounts within that component that we considered had the potential for the greatest impact on the significant accounts in the financial statements either because of the size of these accounts or their risk profile. We have also performed specified procedures over 23 locations, primarily in relation to the testing of cash and cash equivalents.

The table below illustrates the coverage obtained from the work performed by our audit teams.

	Number		% Group adjusted profit before tax		% Group revenue		% Total assets		See Notes
	2023	2022	2023	2022	2023	2022	2023	2022	
Full scope	7	7	99%	97%	76%	75%	83%	84%	A, B
Specific scope	6	5	(8)%	4%	10%	10%	6%	6%	A, B, C, D
Coverage	13	12	91%	101%	86%	85%	89%	90%	
Specified procedures	23	22	—%	—%	6%	3%	4%	3%	B
Remaining components	32	33	9%	(1)%	8%	12%	7%	7%	E
Total reporting components	68	67	100%	100%	100%	100%	100%	100%	

Notes

- (A) The Group audit risk in relation to tax was subject to audit procedures performed by both the component teams and the Group team.
- (B) The Group audit risk in relation to accrued customer marketing costs was subject to audit procedures performed by the Group team and at six full scope components, three specific scope components and specified procedures at two components.
- (C) The specific scope components relate to four trading components.
- (D) The audit scope of these components may not have included testing of all significant accounts of the component but will have contributed to the coverage of significant accounts tested for the Group. Significant accounts that were not subject to the specific scope audit procedures were subjected to testing of Group-wide controls and analytical review.
- (E) Of the remaining 32 components that together represent 9% of the Group's adjusted profit before tax, none are individually greater than 3% of the Group's adjusted profit before tax. For the remaining components in this category, we performed other procedures, including testing of Group-wide controls, analytical review procedures and testing of consolidation journals including intercompany eliminations to respond to any potential risks of material misstatement to the Group financial statements.

Independent auditor's report to the members of Coca-Cola Europacific Partners plc continued

Changes from the prior year

We have not removed any audits designated as full scope or specific scope components from the prior year as these components remain the most significant to the Group, by size and risk, and the coverage remains consistent with the prior year. In the current year, we included one additional specific scope component in our scope which includes certain intangibles assets. As this is a cost centre, this has reduced our coverage over adjusted profit before tax compared to the prior year. We performed specified procedures for a larger number of components, primarily relating to cash and cash equivalents across the Group.

Involvement with component teams

In establishing our overall approach to the Group audit, we determined the type of work that needed to be undertaken at each of the components by us, as the primary audit engagement team, or by component auditors from other EY global network firms operating under our instruction. Of the seven full scope components, audit procedures were performed on six of these directly by the component audit team. For the 29 specific scope and specified procedures components, eight represented work performed directly by component auditors. Where the work was performed by component auditors, we determined the appropriate level of involvement to enable us to determine that sufficient audit evidence had been obtained as a basis for our opinion on the Group as a whole.

During the current audit cycle, we completed a combination of physical visits to component teams and alternative oversight procedures, including meeting our European full and specific scope components at our global audit event held in London. We also attended video meetings and live reviewed our local audit teams' working papers. Our physical visits included the Senior Statutory Auditor or delegates visiting Australia, Spain, Germany, France, Great Britain, Belgium and Indonesia.

Our site visits (both physical and virtual) involved: meeting with our component teams to discuss and direct their audit approach; reviewing relevant working papers and understanding the significant audit findings in response to the risk areas including accrued customer marketing costs and taxation; holding meetings with local management; and obtaining updates on local regulatory matters including tax, pensions, restructuring and legal. The Group audit team interacted regularly with the component teams where appropriate during various stages of the audit, reviewed relevant working papers and were responsible for the scope and direction of the audit process. This, together with the additional procedures performed at Group level, gave us appropriate evidence for our opinion on the Group financial statements.

Climate change

Stakeholders are increasingly interested in how climate change will impact the Group. The Group has determined that the most significant future impacts from climate change on its operations will be from the increased severity of extreme weather events which could cause disruption to facilities and logistics routes, increasing water stress or water scarcity, changes to weather and precipitation patterns which could cause disruption to the supply of ingredients as well future regulations (e.g. carbon tax related to greenhouse gas emissions). These are explained on pages 48 to 60 in the Task Force On Climate Related Financial disclosures and on pages 68 to 78 in the principal risks. The Group has also explained its climate commitments on page 36. All of these disclosures form part of the "Other information," rather than the audited financial statements. Our procedures on these unaudited disclosures therefore consisted solely of considering whether they are materially inconsistent with the financial statements or our knowledge obtained in the course of the audit or otherwise appear to be materially misstated, in line with our responsibilities on "Other information".

In planning and performing our audit we assessed the potential impacts of climate change on the Group's business and any consequential material impact on its financial statements.

The Group has explained in Note 1 (Impact of climate change) its articulation of how climate change has been reflected in the financial statements including how this aligns with their commitment to achieve net zero emissions by 2040. In Note 6 (Intangible assets and goodwill) and Note 7 (Property, plant and equipment) to the financial statements, narrative explanation including further details over the Group's considerations has been provided.

Our audit effort in considering the impact of climate change on the financial statements was focused on evaluating management's assessment of the impact of climate risk, physical and transition, their climate commitments, the effects of material climate risks disclosed on pages 56 to 59 and the significant judgements and estimates disclosed in Note 3 and whether these have been appropriately reflected in asset values, useful economic lives, cash flow projections used in assessing the recoverable amount of the Group's CGUs, and also in the going concern and viability assessment. As part of this evaluation, we performed our own risk assessment, supported by our climate change internal specialists, to determine the risks of material misstatement in the financial statements from climate change which needed to be considered in our audit.

Independent auditor's report to the members of Coca-Cola Europacific Partners plc continued

We also challenged the Directors' considerations of climate change risks in their assessment of going concern and viability and associated disclosures. Where considerations of climate change were relevant to our assessment of going concern, these are described above.

Based on our work we have not identified the impact of climate change on the financial statements to be a key audit matter or to impact a key audit matter.

Key audit matters

Key audit matters are those matters that, in our professional judgement, were of most significance in our audit of the financial statements of the current period and include the most significant assessed risks of material misstatement (whether or not due to fraud) that we identified. These matters included those which had the greatest effect on: the overall audit strategy, the allocation of resources in the audit; and directing the efforts of the engagement team. These matters were addressed in the context of our audit of the financial statements as a whole, and in our opinion thereon, and we do not provide a separate opinion on these matters.

Risk

Accrued customer marketing costs

Refer to the Audit Committee Report (page 121-122); Accounting policies (pages 169 and 170).

The Group participates in various programmes and arrangements with customers referred to as "promotional programmes", which are recorded as deductions from revenue. The off-invoice discounts activity totalled €5.4 billion for the year ended 31 December 2023 (2022: €5.2 billion), with €1.3 billion of accrued customer marketing costs as of 31 December 2023 (2023: €1.3 billion).

Auditing the completeness and measurement of the accrued customer marketing costs is complex and judgemental, particularly in relation to promotional programmes where there is estimation uncertainty related to forecasted sales volumes, expected customer performance or amounts ultimately claimed by customers.

The types of promotional programmes are more fully described in Note 3 to the consolidated financial statements with details about accrued customer marketing costs disclosed in Note 14 to the consolidated financial statements.

Our response to the risk

We performed audit procedures over this matter at ten reporting components which covered 93% of the Group balance.

We obtained an understanding of the Group's revenue recognition policies and processes and how they are applied, and for full and specific scope reporting components evaluated the design and tested the operating effectiveness of controls, including IT controls, that address the risks of material misstatement relating to the completeness and measurement of the promotional programmes. For example, we tested controls over management's determination of the total estimated sales volumes used in the assessment of the accrued customer marketing costs.

To evaluate the specific estimations that are inherent in the calculation of the accrued customer marketing costs and assess the completeness of the accrual:

- We evaluated management's methodology to estimate the year-end accrued customer marketing costs, in particular the use of historical trends.
- We tested the completeness and accuracy of the underlying data by agreeing key terms of the promotional programmes to the executed sales agreements on a sample basis. We also compared accrued customer marketing costs to subsequent cash settlements on a sample basis.
- We performed analytical procedures on the ratio of accrued customer marketing costs to relevant data such as gross revenue to identify any potential outliers and tested material unusual or unexpected journal entries.
- We analysed the historical reversals and ageing of the accrued customer marketing costs, to identify potential management bias in the estimate of the year-end accrual and considered any changes in the business environment that would warrant changes in the methodology.
- We also evaluated the disclosures provided in the consolidated financial statements related to these promotional programmes.

The audit procedures performed to address this risk were performed by both the component teams and the Primary team.

Key observations communicated to the Audit Committee

We concluded that accrued customer marketing costs in the consolidated statement of financial position represent a reasonable estimate of the associated liability and the related disclosures included in the financial statements are appropriate.

Independent auditor's report to the members of Coca-Cola Europacific Partners plc continued

Risk

Accounting for uncertain tax positions

Refer to the Audit Committee Report (page 121-122); Accounting policies (pages 171 and 208).

At 31 December 2023, the Group recorded provisions for uncertain tax positions of which €175 million (31 December 2022: €122 million) are included in current tax liabilities and the remainder in non-current tax liabilities.

The Group is subject to income tax in numerous jurisdictions and is routinely under audit by tax authorities in the ordinary course of business as described in Note 20 and Note 22 of the consolidated financial statements.

Management applies judgement in assessing tax exposures in each jurisdiction, which requires interpretation of local tax laws and specific facts and circumstances.

Auditing the uncertain tax positions is judgemental, because of the inherent uncertainty related to the tax exposures, which may result in materially different outcomes. Specifically, each tax position involves the evaluation of unique and evolving facts and circumstances.

In the prior year, our auditor's report included a key audit matter in relation to the carrying value of goodwill and indefinite lived intangibles. In the current year, we concluded that this is no longer a key audit matter due to the continued growth in the Group's significant cash generating units and as we concluded there is no risk of a material misstatement.

Our application of materiality

We apply the concept of materiality in planning and performing the audit, in evaluating the effect of identified misstatements on the audit and in forming our audit opinion.

Our response to the risk

We performed audit procedures over this matter at four full scope components and one specific scope component.

We obtained an understanding, evaluated the design and tested the operating effectiveness of controls, including IT controls, in place over the Group's process to evaluate and account for uncertain tax positions. For example, we tested the Group's controls around evaluation of the facts and circumstances supporting the conclusions on the Group's tax positions.

We obtained management's calculations and agreed inputs to source documentation where applicable.

We evaluated the tax positions taken by management in each significant jurisdiction in the context of local tax laws, considering correspondence with tax authorities, the status of any tax audits and third-party advice obtained by the Group. Our work involved tax professionals with local knowledge to assess the tax positions taken in each significant jurisdiction in the context of local tax law and significant tax assessments.

In evaluating management's tax provisions, we evaluated the assumptions used by management to assess its uncertain tax positions and compliance with the requirements of IFRIC 23. We developed our independent range of possible outcomes for the Group's tax exposures based on evidence obtained, which we compared to the Group's provisions. Where exposures arise in jurisdictions with similar laws and regulations, we also considered whether the evaluation of tax risks was consistent across those jurisdictions and took into account any resolution of these issues with the tax authorities.

We evaluated the adequacy of the related disclosures provided in the Group financial statements.

The audit procedures performed to address this risk were performed by both the component teams and the Group team.

Key observations communicated to the Audit Committee

We have evaluated the Group's tax provisions and challenged the judgements applied. We concluded that the amounts provided for uncertain tax positions are within an acceptable range considering the latest developments in each jurisdiction and the Group's overall tax exposures and that the related disclosures are appropriate.

Materiality

The magnitude of an omission or misstatement that, individually or in the aggregate, could reasonably be expected to influence the economic decisions of the users of the financial statements. Materiality provides a basis for determining the nature and extent of our audit procedures.

We determined materiality for the Group to be €100 million (2022: €87 million), which is 4.8% (2022: 4.7%) of adjusted profit before tax. We believe that the adjusted profit before tax provides us with the most relevant profit basis as the non-recurring items were not related to the ongoing trading of the Group. The increase in Group materiality since 2022 reflects the increase in profit before taxation, driven by continued growth in the business in the current year.

Independent auditor's report to the members of Coca-Cola Europacific Partners plc continued

We determined materiality for the Parent Company to be €139 million (2022: €142 million), which is 1% (2022: 1%) of shareholder's equity.

During the course of our audit, we reassessed initial materiality and the actual adjusted profit before tax was slightly higher than the forecasted adjusted profit before tax and hence the recalculated materiality was higher than the Group's initial estimates used at planning. However, due to the status of our procedures we did not change our materiality assessment to reflect this.

ADJUSTED PROFIT BEFORE TAX MEASURE

Starting basis	<ul style="list-style-type: none"> Profit before tax: €2,203 million
Adjustments	<ul style="list-style-type: none"> Gain on property sale: €54 million Gain on sale of sub-strata and associated mineral rights: €35 million Coal royalty income: €18 million Total adjustments: €107 million
Adjusted basis	<ul style="list-style-type: none"> €2,096 million (adjusted profit before tax)
Materiality	<ul style="list-style-type: none"> Materiality maintained at planning level of €100 million versus €104.8 million on adjusted final reported profit before tax

Performance materiality

The application of materiality at the individual account or balance level. It is set at an amount to reduce to an appropriately low level the probability that the aggregate of uncorrected and undetected misstatements exceeds materiality.

On the basis of our risk assessments, together with our assessment of the Group's overall control environment, our judgement was that performance materiality was 75% (2022: 75%) of our planning materiality, namely €75 million (2022: €65 million). We reviewed any misstatements identified in our 2022 Group audit to assess their potential recurrence in 2023 (which would affect the percentage of Group performance materiality we utilised to determine the extent of our audit procedures). Based on the nature of the adjustments identified last year, we concluded the likelihood of material misstatements would remain low in the current year and, hence, we set performance materiality at 75%.

Audit work at component locations for the purpose of obtaining audit coverage over significant financial statement accounts is undertaken based on a percentage of total performance materiality. The performance materiality set for each component is based on the relative scale and risk of the component to the Group as a whole and our assessment of the risk of misstatement at that component. In the current year, the range of performance materiality allocated to components was €15 million to €37.5 million (2022: €13.1 million to €32.7 million).

Reporting threshold

An amount below which identified misstatements are considered as being clearly trivial.

We agreed with the Audit Committee that we would report to them all uncorrected audit differences in excess of €5 million (2022: €4.3 million), which is set at 5% of planning materiality, as well as differences below that threshold that, in our view, warranted reporting on qualitative grounds.

We evaluate any uncorrected misstatements against both the quantitative measures of materiality discussed above and in light of other relevant qualitative considerations in forming our opinion.

Other information

The other information comprises the information included in the annual report including the Strategic Report set out on pages 1 to 90, Governance and Directors' report set out on pages 91 to 147 and Other Group Information set out on pages 242 to 278 other than the financial statements and our auditor's report thereon. The Directors are responsible for the other information contained within the annual report.

Our opinion on the financial statements does not cover the other information and, except to the extent otherwise explicitly stated in this report, we do not express any form of assurance conclusion thereon.

Our responsibility is to read the other information and, in doing so, consider whether the other information is materially inconsistent with the financial statements or our knowledge obtained in the course of the audit or otherwise appears to be materially misstated. If we identify such material inconsistencies or apparent material misstatements, we are required to determine whether this gives rise to a material misstatement in the financial statements themselves. If, based on the work we have performed, we conclude that there is a material misstatement of the other information, we are required to report that fact.

We have nothing to report in this regard.

Independent auditor's report to the members of Coca-Cola Europacific Partners plc continued

Opinions on other matters prescribed by the Companies Act 2006

In our opinion, the part of the Directors' remuneration report to be audited has been properly prepared in accordance with the Companies Act 2006.

In our opinion, based on the work undertaken in the course of the audit:

- the information given in the Strategic Report and the Directors' Report for the financial year for which the financial statements are prepared is consistent with the financial statements; and
- the Strategic Report and the Directors' Report have been prepared in accordance with applicable legal requirements.

Matters on which we are required to report by exception

In the light of the knowledge and understanding of the Group and the Parent Company and its environment obtained in the course of the audit, we have not identified material misstatements in the Strategic Report or the Directors' Report.

We have nothing to report in respect of the following matters in relation to which the Companies Act 2006 requires us to report to you if, in our opinion:

- adequate accounting records have not been kept by the Parent Company, or returns adequate for our audit have not been received from branches not visited by us; or
- the Parent Company financial statements and the part of the Directors' Remuneration Report to be audited are not in agreement with the accounting records and returns; or
- certain disclosures of Directors' remuneration specified by law are not made; or
- we have not received all the information and explanations we require for our audit.

Corporate Governance Statement

We have reviewed the Directors' statement in relation to going concern, longer-term viability and that part of the Corporate Governance Statement relating to the Group and Parent Company's compliance with the provisions of the UK Corporate Governance Code specified for our review by the Listing Rules.

Based on the work undertaken as part of our audit, we have concluded that each of the following elements of the Corporate Governance Statement is materially consistent with the financial statements or our knowledge obtained during the audit:

- Directors' statement with regards to the appropriateness of adopting the going concern basis of accounting and any material uncertainties identified set out on page 146;

- Directors' explanation as to its assessment of the company's prospects, the period this assessment covers and why the period is appropriate set out on page 79;
- Director's statement on whether it has a reasonable expectation that the Group will be able to continue in operation and meets its liabilities set out on page 146;
- Directors' statement on fair, balanced and understandable set out on page 147;
- Board's confirmation that it has carried out a robust assessment of the emerging and principal risks set out on page 68-78;
- The section of the annual report that describes the review of effectiveness of risk management and internal control systems set out on page 77 and 124; and
- The section describing the work of the Audit Committee set out on page 117-124.

Responsibilities of Directors

As explained more fully in the Directors' responsibilities statement set out on page 147, the Directors are responsible for the preparation of the financial statements and for being satisfied that they give a true and fair view, and for such internal control as the Directors determine is necessary to enable the preparation of financial statements that are free from material misstatement, whether due to fraud or error.

In preparing the financial statements, the Directors are responsible for assessing the Group and Parent Company's ability to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless the Directors either intend to liquidate the Group or the Parent Company or to cease operations, or have no realistic alternative but to do so.

Auditor's responsibilities for the audit of the financial statements

Our objectives are to obtain reasonable assurance about whether the financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with ISAs (UK) will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these financial statements.

Independent auditor's report to the members of Coca-Cola Europacific Partners plc continued

Explanation as to what extent the audit was considered capable of detecting irregularities, including fraud

Irregularities, including fraud, are instances of non-compliance with laws and regulations. We design procedures in line with our responsibilities, outlined above, to detect irregularities, including fraud. The risk of not detecting a material misstatement due to fraud is higher than the risk of not detecting one resulting from error, as fraud may involve deliberate concealment by, for example, forgery or intentional misrepresentations, or through collusion. The extent to which our procedures are capable of detecting irregularities, including fraud is detailed below.

However, the primary responsibility for the prevention and detection of fraud rests with both those charged with governance of the company and management.

- We obtained an understanding of the legal and regulatory frameworks that are applicable to the Group and determined that the most significant are:
 - those that relate to the reporting framework: U.K. adopted International Accounting Standards, International Financial Reporting Standards (IFRS) as adopted by the European Union, International Financial Reporting Standards as issued by the IASB, the UK Companies Act 2006 and the UK Corporate Governance Code.
 - those that relate to the accrual or recognition of expenses for taxation such as various country specific tax regulations in which the Group has operations.
 - those that relate to the accrual or recognition of expenses for pension costs, as well as the treatment of its employees, such as labour agreements in countries where the Group operates.
 - In addition, we concluded that there are certain significant laws and regulations which may have an effect on the determination of the amounts and disclosures in the financial statements, primarily being The US Securities Act and Exchange Act of 1934 and the Listing Rules of the UK Listing Authority.
- We understood how Coca-Cola Europacific Partners plc is complying with those frameworks by making enquiries of management, internal audit, those responsible for legal and compliance procedures and the company secretary. We corroborated our enquiries through our review of board minutes and papers provided to the Audit Committee and attendance at all meetings of the Audit Committee, as well as consideration of the results of our audit procedures across the Group.
- We assessed the susceptibility of the Group's financial statements to material misstatement, including how fraud might occur. We did this by:
 - Meeting with management from various parts of the business to understand where they considered there to be susceptibility to fraud;

- Assessing whistleblowing incidences for those with a potential financial reporting impact;
- Evaluating the historical performance of CCEP against similar companies;
- Understanding the Group's annual bonus scheme and long-term incentive plan performance targets and their propensity to influence on efforts made by management to manage revenue and earnings;
- Understanding the related party transactions and significant transactions occurring with related parties in the year;
- Assessing the key judgements and estimates and significant transactions occurring in year; and
- Considering the controls framework, including IT General controls, that the Group has established to prevent, deter and detect fraud; and how senior management monitors those programmes and controls.

Where the risk was considered to be higher, we performed audit procedures to address identified risks of material misstatement. These procedures included those referred to in the "Accrued customer marketing costs" key audit matters section above. In addition, we used data analytics at our full and specific scope components to correlate revenue with trade receivables and cash received, as well as promotional programmes expense with promotional programmes accruals and settlements. We also performed journal entry testing, focusing on manual and consolidation journals, and inspected documentation for any material unusual or unexpected journals.

Based on this understanding we designed our audit procedures to identify non-compliance with such laws and regulations, including specific instructions to full and specific scope component audit teams. At a Group level, our procedures involved: enquiries of Group management and those charged with governance, legal counsel and internal audit and also testing over manual consolidation journals and journals indicating large or unusual transactions based on our understanding of the business. At a component level, our full and specific scope component audit team's procedures included enquiries of component management; journal entry testing; and focused testing over areas we considered more susceptible to management override, including as referred to in the "Accrued customer marketing costs" key audit matters section above. Any instances of non-compliance with laws and regulations, including in relation to fraud, were communicated by/to components and considered in our audit approach, if applicable. In addition, we completed procedures to conclude on the compliance of the disclosures in the annual report and accounts with all applicable requirements.

Independent auditor's report to the members of Coca-Cola Europacific Partners plc continued

A further description of our responsibilities for the audit of the financial statements is located on the Financial Reporting Council's website at <https://www.frc.org.uk/auditorsresponsibilities>. This description forms part of our auditor's report.

Other matters we are required to address

- Following the recommendation from the Audit Committee we were appointed by the Company on 22 June 2016 to audit the financial statements for the year ending 31 December 2016 and subsequent financial periods.

The period of total uninterrupted engagement including previous renewals and reappointments is eight years, covering the years ending 31 December 2016 to 31 December 2023.

- The audit opinion is consistent with the additional report to the Audit Committee.

Use of our report

This report is made solely to the Company's members, as a body, in accordance with Chapter 3 of Part 16 of the Companies Act 2006. Our audit work has been undertaken so that we might state to the Company's members those matters we are required to state to them in an auditor's report and for no other purpose. To the fullest extent permitted by law, we do not accept or assume responsibility to anyone other than the Company and the Company's members as a body, for our audit work, for this report, or for the opinions we have formed.

Report of independent registered public accounting firm

To the Shareholders and the Board of Directors of Coca-Cola Europacific Partners plc

Opinion on the Financial Statements

We have audited the accompanying consolidated statements of financial position of Coca-Cola Europacific Partners plc (the "Group") as of 31 December 2023 and 2022, the related consolidated statements of income, comprehensive income, statement of changes in equity and cash flows for each of the three years in the period ended 31 December 2023, and the related notes, collectively referred to as the "consolidated financial statements". In our opinion, the consolidated financial statements present fairly, in all material respects, the financial position of the Group at 31 December 2023 and 2022, and the results of its operations and its cash flows for each of the three years in the period ended 31 December 2023, in conformity with International Financial Reporting Standards as issued by the International Accounting Standards Board.

We also have audited, in accordance with the standards of the Public Company Accounting Oversight Board (United States) (PCAOB), the Group's internal control over financial reporting as of 31 December 2023, based on criteria established in Internal Control-Integrated Framework issued by the Committee of Sponsoring Organizations of the Treadway Commission (2013 framework) and our report dated 15 March 2024 expressed an unqualified opinion thereon.

Basis for Opinion

These financial statements are the responsibility of the Group's management. Our responsibility is to express an opinion on the Group's financial statements based on our audits. We are a public accounting firm registered with the PCAOB and are required to be independent with respect to the Group in accordance with the U.S. federal securities laws and the applicable rules and regulations of the Securities and Exchange Commission and the PCAOB.

We conducted our audits in accordance with the standards of the PCAOB. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement, whether due to error or fraud. Our audits included performing procedures to assess the risks of material misstatement of the financial statements, whether due to error or fraud, and performing procedures that respond to those risks. Such procedures included examining, on a test basis, evidence regarding the amounts and disclosures in the financial statements. Our audits also included evaluating the accounting principles used and significant estimates made by management, as well as evaluating the overall presentation of the financial statements. We believe that our audits provide a reasonable basis for our opinion.

Critical Audit Matters

The critical audit matters communicated below are matters arising from the current period audit of the financial statements that were communicated or required to be communicated to the audit committee and that: (1) relate to accounts or disclosures that are material to the financial statements and (2) involved our especially challenging, subjective or complex judgements. The communication of critical audit matters does not alter in any way our opinion on the consolidated financial statements, taken as a whole, and we are not, by communicating the critical audit matters below, providing separate opinions on the critical audit matters or on the accounts or disclosures to which they relate.

/s/ Ernst & Young LLP

We have served as the Group's auditor since 2016.

London, United Kingdom

15 March 2024

Report of independent registered public accounting firm continued

To the Shareholders and the Board of Directors of Coca-Cola Europacific Partners plc

Opinion on Internal Control Over Financial Reporting

We have audited Coca-Cola Europacific Partners plc's internal control over financial reporting as of 31 December 2023, based on criteria established in Internal Control—Integrated Framework issued by the Committee of Sponsoring Organizations of the Treadway Commission (2013 framework), (the COSO criteria). In our opinion, Coca-Cola Europacific Partners plc (the "Group") maintained, in all material respects, effective internal control over financial reporting as of 31 December 2023, based on the COSO criteria.

We also have audited, in accordance with the standards of the Public Company Accounting Oversight Board (United States) (PCAOB), the consolidated statements of financial position of the Group as of 31 December 2023 and 2022, the related consolidated statements of income, comprehensive income, statement of changes in equity and cash flows for each of the three years in the period ended 31 December 2023, and the related notes and our report dated 15 March 2024 expressed an unqualified opinion thereon.

Basis for Opinion

The Group's management is responsible for maintaining effective internal control over financial reporting and for its assessment of the effectiveness of internal control over financial reporting included in the accompanying Management's report on internal control over financial reporting. Our responsibility is to express an opinion on the Group's internal control over financial reporting based on our audit. We are a public accounting firm registered with the PCAOB and are required to be independent with respect to the Group in accordance with the U.S. federal securities laws and the applicable rules and regulations of the Securities and Exchange Commission and the PCAOB.

We conducted our audit in accordance with the standards of the PCAOB. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether effective internal control over financial reporting was maintained in all material respects.

Our audit included obtaining an understanding of internal control over financial reporting, assessing the risk that a material weakness exists, testing and evaluating the design and operating effectiveness of internal control based on the assessed risk, and performing such other procedures as we considered necessary in the circumstances. We believe that our audit provides a reasonable basis for our opinion.

Definition and Limitations of Internal Control Over Financial Reporting

A company's internal control over financial reporting is a process designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles. A company's internal control over financial reporting includes those policies and procedures that (1) pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the company; (2) provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with generally accepted accounting principles, and that receipts and expenditures of the company are being made only in accordance with authorisations of management and directors of the company; and (3) provide reasonable assurance regarding prevention or timely detection of unauthorised acquisition, use, or disposition of the company's assets that could have a material effect on the financial statements.

Because of its inherent limitations, internal control over financial reporting may not prevent or detect misstatements. Also, projections of any evaluation of effectiveness to future periods are subject to the risk that controls may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

Notes to the consolidated financial statements

Note 1

General information and basis of preparation

Coca-Cola Europacific Partners plc (the Company) and its subsidiaries (together CCEP, or the Group) are a leading consumer goods group in Western Europe and the Asia Pacific region, making, selling and distributing an extensive range of primarily non-alcoholic ready to drink beverages.

The Company has ordinary shares with a nominal value of €0.01 per share (Shares). CCEP is a public company limited by shares, incorporated under the laws of England and Wales with the registered number in England of 9717350. The Group's Shares are listed and traded on Euronext Amsterdam, the NASDAQ Global Select Market, London Stock Exchange and on the Spanish Stock Exchanges. The address of the Company's registered office is Pemberton House, Bakers Road, Uxbridge, UB8 1EZ, United Kingdom.

The consolidated financial statements of the Group for the year ended 31 December 2023 were approved and signed by Damian Gammell, Chief Executive Officer, on 15 March 2024 having been duly authorised to do so by the Board of Directors.

Impact of climate change

As part of the preparation of these consolidated financial statements, the Group has considered the impact of climate change risks on the current valuation of the Group's assets and liabilities, particularly in the context of the risks and scenarios identified in the Task Force on Climate-related Financial Disclosures (TCFD) on pages 48-60 of the Strategic Report. There has been no material impact on the financial reporting judgements and estimates arising from the considerations of the Group and, as a result, the valuation of the Group's assets and liabilities as of 31 December 2023 have not been affected. The Group's considerations were specifically focused on the impact of climate change risks on the projected cash flows used in the impairment assessment of our indefinite lived intangible assets and goodwill (refer to Note 6) as well as the carrying value and useful economic lives of property, plant and equipment (refer to Note 7). As the pace and effectiveness of a global transition to a low-carbon economy evolve, including the development of government policies aiming to address the risks arising from climate change, the Group will continue to monitor and assess the relevant implications on the valuation of the Group's assets and liabilities that could arise in future years.

Basis of preparation

These consolidated financial statements of the Group reflect the following:

- They have been prepared in accordance with UK adopted International Accounting Standards, International Financial Reporting Standards (IFRS) as adopted by the European Union and International Financial Reporting Standards as issued by the International Accounting Standards Board (IASB).
- They have been prepared under the historical cost convention, except for certain items measured at fair value. Those accounting policies have been applied consistently in all periods, except for the adoption of new standards and amendments as of 1 January 2023, as described below under accounting policies.
- They are presented in euros, which is also the Parent Company's functional currency, and all values are rounded to the nearest euro million except where otherwise indicated.
- They have been prepared on a going concern basis (refer to the "Going concern" paragraph on page 146).

Basis of consolidation

The consolidated financial statements comprise the financial statements of the Group and its subsidiaries. All subsidiaries have accounting years ended 31 December and apply consistent accounting policies for the purpose of the consolidated financial statements.

Subsidiary undertakings are consolidated from the date on which control is transferred to the Group and cease to be consolidated from the date on which control is transferred out of the Group. The Group controls an entity when it is exposed to, or has rights to, variable returns from its involvement with the entity and has the ability to affect those returns through the Group's power to direct the activities of the entity. All intercompany accounts and transactions are eliminated on consolidation.

Associates are all entities over which the Group has significant influence but not control, generally accompanying a shareholding of between 20% to 50% of voting rights. Investments in associates are accounted for using the equity method of accounting, after initially being recognised at cost.

Notes to the consolidated financial statements continued

The Group treats transactions with non-controlling interests that do not result in a loss of control as equity transactions.

When the Group loses control over a subsidiary, it derecognises the related assets (including goodwill), liabilities, non-controlling interest and any other components of equity, while any resulting gain or loss is recognised in profit or loss. Any interest retained in the former subsidiary is measured at fair value when control is lost.

The financial results presented herein for the period from 1 January 2021 through to the acquisition of CCL (the Acquisition) effective 10 May 2021 refer to Coca-Cola European Partners plc (Legacy CCEP) and its consolidated subsidiaries. The periods from the Acquisition to the year ended 31 December 2023 refer to the combined financial results of CCEP.

Foreign currency

The individual financial statements of each subsidiary are presented in the currency of the primary economic environment in which the subsidiary operates (its functional currency). For the purpose of the consolidated financial statements, the results and financial position of each subsidiary are expressed in euros.

Foreign currency transactions are translated into the functional currency using the exchange rates prevailing at the dates of the transactions. Monetary assets and liabilities denominated in foreign currencies are remeasured to the functional currency of the entity at the rate of exchange in effect at the statement of financial position date with the resulting gain or loss recorded in the consolidated income statement.

The consolidated income statement includes non-operating items which are primarily made up of remeasurement gains and losses related to currency exchange rate fluctuations on financing transactions denominated in a currency other than the subsidiary's functional currency. Non-operating items are shown on a net basis and reflect the impact of any derivative instruments utilised to hedge the foreign currency movements of the underlying financing transactions.

The assets and liabilities of the Group's foreign operations are translated from local currencies to the euro reporting currency at exchange rates in effect at the end of each reporting period. Revenues and expenses are translated at average monthly exchange rates, with average rates being a reasonable approximation of the rates prevailing on the transaction dates. Gains and losses from translation are included in other comprehensive income. On disposal of a foreign operation, accumulated exchange differences are recognised as a component of the gain or loss on disposal.

The principal exchange rates used for translation purposes in respect of one euro were:

	Average for the year ended 31 December ^(A)			Closing as at 31 December	
	2023	2022	2021	2023	2022

(A) For the year ended 31 December 2021, the rates for the Asia Pacific region are calculated as average for the period from 10 May 2021 to 31 December 2021.

(B) Indonesian rupiah is shown as 1000 IDR versus 1 EUR.

Notes to the consolidated financial statements continued

Reporting periods

In these consolidated financial statements, the Group is reporting the financial results for the years ended 31 December 2023, 31 December 2022 and 31 December 2021.

The following table summarises the number of selling days for the years ended 31 December 2023, 31 December 2022 and 31 December 2021 (based on a standard five day selling week):

	First half	Second half	Full year
2023	130	130	260
2022	130	130	260
2021	131	130	261

Comparability

Sales of the Group's products are seasonal. In Europe, the second and third quarters typically account for higher unit sales of the Group's products than the first and fourth quarters. In the Group's Asia Pacific territories, the fourth quarter would typically reflect higher sales volumes in the year. The seasonality of the Group's sales volume, combined with the accounting for fixed costs such as depreciation, amortisation, rent and interest expense, impacts the Group's reported results for the first and second halves of the year. Additionally, year over year shifts in holidays, selling days and weather patterns can impact the Group's results on an annual or half yearly basis.

Note 2

Accounting policies

IFRS 15 "Revenue recognition and deductions from revenue"

The Group derives its revenues by making, selling and distributing ready to drink beverages. The revenue from the sale of products is recognised at the point in time at which control passes to a customer, typically when products are delivered to a customer. A receivable is recognised by the Group at the point in time at which the right to consideration becomes unconditional.

The Group uses various promotional programmes under which rebates, refunds, price concessions or similar items can be earned by customers for attaining agreed upon sales levels or for participating in specific marketing programmes. Those promotional programmes do not give rise to a separate performance obligation. Where the consideration the Group is entitled to varies because of such programmes, it is deemed to be variable consideration. The related accruals are recognised as a deduction from revenue and are not considered distinct from

the sale of products to the customer. Variable consideration is only included to the extent that it is highly probable that the inclusion will not result in a significant revenue reversal in the future normal commercial terms.

Financing elements are not deemed present in our contracts with customers, as the sales are made with credit terms not exceeding normal commercial terms. Taxes on sugared soft drinks, excise taxes and taxes on packaging are recorded on a gross basis (i.e. included in revenue) where the Group is the principal in the arrangement. Value added taxes are recorded on a net basis (i.e. excluded from revenue). The Group assesses these taxes and duties on a jurisdiction by jurisdiction basis to conclude on the appropriate accounting treatment.

The rest of the accounting policies applied by the Group are included in the relevant notes herein.

New and amended standards

The Group has applied the following standards and amendments for the first time in the year ended 31 December 2023.

IFRS 17 "Insurance Contracts"

IFRS 17 "Insurance Contracts" is a comprehensive new standard for insurance contracts covering recognition, measurement, presentation and disclosure. IFRS 17 replaces IFRS 4 "Insurance Contracts". The overall objective of IFRS 17 is to provide a comprehensive accounting model for insurance contracts that is more useful and consistent for insurers covering all relevant accounting aspects.

The new standard had no impact on the consolidated financial statements of the Group.

Definition of Accounting Estimates – Amendments to IAS 8

The amendments to IAS 8 clarify the distinction between changes in accounting estimates, changes in accounting policies and corrections of errors. They also clarify how entities use measurement techniques and inputs to develop accounting estimates.

These amendments had no impact on the consolidated financial statements of the Group.

Notes to the consolidated financial statements continued

Disclosure of Accounting Policies – Amendments to IAS 1 and IFRS Practice Statement 2

The amendments to IAS 1 "Presentation of Financial Statements" and IFRS Practice Statement 2 "Making Materiality Judgements" provide guidance and examples to help entities apply materiality judgements to accounting policy disclosures. The amendments aim to help entities provide accounting policy disclosures that are more useful by replacing the requirement for entities to disclose their "significant" accounting policies with a requirement to disclose their "material" accounting policies and adding guidance on how entities apply the concept of materiality in making decisions concerning accounting policy disclosures.

The amendments had no impact on the consolidated financial statements of the Group.

Deferred Tax related to Assets and Liabilities arising from a Single Transaction – Amendments to IAS 12

The amendments to IAS 12 "Income Tax" narrow the scope of the initial recognition exception, so that it no longer applies to transactions that give rise to equal taxable and deductible temporary differences such as leases and decommissioning liabilities.

The amendments had no material impact on the consolidated financial statements of the Group.

International Tax Reform - Pillar Two Model Rules - Amendments to IAS 12

The Group has adopted International Tax Reform – Pillar Two Model Rules (Amendments to IAS 12) upon their release on 23 May 2023. The amendments provide a temporary mandatory exception from deferred tax accounting for the top-up tax, which is effective immediately, and require new disclosures about the Pillar Two exposure (see Note 20 for further details).

The Group has not early adopted any other amendments to accounting standards that have been issued but are not yet effective. These amendments are not expected to have a material impact to the Group in the current or future periods and on foreseeable future transactions.

Note 3

Significant judgements and estimates

In preparing these consolidated financial statements, management has made judgements and estimates that affect the application of the Group's accounting policies and the reported amounts of assets and liabilities, income and expense. Actual results may differ from these estimates. Estimates and underlying assumptions are reviewed on an ongoing basis. Revisions to estimates are recognised prospectively. The significant judgements made in applying the Group's accounting policies were applied consistently across the annual periods.

The significant judgements and key sources of estimation uncertainty that have a significant effect on the amounts recognised in these financial statements are outlined below.

Significant judgements

Intangible assets and goodwill

The Group has assigned indefinite lives to its bottling agreements with TCCC. This judgement has been made after evaluating the contractual provisions of the bottling agreements, the Group's mutually beneficial relationship with TCCC and the history of renewals for bottling agreements.

Refer to Note 6 for further details on the judgement regarding the lives of bottling agreements.

Significant estimates

Impairment of indefinite lived intangible assets and goodwill

Determining whether goodwill and intangible assets with indefinite lives are impaired requires an estimation of the value in use or the fair value less costs to sell of the cash generating unit (CGU) to which the goodwill or intangible asset has been allocated. The value in use calculation requires management's estimation of the future cash flows expected to arise from the CGU, including climate-related risks. Refer to Note 6 for the sensitivity analysis of the assumptions used in the impairment analysis of goodwill and intangible assets with indefinite lives.

Notes to the consolidated financial statements continued

Deductions from revenue and sales incentives

The Group participates in various promotional programmes with customers designed to increase the sale of products. Among the programmes are arrangements under which rebates, refunds, price concessions or similar items can be earned by customers for attaining agreed upon sales levels, or for participating in specific marketing programmes. Those promotional programmes do not give rise to a separate performance obligation. Where the consideration the Group is entitled to varies because of such programmes, the amount payable is deemed to be variable consideration. Management makes estimates on an ongoing basis for each individual promotion to assess the value of the variable consideration based upon historical customer experience, expected customer performance and/or estimated sales volumes. The related accruals are recognised as a deduction from revenue and are not considered distinct from the sale of products to the customer. Refer to Note 14 for further details.

Income tax

The Group is subject to income taxes in numerous jurisdictions and there are many transactions for which the ultimate tax determination cannot be assessed with certainty in the ordinary course of business. The Group recognises a provision for situations that might arise in the foreseeable future based on an assessment of the probabilities as to whether additional taxes will be due. In addition, the Group is involved in various legal proceedings and tax matters. Where an outflow of funds is believed to be probable and a reliable estimate of the outcome of the dispute can be made, management provides for its best estimate of the liability. Where the final outcome on these matters is different from the amounts that were initially recorded, such differences impact the tax provision in the period in which such determination is made. These estimates are subject to potential change over time as new facts emerge and each circumstance progresses. The evaluation of deferred tax asset recoverability requires estimates to be made regarding the availability of future taxable income in the jurisdiction giving rise to the deferred tax asset. Refer to Note 20 for further details regarding income taxes.

Defined benefit plans

The determination of pension benefit costs and obligations is estimated based on assumptions determined with the assistance of external actuarial advice. The key assumptions impacting the valuations are the discount rate, salary rate of inflation and mortality rates. Refer to Note 15 for further details about the Group's defined benefit pension plan costs and obligations, including sensitivities to the key assumptions applied.

Note 4

Segment information

Description of segment and principal activities

The Group derives its revenues through a single business activity, which is making, selling and distributing an extensive range of primarily non-alcoholic ready to drink beverages. The Group's Board continues to be its Chief Operating Decision Maker (CODM), which allocates resources and evaluates performance of its operating segments based on volume, revenue and comparable operating profit. Comparable operating profit excludes items impacting the comparability of period over period financial performance.

The following table provides a reconciliation between reportable segment operating profit and consolidated profit before tax:

	Year ended 31 December								
	2023			2022			2021		
	Europe	API	Total	Europe	API	Total	Europe	API	Total
	€ million	€ million	€ million	€ million	€ million	€ million	€ million	€ million	€ million
Revenue	14,553	3,749	18,302	13,529	3,791	17,320	11,584	2,179	13,763
Comparable operating profit ^(A)	1,888	485	2,373	1,670	468	2,138	1,500	272	1,772
Items impacting comparability ^(B)			(34)			(52)			(256)
Reported operating profit			2,339			2,086			1,516
Total finance costs, net			(120)			(114)			(129)
Non-operating items			(16)			(15)			(5)
Reported profit before tax			2,203			1,957			1,382

(A) Comparable operating profit includes comparable depreciation and amortisation of €558 million and €196 million for Europe and API respectively, for the year ended 31 December 2023. Comparable depreciation and amortisation charges for the year ended 31 December 2022 totalled €549 million and €223 million for Europe and API respectively. Comparable depreciation and amortisation charges for the year ended 31 December 2021 totalled €564 million and €162 million for Europe and API respectively.

Notes to the consolidated financial statements continued

(B) Items impacting the comparability of period over period financial performance for 2023 primarily include restructuring charges of €94 million (refer to Note 17) and accelerated amortisation charges of €27 million (refer to Note 6), partially offset by €18 million of royalty income arising from the ownership of certain mineral rights in Australia (refer to Note 23), considerations of €35 million received relating to the sale of the sub-strata and associated mineral rights in Australia (refer to Note 23) and gains of €54 million mainly attributable to the sale of property in Germany (refer to Note 23). Items impacting the comparability for 2022 included restructuring charges of €163 million (refer to Note 17), partially offset by €96 million of other income arising from the favourable court ruling pertaining to the ownership of certain mineral rights in Australia (refer to Note 23) and net insurance recoveries received of €11 million arising from the July 2021 flooding events.

No single customer accounted for more than 10% of the Group's revenue during the years ended 31 December 2023, 31 December 2022 and 31 December 2021.

Revenue by geography

The following table summarises revenue from external customers by geography, which is based on the origin of the sale:

	Year ended 31 December		
	2023	2022	2021
Revenue:	€ million	€ million	€ million
Iberia ^(A)	3,325	3,034	2,495
Germany	3,018	2,682	2,335
Great Britain	3,235	3,088	2,613
France ^(B)	2,321	2,089	1,813
Belgium/Luxembourg	1,078	1,042	926
Netherlands	718	682	557
Norway	376	404	391
Sweden	398	421	375
Iceland	84	87	79
Total Europe	14,553	13,529	11,584
Australia	2,385	2,339	1,359
New Zealand and Pacific Islands	679	649	377
Indonesia and Papua New Guinea	685	803	443
Total API	3,749	3,791	2,179
Total CCEP	18,302	17,320	13,763

(A) Iberia refers to Spain, Portugal and Andorra.

(B) France refers to continental France and Monaco.

Assets by geography

Assets are allocated based on operations and physical location. The following table summarises non-current assets, other than financial instruments and deferred tax assets, by geography:

	Year ended 31 December	
	2023	2022
Assets:	€ million	€ million
Iberia ^(A)	6,455	6,401
Germany	3,162	3,091
Great Britain	2,523	2,469
France ^(B)	940	896
Belgium/Luxembourg	623	613
Netherlands	439	428
Sweden	349	349
Norway	225	242
Iceland	38	36
Other unallocated	360	271
Total Europe	15,114	14,796
Australia	5,065	5,281
New Zealand and Pacific Islands	1,687	1,755
Indonesia and Papua New Guinea	682	726
Total API	7,434	7,762
Total CCEP	22,548	22,558

(A) Iberia refers to Spain, Portugal and Andorra.

(B) France refers to continental France and Monaco.

Notes to the consolidated financial statements continued

Note 5

Earnings per share

Basic earnings per share is calculated by dividing profit after taxes by the weighted average number of Shares in issue and outstanding during the period. Diluted earnings per share is calculated in a similar manner, but includes the effect of dilutive securities, principally share options, restricted stock units and performance share units. Share-based payment awards that are contingently issuable upon the achievement of specified market and/or performance conditions are included in the diluted earnings per share calculation based on the number of Shares that would be issuable if the end of the period was the end of the contingency period.

The following table summarises basic and diluted earnings per share calculations for the years presented:

	Year ended 31 December		
	2023	2022	2021
Profit after taxes attributable to equity shareholders (€ million)	1,669	1,508	982
Basic weighted average number of Shares in issue ^(A) (million)	459	457	456
Effect of dilutive potential Shares ^(B) (million)	—	1	1
Diluted weighted average number of Shares in issue ^(A) (million)	459	458	457
Basic earnings per share ^(C) (€)	3.64	3.30	2.15
Diluted earnings per share ^(C) (€)	3.63	3.29	2.15

(A) As at 31 December 2023, 31 December 2022 and 31 December 2021, the Group had 459,200,818, 457,106,453 and 456,235,032 Shares, respectively, in issue and outstanding.

(B) For the years ended 31 December 2023, 31 December 2022 and 31 December 2021, no options to purchase Shares were excluded from the diluted earnings per share calculation. The dilutive impact of all outstanding options, unvested restricted stock units and unvested performance share units was included in the effect of dilutive securities.

(C) Basic and diluted earnings per share are calculated prior to rounding.

Note 6

Intangible assets and goodwill

Intangible assets with indefinite lives

Intangible assets with indefinite lives acquired through business combination transactions are measured at fair value at the date of acquisition. These assets are not subject to amortisation but are tested for impairment annually at the CGU level or more frequently if facts and circumstances indicate an impairment may exist. In addition to the annual impairment test, the assessment of indefinite lives is also reviewed annually.

TCCC franchise intangible assets

The Group's bottling agreements with TCCC contain performance requirements and convey the rights to distribute and sell products within specified territories. The agreements in each territory are for initial terms of 10 years that can be renewed for another 10 years. The Group believes that its interdependent relationship with TCCC and the substantial cost and disruption to TCCC that would be caused by non-renewal ensure that these agreements will continue to be renewed and, therefore, are essentially perpetual. The Group has never had a bottling agreement with TCCC terminated due to non-performance of the terms of the agreement or due to a decision by TCCC to terminate an agreement at the expiration of a term. After evaluating the contractual provisions of the bottling agreements as at 31 December 2023, the Group's mutually beneficial relationship with TCCC and history of renewals, indefinite lives have been assigned to all of the Group's TCCC bottling agreements.

Brands

In connection with the Acquisition, the Group acquired a portfolio of brands, predominantly comprised of certain non-alcoholic ready to drink beverages distributed and sold in Australia and New Zealand. These are considered to have an indefinite life, given the strength and durability of the brands. Refer to Note 19 for details surrounding the subsequent sale of certain non-alcoholic ready to drink brands to TCCC, which was completed in tranches.

Notes to the consolidated financial statements continued

Goodwill

Goodwill is initially measured as the excess of the total consideration transferred over the amount recognised for net identifiable assets acquired and liabilities assumed in a business combination. If the fair value of the net assets acquired is in excess of the aggregate consideration transferred, the gain is recognised in the consolidated income statement as a bargain purchase. Goodwill is not subject to amortisation. It is tested annually for impairment at the CGU level or more frequently if events or changes in circumstances indicate that it might be impaired. Goodwill acquired in a business combination is allocated to the CGU that is expected to benefit from the synergies of the combination irrespective of whether a CGU is part of the business combination.

Intangible assets with finite lives

Intangible assets with finite lives are measured at cost of acquisition or production and are amortised using the straight-line method over their respective estimated useful lives. Finite lived intangible assets are assessed for impairment whenever there is an indication that they may be impaired. The amortisation period and method are reviewed annually.

Internally generated software

The Group capitalises certain development costs associated with internally developed software, including external direct costs of materials and services, and payroll costs for employees devoting time to a software project and any such software acquired as part of a business combination. Development expenditure is recognised as an intangible asset only after its technical feasibility and commercial viability can be demonstrated. When capitalised software is not integral to related hardware, it is treated as an intangible asset; otherwise it is included within property, plant and equipment. The estimated useful life of capitalised software is predominantly between five and seven years. Amortisation expense for capitalised software is included within administrative expenses and was €94 million, €83 million and €75 million for the years ended 31 December 2023, 31 December 2022 and 31 December 2021, respectively.

Customer relationships

The Group has acquired certain customer relationships in connection with business combinations. These customer relationships are recorded at fair value on the date of acquisition, and amortised over an estimated economic useful life of 20 years. Amortisation expense for these assets is included within administrative expenses and was €10 million, €10 million and €9 million for the years ended 31 December 2023, 31 December 2022 and 31 December 2021, respectively.

Non-TCCC franchise intangible

In connection with the Acquisition, the Group acquired certain bottling agreements with non-TCCC distribution partners, mainly Beam Suntory, which contain performance requirements and convey the rights to distribute and sell products within specified API territories. The non-TCCC bottling arrangements were recorded at fair value at the acquisition date and were initially amortised over an expected economic useful life of 20 years. On 2 August 2023, the Group announced that CCEP and Beam Suntory will discontinue their relationship effective 1 July 2025 (Australia) and 1 January 2026 (New Zealand). CCEP will remain the exclusive manufacturing, sales and distribution partner for Beam Suntory in Australia and New Zealand through the end of the current contractual terms set to expire on 30 June 2025 and 31 December 2025, respectively. The discontinuance of the relationship triggered a change in the assigned useful economic life of the intangible assets effective from the second half of 2023, resulting in an accelerated amortisation charge of €27 million recognised for the year ending 31 December 2023. As at 31 December 2023, finite-lived intangible assets of €94 million were reflected in the consolidated statement of financial position related to the Beam Suntory distribution rights, primarily attributable to those available in Australia. Total amortisation expense for these assets is recognised within administrative expenses and totalled €35 million, €8 million and €5 million for the years ended 31 December 2023, 31 December 2022 and 31 December 2021, respectively.

Notes to the consolidated financial statements continued

Balances and movements in intangible assets and goodwill

The following table summarises the movements in the carrying amounts of intangible assets and goodwill for the periods presented:

	TCCC franchise intangible € million	Brands € million	Software € million	Customer relationships € million	Non-TCCC franchise intangible € million	Assets under construction € million	Total intangibles € million	Goodwill € million

Notes to the consolidated financial statements continued

Impairment of indefinite lived intangible assets and goodwill

Each CGU is tested for impairment annually in the fourth quarter or whenever there is an indication of impairment. The recoverable amount of each CGU is normally determined through a value in use calculation. To determine value in use for a CGU, estimated future cash flows are discounted to their present values using a pre-tax discount rate reflective of the current market conditions and risks specific to each CGU. If the carrying value of a CGU exceeds its recoverable amount, the carrying value of the CGU is reduced to its recoverable amount and impairment charges are recognised immediately within the consolidated income statement. Impairment charges other than those related to goodwill may be reversed in future periods if a subsequent test indicates that the recoverable amount has increased. Such recoveries may not exceed a CGU's original carrying value less any depreciation that would have been recognised if no impairment charges were previously recorded.

The Group's CGUs are based on geography and generally represent the individual territories in which the Group operates. For the purposes of allocating intangibles, each indefinite lived intangible asset is allocated to the geographic region to which the agreement relates and goodwill is allocated to each of the CGUs expected to benefit from a business combination, irrespective of whether other assets and liabilities of the acquired businesses are assigned to the CGUs.

The following table identifies the carrying value of goodwill and indefinite lived intangible assets attributable to each significant CGU of the Group. In addition to the significant CGUs of the Group, as at 31 December 2023, the Group had other CGUs with total indefinite lived intangible assets of €1,349 million (2022: €1,369 million) and goodwill of €370 million (2022: €380 million).

Cash generating unit	Year ended 31 December			
	2023		2022	
	Indefinite lived intangible assets	Goodwill	Indefinite lived intangible assets	Goodwill
	€ million	€ million	€ million	€ million
Iberia	4,289	1,275	4,289	1,275
Australia	2,596	1,397	2,690	1,450
Great Britain	1,680	200	1,646	200
Germany	1,060	748	1,060	748
Pacific ^(A)	816	524	849	547

(A) Pacific refers to New Zealand and Pacific Islands.

The recoverable amount of each CGU was determined through a value in use calculation, which uses cash flow projections for a five year period. These projections reflect the impact of climate change on our business as well as the mitigating actions and strategies we are undertaking to support our commitment to reach Net Zero by 2040. The key assumptions used in projecting these cash flows were as follows:

- Growth rate and operating margins: Cash flows were projected over four years based on the Group's strategic business plan. Cash flows for the fifth year and beyond were projected using an inflation-based long-term terminal growth rate between 1.6% and 4.5%.
- Discount rate: A weighted average cost of capital was applied specific to each CGU as a hurdle rate to discount cash flows. The discount rates represent the current market assessment of the risks specific to each CGU, taking into consideration the time value of money and individual risks of the underlying assets that have not been incorporated in the cash flow estimates. The following table summarises the pre-tax discount rate attributable to each significant CGU.

Cash generating unit	2023	2022
	Pre-tax discount rate	Pre-tax discount rate
	%	%
Iberia	9.3	8.7
Australia	11.1	9.1
Great Britain	9.8	9.3
Germany	10.1	7.9
Pacific ^(A)	11.2	9.7

(A) Pacific refers to New Zealand and Pacific Islands.

The Group did not record any impairment charges as a result of the tests conducted in 2023 and 2022.

The Group's Iberia, Australia, Great Britain and Germany CGUs have substantial headroom when comparing the value in use calculation of the CGU versus the CGU's total carrying value.

For the Group's Pacific CGU, the headroom in the 2023 impairment analysis was approximately 11% of total carrying value. The Group estimates that a 0.9% reduction in the terminal growth rate or a 0.7% increase in the discount rate, each in isolation, would eliminate existing headroom in Pacific.

Notes to the consolidated financial statements continued

For the Group's Indonesia CGU, the headroom in the 2023 impairment analysis was approximately 11% of total carrying value. The indefinite lived intangible assets and goodwill equalled €143 million in total and the pre-tax discount rate used in the test was 12.2%. The Group estimates that a 1.2% reduction in the terminal growth rate or a 0.8% increase in the discount rate, each in isolation, would eliminate existing headroom in Indonesia.

Note 7

Property, plant and equipment

Property, plant and equipment is recorded at cost, net of accumulated depreciation and accumulated impairment losses, where cost is the amount of cash or cash equivalents paid to acquire an asset at the time of its acquisition or construction. Major property additions, replacements and improvements are capitalised, while maintenance and repairs that do not extend the useful life of an asset or add new functionality are expensed as incurred. Land is not depreciated, as it is considered to have an indefinite life. For all property, plant and equipment, other than land, depreciation is recorded using the straight-line method over the respective estimated useful lives as follows:

Category	Useful life (years)	
	Low	High
Buildings and improvements	10	40
Machinery, equipment and containers	3	20
Cold drink equipment	2	12
Vehicle fleet	3	12
Furniture and office equipment	3	10

Gains or losses arising on the disposal or retirement of an asset are determined as the difference between the carrying amount of the asset and any proceeds from its sale. Leasehold improvements are amortised using the straight-line method over the shorter of the remaining lease term or the estimated useful life of the improvement.

The Group assesses, at each reporting date, whether there is an indication that an asset may be impaired. If any indication exists, an impairment test is performed to estimate the potential loss of value that may reduce the recoverable amount of the asset to below its carrying amount. Any impairment loss is recognised within the consolidated income statement by the amount which the carrying amount exceeds the recoverable amount. Useful lives and residual amounts are reviewed annually and adjustments are made prospectively as required.

For property, plant and equipment, the Group assesses annually whether there is an indication that previously recognised impairment losses no longer exist or have decreased. If such an indication exists, a previously recognised impairment loss is reversed only if there has been a change in the assumptions used to determine the asset's recoverable amount since the last impairment loss was recognised and only up to the recoverable amount or the original carrying amount net of depreciation that would have been incurred had no impairment losses been recognised.

The transition to a low-carbon economy may impact the carrying value and remaining useful economic lives of the Group's property, plant and equipment. The Group continues to invest in more efficient, cleaner and more technologically advanced assets, however, the significant majority of the Group's assets currently in operation are likely to be substantially depreciated ahead of our Net Zero 2040 target, as set out in our Strategic Report on pages 37-40. In addition, the Group continuously monitors the latest developments in government legislation in relation to climate-related risks. Currently, no legislation has been passed that will materially impact the carrying value and remaining useful economic lives of the Group.

The Group leases land, office and warehouse property, computer hardware, machinery and equipment, and vehicles under non-cancellable lease agreements, most of which expire at various dates through to 2030. The Group includes right of use assets within property, plant and equipment. Right of use assets are initially measured at cost, comprising the initial measurement of the lease liability, plus any direct costs and an estimate of asset retirement obligations, less lease incentives. Subsequently, right of use assets are measured at cost, less accumulated depreciation and any accumulated impairment losses. Depreciation is calculated on a straight-line basis over the term of the lease.

The Group does not separate lease from non-lease components for each of its lease categories, except for property leases. All low value leases with total minimum lease payments under €5,000 and leases with a term less than 12 months are expensed on a straight-line basis.

Extension and termination options are included in a number of property and equipment leases across the Group and are used to maximise operational flexibility in terms of managing contracts. Extension options (or periods after termination options) are only included in the lease term if the Group has an enforceable right to extend or terminate the lease and is reasonably certain to do so.

Notes to the consolidated financial statements continued

The following table summarises the movement in net book value for property, plant and equipment for the periods presented:

	Land € million	Buildings and improvements € million	Machinery, equipment and containers € million	Cold drink equipment € million	Vehicle fleet € million	Furniture and office equipment € million	Assets under construction € million	Total € million

As at 31 December 2022	648	1,658	1,985	385	144	76	305	5,201
As at 31 December 2023	657	1,634	2,042	370	182	70	389	5,344

Notes to the consolidated financial statements continued

Right of use assets

The following table summarises the net book value of right of use assets included within property, plant and equipment:

	Year ended 31 December	
	2023	2022
	€ million	€ million
Buildings and improvements	427	465
Vehicle fleet	171	133
Machinery, equipment and containers	81	82
Furniture and office equipment	2	3
Total	681	683

Total additions to right of use assets during 2023 were €192 million (2022: €208 million).

The following table summarises depreciation charges relating to right of use assets for the periods presented:

	Year ended 31 December	
	2023	2022
	€ million	€ million
Buildings and improvements	67	63
Vehicle fleet	58	57
Machinery, equipment and containers	32	34
Furniture and office equipment	2	2
Total	159	156

During the years ended 31 December 2023 and 31 December 2022, the total expense relating to low value and short-term leases was €24 million and €24 million, respectively, which is primarily included in administrative expenses. The Group does not have any residual value guarantees in relation to its leases. As at 31 December 2023, the total value of lease extension and termination options included within right of use assets was €17 million (2022: €35 million).

The Group incurred variable lease expenses of €157 million in 2023 (2022: €153 million), primarily included in administrative expenses. This amount mainly consists of the variable component of lease payments for product transportation services in Australia and New Zealand, whereby these components are dependent on various factors such as number of cases of product delivered, number of trips and pallets.

Note 8 Inventories

Inventories are valued at the lower of cost or net realisable value and cost is determined using the first-in, first-out (FIFO) method. Inventories consist of raw materials, supplies (primarily including concentrate, other ingredients and packaging) and finished goods, which also include direct labour, indirect production and overhead costs. Cost includes all costs incurred to bring inventories to their present location and condition. Cost of inventories also includes the transfer from equity of gains and/or losses on qualified cash flow hedges relating to inventory purchases. Spare parts, classified and accounted as inventories, are recorded as assets at the time of purchase and are expensed as utilised. Net realisable value is the estimated selling price in the ordinary course of business, less the estimated costs necessary to complete and sell the inventory.

The following table summarises the inventory outstanding in the consolidated statement of financial position as at the dates presented:

	Year ended 31 December	
	2023	2022
	€ million	€ million
Finished goods	750	777
Raw materials and supplies	449	452
Spare parts and other	157	151
Total inventories	1,356	1,380

Write downs of inventories totalled €59 million, €41 million and €41 million for the years ended 31 December 2023, 31 December 2022 and 31 December 2021, respectively. The majority of these write downs were included in cost of sales on the consolidated income statement. None of these write downs of inventory were subsequently reversed.

Notes to the consolidated financial statements continued

Note 9

Trade accounts receivable

The Group sells its products to retailers, wholesalers and other customers and extends credit, generally without requiring collateral, based on an evaluation of the customer's financial condition. While the Group has a concentration of credit risk in the retail sector, this risk is mitigated due to the diverse nature of the customers the Group serves, including, but not limited to, their type, geographic location, size and beverage channel.

Trade accounts receivable are initially recognised at their transaction price and subsequently measured at amortised cost less provision for impairment. Typically, accounts receivable have terms of 30 to 60 days and do not bear interest. The Group applies an expected credit loss reserve methodology to assess possible impairments. Balances are considered for impairment on an individual basis rather than by reference to the extent that they become overdue. The Group considers factors such as delinquency in payment, financial difficulties, payment history of the debtor and certain forward-looking macroeconomic indicators. The carrying amount of trade accounts receivable is reduced through the use of an allowance account, and the amount of the loss is recognised in the consolidated income statement. Credit insurance on a portion of the accounts receivable balance is also carried. Refer to Note 26 for further details on credit risk management.

As a result of continued recession risk across our European territories, the Group supplements its existing credit loss reserve methodology to include an incremental loss allowance for those receivable balances that were deemed to be higher risk in the current environment. The incremental allowance is included within allowance for doubtful accounts below, as at 31 December 2023 and 31 December 2022.

The following table summarises the trade accounts receivable outstanding in the consolidated statement of financial position as at the dates presented:

	Year ended 31 December	
	2023	2022
	€ million	€ million
Trade accounts receivable, gross	2,601	2,523
Allowance for doubtful accounts	(54)	(57)
Total trade accounts receivable	2,547	2,466

The following table summarises the ageing of trade accounts receivable, net of allowance for doubtful accounts, in the consolidated statement of financial position as at the dates presented:

	Year ended 31 December	
	2023	2022
	€ million	€ million
Not past due	2,348	2,287
Past due 1 – 30 days	142	102
Past due 31 – 60 days	16	30
Past due 61 – 90 days	7	15
Past due 91 – 120 days	9	14
Past due 121+ days	25	18
Total	2,547	2,466

The following table summarises the change in the allowance for doubtful accounts for the periods presented:

	Allowance for doubtful accounts

Notes to the consolidated financial statements continued

Note 10

Cash and cash equivalents and short-term investments

Cash and cash equivalents

Cash and cash equivalents include cash and short-term, highly liquid financial instruments with maturity dates of less than three months when acquired that are readily convertible to cash and which are subject to an insignificant risk of changes in value. Counterparties and instruments used to hold the Group's cash and cash equivalents are continually assessed, with a focus on preservation of capital and liquidity.

The following table summarises the cash and cash equivalents outstanding in the consolidated statement of financial position as at the dates presented:

	Year ended 31 December	
	2023	2022
	€ million	€ million
Cash at banks and on hand	465	491
Short-term deposits and securities	954	896
Total cash and cash equivalents	1,419	1,387

Cash and cash equivalents are held in the following currencies as at the dates presented:

	Year ended 31 December	
	2023	2022
	€ million	€ million
Euro	662	477
British pound	305	190
US dollar	64	88
Norwegian krone	58	35
Swedish krona	26	21
Australian dollar	118	358
Indonesian rupiah	48	26
Papua New Guinean kina	42	102
Other	96	90
Total cash and cash equivalents	1,419	1,387

Included within cash and cash equivalents as at 31 December 2023 and 31 December 2022 are Papua New Guinea cash assets of €42 million and €102 million respectively, denominated in local currency (kina). Government-imposed currency controls impact the extent to which the cash held in Papua New Guinea can be converted into foreign currency and remitted for use elsewhere in the Group. There are no other material restrictions on the Group's cash and cash equivalents.

Short-term investments

Short-term investments are financial assets that are initially recognised at fair value and subsequently measured at amortised cost. The Group classifies its financial assets as at amortised cost only if both of the following criteria are met:

- the asset is held within a business model whose objective is to collect the contractual cash flows; and
- the contractual terms give rise to cash flows that are solely payments for principal and interest.

The short-term investment balance is comprised of time deposits and treasury bills, with maturity dates of greater than three months and less than one year when acquired, which do not meet the definition of cash and cash equivalents, and are expected to be held until maturity. These are highly liquid investments and, due to their short-term nature, their carrying amount is not significantly different from the fair values.

As at 31 December 2023, short-term investments were €568 million (2022: €256 million), which included €33 million (2022: €49 million) denominated in Papua New Guinea kina that are subject to government-imposed currency controls which impact the extent to which these investments, upon maturity, can be converted into foreign currency and remitted for use elsewhere in the Group.

Cash receipts arising from the interest earned on cash and cash equivalents and short-term investments were €58 million, €25 million and €12 million for the years ended 31 December 2023, 31 December 2022, and 31 December 2021 respectively, and in the current year considered a major class of gross cash receipts from investing activities. Accordingly, these have been presented separately in the Group's consolidated statement of cash flows in the current year.

Notes to the consolidated financial statements continued

Note 11

Fair values

Fair value measurements

All assets and liabilities for which fair value is measured or disclosed in the financial statements are categorised within the fair value hierarchy. This is described as one of the following, based on the lowest-level input that is significant to the fair value measurement as a whole:

- Level 1 – Quoted prices in active markets for identical assets or liabilities.
- Level 2 – Observable inputs other than quoted prices included in Level 1. The Group values assets and liabilities included in this level using dealer and broker quotations, certain pricing models, bid prices, quoted prices for similar assets and liabilities in active markets or other inputs that are observable or can be corroborated by observable market data.
- Level 3 – Unobservable inputs that are supported by little or no market activity and that are significant to the fair value of the assets or liabilities. This includes certain pricing models, discounted cash flow methodologies and similar techniques that use significant unobservable inputs.

The fair values of the Group's cash and cash equivalents, short-term investments, trade accounts receivable, amounts receivable from related parties, trade and other payables and amounts payable to related parties approximate their carrying amounts due to their short-term nature.

The fair values of the Group's borrowings are estimated based on borrowings with similar maturities and credit quality and current market interest rates. These are categorised within Level 2 of the fair value hierarchy, as the Group uses certain pricing models and quoted prices for similar liabilities in active markets in assessing their fair values. Refer to Note 13 for further details regarding the Group's borrowings.

The following table summarises the book value and fair value of the Group's borrowings as at the dates presented:

	Year ended 31 December	
	2023	2022
	€ million	€ million
Fair value of borrowings	10,580	10,503
Book value of borrowings (Note 13)	11,396	11,907

The Group's derivative assets and liabilities are carried at fair value both upon initial recognition and subsequently. The fair value is determined using a variety of

valuation techniques, depending on the specific characteristics of the hedging instrument, taking into account credit risk. The fair value of the Group's derivative contracts (including forwards, options, futures, cross currency swaps and interest rate swaps) is determined using standard valuation models. The significant inputs used in these models are readily available in public markets or can be derived from observable market transactions and, therefore, the derivative contracts have been classified as Level 2. Inputs used in these standard valuation models include the applicable spot, forward and discount rates. The standard valuation model for the option contracts also includes implied volatility, which is specific to individual options and is based on rates quoted from a widely used third party resource. Refer to Note 12 for further details about the Group's derivatives.

The following table summarises the fair value of the derivative assets and liabilities as at the dates presented:

	Year ended 31 December	
	2023	2022
	€ million	€ million
Assets at fair value:		
Derivatives (Note 12)	261	448
Liabilities at fair value:		
Derivatives (Note 12)	268	263

For assets and liabilities that are recognised in the financial statements on a recurring basis, the Group determines whether transfers have occurred between levels in the hierarchy by reassessing categorisation at the end of each reporting period. There have been no transfers between levels during the periods presented.

Note 12

Hedging activities

Derivative financial instruments

The Group utilises derivative financial instruments to mitigate its exposure to certain market risks associated with its ongoing operations. The primary risks that it seeks to manage through the use of derivative financial instruments include currency exchange risk, commodity price risk and interest rate risk.

All derivative financial instrument assets and liabilities are recorded at fair value in the consolidated statement of financial position. The Group does not use derivative financial instruments for trading or speculative purposes, and all hedge ratios are on a 1:1 basis. At the inception of a hedge transaction, the Group documents the relationship between the hedging instrument and the hedged

Notes to the consolidated financial statements continued

item, as well as its risk management objective and strategy for undertaking the hedge transaction. This process includes linking the derivative financial instrument designated as a hedging instrument to the specific asset, liability, firm commitment or forecasted transaction. Refer to Note 26 for further details about the Group's risk management strategy and objectives. Both at the hedge inception and on an ongoing basis, the Group assesses and documents whether the derivative financial instrument used in the hedging transaction is highly effective in maintaining the risk management objectives. Where critical terms match, the Group uses a qualitative assessment to ensure initial and ongoing effectiveness criteria. Hedge accounting is discontinued when the hedging instrument expires or is sold, terminated, exercised or no longer qualifies for hedge accounting. At that time, any cumulative gain or loss on the hedging instrument recognised in equity is retained in equity until the forecasted transaction occurs. If the hedged transaction is no longer expected to occur, the net cumulative gain or loss recognised in equity is transferred to the income statement.

While certain derivative financial instruments are designated as hedging instruments, the Group may also enter into derivative financial instruments that are designed to hedge a risk but are not designated as hedging instruments (referred to as an economic hedge or a non-designated hedge). The decision regarding whether or not to designate a hedge for hedge accounting is made by management considering the size, purpose and tenure of the hedge, as well as the anticipated ability to achieve and maintain the Group's risk management objective.

The Group is exposed to counterparty credit risk on all of its derivative financial instruments. It has established and maintained strict counterparty credit guidelines and enters into hedges only with financial institutions that are investment grade or better. It continuously monitors counterparty credit risk and utilises numerous counterparties to minimise its exposure to potential defaults.

The following table summarises the fair value of the assets and liabilities related to derivative financial instruments and the respective line items in which they were recorded in the consolidated statement of financial position as at the dates presented. All derivative instruments are classified as Level 2 within the fair value hierarchy.

Discussion of the Group's other financial assets and liabilities is contained elsewhere in these financial statements. Refer to Note 9 for trade accounts receivable, Note 14 for trade and other payables, Note 13 for borrowings and Note 19 for amounts receivable and payable with related parties.

Hedging instrument	Location – statement of financial position	Year ended 31 December

Notes to the consolidated financial statements continued

Cash flow hedges

The Group uses cash flow hedges to mitigate its exposure to variability in cash flows attributable to currency fluctuations and commodity price fluctuations associated with certain highly probable forecasted transactions, including purchases of raw materials, finished goods and services denominated in non-functional currencies, the receipts of interest as well as the payments of interest and principal on debt issuances in non-functional currencies.

Effective changes in the fair value of these cash flow hedging instruments are recognised as a component of other reserves in the consolidated statement of changes in equity. Any changes in the fair value of these cash flow hedges that are the result of ineffectiveness are recognised immediately in the line item in the consolidated income statement that is consistent with the nature of the underlying hedged item. Historically, the Group has not experienced, nor does it expect to experience, material hedge ineffectiveness with the value of the hedged instrument equalling that of the hedged item. If the hedged cash flow results in a subsequent recognition of a non-financial asset or liability, the gains and/or losses accumulated in equity are included in the measurement of the cost of the asset or liability. For other cash flow hedges, the amounts deferred in equity are then recognised within the line item in the consolidated income statement that is consistent with the nature of the underlying hedged item in the period that the forecasted purchases or payments impact earnings.

The following table summarises the Group's outstanding cash flow hedges by risk category as at the dates presented (all contracts denominated in a foreign currency have been converted into euro using the respective year end spot rate):

	Notional maturity profile				
	Total	Less than 1 year	1 to 3 years	3 to 5 years	Over 5 years
	€ million	€ million	€ million	€ million	€ million
Cash flow hedges					
Foreign currency contracts	1,074	912	162	—	—
Interest rate and cross currency swaps	2,225	144	1,365	—	716
Commodity contracts	922	566	356	—	—
As at 31 December 2021	4,221	1,622	1,883	—	716
Foreign currency contracts	1,723	1,292	431	—	—
Interest rate and cross currency swaps	2,079	760	604	416	299
Commodity contracts	1,397	834	563	—	—
As at 31 December 2022	5,199	2,886	1,598	416	299
Deal contingent foreign currency forwards	636	636	—	—	—
Foreign currency contracts	1,105	980	125	—	—
Interest rate and cross currency swaps	1,306	602	—	520	184
Commodity contracts	1,441	829	588	9	15
As at 31 December 2023	4,488	3,047	713	529	199

The net notional amount of outstanding interest rate and cross currency swaps used to hedge interest rate risk and currency fluctuations of non-functional currency borrowings was €1.3 billion as at 31 December 2023, €2.1 billion as at 31 December 2022 and €2.2 billion as at 31 December 2021. The net notional amount of the other outstanding foreign currency cash flow hedges was €1.1 billion as at 31 December 2023, €1.7 billion as at 31 December 2022 and €1.1 billion as at 31 December 2021. The net notional amount of outstanding commodity-related cash flow hedges was €1.4 billion as at 31 December 2023, €1.4 billion as at 31 December 2022 and €0.9 billion as at 31 December 2021.

Notes to the consolidated financial statements continued

During 2023, the Group entered into deal-contingent foreign currency forwards with a total notional amount of €636 million in order to mitigate the foreign currency risk arising from the proposed acquisition of CCBPI. These instruments were recorded as cash flow hedges. Refer to Note 19 for further information concerning the proposed acquisition. As of 31 December 2023, a loss of €5 million is recognised in other comprehensive income related to changes in the fair value of these instruments.

Outstanding cash flow hedges as at 31 December 2023 are expected to be settled between 2024 and 2036.

The following table provides a reconciliation by risk category of the net of tax impacts on the cash flow hedge reserve disclosed in Note 16, resulting from cash flow hedge accounting:

	Foreign currency contracts	Commodity contracts	Interest rate and cross currency swaps	Total
	€ million	€ million	€ million	€ million
Cash flow hedges				
As at 1 January 2021	(1)	20	1	20
Net fair value gains/(losses) recognised in OCI	108	209	(16)	301
Net (gains)/losses reclassified from OCI to income statement or transferred to cost of inventories	3	(76)	(13)	(86)
Gains transferred to goodwill	(84)	—	—	(84)
As at 31 December 2021	26	153	(28)	151
Net fair value gains/(losses) recognised in OCI	13	43	46	102
Net (gains)/losses reclassified from OCI to income statement or transferred to cost of inventories	(19)	(117)	(13)	(149)
As at 31 December 2022	20	79	5	104
Net fair value gains/(losses) recognised in OCI	(26)	67	(3)	38
Net (gains)/losses reclassified from OCI to income statement or transferred to cost of inventories ^(A)	10	(111)	(10)	(111)
As at 31 December 2023	4	35	(8)	31

(A) The amount includes a net of tax gain of €83 million transferred from the cash flow hedge reserve to the cost of inventories.

The following table summarises the net of tax effect of the cash flow hedges in the consolidated income statement for the periods presented:

Cash flow hedging instruments	Location – Income statement	Amount of gain/(loss) reclassified from the cash flow hedge reserve into profit		
		Year ended 31 December		
		2023	2022	2021
		€ million	€ million	€ million
Foreign currency contracts	Cost of sales	1	19	(3)
Commodity contracts	Cost of sales	—	83	74
Commodity contracts	Selling and distribution expenses	17	34	2
Interest rate and cross currency swaps	Finance costs	10	13	13
Total		28	149	86

Ineffectiveness associated with these cash flow hedges was not material during any year presented within these financial statements.

Fair value hedges

The Group has designated certain cross currency swaps used to mitigate foreign currency risk and interest rate risk on foreign currency borrowings as fair value hedges. There is an economic relationship between the hedged item and the hedging instrument, as the terms of the cross currency swap contracts match the terms of the fixed rate borrowings. The Group has established a hedge ratio of 1:1 for the hedging relationship.

The following table summarises the Group's outstanding fair value hedges by risk category as at the dates presented (all contracts denominated in a foreign currency have been converted into euros using the respective year end spot rate):

Fair value hedges	Total	Less than 1 year	1 to 3 years	3 to 5 years	Over 5 years
		€ million	€ million	€ million	€ million
Interest rate and cross currency swaps	166	—	—	—	166
As at 31 December 2021	166	—	—	—	166
Interest rate and cross currency swaps	1,165	—	—	500	665
As at 31 December 2022	1,165	—	—	500	665
Interest rate and cross currency swaps	1,159	—	275	450	434
As at 31 December 2023	1,159	—	275	450	434

Notes to the consolidated financial statements continued

The net notional amount of outstanding interest rate and cross currency swaps designated in a fair value hedge relationship with borrowings was €1,159 million as at 31 December 2023, €1,165 million as at 31 December 2022 and €166 million as at 31 December 2021.

The following table summarises the gains/(losses) recognised from the settlement of fair value hedges within the consolidated income statement for the periods presented:

	Location - Income statement	Year ended 31 December		
		2023 € million	2022 € million	2021 € million
Fair value hedges				
Interest rate and cross currency swaps	Finance costs	(30)	2	(2)
Total		(30)	2	(2)

The carrying value of the hedged item recognised in borrowings as at 31 December 2023 is €1,051 million (31 December 2022: €1,019 million), which includes accumulated amounts of fair value hedging adjustments of €106 million reduction in borrowings (31 December 2022: €146 million reduction in borrowings).

Non-designated hedges

The Group periodically enters into derivative instruments that are designed to hedge various risks but are not designated as hedging instruments.

At times, it enters into other short-term non-designated hedges to mitigate its exposure to changes in cash flows attributable to currency fluctuations associated with no qualifying hedged items such as short-term intercompany loans and certain cash equivalents denominated in non-functional currencies. Changes in the fair value of outstanding non-designated hedges are recognised each reporting period in the line item in the consolidated income statement that is consistent with the nature of the hedged risk.

There were €215 million of outstanding non-designated foreign currency hedges related to hedging foreign currency exposure on intercompany loans as at 31 December 2023. There were €29 million outstanding non-designated hedges as at 31 December 2022.

The following table summarises the gains/(losses) recognised from non-designated derivative financial instruments in the consolidated income statement for the years presented:

Non-designated hedging instruments	Location - Income statement	Year ended 31 December		
		2023 € million	2022 € million	2021 € million
Foreign currency contracts ^(A)	Non-operating items	(5)	(5)	—
Total		(5)	(5)	—

(A) The gain/(loss) recognised on these currency contracts is offset by the gain/(loss) recognised on the remeasurement of the underlying hedged items; therefore, there is a minimal consolidated net effect in non-operating items on the consolidated income statement.

Net investment hedges

The Group had no net investment hedges in place as at 31 December 2023 or 31 December 2022; however, it continues to monitor its exposure to currency exchange rates and may enter into future net investment hedges as a result of volatility in the functional currencies of certain of its subsidiaries.

Note 13

Borrowings and leases

Borrowings

Borrowings are initially recognised at fair value, net of issuance costs incurred. Borrowings acquired by the Group as part of the Acquisition have been recognised at fair value at the acquisition date. After initial recognition, borrowings are subsequently measured at amortised cost using the effective interest rate method. Amortisation of transaction costs, fair value adjustments made on acquisition, premiums and discounts are recognised as part of finance costs within the consolidated income statement.

Leases

Lease liabilities are included within borrowings in our consolidated statement of financial position.

The lease liability is measured at the present value of lease payments, discounted using the Group's incremental borrowing rate (IBR). The lease term comprises the non-cancellable period of the contract, together with periods covered by an option to extend the lease whenever the Group is reasonably certain to exercise that option and has an enforceable right to do so. Subsequently, the lease liability is measured by increasing the carrying amount to reflect interest on the lease liability and reducing it by lease payments made.

Notes to the consolidated financial statements continued

Borrowings outstanding

The following table summarises the carrying value of the Group's borrowings as at the dates presented:

	Year ended 31 December			Year ended 31 December

(A) In December 2023, the Group issued €700 million 3.875% Notes 2030 in connection with the proposed acquisition of CCBPI. Refer to Note 19 for further information concerning the proposed acquisition

(B) In November 2023, the Group repaid on maturity the outstanding amount related to the €350 million 2.625% Notes 2023.

(C) In May 2023, the Group repaid on maturity the outstanding amount related to the US\$850 million 0.50% Notes due 2023.

(D) In October 2023, the Group repaid on maturity the outstanding amount related to US\$25 million 4.34% Notes 2023 and US\$25 million 4.34% Notes 2023 assumed as part of the Acquisition.

(E) Bond designated in full or partially in a fair value hedge relationship.

(F) Cross currency swaps are used by the Group to swap foreign currency bonds into the required local currency.

Borrowings are stated net of unamortised financing fees of €30 million and €33 million, as at 31 December 2023 and 31 December 2022, respectively.

Interest expense recognised on lease liabilities totalled €17 million, €14 million and €10 million in 2023, 2022 and 2021, respectively.

Credit facilities

During 2023, the amount available under the Group's multi currency credit facility was €1.80 billion. This amount is available for borrowing with a syndicate of 12 banks. This credit facility matures in 2029 and is for general corporate purposes and supporting the Group's working capital needs. Based on information currently available, there is no indication that the financial institutions participating in this facility would be unable to fulfil their commitments to the Group as at the date of these consolidated financial statements. The Group's current credit facility contains no financial covenants that would impact its liquidity or access to capital. As at 31 December 2023, the Group had no amounts drawn under this credit facility.

Notes to the consolidated financial statements continued

(A) In 2023, changes in short-term borrowings include €6,810 million of newly issued and €6,810 million of repaid EUR commercial paper. In 2022, changes in short-term borrowings included €2,464 million and €2,749 million of newly issued and repaid EUR commercial paper, respectively.

(B) Interest payable and dividends payable balances are presented within the "Trade and other payables" line item in the Group's consolidated statement of financial position.

(C) Interest rate and cross currency swaps used to hedge interest rate risk and currency fluctuations of non-functional currency borrowings, refer to Note 12.

Total cash outflows for leases were €165 million, €167 million and €149 million for the years ended 31 December 2023, 31 December 2022 and 31 December 2021, respectively.

Note 14**Trade and other payables**

Trade and other payables represent liabilities for goods and services provided to the Group prior to the end of the reporting period, which are unpaid. Trade and other payables are presented as current liabilities unless payment is not due within 12 months after the reporting period. Trade and other payables are recognised initially at fair value and subsequently measured at amortised cost using the effective interest rate method. Trade payables are non-interest bearing and are normally settled between 70 to 80 days.

The Group participates in various programmes and arrangements with customers designed to increase the sale of our products. The costs of these programmes are recorded as deductions from revenue. Among the programmes are arrangements under which allowances can be earned by customers for attaining agreed upon sales levels or for participating in specific marketing programmes. When these allowances are paid in arrears, the Group accrues the estimated amount to be paid based upon historical customer experience, the programme's contractual terms, expected customer performance and/or estimated sales volume. The costs of these off-invoice customer marketing costs totalled €5.4 billion, €5.2 billion and €4.1 billion for 2023, 2022 and 2021, respectively.

The following table summarises trade and other payables as at the dates presented:

	Year ended 31 December	
	2023	2022
	€ million	€ million
Trade accounts payable ^(A)	2,306	2,221
Accrued customer marketing costs	1,340	1,348
Accrued deposits	338	288
Accrued compensation and benefits	532	500
Accrued taxes ^(B)	280	253
Other accrued expenses	438	442
Total trade and other payables	5,234	5,052

(A) Includes amounts of €622 million (2022: €212 million) which are part of a supply chain finance programme facilitated by the Group. The programme permits suppliers to elect on an invoice by invoice basis to receive a discounted payment from the partner bank earlier than the agreed payment terms with the Group. If a supplier makes this election, the value and the due date of the invoice payable by the Group remains unchanged.

(B) This line item includes a payable of €59 million in 2023 and €57 million in 2022 to the Spanish tax authorities. Refer to Note 24 for further details.

Notes to the consolidated financial statements continued

Note 15

Post-employment benefits

The cost of providing benefits is determined using the projected unit credit method, with actuarial valuations being carried out at the end of each annual reporting period. All remeasurements of the defined benefit obligation, such as actuarial gains and losses and return on plan assets, are recognised directly in other comprehensive income. Remeasurements recognised in other comprehensive income are reflected immediately in retained earnings and are not reclassified to profit or loss. Service cost is presented within cost of sales, selling and distribution expenses and administrative expenses in the consolidated income statement. Past service cost is recognised immediately within cost of sales, selling and distribution expenses, and administrative expenses in the consolidated income statement. The net interest cost is calculated by applying the discount rate to the net balance of the defined benefit obligation and the fair value of plan assets. Net interest cost is presented within finance costs or finance income, as applicable, in the consolidated income statement. The defined benefit obligation recognised in the consolidated statement of financial position represents the present value of the estimated future cash outflows, using interest rates of high quality corporate bonds which have terms to maturity approximating the terms of the related liability.

The Group recognises termination benefits at the earlier of the following dates: (1) when the Group can no longer withdraw the offer of those benefits; and (2) when the Group recognises costs for restructuring that are within the scope of IAS 37, "Provisions, Contingent Liabilities and Contingent Assets" and involves the payment of termination benefits. In the case of an offer made to encourage voluntary redundancy, the termination benefits are measured based on the number of employees expected to accept the offer. Termination benefits are payable whenever an employee's employment is terminated before the normal retirement date or whenever an employee accepts voluntary redundancy in exchange for those benefits.

The following table summarises our non-current employee benefit liabilities as at the dates presented:

	Year ended 31 December					
	2023			2022		
	GB	Rest of world	Total	GB	Rest of world	Total
€ million	€ million	€ million	€ million	€ million	€ million	
Retirement benefit obligation	77	81	158	—	77	77
Other employee benefit liabilities	—	33	33	—	31	31
Total non-current employee benefit liabilities	77	114	191	—	108	108

Defined benefit plans

The Group sponsors a number of defined benefit pension plans in Belgium, France, Germany, Great Britain, Luxembourg, Norway, Australia and Indonesia. The majority of the defined benefit plans are either career average, final salary or hybrid plans, and operate on a funded basis with assets held in external funds. The Group's Great Britain plan (GB Scheme) is the most significant.

The GB Scheme's defined benefit obligation includes benefits for current employees, former employees and current pensioners. The level of benefits provided (funded final salary pension) depends on the member's length of service and salary at retirement age. Part of the pension may be exchanged for a tax free cash lump sum. The GB Scheme was closed to new members with effect from 1 October 2005 and is administered by a board of trustees, which is legally separate from the Group. The board of trustees is composed of representatives of both the employer and employees. The board of trustees is required by law to act in the interest of all relevant beneficiaries and is responsible for the investment policy with regard to the assets plus the day to day administration of the benefits.

On 8 October 2020, the Group announced a proposal to close the GB Scheme to future accrual, which was implemented on 31 March 2021. The affected employees were offered to enrol in the Group's defined contribution scheme (DC scheme). Subsequent to the implementation of the closure of the GB Scheme, the members moved from active to deferred status, with future indexation of deferred pensions before retirement measured by reference to the consumer price index (CPI).

Notes to the consolidated financial statements continued

As part of its risk management strategy, in September 2023, the board of trustees entered into a buy-in agreement with Just Retirement Ltd. to acquire an insurance policy with the intent of matching a specific portion of the GB Scheme's future cash flows arising from the accrued pension liabilities of retired members. The transaction was financed entirely using a portion of the existing plan assets, with no further funding required from the Group. On an IAS 19 "Employee Benefits" basis, the subsequent fair value of the insurance policy matches the present value of the liabilities being insured. As the purchase price of the annuity of €257 million exceeded the IAS 19 accounting value of the corresponding liabilities, an asset remeasurement loss of €26 million has been recorded in other comprehensive income.

A full actuarial valuation of the GB Scheme occurs on a triennial basis by a qualified external actuary, which is used as the basis of determining the Group's future contributions to the plan. The latest triennial valuation was carried out as at 5 April 2022 and has been updated to 31 December 2023 to reflect our defined benefit obligation, for known events and changes in market conditions as allowed under IAS 19.

Risks

The Group's defined benefit pension schemes expose the Group to a number of risks, including:

- Asset volatility: the plan liabilities are calculated using a discount rate set with reference to corporate bond yields; if assets underperformed this yield, a deficit would occur. Some of our plans hold a significant proportion of growth assets (equities and property) which, though expected to outperform corporate bonds in the long term, create volatility and risk in the short term. The allocation to growth assets is monitored to ensure it remains appropriate given each scheme's long-term objectives.
- Changes in bond yields – a decrease in corporate bond yields will increase the defined benefit liability, although this will be partially offset by an increase in the value of the plan's bond holdings.
- Inflation risk: a significant proportion of our benefit obligations are linked to inflation, and higher inflation will lead to higher liabilities (although, in most cases, caps on the level of inflationary increases are in place to protect against extreme inflation). The majority of the assets are either unaffected by or only loosely correlated with inflation, meaning that an increase in inflation will also increase the deficit.
- Life expectancy: the majority of our plans have an obligation to provide benefits for the life of the member, so increases in life expectancy will result in an increase in the defined benefit liabilities.

Benefit costs

The following table summarises the expense related to pension plans recognised in the consolidated income statement for the years presented:

	Year ended 31 December								
	2023			2022			2021		
	GB	Rest of world	Total	GB	Rest of world	Total	GB	Rest of world	Total
€ million	€ million	€ million	€ million	€ million	€ million	€ million	€ million	€ million	€ million
Service cost	—	14	14	—	18	18	10	16	26
Past service (credit)/cost ^(A)	—	(7)	(7)	—	(2)	(2)	(29)	6	(23)
Net interest (income)/cost	(1)	(1)	(2)	(2)	1	(1)	1	1	2
Administrative expenses	—	1	1	—	1	1	1	1	2
Total cost	(1)	7	6	(2)	18	16	(17)	24	7

(A) The current year activity is predominantly comprised of the impact of a plan amendment arising from legislative changes in respect of the minimum retirement age in France.

Other comprehensive income

The following table summarises the changes in other comprehensive income related to our pension plans for the years presented:

	Year ended 31 December								
	2023			2022			2021		
	GB	Rest of world	Total	GB	Rest of world	Total	GB	Rest of world	Total

Benefit payments	(33)	(70)	(103)	(57)	(72)	(129)
Currency translation adjustment	20	(2)	18	(68)	(1)	(69)
Fair value of plan assets at end of plan year	931	601	1,532	952	572	1,524

Notes to the consolidated financial statements continued

Timing of benefit payments

The weighted average duration of the defined benefit plan obligation as at 31 December 2023 is 15 years, including 16 years for the GB Scheme. The weighted average duration of the defined benefit plan obligation as at 31 December 2022 was 16 years, including 17 years for the GB Scheme.

Retirement benefit status

The following table summarises the retirement benefit status of pension plans as at the dates presented:

	Year ended 31 December					
	2023			2022		
	GB	Rest of world	Total	GB	Rest of world	Total
	€ million	€ million	€ million	€ million	€ million	€ million
Net benefit status:						
Present value of obligation	(1,008)	(548)	(1,556)	(937)	(529)	(1,466)
Fair value of assets	931	601	1,532	952	572	1,524
Net benefit status:	(77)	53	(24)	15	43	58
Retirement benefit surplus (Note 25)	—	134	134	15	120	135
Retirement benefit obligation	(77)	(81)	(158)	—	(77)	(77)

The surplus for 2023 is primarily related to the defined benefit plans in Germany and Belgium. The surplus is recognised on the balance sheet on the basis that the Group is entitled to a refund of any remaining assets once all members have left the plan.

Actuarial assumptions

The following tables summarise the weighted average actuarial assumptions used to determine the benefit obligations of pension plans as at the dates presented:

	Year ended 31 December					
	2023			2022		
	GB	Rest of world	Average	GB	Rest of world	Average
	%	%	%	%	%	%
Financial assumptions						
Discount rate	4.5	3.6	4.2	4.8	4.0	4.5
Rate of compensation increase	N/A	3.6	3.6	N/A	3.6	3.6
Rate of price inflation	3.1	2.3	2.9	3.3	2.4	3.0

	Year ended 31 December					
	2023			2022		
	GB	Rest of world	Average	GB	Rest of world	Average
Demographic assumptions (weighted average)^(A)						
Retiring at the end of the reporting period						
Male	21.4	19.8	21.0	21.9	19.8	21.3
Female	23.9	23.2	23.7	24.4	23.1	24.0
Retiring 15 years after the end of the reporting period						
Male	22.3	20.0	21.7	22.8	20.0	22.1
Female	25.0	23.5	24.6	25.5	23.5	24.9

(A) These assumptions translate into an average life expectancy in years, post-retirement, for an employee retiring at age 65.

Notes to the consolidated financial statements continued

The following tables summarise the sensitivity of the defined benefit obligation to changes in the weighted average principal assumptions for the periods presented:

Principal assumptions	Change in assumption	Year ended 31 December 2023					
		Impact on defined benefit obligation (%)					
		Increase in assumption			Decrease in assumption		
		GB	Rest of world	Average	GB	Rest of world	Average
Discount rate	0.5%	(7.3)	(4.1)	(6.2)	7.9	4.4	6.7
Rate of compensation increase ^(A)	0.5%	N/A	1.6	0.5	N/A	(1.4)	(0.5)
Rate of price inflation	0.5%	4.6	3.2	4.1	(4.5)	(3.0)	(4.0)
Mortality rates	1 year	2.3	1.7	2.1	(2.5)	(1.8)	(2.2)

Principal assumptions	Change in assumption	Year ended 31 December 2022					
		Impact on defined benefit obligation (%)					
		Increase in assumption			Decrease in assumption		
		GB	Rest of world	Average	GB	Rest of world	Average
Discount rate	0.5%	(7.9)	(4.0)	(6.5)	8.6	4.4	7.1
Rate of compensation increase ^(A)	0.5%	N/A	1.6	0.6	N/A	(1.4)	(0.5)
Rate of price inflation	0.5%	3.9	3.1	3.6	(3.8)	(2.9)	(3.4)
Mortality rates	1 year	3.0	1.7	2.5	(2.8)	(1.7)	(2.4)

(A) The compensation increase assumption is no longer applicable to the valuation of the defined benefit obligation associated with the GB Scheme in light of the plan closure effective 31 March 2021.

The sensitivity analyses have been determined based on a method that extrapolates the impact on the defined benefit obligation as a result of reasonable changes in key assumptions occurring at the end of the reporting period. The sensitivity analyses are based on a change in a significant assumption, keeping all other assumptions constant. The sensitivity analyses may not be representative of an actual change in the defined benefit obligation, as it is unlikely that changes in assumptions would occur in isolation from one another.

Pension plan assets

There are formal investment policies for the assets associated with our pension plans. Policy objectives include: (1) maximising long-term return at acceptable risk levels; (2) diversifying among asset classes, if appropriate, and among investment managers; and (3) establishing relevant risk parameters within each asset class. Investment policies reflect the unique circumstances of the respective plans and include requirements designed to mitigate risk, including quality and diversification standards. Asset allocation targets are based on periodic asset liability and/or risk budgeting study results, which help determine the appropriate investment strategies for acceptable risk levels. The investment policies permit variances from the targets within certain parameters.

Notes to the consolidated financial statements continued

The following table summarises pension plan assets measured at fair value as at the dates presented:

	Year ended 31 December 2023					Year ended 31 December 2022				
	Total	Investments quoted in active markets		Unquoted investments		Total	Investments quoted in active markets		Unquoted investments	
		GB	Rest of world	GB	Rest of world		GB	Rest of world	GB	Rest of world
	€ million	€ million	€ million	€ million	€ million	€ million	€ million	€ million	€ million	€ million
Equity securities ^(A)	154	—	154	—	—	185	—	185	—	—

Government bonds ^(C)	335	770	41	(476)	—	692	1,131	28	(467)	—
Cash and other short-term investments ^(D)	25	19	6	—	—	28	23	5	—	—
Other investments:										
Real estate funds ^(E)	255	21	26	208	—	274	43	15	216	—
Insurance contracts ^(F)	463	—	—	260	203	207	—	—	—	207
Investment funds ^(G)	77	—	—	—	77	76	—	5	—	71
Derivatives ^(H)	12	7	—	5	—	6	5	—	1	—
Total	1,532	934	321	(3)	280	1,524	1,202	294	(250)	278

(A) Equity securities are comprised of ordinary shares and investments in equity funds. Investments in ordinary shares are valued using quoted market prices multiplied by the number of shares owned. Investments in equity funds are valued at the net asset value per share, which is calculated predominantly based on the underlying quoted investments market price, multiplied by the number of shares held as of the measurement date.

(B) The fair values of the fixed income securities are determined based on quoted market prices in active markets. Bonds are held mainly in the currency of the geography of the plan.

(C) The unquoted amounts within this category relate to repurchase agreements (where the Scheme has sold government bonds with the agreement to repurchase at a fixed date and price). The commitment to repurchase the government bonds reduces the pension assets and is reflected at fair value based on the repurchase price. The assets sold are reported at their fair value, reflecting that the Scheme retains the risks and rewards of ownership of those assets. The asset portfolio of the GB Scheme was refined during 2022 by entering into repurchase agreement of government bonds in order to better match the Scheme liability and to offset the exposure to interests and inflation rates, while remaining invested in the assets of similar risk profile.

(D) Cash and other short-term investments are valued at €1.00/unit, which approximates fair value. Amounts are generally invested in cash or interest bearing accounts.

(E) The valuation of unquoted real estate funds is based on net assets value per share multiplied by the number of shares owned. For quoted real estate funds, the calculation is based on the underlying quoted investments market price, multiplied by the number of shares held as of the measurement date.

(F) Insurance contracts exactly match the amount and timing of certain benefits and therefore the fair value of these insurance policies is deemed to be the present value of the related obligations.

(G) Primarily includes investments in equity securities, fixed income securities and combinations of both. Fair values are sourced from broker quotes.

(H) The unquoted amounts within derivatives primarily relate to total return swaps, which represent the current value of future cash flows arising from the swap determined using discounted cash flow models and market data at the reporting date.

Notes to the consolidated financial statements continued

Contributions

To support a long-term funding arrangement, during 2019 the Group entered into a partnership agreement with the GB Scheme and the CCEP Scottish Limited Partnership (the Partnership). Certain property assets in Great Britain, with a market value of £171 million, were transferred into the Partnership and subsequently leased back to the Group's operating subsidiary in Great Britain. The GB Scheme receives semi-annual distributions from the Partnership, increasing each year at a fixed cumulative rate of 3% through to 2034. The Group exercises control over the Partnership, and as such, it is fully consolidated in these consolidated financial statements. Under IAS 19, the investment held by the GB Scheme in the Partnership does not represent a plan asset for the purposes of these consolidated financial statements. Similarly, the associated liability is not included in the consolidated statement of financial position; rather, the distributions are recognised when paid as a contribution to the plan assets of the scheme.

Contributions to pension plans totalled €32 million, €32 million and €39 million during the years ended 31 December 2023, 31 December 2022 and 31 December 2021, respectively. Included within the 2023 contribution is €11 million relating to the Partnership agreement. The Group expects to make contributions of €31 million for the full year ending 31 December 2024.

Other employee benefit liabilities

In certain territories, the Group has an early retirement programme designed to create an incentive for employees, within a certain age group, to transition from (full or part time) employment into retirement before their legal retirement age. Furthermore, the Group also sponsors deferred compensation plans in other territories. The current portion of these liabilities totalled €8 million and €8 million as at 31 December 2023 and 31 December 2022, respectively, and is included within the current portion of employee benefit liabilities. The non-current portion of these liabilities totalled €33 million and €31 million as at 31 December 2023 and 31 December 2022, respectively, and is included within employee benefit liabilities.

Defined contribution plans

The Group sponsors a number of defined contribution plans across its territories. Contributions payable for the period are charged to the consolidated income statement as an operating expense for defined contribution plans. Contributions to these plans totalled €81 million for the year ended 31 December 2023, €79 million for the year ended 31 December 2022 and €62 million for the year ended 31 December 2021.

Note 16

Equity

Share capital

As at 31 December 2023, the Company has issued and fully paid 459,200,818 Shares. Shares in issue have one voting right each and no restrictions related to dividends or return of capital.

	Number of Shares millions	Share capital € million
As at 1 January 2021	455	5
Issuances of Shares	1	—
Cancellation of Shares	—	—
As at 31 December 2021	456	5
Issuance of Shares	1	—
Cancellation of Shares	—	—
As at 31 December 2022	457	5
Issuance of Shares	2	—
Cancellation of Shares	—	—
As at 31 December 2023	459	5

The number of Shares increased in 2023, 2022 and 2021 from the issue of 2,094,365, 871,421 and 1,589,522 Shares, respectively, following the exercise of share-based payment awards.

Notes to the consolidated financial statements continued

Share premium

The share premium account increased by cash received for the exercise of options by €42 million in 2023, €14 million in 2022 and €28 million in 2021.

Merger reserves

The consideration transferred to acquire CCIP and CCEG qualified for merger relief under the Companies Act. As such, the excess consideration transferred over nominal value of €287 million was required to be excluded from the share premium account and recorded to merger reserves.

Other reserves

The following table summarises the balances in other reserves (net of tax) as at the dates presented:

	Year ended 31 December		
	2023	2022	2021
	€ million	€ million	€ million
Cash flow hedge reserve	31	104	151
Net investment hedge reserve	197	197	197
Foreign currency translation adjustment reserve	(974)	(728)	(509)
Reserve related to the acquisition of non-controlling interests	(79)	(79)	—
Other reserves ^(A)	2	(1)	5
Total other reserves	(823)	(507)	(156)

(A) Other reserves relate to cost of hedging which represents forward point on spot designations, time value of options and currency basis.

Movements, including the tax effects, in these accounts through to 31 December 2023 are included in the consolidated statement of comprehensive income or directly within the consolidated statement of changes in equity.

Dividends

Dividends are recorded within the Group's consolidated financial statements in the period in which they are paid.

	Year ended 31 December		
	2023	2022	2021
	€ million	€ million	€ million
First half dividend ^(A)	308	256	—
Second half dividend ^(B)	533	507	638
Total dividend on ordinary shares paid	841	763	638

(A) Dividend of €0.67 per Share was paid in first half of 2023. Dividend of €0.56 per Share was paid in first half of 2022.

(B) Dividend of €1.17 per Share was paid in second half of 2023. Dividend of €1.12 per Share was paid in second half of 2022.

A full year dividend of €1.40 per Share was paid in 2021.

Dividends attributable to restricted stock units and performance share units that are unvested at the period end date are accrued accordingly. During 2023, an incremental dividend accrual of €3 million has been recognised (2022: €3 million, 2021: €1 million).

Non-controlling interest

As at 31 December 2023, 31 December 2022 and 31 December 2021, equity attributable to non-controlling interest was nil, nil and €177 million, respectively.

In December 2022, the Group entered into a share purchase agreement (SPA) with TCCC to acquire the remaining 29.4% ownership interest of its subsidiary, PT Coca-Cola Bottling Indonesia, for a total consideration of €282 million. The acquisition completed in the first quarter of 2023, following the resolution of customary conditions (refer to Note 19). As at 31 December 2022, the non-controlling interest was derecognised.

As at 31 December 2021, equity attributable to non-controlling interest was €177 million, representing 29.4% of PT Coca-Cola Bottling Indonesia, held by TCCC and 6.1% of Samoa Breweries Limited held by numerous investors.

Notes to the consolidated financial statements continued

Note 17

Total operating costs

The following tables summarise the significant cost items by nature within operating costs for the years presented:

	Year ended 31 December		
	2023	2022	2021
	€ million	€ million	€ million
Transportation costs ^(A)	958	851	631
Employee benefits	1,116	1,110	975
Depreciation of property, plant and equipment, excluding restructuring	236	246	245
Amortisation of intangible assets	6	7	4
Restructuring charges, including accelerated depreciation ^(B)	—	1	45
Other selling and distribution expenses	862	769	596
Total selling and distribution expenses	3,178	2,984	2,496
Transportation costs ^(A)	3	16	2
Employee benefits	608	544	462
Depreciation of property, plant and equipment, excluding restructuring	93	99	76
Amortisation of intangible assets	130	94	83
Acquisition related costs	12	3	49
Restructuring charges, including accelerated depreciation ^(B)	85	143	91
Other administrative expenses	379	351	311
Total administrative expenses	1,310	1,250	1,074
Total operating expenses	4,488	4,234	3,570

(A) Transportation costs include warehousing and delivery costs to the final customer destination. They exclude depreciation and amortisation.

(B) See restructuring costs table.

	Year ended 31 December		
	2023	2022	2021
	€ million	€ million	€ million
Restructuring costs			
Increase in provision for restructuring programmes (Note 22)	78	115	93
Amount of provision unused (Note 22)	(10)	(8)	(13)
Accelerated depreciation and non-cash costs	11	44	60
Other cash costs ^(A)	15	12	13
Total restructuring costs	94	163	153
Restructuring costs by function:			
Cost of sales	9	19	17
Selling and distribution expenses	—	1	45
Administrative expenses	85	143	91

(A) Other cash costs primarily relate to professional fees, which include consultancy costs, legal fees and other costs directly associated with restructuring.

Restructuring costs charged in arriving at operating profit for the years presented include restructuring costs arising under the following programmes and initiatives.

Accelerate competitiveness

In October 2020, the Group announced a number of proposals aimed at improving productivity through the use of technology enabled solutions. Included in these proposals was the closure of certain production facilities, including Liederbach and Sodenthaler in Germany and Malaga in Iberia. These proposals continue the focus on network optimisation and site rationalisation of the Group, with the majority of the impacted activities to be transferred within our network of facilities in each respective territory.

The proposals are also expected to impact a number of functions across the Group, including business process technology, customer service, sales and marketing, and finance, as the Group seeks to reduce complexity, improve efficiency and increase the use of technology.

In 2023, as part of the continuation of this program, the Group announced additional restructuring proposals. These initiatives resulted in €7 million of restructuring charges primarily related to severance costs. As at 31 December 2023, the programme is substantially complete.

Notes to the consolidated financial statements continued

In November 2022, the Group announced a new efficiency programme to be delivered by the end of 2028. This programme focusses on further supply chain efficiencies, leveraging global procurement and a more integrated shared service centre model, all enabled by next generation technology including digital tools and data and analytics.

In 2023, as part of this efficiency programme, the Group announced restructuring proposals resulting in €82 million of recognised costs primarily related to expected severance payments.

Staff costs

Staff costs included within the income statement were as follows:

	Year ended 31 December		
	2023	2022	2021
Employee costs	€ million	€ million	€ million
Wages and salaries	1,841	1,769	1,544
Social security costs	339	316	302
Pension and other employee benefits	253	233	170
Total employee costs	2,433	2,318	2,016

Directors' remuneration information is disclosed in the Directors' remuneration report.

The average number of persons employed by the Group (including Directors) for the periods presented were as follows:

	2023	2022	2021
	No. in thousands	No. in thousands	No. in thousands
Commercial	11.6	12.5	10.9
Supply chain	17.1	16.6	14.9
Support functions	4.1	4.0	3.9
Total average staff employed	32.8	33.1	29.7

Auditor's remuneration

Audit and other fees charged in the income statement concerning the statutory auditor of the consolidated financial statements, Ernst & Young LLP, were as follows:

	Year ended 31 December		
	2023	2022	2021
	€ thousand	€ thousand	€ thousand
Audit of Parent Company and consolidated financial statements ^(A)	3,759	3,136	4,751
Audit of the Company's subsidiaries	6,269	6,248	5,493
Total audit	10,028	9,384	10,244
Audit-related assurance services ^(B)	1,019	1,002	1,234
Other assurance services	717	213	313
Total audit and audit-related assurance services	11,764	10,599	11,791
All other services ^(C)	36	47	35
Total non-audit or non-audit-related assurance services	36	47	35
Total audit and all other fees	11,800	10,646	11,826

(A) Fees in respect of the audit of the accounts of the Company, including the Group's consolidated financial statements.

(B) Includes professional fees for interim reviews, reporting on internal financial controls, services related to the transactions entered into with TCCC, issuance of comfort letters for debt issuances, regulatory inspections, certain accounting consultations and other attested engagements.

(C) Represents fees for all other allowable services.

Notes to the consolidated financial statements continued

Note 18 Finance costs

Finance costs are recognised in the consolidated income statement in the period in which they are incurred, with the exception of general and specific borrowing costs directly attributable to the acquisition, construction or production of qualifying assets. Qualifying assets are assets that necessarily take a substantial period of time to get ready for their intended use or sale. Borrowing costs are added to the cost of those assets, until such time as the assets are substantially ready for their intended use or sale. All other borrowing costs are recognised within the consolidated income statement in the period in which they are incurred based upon the effective interest rate method. Interest income is recognised using the effective interest rate method.

The following table summarises net finance costs for the years presented:

	Year ended 31 December		
	2023	2022	2021
	€ million	€ million	€ million
Interest income ^(A)	65	67	43
Interest expense on external debt ^(A)	(162)	(162)	(153)
Other finance costs ^(B)	(23)	(19)	(19)
Total finance costs, net	(120)	(114)	(129)

(A) Includes interest income and expense amounts, as applicable, on cross currency swaps and interest rate swaps. Cross currency swap and interest rate swap income totalled €47 million, €50 million and €27 million in 2023, 2022 and 2021, respectively. Cross currency swap and interest rate swap expense totalled €67 million, €31 million and €14 million in 2023, 2022 and 2021, respectively. Refer to Note 12 for further details.

(B) Other finance costs principally includes amortisation of the discount on external debt and interest on leases.

Note 19 Related party transactions

For the purpose of these consolidated financial statements, transactions with related parties mainly comprise transactions between subsidiaries of the Group and the related parties of the Group.

Transactions with entities with significant influence over the Group Transactions with TCCC

TCCC exerts significant influence over the Group, as defined by IAS 24 "Related Party Disclosures". As at 31 December 2023, 19.20% of the total outstanding Shares in the Group were owned by European Refreshments, a wholly owned subsidiary of TCCC. The Group is a key bottler of TCCC products and has entered into bottling agreements with TCCC to make, sell and distribute products of TCCC within the Group's territories. The Group purchases concentrate from TCCC and also receives marketing funding to help promote the sale of TCCC products. The Group's agreements with TCCC in each territory are for 10-year terms and each contains the right for the Group to request a 10-year renewal. The existing bottling agreements expire no earlier than 1 September 2025. Additionally, two of the Group's seventeen Directors are nominated by TCCC.

The Group and TCCC engage in a variety of marketing programmes to promote the sale of TCCC products in territories in which the Group operates. The Group and TCCC operate under an incidence based concentrate pricing model and funding programme across most territories, the terms of which are tied to the bottling agreements. In certain API territories, the Group operates under a fixed price model with marketing rebates and support.

TCCC makes discretionary marketing contributions under shared marketing agreements to CCEP's operating subsidiaries. Amounts to be paid to the Group by TCCC under the programmes are generally determined annually and are periodically reassessed as the programmes progress. Under the bottling agreements, TCCC is under no obligation to participate in the programmes or continue past levels of funding in the future. The amounts paid and terms of similar programmes with other franchises may differ.

Marketing support funding programmes granted to the Group provide financial support principally based on product sales or on the completion of stated requirements and are intended to offset a portion of the costs of the programmes.

Payments from TCCC for marketing programmes to promote the sale of products are classified as a reduction in cost of sales, unless the presumption that the payment is a reduction in the price of the franchisors' products can be overcome. Payments for marketing programmes are recognised as product is sold.

Notes to the consolidated financial statements continued

The following table summarises the transactions with TCCC that directly impacted the consolidated income statement for the years presented:

	Year ended 31 December		
	2023	2022	2021
	€ million	€ million	€ million
Amounts affecting revenue ^(A)	140	117	50
Amounts affecting cost of sales ^(B)	(3,964)	(3,805)	(3,056)
Amounts affecting operating expenses ^(C)	25	19	9
Amounts affecting finance costs, net ^(D)	4	—	—
Total net amount affecting the consolidated income statement	(3,795)	(3,669)	(2,997)

(A) Amounts principally relate to fountain syrup and packaged product sales.

(B) Amounts principally relate to the purchase of concentrate, syrup, mineral water and juice, as well as funding for marketing programmes.

(C) Amounts principally relate to certain costs associated with new product development initiatives and reimbursement of certain marketing expenses.

(D) Amounts relate to bank fees recharges for bank guarantees.

The following table summarises the transactions with TCCC that impacted the consolidated statement of financial position for the periods presented:

	Year ended 31 December	
	2023	2022
	€ million	€ million
Amounts due from TCCC	101	130
Amounts payable to TCCC	229	442

In December 2022, the Group entered into a share purchase agreement (SPA) with TCCC to acquire the remaining 29.4% ownership interest of its subsidiary, PT Coca-Cola Bottling Indonesia, for a total consideration of €282 million. As at 31 December 2022, we recognised a redemption liability equalling the consideration amount, which was reflected within the amounts payable to related parties line of our consolidated statement of financial position. The acquisition completed on 15 February 2023, following the resolution of customary conditions.

In February 2022, the Group entered into asset sale arrangements with TCCC, pursuant to which the Group agreed to sell certain non-alcoholic ready to drink beverage brands predominantly available in Australia and New Zealand, which were acquired as part of the business combination transaction consummated on 10 May 2021, for a total consideration approximating €182 million. The sale price approximated the fair value of the brands assessed at the acquisition date. During

the first half of 2022, the Group partially completed the asset sale transaction and classified the remaining brands as assets held for sale in our consolidated statement of financial position as at 31 December 2022. The remaining portion of the asset sale transaction was finalised during the first half of 2023. The Group has also entered into commercial agreements with TCCC to facilitate ongoing manufacturing, distributing and/or selling activities pertaining to these brands.

Terms and conditions of transactions with TCCC

Outstanding balances on transactions with TCCC are unsecured, interest free and generally settled in cash. Receivables from TCCC are considered to be fully recoverable.

Proposed acquisition of Coca-Cola Beverages Philippines, Inc. (CCBPI)

In November 2023, the Group together with Aboitiz Equity Ventures Inc. (AEV) entered into a definitive agreement with The Coca-Cola Company (TCCC) to jointly acquire 100% of CCBPI, a wholly owned subsidiary of TCCC, for an estimated total consideration of US\$1.8 billion on a debt-free, cash-free basis. The proposed acquisition reflects a 60:40 ownership structure between CCEP and AEV. The parties also agreed that if any currently unforeseen events lead AEV to terminate its participation in the proposed acquisition, at the election of TCCC, CCEP may acquire 60% or 100% of CCBPI. The transaction, which is subject to a number of customary closing conditions, including the receipt of regulatory approval, is expected to complete during the first quarter of 2024 (refer to Note 27 for further details).

Transactions with Cobega companies

Cobega, S.A. (Cobega) exhibits significant influence over the Group, as defined by IAS 24, "Related Party Disclosures". As at 31 December 2023, 20.80% of the total outstanding Shares in the Group were indirectly owned by Cobega through its ownership interest in Olive Partners, S.A. Additionally, five of the Group's seventeen Directors, including the Chairman, are nominated by Olive Partners, three of whom are affiliated with Cobega.

Notes to the consolidated financial statements continued

The principal transactions with Cobega are for the purchase of packaging materials and maintenance services for vending machines. The following table summarises the transactions with Cobega that directly impacted the consolidated income statement for the years presented:

	Year ended 31 December		
	2023 € million	2022 € million	2021 € million
Amounts affecting revenue ^(A)	1	2	1
Amounts affecting cost of sales ^(B)	(69)	(76)	(49)
Amounts affecting operating expenses ^(C)	(18)	(17)	(11)
Total net amount affecting the consolidated income statement	(86)	(91)	(59)

(A) Amounts principally relate to packaged product sales.

(B) Amounts principally relate to the purchase of packaging materials and concentrate.

(C) Amounts principally relate to maintenance and repair services and transportation.

The following table summarises the transactions with Cobega that impacted the consolidated statement of financial position for the periods presented:

	Year ended 31 December	
	2023 € million	2022 € million
Amounts due from Cobega	16	3
Amounts payable to Cobega	22	24

Terms and conditions of transactions with Cobega

Outstanding balances on transactions with Cobega are unsecured, interest free and generally settled in cash. Receivables from Cobega are considered to be fully recoverable.

Other related parties

Transactions with associates, joint ventures and other related parties

Joint venture investments relate to interests in a service provider supporting the operation of container refund schemes in certain Australian states, a PET recycling plant in Indonesia and a manufacturer of alcoholic beverages (divested during the first half of 2022).

Associate investments relate to interests in deposit scheme coordinators and a holding company of container deposit schemes in certain Australian states and territories. Associate investments also include the Group's equity interests in early stage development companies as part of CCEP Ventures.

Other related parties include coordinators of container deposit schemes in certain Australian states over which significant influence is held.

The following table summarises the transactions with associates, joint ventures and other related parties:

	Year ended 31 December		
	2023 € million	2022 € million	2021 € million
Net amounts affecting consolidated income statement – associates ^(A)	(68)	(73)	(49)
Net amounts affecting consolidated income statement – joint ventures ^(B)	(28)	(9)	(9)
Net amounts affecting consolidated income statement – other related parties ^(A)	(85)	(85)	(52)
Total net amount affecting the consolidated income statement	(181)	(167)	(110)

(A) Amounts principally relate to container deposit scheme charges in Australia.

(B) Amounts principally relate to the purchase of certain raw materials.

Notes to the consolidated financial statements continued

The following table summarises the balances with associates, joint ventures and other related parties:

	Year ended 31 December	
	2023	2022
	€ million	€ million
Amounts due from associates	6	6
Amounts payable to associates	2	9
Amounts payable to joint ventures	7	—
Amounts payable to other related parties	10	10

Terms and conditions of transactions with associates, joint ventures and other related parties

Outstanding balances on transactions are unsecured, interest free and generally settled in cash. Receivables are considered to be fully recoverable.

Refer to Note 28 for a listing of associates, joint ventures and other related parties.

Transactions with key management personnel

Key management personnel are the members of the Board of Directors and the members of the Executive Leadership Team. The following table summarises the total remuneration paid or accrued during the reporting period related to key management personnel:

	Year ended 31 December		
	2023	2022	2021
	€ million	€ million	€ million
Salaries and other short-term employee benefits ^(A)	31	30	22
Share-based payments	20	15	7
Total	51	45	29

(A) Short-term employee benefits include wages, salaries and social security contributions, paid annual leave and paid sick leave, paid bonuses and non-monetary benefits.

The Group did not have any loans with key management personnel and was not party to any other transactions with key management personnel during the periods presented.

Note 20 Income taxes Current tax

Current tax for the period includes amounts expected to be payable on taxable income in the period together with any adjustments to taxes payable in respect of previous periods, and is determined based on the tax laws enacted or substantively enacted at the balance sheet date in the countries where the Group operates and generates taxable income. Management periodically evaluates positions taken in tax returns with respect to situations in which applicable tax regulations are subject to interpretation and establishes provisions, where appropriate, on the basis of amounts expected to be paid to the tax authorities.

Deferred tax

Deferred tax is determined by identifying the temporary differences between the tax bases of assets and liabilities and their carrying amounts for financial reporting purposes at the reporting date. Deferred tax for the period includes origination and reversal of temporary differences, remeasurements of deferred tax balances and adjustments in respect of prior periods.

Deferred tax liabilities are recognised for all taxable temporary differences, except:

- When the deferred tax liability arises from the initial recognition of goodwill or an asset or liability in a transaction that is not a business combination and, at the time of the transaction, affects neither the accounting profit nor taxable profit or loss, unless it gives rise to equal taxable and deductible temporary differences; or
- In respect of taxable temporary differences associated with investments in subsidiaries, branches and associates, and interests in joint ventures, when the timing of the reversal of the temporary differences can be controlled by the Group and it is probable that the temporary differences will not reverse in the foreseeable future.

Notes to the consolidated financial statements continued

Deferred tax assets are recognised for all deductible temporary differences, carry forward of unused tax credits and unused tax losses, to the extent that it is probable that taxable profit will be available against which the deductible temporary differences and the carry forward of unused tax credits and unused tax losses can be utilised, except:

- When the deferred tax asset relating to the deductible temporary difference arises from the initial recognition of an asset or liability in a transaction that is not a business combination and, at the time of the transaction, affects neither the accounting profit nor taxable profit or loss, unless it gives rise to equal taxable and deductible temporary differences; or
- In respect of deductible temporary differences associated with investments in subsidiaries, branches and associates, and interests in joint ventures, deferred tax assets are recognised only to the extent that it is probable that the temporary differences will reverse in the foreseeable future and taxable profit will be available against which the temporary differences can be utilised.

The carrying amount of deferred tax assets is reviewed at each reporting date and reduced to the extent that it is no longer probable that sufficient taxable profit will be available to allow all or part of the deferred tax asset to be utilised. Unrecognised deferred tax assets are reassessed at each reporting date and are recognised to the extent that it has become probable that future taxable profits will allow the deferred tax asset to be recovered.

Deferred tax assets and liabilities are measured at the tax rates that are expected to apply in the year when the asset is realised or the liability is settled, based on tax rates (and tax laws) that have been enacted or substantively enacted at the reporting date.

Deferred tax assets and deferred tax liabilities are offset if a legally enforceable right exists to set off current tax assets against current income tax liabilities and the deferred taxes relate to the same taxation authority on either the same taxable entity or different taxable entities where there is an intention to settle the balances on a net basis.

Income tax is recognised in the consolidated income statement. Income tax is recognised in other comprehensive income or directly in equity to the extent that it relates to items recognised in other comprehensive income or in equity.

2023, 2022 and 2021 results

The following table summarises the major components of income tax expense for the periods presented:

	Year ended 31 December		
	2023 € million	2022 € million	2021 € million
Current tax:			
Current tax charge	555	460	323
Adjustment in respect of current tax from prior periods	(10)	(37)	(53)
Total current tax	545	423	270
Deferred tax:			
Relating to the origination and reversal of temporary differences	11	35	6
Adjustment in respect of deferred income tax from prior periods	(22)	(22)	(9)
Relating to changes in tax rates or the imposition of new taxes	—	—	127
Total deferred tax	(11)	13	124
Income tax charge per the consolidated income statement	534	436	394

Notes to the consolidated financial statements continued

The following table summarises the taxes on items recognised in other comprehensive income (OCI) and directly within equity for the periods presented:

	Year ended 31 December		
	2023 € million	2022 € million	2021 € million
Taxes charged/(credited) to OCI:			
Deferred tax on net gain/loss on revaluation of cash flow hedges	11	(20)	63
Deferred tax on net gain/loss on pension plan remeasurements	(43)	(11)	63
Current tax on net gain/loss on pension plan remeasurements	8	—	1
Total taxes charged/(credited) to OCI	(24)	(31)	127
Taxes charged/(credited) to equity:			
Deferred tax charge/(credit): cash flow hedges	(31)	—	—
Deferred tax charge/(credit): share-based compensation	(1)	(2)	(3)
Current tax charge/(credit): share-based compensation	—	(8)	—
Total taxes charged/(credited) to equity	(32)	(10)	(3)

The effective tax rate was 24.2%, 22.3% and 28.5% for the years ended 31 December 2023, 31 December 2022 and 31 December 2021, respectively. The Parent Company of the Group is a UK company.

Accordingly, the following tables provide reconciliations of the Group's income tax expense at the UK statutory tax rate to the actual income tax expense for the periods presented:

	Year ended 31 December		
	2023 € million	2022 € million	2021 € million
Accounting profit before tax from continuing operations	2,203	1,957	1,382
Tax expense at the UK statutory rate	518	371	262
Taxation of foreign operations, net ^(A)	43	115	72
Non-deductible expense items for tax purposes	15	2	2
Rate and law change impact, net ^{(B)(C)(D)}	—	—	127
Deferred taxes not recognised	(10)	7	(7)
Adjustment in respect of prior periods ^(E)	(32)	(59)	(62)
Total provision for income taxes	534	436	394

(A) This reflects the impact, net of income tax contingencies, of having operations outside the UK, which are taxed at rates other than the statutory UK rate of 23.5% (2022: 19%, 2021: 19%).

(B) In 2021, the UK enacted a law change that increased its tax rate to 25% with effect from 1 April 2023. The Group recognised a deferred tax expense of €123 million to reflect the impact of this change.

(C) In 2021, the Netherlands enacted a law change that increased its tax rate to 25.8% with effect from 1 January 2022. The Group recognised a deferred tax expense of €2 million to reflect the impact of this change.

(D) In 2021, Indonesia enacted a law change that retained its tax rate of 22% with effect from 1 January 2022, reversing a previously enacted decrease to 20%. The Group recognised a deferred tax expense of €2 million to reflect the impact of this change.

(E) The prior year adjustment is principally due to the release of tax reserves that are no longer required and tax audit settlements.

Notes to the consolidated financial statements continued

Deferred income taxes

The following table summarises the movements in the carrying amounts of deferred tax liabilities and assets by significant component during the periods presented.

	Franchise and other intangible assets	Property, plant and equipment	Financial assets and liabilities	Tax losses	Employee and retiree benefit accruals	Tax credits	Other, net	Total, net
	€ million	€ million	€ million	€ million	€ million	€ million	€ million	€ million
As at 31 December 2021	3,285	251	36	(14)	(14)	(12)	25	3,557
Amount charged/(credited) to income statement (excluding effect of tax rate changes)	(4)	(11)	5	7	5	—	11	13
Amounts charged/(credited) directly to OCI	—	—	(20)	—	(11)	—	—	(31)

Analysed as follows:								
						As at 31 December 2022	As at 31 December 2023	
Deferred tax asset						(21)	(1)	
Deferred tax liability						3,513	3,378	

Notes to the consolidated financial statements continued

Unrecognised tax items

The utilisation of tax losses and temporary differences carried forward, for which no deferred tax asset is currently recognised, is subject to the resolution of tax authority enquiries and the achievement of positive income in periods which are beyond the Group's current business plan, and therefore this utilisation is uncertain.

The gross and tax effected amounts including expiry dates, where applicable, of unrecognised losses, tax credits and deductible temporary differences available for carry forward are as follows:

	Year ended 31 December					
	2023		2022		2021	
	€ million		€ million		€ million	
	Gross amount	Tax effected	Gross amount	Tax effected	Gross amount	Tax effected
Tax losses expiring:						
Beyond 10 years	3	1	3	1	—	—
No time limit	1,391	264	1,657	288	1,803	310
	1,394	265	1,660	289	1,803	310
Tax credits expiring:						
Within 10 years	57	57	58	58	100	100
Beyond 10 years	35	35	43	43	45	45
	92	92	101	101	145	145
Deductible temporary differences						
No time limit	17	4	79	20	53	11
	17	4	79	20	53	11
Total	1,503	361	1,840	410	2,001	466

As at 31 December 2023, no deferred tax liability has been recognised in respect of €244 million (2022: €309 million) of unremitted earnings in subsidiaries, associates and joint ventures.

Tax provisions

The Group is routinely under audit by tax authorities in the ordinary course of business. Due to their nature, such proceedings and tax matters involve inherent uncertainties including, but not limited to, court rulings, settlements between affected parties and/or governmental actions. The probability of outcome is assessed and accrued as a liability and/or disclosed, as appropriate. The Group maintains provisions for uncertainty relating to these tax matters that it believes appropriately reflect its risk. As at 31 December 2023, €175 million (31 December 2022: €122 million) of these provisions is included in current tax liabilities and the remainder is included in non-current tax liabilities.

The Group reviews the adequacy of these provisions at the end of each reporting period and adjusts them based on changing facts and circumstances. Due to the uncertainty associated with tax matters, it is possible that at some future date, liabilities resulting from audits or litigation could vary significantly from the Group's provisions. When an uncertain tax liability is regarded as probable, it is measured on the basis of the Group's best estimate.

The Group has received tax assessments in certain jurisdictions for potential tax related to the Group's purchases of concentrate. The value of the Group's concentrate purchases is significant, and, therefore, the tax assessments are substantial. The Group strongly believes the application of tax has no technical merit based on applicable tax law, and its tax position would be sustained. Accordingly, the Group has not recorded a tax liability for these assessments, and is vigorously defending its position against these assessments.

Global minimum top-up tax

On 11 July 2023, the Finance (No.2) Act 2023 was enacted in the United Kingdom, introducing a global minimum effective tax rate of 15%. The legislation implements a domestic top-up tax and a multinational top-up tax effective for accounting periods starting on or after 31 December 2023.

The Group expects to be subject to the top-up tax in relation to its operations in a few countries. However, since the newly enacted tax legislation in the United Kingdom is only effective from 1 January 2024, there is no current tax impact for the year ended 31 December 2023.

The Group has applied a temporary mandatory relief from recognising and disclosing information about deferred tax assets and liabilities in relation to top-up tax and accounts for it as a current tax when it is incurred.

If the top-up tax had applied in 2023, the additional tax expense relating to the Group's operations for the year ended 31 December 2023 would be immaterial.

Notes to the consolidated financial statements continued

Note 21

Share-based payment plans

The Group has an established Share options plan and a Long-Term Incentive Plan (LTIP) for certain executive and management level employees that provide for granting restricted stock units, some with performance and/or market conditions. These awards are designed to align the interests of executives and management with the interests of shareholders.

During 2022, the Group launched a new global Employee Share Purchase Plan (ESPP), which gives employees the opportunity to purchase CCEP Shares on a regular basis and become a shareholder, promoting an ownership culture. Under the ESPP, participating employees are granted matching Shares when certain vesting and non-vesting conditions are met.

The Group recognises compensation expense equal to the grant date fair value for all share-based payment awards that are expected to vest. Expense is generally recorded on a straight-line basis over the requisite service period for each separately vesting portion of the award.

During the years ended 31 December 2023, 31 December 2022 and 31 December 2021, compensation expense related to our share-based payment plans totalled €57 million, €33 million and €17 million, respectively. The expense arising from equity-settled share-based payment transactions was €54 million for the year ended 31 December 2023 (2022: €33 million; 2021: €16 million).

Share options

Share options: (1) are granted with exercise prices equal to or greater than the fair value of the Group's stock on the date of grant, (2) generally vest in three annual tranches over a period of 36 months, and (3) expire 10 years from the date of grant. Generally, when options are exercised, new Shares will be issued rather than issuing treasury Shares, if available. No options were granted during the years ended 31 December 2023, 31 December 2022 and 31 December 2021. All options outstanding as at 31 December 2023, 31 December 2022 and 31 December 2021 were valued and had exercise prices in US dollars.

The following table summarises our share option activity for the periods presented:

	2023		2022		2021	
	Shares thousands	Average exercise price US\$	Shares thousands	Average exercise price US\$	Shares thousands	Average exercise price US\$
Outstanding at beginning of year	2,272	35.30	2,758	34.19	4,051	31.68
Granted	—	—	—	—	—	—
Exercised	(1,352)	33.86	(484)	29.00	(1,290)	26.33
Forfeited, expired or cancelled	—	—	(2)	23.21	(3)	19.68
Outstanding at end of year	920	37.42	2,272	35.30	2,758	34.19
Options exercisable at end of year	920	37.42	2,272	35.30	2,758	34.19

Notes to the consolidated financial statements continued

The weighted average Share price during the years ended 31 December 2023, 31 December 2022 and 31 December 2021 was US\$60.96, US\$51.21 and US\$55.68, respectively.

The following table summarises the weighted average remaining life of options outstanding for the periods presented:

Range of exercise prices US\$	2023		2022		2021	
	Options outstanding thousands	Weighted average remaining life years	Options outstanding thousands	Weighted average remaining life years	Options outstanding thousands	Weighted average remaining life years
15.01 to 25.00	—	0	—	0	151	0.85
25.01 to 40.00	920	1.60	2,272	2.20	2,607	3.04
Total	920	1.60	2,272	2.20	2,758	2.92

Restricted Stock Units (RSUs) and Performance Share Units (PSUs)

RSU awards entitle the participant to accrue dividends, which are paid in cash only if the RSUs vest. They do not have voting rights. Upon vesting, the participant is granted one Share for each RSU. They generally vest subject to continued employment for a period of 36 months. Unvested RSUs are restricted as to disposition and subject to forfeiture.

There were 0.1 million, 0.1 million and 0.1 million unvested RSUs outstanding with a weighted average grant date fair value of US\$50.67, US\$42.74 and US\$43.29 as at 31 December 2023, 31 December 2022 and 31 December 2021, respectively.

PSU awards entitle the participant to the same benefits as RSUs. They generally vest subject to continued employment for a period of 36 months and the attainment of certain performance targets. There were 2.1 million, 1.8 million and 1.3 million of unvested PSUs, with weighted average grant date fair values of US\$48.95, US\$41.65 and US\$43.07 outstanding as at 31 December 2023, 31 December 2022 and 31 December 2021, respectively.

The PSUs granted in 2023, 2022 and 2021 are subject to performance conditions of absolute EPS and ROIC, each with a 42.5% weighting, and to a sustainability metric, focused on the reduction of greenhouse gas emissions (CO₂e) across our entire value chain with a 15% weighting.

Key assumptions for grant date fair value

The following table summarises the weighted average grant date fair values per unit:

Restricted stock units and performance share units	2023	2022
Grant date fair value – service conditions (US\$)	59.21	45.43
Grant date fair value – service and performance conditions (US\$)	59.23	45.44

Employee Share Purchase Plan

Through the ESPP, employees are able to contribute on a regular basis up to a maximum amount deducted from their salary for the purpose of purchasing CCEP Shares. Every quarter, for each purchased share, CCEP awards participating employees matching Shares at the same time. Participating employees become owners of the matching Shares 12 months after the award, as long as they remain in employment and do not sell the related purchased Shares during this period. Participants have all the rights of a shareholder in respect of their purchased Shares and matching Shares (once they are fully owned by the employees), including dividend rights and voting rights. During the years ended 31 December 2023 and 31 December 2022, the Group recognised a compensation expense related to the ESPP of €14 million and €3 million, respectively.

Note 22

Provisions, contingencies and commitments

Provisions are recognised when the Group has a present obligation (legal or constructive) as a result of a past event, it is probable that an outflow of resources embodying economic benefits will be required to settle the obligation and a reliable estimate can be made of the amount of the obligation. When some or all of a provision is expected to be reimbursed, the reimbursement is recognised as a separate asset, but only when the reimbursement is virtually certain. The expense relating to a provision is presented in the consolidated income statement, net of any reimbursement.

Asset retirement obligations are estimated at the inception of a lease or contract, for which a liability is recognised. A corresponding asset is also created and depreciated.

If the effect of the time value of money is material, provisions are discounted using a current pre-tax rate that reflects, when appropriate, the risks specific to the liability. When discounting is used, the increase in the provision due to the passage of time is recognised as a finance cost.

Notes to the consolidated financial statements continued

Provisions

The following table summarises the movement in each class of provision for the periods presented:

	Restructuring provision € million	Decommissioning provision € million	Other provisions ^(A) € million	Total € million
As at 31 December 2021	103	20	11	134
Charged/(credited) to profit or loss:				
Additional provisions recognised	115	7	2	124
Unused amounts reversed	(8)	(2)	(3)	(13)
Utilised during the period	(74)	(1)	(1)	(76)
Translation	1	—	—	1
As at 31 December 2022	137	24	9	170
Charged/(credited) to profit or loss:				
Additional provisions recognised	78	1	24	103
Unused amounts reversed	(10)	(9)	(1)	(20)
Utilised during the period	(89)	(1)	(4)	(94)
Translation	—	—	—	—
As at 31 December 2023	116	15	28	159
Non-current	26	15	4	45
Current	90	—	24	114
As at 31 December 2023	116	15	28	159

(A) Other provisions primarily relate to property tax assessment provisions and legal reserves, and are not considered material to the consolidated financial statements.

Restructuring provision

Restructuring provisions are recognised only when the Group has a constructive obligation, which is when a detailed formal plan identifies the business or part of the business concerned, the location and number of employees affected, a detailed estimate of the associated costs and an appropriate timeline, and the employees affected have been notified of the plan's main features. These provisions are expected to be resolved by the time the related programme is substantively complete.

Refer to Note 17 for further details regarding our restructuring programmes.

Decommissioning provisions

Decommissioning liabilities relate to contractual or legal obligations to pay for asset retirement costs. The liabilities represent both the reinstatement obligations when the Group is contractually obligated to pay for the cost of retiring leased buildings and the costs for collection, treatment, reuse, recovery and environmentally sound disposal of cold drink equipment. Specific to cold drink equipment obligations, the Group is subject to, and operates in accordance with, the EU Directive on Waste from Electrical and Electronic Equipment (WEEE). Under the WEEE, companies that put electrical and electronic equipment (such as cold drink equipment) on the EU market are responsible for the costs of collection, treatment, recovery and disposal of their own products. Where applicable, the WEEE provision estimate is calculated using assumptions, including disposal cost per unit, average equipment age and the inflation rate, to determine the appropriate accrual amount.

The period over which the decommissioning liabilities on leased buildings and cold drink equipment will be settled ranges from 1 to 30 years and 2 to 9 years, respectively.

Contingencies

Legal proceedings and tax matters

The Group is involved in various legal proceedings and tax matters and is routinely under audit by tax authorities in the ordinary course of business. Due to their nature, such legal proceedings and tax matters involve inherent uncertainties including, but not limited to, court rulings, settlements between affected parties and/or governmental actions. The probability of loss for such contingencies is assessed and accrued as a liability and/or disclosed, as appropriate.

Notes to the consolidated financial statements continued

Guarantees

In connection with ongoing litigation and tax matters in certain territories, guarantees of approximately €1,127 million have been issued (2022: €646 million). The Group was required to issue these guarantees to satisfy potential obligations arising from such litigation. In addition, we have approximately €37 million of guarantees issued to third parties through the normal course of business (2022: €29 million). The guarantees have various terms and the amounts represent the maximum potential future payments that we could be required to make under the guarantees. No significant additional liabilities in the accompanying consolidated financial statements are expected to arise from guarantees issued.

Commitments

Commitments beyond 31 December 2023 are disclosed herein but not accrued for within the consolidated statement of financial position.

Purchase agreements

Total purchase commitments were €0.2 billion as at 31 December 2023. This amount represents non-cancellable purchase agreements with various suppliers that are enforceable and legally binding, and that specify a fixed or minimum quantity that we must purchase. All purchases made under these agreements have standard quality and performance criteria. In addition to these amounts, the Group has outstanding capital expenditure purchase orders of approximately €165 million as at 31 December 2023. The Group also has other purchase orders raised in the ordinary course of business, which are settled in a reasonably short period of time.

Lease agreements

As at 31 December 2023, the Group had committed to a number of lease agreements that have not yet commenced. The minimum lease payments for these lease agreements totalled €23 million.

Proposed Acquisition of Coca-Cola Beverages Philippines, Inc. (CCBPI)

In November 2023, the Group together with Aboitiz Equity Ventures Inc. (AEV) entered into a definitive agreement with The Coca-Cola Company (TCCC) to jointly acquire 100% of Coca-Cola Beverages Philippines, Inc. (CCBPI) (refer to Note 19 and Note 27 for further details).

Note 23

Other income

Other income for the year ended 31 December 2023 totalled €107 million (31 December 2022: €96 million, 31 December 2021: nil). The balance is primarily attributable to the following activities.

The Group recognised €18 million of royalty income arising from the ownership of mineral rights in Queensland, Australia (2022: €96 million). On 7 March 2023, the Group entered into an agreement to sell the sub-strata and associated mineral rights. Upon regulatory approval, the transaction was consummated in April 2023. The total consideration approximated €35 million.

The Group recognised a gain of €54 million related to the sales of properties, mainly attributable to the sale of property in Germany completed on 7 July 2023.

Note 24

Other current assets and assets held for sale

Other current assets

The following table summarises the Group's other current assets as at the dates presented:

	Year ended 31 December	
	2023	2022
	€ million	€ million
Other current assets		
Prepayments	130	180
VAT receivables	40	41
Coal royalties ^(A)	—	96
Miscellaneous receivables	181	162
Total other current assets	351	479

(A) As at 31 December 2022, the amount related to the royalty income recognised in connection with a favourable court ruling pertaining to the ownership of certain mineral rights in Australia. Refer to Note 23 for further detail.

VAT receivables

In 2014, a dispute arose between the Spanish tax authorities and the regional tax authorities of Bizkaia (Basque Region) as to the responsibility for refunding VAT to CCEP. Pertaining to the VAT assessment for years 2013 to 2016, the Group recognised a VAT receivable of €214 million within other non-current assets, for the year ended 31 December 2021. During 2022, the Group received €252 million, inclusive of interest, from the regional tax authorities of Bizkaia following the Arbitration Board ruling and recognised an additional VAT receivable of €25 million from the Basque Region within Other current assets, and a payable of

Notes to the consolidated financial statements continued

€57 million to the Spanish tax authorities within Trade and other payables, both inclusive of interest. As at 31 December 2023, the VAT receivable balance of €25 million remains unchanged, while the VAT payable balance increased to €59 million resulting from interests. The classification of both balances remains unchanged.

Related to the same dispute between the Spanish tax authorities and the regional tax authorities of Bizkaia (Basque Region), on 8 February 2023 the Group received a proposed VAT assessment for years 2017 to 2019, approximating €250 million, inclusive of interest. For the period under the proposed assessment, the VAT refund was issued by the Spanish tax authorities. We believe that the Group will continue to be held neutral in respect of the VAT dispute.

Assets held for sale

Non-current assets, or disposal groups comprising assets and liabilities, are classified as held for sale if it is highly probable that they would be recovered through sale rather than continuous use. In order for a sale to be considered highly probable, all of the following criteria needs to be met: management is committed to a plan to sell the assets, an active programme to locate a buyer and complete the plan has been initiated, the assets are actively marketed at a reasonable price, and the sale is expected to be completed within one year from the date of classification.

Such assets, or disposal groups, are generally measured at the lower of their carrying amount and fair value less cost to sale.

Once classified as held for sale, intangible assets and property, plant and equipment are no longer amortised or depreciated, and any equity accounted investee is no longer equity accounted.

Assets classified as held for sale as at 31 December 2023 totalled €22 million and are comprised of properties expected to be sold in the near future.

Assets classified as held for sale as at 31 December 2022 totalled €94 million and were predominantly comprised of €40 million related to certain non-alcoholic ready to drink brands that were sold to TCCC (refer to Note 19 for further details), as well as €29 million related to a sale of property in Germany (refer to Note 23 for further details).

Note 25

Other non-current assets

The following table summarises the Group's other non-current assets as at the dates presented:

	Year ended 31 December	
	2023	2022
	€ million	€ million
Other non-current assets		
Retirement benefit surplus (Note 15)	134	135
Investments	39	35
Other	122	82
Total other non-current assets	295	252

Investments

Joint ventures are undertakings in which the Group has an interest and which are jointly controlled by the Group and one or more other parties. Associates are undertakings where the Group has an investment in which it does not have control or joint control but can exercise significant influence. Interests in joint ventures and associates are accounted for using the equity method and are stated in the consolidated balance sheet at cost, adjusted for the movement in the Group's share of their net assets and liabilities. The Group's share of the profit or loss after tax of joint ventures and associates is included in the Group's consolidated income statement as non-operating items. Where the Group's share of losses exceeds its interest in the equity accounted investee, the carrying amount of the investment is reduced to zero and the recognition of further losses is discontinued, except to the extent that the Group has an obligation to make payments on behalf of the investee.

Financial assets at fair value through other comprehensive income relate to equity investments. These investments are not held for trading purposes, and hence the Group has opted to recognise fair value movements through other comprehensive income. There have been no significant changes in fair value of these investments during the period.

Notes to the consolidated financial statements continued

The following table summarises the Group's carrying value of investments as at the dates presented:

	Year ended 31 December	
	2023	2022
	€ million	€ million
Investments		
Investments accounted using equity method	35	33
Financial assets at fair value through other comprehensive income	4	2
Total investments	39	35

Note 26

Financial risk management

Financial risk factors, objectives and policies

The Group's activities expose it to several financial risks including market risk, credit risk and liquidity risk. Financial risk activities are governed by appropriate policies and procedures to minimise the uncertainties these risks create on the Group's future cash flows. Such policies are developed and approved by the Group's Treasury and Commodities Risk Committee, through the authority delegated to it by the Board.

Market risk

Market risk represents the risk that the fair value of future cash flows of a financial instrument will fluctuate due to changes in market prices and includes interest rate risk, currency risk and other price risk such as commodity price risk. Market risk affects outstanding borrowings, as well as derivative financial instruments.

Interest rates

The Group is subject to interest rate risk for its outstanding borrowings. To manage interest rate risk, the Group maintains a significant proportion of its borrowings at fixed rates. Approximately 89% and 90% of the Group's interest bearing borrowings were comprised of fixed rate borrowings at 31 December 2023 and 31 December 2022, respectively. The Group also modifies its interest rate exposure through the use of interest rate swaps. As at 31 December 2023 and 31 December 2022, the notional value of the Group's interest rate swaps was €1,123 million and €1,146 million, respectively.

If interest rates on the Group's floating rate debt were adjusted by 1% for the years ended 31 December 2023, 31 December 2022 and 31 December 2021, the Group's finance costs and pre-tax equity would change on an annual basis by approximately €9 million, €9 million and €7 million, respectively. This amount is determined by calculating the effect of a hypothetical interest rate change on the Group's floating rate debt.

Currency exchange rates

Foreign currency exchange risk can only arise on financial instruments that are denominated in a currency other than the functional currency in which they are measured. Translation-related risks are therefore not included in the assessment of the Group's exposure to currency risks. Translation exposures arise from financial and non-financial items held by the Group with a functional currency different from the Group's presentation currency (euro). To manage currency exchange risk arising from future commercial transactions and recognised monetary assets and liabilities, foreign currency forward and option contracts with external third parties are used. Typically, up to 80% of anticipated cash flow exposures in each major foreign currency for the next calendar year are hedged using a combination of forward and option contracts with third parties.

The Group is also exposed to the risk of changes in currency exchange rates between US dollar and euro relating to its US denominated borrowings. This risk is managed by entering into cross currency swaps upon issuance thereby mitigating all the foreign currency risk.

The Group also has borrowing denominated in Australian dollars that are not swapped into euro and are converted as part of the currency translation of the net assets of API, and, as such, movements in exchange rates would not impact profit.

The Group's main foreign currency exchange rate exposure relates to the change in value of the euro against other currencies. The impact of a reasonably probable movement such as 10% appreciation of the euro on the Group's pre-tax equity would have led to a €6 million loss as at 31 December 2023 (31 December 2022: €29 million loss; 31 December 2021: €11 million gain). A 10% weakening of the euro would have led to an equal but opposite effect. The impact on the Group's pre-tax equity is due to changes in the fair value of foreign currency hedges designated as cash flow hedges.

During 2023, the Group entered into deal contingent foreign currency forwards (refer to Note 12 for further details) in order to mitigate the foreign currency risk arising from the proposed acquisition of CCBPI. A 10% appreciation of the euro as at 31 December 2023 would have led to a €64 million loss impacting the Group's pre-tax equity. A 10% weakening of the euro would have led to an equal but

Notes to the consolidated financial statements continued

opposite effect. There would be no impact on the Group's income statement as these instruments are designated as cash flow hedges.

Movements in foreign currencies related to the Group's other financial instruments do not have a material impact on profit before income taxes or pre-tax equity.

Commodity price risk

The competitive marketplace in which the Group operates may limit its ability to recover increased costs through higher prices. As such, the Group is subject to market risk with respect to commodity price fluctuations, principally related to its purchases of aluminium, PET (plastic, including recycled PET, LDPE), ethylene, sugar and vehicle fuel. When possible, exposure to this risk is managed primarily through the use of supplier pricing agreements, which enable the Group to establish the purchase price for certain commodities. Certain suppliers restrict the Group's ability to hedge prices through supplier agreements. As a result, commodity hedging programmes are entered into and generally designated as hedging instruments. Refer to Note 12 for more information. Typically, up to 80% of the anticipated commodity transaction exposures for the next calendar year are hedged using a combination of forward and option contracts executed with third parties.

During the year ended 31 December 2023, the Group implemented a new gas and power hedging programme to manage its exposure to changes in commodity prices in relation to its purchases of power and gas, by entering into financial swaps designated in a cash flow hedge relationship. As at 31 December 2023, the notional value of the swaps was €89 million and amounts of €13 million and €52 million were included in derivative assets and derivative liabilities, respectively (refer to Note 12).

The following table demonstrates the sensitivity to reasonably possible changes in commodity prices at the reporting date, with all other variables held constant. The impact on the Group's pre-tax equity is due to changes in the fair value of commodity hedges designated as cash flow hedges. There is no impact on the Group's income statement as all commodity derivatives are designated as hedging instruments in cash flow hedges.

	Year ended 31 December		
	2023	2022	2021
	€ million	€ million	€ million
Commodity price risk			
10% increase in commodity prices equity gain	144	140	92
10% decrease in commodity prices equity loss	(144)	(140)	(92)

Credit risk

The Group is exposed to counterparty credit risk on all of its derivative financial instruments. Strict counterparty credit guidelines are maintained and only financial institutions that are investment grade or better are acceptable counterparties. Counterparty credit risk is continuously monitored and numerous counterparties are used to minimise exposure to potential defaults. Where required, collateral is paid between the counterparties to minimise counterparty risk. The maximum credit risk exposure for each derivative financial instrument is the carrying amount of the derivative. Included in trade and other payables is €20 million (2022: €25 million) related to collateral received from counterparties.

Credit is extended in the form of payment terms for trade to customers of the Group, consisting of retailers, wholesalers and other customers, generally without requiring collateral, based on an evaluation of the customer's financial condition. While the Group has a concentration of credit risk in the retail sector, this risk is mitigated due to the diverse nature of the customers the Group serves, including, but not limited to, their type, geographic location, size and beverage channel. Depending on the risk profile of certain customers, we may also seek bank guarantees. Collections of receivables are dependent on each individual customer's financial condition and sales adjustments granted. Trade accounts receivable are initially recognised at their transaction price and subsequently measured at amortised cost less provision for impairment. Typically, accounts receivable have terms of 30 to 60 days and do not bear interest. A default on a financial asset is when the counterparty fails to make contractual payments when they fall due. Exposure to losses on receivables is monitored, and balances are adjusted for expected credit losses. Expected credit losses are determined by: (1) evaluating the ageing of receivables; (2) analysing the history of adjustments; and (3) reviewing high risk customers. Credit insurance on a portion of the accounts receivable balance is also carried.

Notes to the consolidated financial statements continued

Liquidity risk

Liquidity risk is actively managed to ensure that the Group has sufficient funds to satisfy its commitments. The Group's sources of capital include, but are not limited to, cash flows from operations, public and private issuances of debt and equity securities, and bank borrowings. The Group believes its operating cash flow, cash on hand and available short- and long-term capital resources are sufficient to fund its working capital requirements, scheduled borrowing payments, interest payments, capital expenditures, benefit plan contributions, income tax obligations and dividends to its shareholders. Counterparties and instruments used to hold cash and cash equivalents are continuously assessed, with a focus on preservation of capital and liquidity. Based on information currently available, the Group does not believe it is at significant risk of default by its counterparties.

The Group has amounts available for borrowing under a €1.80 billion multi-currency credit facility (2022: €1.95 billion) with a syndicate of 12 banks. This credit facility matures in 2029 and is for general corporate purposes, including serving as a backstop to its commercial paper programme and supporting the Group's working capital needs. Based on information currently available, the Group has no indication that the financial institutions participating in this facility would be unable to fulfil their commitments as at the date of these financial statements. The current credit facility contains no financial covenants that would impact the Group's liquidity or access to capital. As at 31 December 2023, the Group had no amounts drawn under this credit facility.

In 2022, the Group implemented a new sustainability-linked supply chain finance programme. The facility is provided by a third party bank and will help our suppliers get paid earlier than under contractual credit terms. Supplier balances under supply chain finance facilities are disclosed in Note 14.

The following table analyses the Group's non-derivative financial liabilities and net settled derivative financial liabilities into relevant maturity groupings based on the remaining period at the statement of financial position date to the contractual maturity date. The amounts disclosed in the table are the contractual undiscounted cash flows:

	Total	Less than 1 year	1 to 3 years	3 to 5 years	More than 5 years
	€ million	€ million	€ million	€ million	€ million
Financial liabilities					
31 December 2023					
Trade and other payables	4,875	4,875	—	—	—
Amounts payable to related parties	270	270	—	—	—
Borrowings	11,803	1,322	2,325	2,681	5,475

Total financial liabilities	17,990	6,725	2,604	2,861	5,800
31 December 2022					
Trade and other payables	4,714	4,714	—	—	—
Amounts payable to related parties	485	485	—	—	—
Borrowings	12,314	1,336	2,597	2,179	6,202
Derivatives	263	76	17	51	119
Lease liabilities	752	149	217	129	257
Total financial liabilities	18,528	6,760	2,831	2,359	6,578

Capital management

The primary objective of the Group's capital management is to ensure a strong credit rating and appropriate capital ratios are maintained to support the Group's business and maximise shareholder value. The Group's credit ratings are periodically reviewed by rating agencies. Currently, the Group's long-term ratings from Moody's and Fitch are Baa1 and BBB+, respectively. Changes in the operating results, cash flows or financial position could impact the ratings assigned by the various rating agencies. The credit rating can be materially influenced by a number of factors including, but not limited to, acquisitions, investment decisions, capital management activities of TCCC and/or changes in the credit rating of TCCC. Should the credit ratings be adjusted downwards, the Group may incur higher costs to borrow, which could have a material impact on the financial condition and results of operations.

Notes to the consolidated financial statements continued

The capital structure is managed and, as appropriate, adjustments are made in light of changes in economic conditions and the Group's financial policy. The Group monitors its operating performance in the context of targeted financial leverage by comparing the ratio of net debt with comparable EBITDA. Net debt is calculated as borrowings adjusted for the fair value of hedging instruments and other financial assets/liabilities related to borrowings, net of cash and cash equivalents and short term investments. Comparable EBITDA is calculated as EBITDA and adjusted for items impacting comparability.

Refer to Note 11 for the presentation of fair values for each class of financial assets and financial liabilities and Note 12 for an outline of how the Group utilises derivative financial instruments to mitigate its exposure to certain market risks associated with its ongoing operations.

Refer to the Strategic Report included within this Integrated Report for disclosure of strategic, commercial and operational risk relevant to the Group.

Note 27

Significant events after the reporting period

On 14 February 2024, in connection with the acquisition of Coca-Cola Beverages Philippines, Inc. CCBPI, the Group entered into a term loan facility agreement with

Note 28

Group companies

In accordance with section 409 of the Companies Act 2006, a full list of the Company's subsidiaries, partnerships, associates, joint ventures and joint arrangements as at 31 December 2023 is disclosed below, along with the country of incorporation, the registered address and the effective percentage of equity owned at that date. Unless otherwise stated, each entity has a share capital comprising a single class of ordinary shares and is wholly owned and indirectly held by CCEP.

the Bank of the Philippine Islands. A term loan facility in an aggregate amount of US\$500 million is made available under the agreement to be utilised in Philippine Peso (PHP), which has been defined as the base currency. On 20 February 2024, the Group drew down a PHP23.5 billion (US\$420 million) loan under the facility with a maturity date of 20 February 2034. The vast majority of the balance (90% of the total principal amount of the loan) is repayable in full upon maturity.

On 23 February 2024, the joint acquisition of Coca-Cola Beverages Philippines, Inc. CCBPI was successfully consummated for a total consideration of US\$1.68 billion (€1.55 billion), all of which was settled in cash upon completion. The Group paid US\$1.0 billion (€930 million) of the total consideration, commensurate with the effective 60:40 ownership structure of CCBPI. The transaction is going to be accounted for under IFRS 3 "Business Combinations", using the acquisition method of accounting. The Group has commenced the purchase price allocation procedures related to the assets acquired and liabilities assumed, which as of the date of this filing remain incomplete.

Notes to the Company financial statements

Note 1

General information and basis of preparation

Coca-Cola Europacific Partners plc (the Company) acts as a holding company for investments in subsidiaries, as well as a provider of various intragroup services. In addition, the Company engages in general corporate activities such as third party borrowings.

The financial statements of the Company have been prepared in accordance with the UK adopted International Accounting Standards, International Financial Reporting Standards (IFRS) as adopted by the European Union and International Financial Reporting Standards as issued by the International Accounting Standards Board (IASB). The financial statements were approved and signed by Damian Gammell, Chief Executive Officer, on 15 March 2024, having been duly authorised to do so by the Board of Directors.

As described in the accounting policies in Note 2, the financial statements have been prepared under the historical cost convention except for certain items measured at fair value. Those accounting policies have been applied consistently in all periods. The functional and presentation currency of the Company is euros, and amounts are rounded to the nearest million.

The financial statements of the Company have been prepared on a going concern basis (refer to the Going concern paragraph on page 146).

During 2023, the Company established that its investment in WIH UK Limited, a wholly owned subsidiary, of €533 million should have been written down to zero by 2020. As a result, the previously reported Investments have been overstated. The correction has been reflected by restating each of the affected financial statement line items for prior periods, more specifically, decreasing Investments and Retained Earnings by €533 million.

Note 2

Significant accounting policies

The preparation of these financial statements requires management to make judgements, estimates and assumptions that affect the application of accounting policies and the reported amounts of assets and liabilities, income and expense. Actual results may differ from these estimates. The significant judgements made in applying the Company's accounting policies were applied consistently across the annual periods.

Investments

Investments in subsidiaries are initially recognised at cost and carried net of any impairment. Investments are tested for impairment whenever events or changes in circumstances indicate that the carrying amounts of those investments may not be recoverable. An asset's recoverable amount is the higher of an asset's or CGU's fair value less costs to sell and its value in use, and is determined for an individual asset, unless the asset does not generate cash inflows that are largely independent of those from other assets or groups of assets. Where the carrying amount of an asset exceeds its recoverable amount, the asset is considered impaired and is written down to its recoverable amount. Impairment losses on continuing operations are recognised in the income statement in those expense categories consistent with the function of the impaired asset.

For assets where an impairment loss subsequently reverses, the carrying amount of the asset or CGU is increased to the revised estimate of its recoverable amount, not to exceed the carrying amount that would have been determined, net of depreciation, had no impairment losses been recognised for the asset or CGU in prior years. A reversal of impairment loss is recognised immediately in the income statement.

Share-based payments

The Company has established share-based payment plans that provide for the granting of share options and restricted stock units, some with performance and/or market conditions, to certain executive and management level employees that are employed by the Company and its subsidiaries. These awards are designed to align the interests of its employees with the interests of its shareholders.

The Company recognises compensation expense equal to the grant date fair value for all share-based payment awards that are expected to vest. Expense is generally recorded on a straight-line basis over the requisite service period for each separately vesting portion of the award. As per IAS 27 Separate Financial Statements, the Company equity settles share-based payments for employees of subsidiary entities and accounts for the settlement as an addition to the cost of its investment in the employing subsidiary. Upon vesting, the Company recharges the costs of the share-based awards to the employing subsidiary and records a reduction of the investment.

Notes to the Company financial statements continued

Financial instruments

(i) Financial assets

Initial recognition and measurement

Financial assets within the scope of IFRS 9 Financial Instruments are classified as financial assets at fair value through profit or loss, loans and receivables, or as derivatives designated as hedging instruments in an effective hedge, as appropriate. The Company determines the classification of its financial assets at initial recognition.

All financial assets are recognised initially at fair value plus, in the case of investments not at fair value through profit or loss, directly attributable transaction costs.

The Company's financial assets include cash and short-term deposits, trade and other receivables, loan notes, and derivative financial instruments.

Subsequent measurement

The subsequent measurement of financial assets depends on their classification as follows:

Financial assets at fair value through profit or loss

Financial assets at fair value through profit or loss include financial assets held for trading and financial assets designated upon initial recognition at fair value through profit or loss. Financial assets are classified as held for trading if they are acquired for the purpose of selling in the near term. This category includes derivative financial instruments entered into by the Company that are not designated as hedging instruments in hedge relationships as defined by IFRS 9.

Derivatives, including separated embedded derivatives, are also classified as held for trading unless they are designated as effective hedging instruments.

Financial assets at fair value through profit and loss are carried in the statement of financial position at fair value with changes in fair value recognised in finance income or finance cost in the statement of comprehensive income.

Loans and receivables

Loans and receivables are non-derivative financial assets with fixed or determinable payments that are not quoted in an active market. Such assets are initially recognised at fair value and subsequently measured at amortised cost using the effective interest rate (EIR) method, less impairment. Amortised cost is calculated by taking into account any discount or premium on acquisition and fees or costs that are an integral part of the EIR. The EIR amortisation is included in finance income in the statement of comprehensive income. Losses arising from impairment are recognised in the income statement in other operating expenses.

(ii) Financial liabilities

Initial recognition and measurement

Financial liabilities within the scope of IFRS 9 are classified as financial liabilities at fair value through profit or loss, loans and borrowings, or as derivatives designated as hedging instruments in an effective hedge, as appropriate. The Company determines the classification of its financial liabilities at initial recognition. All financial liabilities are recognised initially at fair value and, in the case of loans and borrowings, plus directly attributable transaction costs.

Subsequent measurement

The measurement of financial liabilities depends on their classification as follows:

Financial liabilities at fair value through profit or loss

Financial liabilities at fair value through profit or loss include financial liabilities held for trading and financial liabilities designated upon initial recognition as at fair value through profit or loss.

Interest bearing loans and borrowings

Obligations for loans and borrowings are recognised when the Company becomes party to the related contracts and are measured initially at the fair value of consideration received, less directly attributable transaction costs.

After initial recognition, interest bearing loans and borrowings are subsequently measured at amortised cost using the effective interest method.

Gains and losses arising on the repurchase, settlement or other cancellation of liabilities are recognised respectively in finance income and finance cost.

Notes to the Company financial statements continued

Trade and other payables

Trade and other payable amounts represent liabilities for goods and services provided to the Company prior to the end of the reporting period, which are unpaid as of the balance sheet date. Trade and other payables are presented as current liabilities unless payment is not due within 12 months after the reporting period. Trade and other payables are recognised initially at fair value and subsequently measured at amortised cost using the effective interest method, as applicable.

Management fees

As the ultimate parent entity of the Group, the Company is involved in the provision of intragroup services to certain subsidiaries. Specifically, the Company's employees are above-market roles, who provide services related but not limited to strategy, people and culture, finance, legal, and business process and technology. In addition, certain intragroup services are charged to the Company by its subsidiaries. Management fees revenue for intragroup services provided to subsidiaries is recorded in Revenue from management fees. Costs incurred by subsidiaries are recharged to the Company and are recorded in Administrative expenses in the statement of comprehensive income.

Note 3

Dividend income

Dividends are recognised when the right to receive the dividend is established. During the year the Company has received the following dividends:

	Year ended 31 December	
	2023	2022
	€ million	€ million
Coca-Cola Europacific Partners Holdings US Inc	896	516

Balance at 31 December	27,406	27,099

In March 2023, CCEP Ventures UK Limited issued one million new ordinary shares of €1 to the Company, resulting in an increase of the Company investment of €1.1 million. In December 2023, the Company subscribed for 282 million ordinary shares on CCEP Holdings (Australia) Limited and for 3.4 million ordinary shares in CCEP Ventures UK Limited in exchange for cash in these amounts. The Company also made a €1 incorporation payment to BNI B.V.

As part of its impairment review, the Company recognised a partial write down of its investment in CCEP Ventures Europe Limited for €2 million.

During 2022, the Company recognised a full write down of its investment in CCEP Ventures UK Limited for €3 million and a partial write down of its investment in CCEP Ventures Europe Limited for €8 million.

*The comparative information has been restated. Refer to Note 1.

Notes to the Company financial statements continued

Note 6

Amounts receivable from/payable to related parties

	Year ended 31 December		
	2023	2022	2021
	€ million	€ million	€ million
Non-current amounts payable to related parties:			
Borrowings ^(A)	3,227	3,227	3,227

Total current amounts payable to related parties	4,130	3,000	1,703
Total amounts payable to related parties	7,357	6,227	4,930

(A) In relation to the acquisition of CCL, the Company borrowed interest bearing euro denominated loan notes from CCEP Finance (Ireland) DAC due between September 2025 and May 2041 with interest rates between 0.1% and 1.6%.

(B) The Company participates in a cash pooling structure in which its available cash is swept to a cash pool header (CCEP Finance (Ireland) DAC). Pooling allows the Company to deposit and withdraw cash on a daily basis to meet its working capital needs.

Transactions with key management personnel

Key management personnel are the members of the Board of Directors and the members of the Executive Leadership Team that are employed by the Company. The following table summarises the total remuneration paid or accrued during the reporting period related to key management personnel:

	Year ended 31 December		
	2023	2022	2021
	€ million	€ million	€ million
Salaries and other short-term employee benefits ^(A)	17	16	19
Share-based payments	5	2	4
Total	22	18	23

(A) Short-term employee benefits include wages, salaries and social security contributions, paid annual leave and paid sick leave, paid bonuses and non-monetary benefits.

Employee costs

The following table summarises the total employee costs of the Company during the reporting period:

	Year ended 31 December		
	2023	2022	2021
	€ million	€ million	€ million
Wages and salaries	12	13	16
Social security costs	5	3	3
Total employee costs	17	16	19

The average number of persons employed by the Company during the year was 7 (2022: 7, 2021: 9).

Note 7

Borrowings

	Year ended 31 December		
	2023	2022	2021
	€ million	€ million	€ million
Non-current borrowings:			
Loan notes	4,976	6,059	7,232
Lease obligations	3	4	5
Total non-current borrowings	4,979	6,063	7,237
Current borrowings:			
Loan notes	1,088	1,147	700
Commercial paper	—	—	285
Lease obligations	1	1	1
Total current borrowings	1,089	1,148	986
Total borrowings	6,068	7,211	8,223

The loan notes as at 31 December 2023 are due between May 2024 and September 2031. The principal amounts due are €6,141 million (2022: €7,915 million, 2021: €7,915 million) and the applicable interest rates are between 0.2% and 2.75%. In May 2023, the Company repaid \$850 million 0.5% notes received in May 2021. The loan notes are stated net of unamortised financing fees of €15 million (2022: €20 million, 2021: €27 million).

Notes to the Company financial statements continued

During 2022, the Company entered into interest rate swaps with notional value of €1 billion, which were designated in a fair value hedge relationship with euro denominated bonds. As at 31 December 2023, fair value adjustments in respect of those interest rate swaps are €(80) million (2022: €(130) million) included within non-current borrowings.

Trade and other payables include interest payable on the borrowings of €45 million (2022: €47 million, 2021: €51 million).

Lease obligations represent the present value of the Company's lease obligations in respect of right of use assets.

The Company has amounts available for borrowing under a €1.80 billion multi-currency credit facility with a syndicate of 12 banks. This credit facility matures in 2029 and is for general corporate purposes and supporting the working capital needs. Based on information currently available, there is no indication that the financial institutions participating in this facility would be unable to fulfil their commitments to the Company as at the date of these financial statements. The Company's credit facility contains no financial covenants that would impact its liquidity or access to capital. As at 31 December 2023, the Company had no amounts drawn under this credit facility.

Note 8 Equity

Share capital

As at 31 December 2023, the Company has issued and fully paid 459,200,818 (2022: 457,106,453; 2021: 456,235,032) ordinary Shares with a nominal value of €0.01 per share. Shares in issue have one voting right each and no restrictions related to dividends or return on capital. For more details, please refer to Note 16 of the consolidated financial statements.

Share premium

The balance in share premium as at 31 December 2023 represents the excess over nominal value of €0.01 for the 228,244,244 Shares issued to CCE shareholders on 28 May 2016 based on the adjusted closing stock price of CCE ordinary Shares of €33.33 at the time of the CCEP merger. The balance also includes €189 million (2022: €146 million) excess over nominal value of share-based payment awarded through to 31 December 2023.

Merger reserves

The Company determined that the consideration transferred to acquire CCIP and CCEG qualified for merger relief under the Companies Act. Therefore, the excess consideration transferred over nominal value is excluded from the share premium. The cumulative balance of €8.5 billion includes the consideration transferred in excess of nominal value of €0.01 for CCIP and CCEG of €6.6 billion and €2.9 billion, respectively.

Retained earnings

The balance in retained earnings represents the opening balance on 1 January 2023, combined with the result for the period, dividends paid and the share-based payment reserve.

The prior period comparative information has been restated. Refer to Note 1.

Dividends

Dividends are recorded in the period in which they are paid. Refer to Note 16 of the consolidated financial statements.

Notes to the Company financial statements continued

Note 9

Financial risk management

Financial risk factors, objectives and policies

The Company's activities expose it to several financial risks, market risk and liquidity risk. Financial risk activities are governed by appropriate policies and procedures to minimise the uncertainties these risks create on the Company's future cash flows. Such policies are developed and approved by CCEP's treasury and commodities risk committee, through the authority delegated to it by the Board.

Market risk

Market risk represents the risk that the fair value of future cash flows of a financial instrument will fluctuate due to changes in market prices and includes interest rate risk, currency risk and other price risk such as commodity price risk. Market risk affects outstanding borrowings, as well as derivative financial instruments.

Interest rates

The Company is subject to interest rate risk for its outstanding borrowings. To manage interest rate risk, the Company maintains a significant proportion of its borrowings at fixed rates.

Currency exchange rates

Foreign currency exchange risk can only arise on financial instruments that are denominated in a currency other than the functional currency in which they are measured. Translation-related risks are therefore not included in the assessment of the Company's exposure to currency risks. Translation exposures arise from financial and non-financial items held by the Company with a functional currency different from the Company's presentation currency (euro). To manage currency exchange risk arising from future commercial transactions and recognised monetary assets and liabilities, foreign currency forward and option contracts with external third parties are used.

The Company is exposed to the risk of changes in currency exchange rates between US dollar and euro relating to its US denominated borrowings.

In the statement of financial position, non-current derivative assets represent the fair value (Level 2) of the cross currency swap of the USD denominated debt to EUR.

Liquidity risk

Liquidity risk is actively managed to ensure that the Company has sufficient funds to satisfy its commitments. The Company's sources of capital include, but are not limited to, dividend income, public and private issuances of debt and equity securities, and bank borrowings. The Company believes its operating cash flow, cash on hand and available short- and long-term capital resources are sufficient to fund its working capital requirements, scheduled borrowing payments, interest payments, capital expenditures, benefit plan contributions, income tax obligations and dividends to its shareholders. Counterparties and instruments used to hold cash and cash equivalents are continuously assessed, with a focus on preservation of capital and liquidity. Based on information currently available, the Company does not believe it is at significant risk of default by its counterparties.

Note 10

Auditor's remuneration

Refer to Note 17 of the consolidated financial statements for details of the remuneration of the Company's auditor.

Note 11

Commitments

The Company has fully and unconditionally guaranteed unsecured borrowings outstanding as at 31 December 2023. These borrowings have been issued by CCEP Finance (Ireland) DAC for €3.2 billion, Coca-Cola Amatil Limited for €0.7 billion and BNI (Finance) B.V. for €0.7 billion.

Note: For a full list of CCEP's headline sustainability commitments as part of our This is Forward sustainability action plan, please refer to "Our headline commitments" on page 15. For details on our approach to reporting and methodology please see our 2023 Sustainability reporting methodology document on [cocacolaep.com/sustainability/download-centre](https://www.cocacolaep.com/sustainability/download-centre).

(A) Market based approach only.

(B) 100% of carbon strategic suppliers to set science based targets by 2023 (Europe) and 2025 (API). Carbon strategic suppliers account for ~80% of our Scope 3 GHG emissions (~200 suppliers in total).

α This metric was subject to external independent limited assurance for the year ended 31 December 2023.

Δ Our 2019 baseline and 2022 data was subject to external independent limited assurance for the year ended 31 December 2022, and was included within our 2022 Integrated Report and Form 20-F. A copy of the assurance statement for these periods can be found on [cocacolaep.com/assets/Sustainability/Documents/2022/2022-Assurance-statement.pdf](https://www.cocacolaep.com/assets/Sustainability/Documents/2022/2022-Assurance-statement.pdf). In line with the WRI/WBCSD GHG Protocol, our baseline figures for 2019 and prior years 2020-2022 have been restated to include updated emissions factors and more accurate data. These restated emissions were outside the scope of the latest independent limited assurance review. The acquisition of API completed on 10 May 2021. The Group and API sustainability metrics are presented on a full year basis for 2019 baseline calculated on a pro forma basis to allow for better period over period comparability.

Note: For a full list of CCEP's headline sustainability commitments as part of our This is Forward sustainability action plan, please refer to "Our headline commitments" on page 15. For details on our approach to reporting and methodology please see our 2023 Sustainability reporting methodology document on cocacolaep.com/sustainability/download-centre.

(A) Volumes are based on RTD litre sales to CCEP customers and reflect changes for new product launches, cessation of products as they occur based on sales timings. Reformulations are captured on a half-yearly basis given high number of beverage formulas across Europe. Reformulations made in the first-half of the year are reflected in the current reporting period calculation. Second-half reformulations are reflected in the next reporting period. Note the data source and methodology on when to apply recipe changes differ from the calculation of the GHG emissions of our ingredients.

(B) Sparkling soft drinks, non-carbonated soft drinks and flavoured water only. Does not include water or juice.

(C) Non-alcoholic ready to drink (NARTD), including dairy. Does not include coffee, alcohol, beer or Freestyle.

(D) Europe 50% by 2025. Does not include coffee, alcohol, beer or Freestyle. Low calorie beverages ≤20kcal/100ml. Zero calorie beverages <4kcal/100ml.

(E) Excludes Fiji and Samoa, as aligned role grades are not available for 2023 reporting. We aim to include these markets for 2024. For full year 2022 Papua New Guinea was also excluded and no restatement has taken place.

(F) Calculated based on the total number of employees responding to our voluntary 2023 inclusion survey (representing 38.4% of our workforce) and the number of employees self-declaring as having a disability.

(G) Australia and Indonesia only. The volunteering policy has been rolled out to all CCEP markets in 2023. Each business unit is responsible for the level of implementation, which might vary from market to market.

(H) We aim to be accurate in our reporting and continue to enhance the way we capture the total value of our community contribution. Figures quoted have been rounded to the nearest 100k.

α This metric was subject to external independent limited assurance for the year ended 31 December 2023.

Δ This metric was subject to external independent limited assurance for the year ended 31 December 2022. Note the baseline year for Europe reduction in average sugar per litre in soft drinks portfolio has changed to 2019 since we issued our 2022 Integrated Report and Form 20-F.

Approach to sustainability reporting and methodologies

Our approach to reporting and methodology

CCEP's carbon footprint is calculated in accordance with the World Resource Institute (WRI) and World Business Council for Sustainable Development (WBCSD) Greenhouse Gas (GHG) Protocol Corporate Standard, using an operational control approach to determine organisational boundaries.

GHG emissions are reported in tonnes of carbon dioxide equivalent (tonnes CO₂e or tCO₂e), accounting for different Global Warming Potentials (GWPs) of the different GHGs.

Note on sources of data and calculation methodologies

Under the GHG Protocol, we measure our emissions in three Scopes. We disclose the Scope 1, 2, and 3 carbon emissions of our full value chain, including all key emissions related to our production facilities, operational centres, sales offices, distribution centres, cold drink equipment (CDE), our own operated and owned transportation as well as third party distribution, business travel, ingredients and packaging. We also disclose biogenic emissions which are outside of the three WRI/WBCSD GHG Protocol Scopes. GHG emissions are reported on a gross basis, independent of any GHG trades, offsets or carbon credits.

Where we refer to our own operations, unless otherwise indicated, we are referring to our own production, sales/distribution, combined sales/production facilities, administrative offices and fleet owned or controlled by CCEP, including our shared-service centre in Bulgaria.

In-scope sales volumes were based on ready to drink litre sales to CCEP customers and reflect changes as they occur based upon sales timings. Sales from distribution agreements are excluded as the GHG emissions associated with these products will be accounted for by the Brand owners. Alcohol sales volume is included if CCEP manufacture the alcohol products. Sales volumes from imports/exports from/to non-CCEP countries are excluded to avoid double counting.

Less than 5% of our value chain carbon footprint is based on estimated emissions. This includes the site energy emissions for small leased offices where energy invoices or the square metre footage size is not available, or packaging emissions where product specifications are unavailable. We also estimate the electricity consumption for the pure electric and plug-in hybrids in our company car fleet.

2019 Baseline and recalculation methodology

Our baseline years is 2019. The acquisition of API completed on 10 May 2021. The Group and API sustainability metrics are presented on a full year basis for 2019 baselines calculated on a pro forma basis to allow for better period over period comparability.

In line with the WRI/WBCSD GHG Protocol guidance, we restate our baseline and subsequent year data when there are significant acquisitions, new emissions factors, and more accurate data. We apply a significance threshold of 5%, but also re-baseline in line with best practice, in order to retain consistency and comparability across years.

In 2024, we have restated our baseline figures for 2019 and 2020-2022 as necessary; increasing baseline and subsequent year emissions by ~350,000 tCO₂e. Key changes include:

- National packaging collection rate changes in European markets, driven by new EU methodology for calculating packaging collection rates.
- Changes to SBTi boundary which now includes emissions from Category 7 and new sources of emissions for Category 1 (marketing and IT spend)
- Shifts in emissions factor source for Well-To-Tank (WTT)/Transmission and Distribution emissions
- Shifts in emission factors for CO₂ as ingredient
- Improvements in data, and inclusion of previously non-included emissions sources.

Approach to sustainability reporting and methodologies

Scope 1 GHG emissions sources

Includes direct owned and operated sources of emissions such as:

- Stationary combustion sources, such as natural gas, diesel/petrol fuel for back up boilers/generators and on-site shunting vehicles, light fuel oil, liquid petroleum gas (LPG) for forklift trucks, Compressed natural gas (CNG) and the non-biogenic element of biofuels such as HVO100.
- Mobile combustion such as diesel and petrol for CCEP operated customer delivery, vans and car fleet.
- Fugitive emissions of refrigerants.
- Fugitive CO₂ emissions from manufacturing processes (i.e. losses occurring during product carbonisation process).
- On-site renewables including geothermal, solar, water turbine, ground source heat (listed as GHG emission sources, but zero rated in terms of carbon emissions).
- Fugitive biogas from Anaerobic Digesters.

We follow Beverage Industry Environmental Roundtable (BIER) emissions sector guidance on the emissions source for the source of the CO₂ supplied to CCEP to carbonate soft drinks, and whether these are generated from fossil or biogenic sources of CO₂.

Scope 2 GHG emissions – purchased electricity, heat and steam

We report Scope 2 emissions according to the GHG Protocol Scope 2 Guidance. We use the Scope 2 market based approach to report our aggregated Scope 1, 2 and 3 GHG emissions, and to set our aggregated targets.

We include indirect sources of GHG emissions from the generation of electricity, heat and steam we use at our sites.

The carbon emission factors for Scope 2 emissions are applied in terms of the two methods provided by the GHG Protocol:

- (1) Location based: All electricity purchased is converted into CO₂ emissions using the average grid emissions factor for electricity in the country in which it is purchased. Energy Attribute Certificates (EAC) are not applied to the total Scope 2 emissions.
- (2) Market based: All electricity purchased is converted to CO₂ using emissions factors from contractual instruments which CCEP has purchased or entered into. EACs are applied based on RE100 guidance which allows for EACs to be used against electricity consumed in the same market as where the EACs are purchased.

Any sites with no contractual instruments for renewable electricity supply will have a residual factor applied (where available), which has had renewable contractual instruments removed.

The quantity of purchased renewable electricity was verified through renewable electricity certificates such as Guarantees of Origin (GoOs) in the EU, Renewable Energy Guarantees of Origin (REGOs) in the UK, Large-scale Generation Certificates (LGCs) in Australia or Power Purchase Agreements (PPAs) from our electricity suppliers in each country and through meter readings of renewable electricity generated on site.

In 2023, we completed a review of our site renewable electricity purchases, and noted that some market based instruments were not in place for a limited number of locations in prior years 2019-2022. This included our PPA solar farm in Wakefield, our water turbine in Chaudfontaine, and our purchased electricity in Iceland. We have restated our purchased and consumed Renewable Electricity figures for Wakefield and Chaudfontaine for FY2019-FY2022 to reflect this.

In 2023, in line with RE100 technical guidance, we no longer use passive claims for renewable electricity use in Iceland. Due to this change, in FY2023, we did not have GoOs available to cover renewable electricity purchases in Iceland. As a result, in FY2023, renewable electricity purchase and use is not claimed for Iceland, and the residual emission factor was applied.

Approach to sustainability reporting and methodologies

In leased non-production facilities where we do not control the purchase of the electricity, we apply the national grid emissions factor for those sites. Where the landlord has provided evidence that they are purchasing renewable electricity on our behalf, we will report this in line with the market based approach. Emissions related to the generation of electricity for these sites are included in our Scope 2 emissions. In 2023, we used ~20,000 MWh of electricity in non-production facilities, where we do not control the purchase of electricity, or use on-site solar.

Scope 3 GHG emissions

Data is consolidated from a number of sources across our business and is analysed centrally. We use a variety of methodologies to gather our emissions data and measure each part of our carbon footprint.

CCEP uses emission factors relevant to the source data including UK Department for Energy Strategy and Net Zero (DESNZ), Australia's Department of Industry, Science, Energy and Resources factors for state-level electricity factors, and International Energy Agency (IEA) emission factors for all other grid factors at a national level.

Data sources include:

- Energy data: from metered sources, supplier invoices or calculations and estimates based on energy benchmarks published in the Best Practice Programme's Energy Consumption Guide 19 (ECON 19).
- Packaging specifications.
- Recipe data for key ingredients. If a recipe change occurs during a reporting year, it is applied for the full year sales.
- National Recycling Rates, calculated in line with our Collection Rates metric. We have restated prior year 2019-2022 rates in line with updated European methodology for calculating packaging collection rates.
- Supplier data for Recycled Content Rates.
- Consumer CO₂ released from carbonated products.
- Calculations of CDE emissions are based on weighted average daily (kWh/24h) supplier energy consumption rates and by subtracting any savings achieved through carbon/energy use reduction initiatives completed during the reporting period or prior years.
- Transport fuel is calculated according to actual litres used or kilometres recorded with vehicle fuel efficiency rates provided by suppliers.
- Supply of water, treatment of wastewater and waste management are calculated by using litre and weight (kg) data respectively.

- Spend data used to calculate Category 1 purchased goods and services (Marketing and IT spend). Marketing spend includes: sales and marketing agency and services spend, and trade marketing. IT spend includes fixed and mobile telecoms, IT hardware and software, and outsourced services.
- Employee headcount and job role used to calculate employee commuting data. Includes WTT assumptions.
- We have started to use supplier specific emission factors for sugar beet in Europe and will extend this to other packaging and ingredient suppliers over the coming years.

Scope 3 reported categories

The following Scope 3 categories are reported by CCEP in our total value chain figures, and are included in our current Science Based Targets initiative (SBTi) target boundary, representing approximately 90% of our Scope 3 emissions:

- Category 1: purchased goods and services (including the packaging we put on the market, the ingredients used in our products, purchased water, IT, telecoms and sales and trade marketing spend).
- Category 3: fuel- and energy-related activities not already included in Scope 1 or Scope 2 (e.g. WTT, transmission and distribution from energy supply to our sites and assets).
- Category 4: upstream transportation and distribution (transportation of finished products paid for by CCEP).
- Category 5: waste generated in operations (emissions from disposal of waste generated at our production facilities).
- Category 6: business travel (including employee business travel by rail and air).
- Category 7: employee commuting (including commuting and home working emissions).
- Category 8: upstream leased assets (including the home charging of company plug-in hybrid electric vehicles (PHEV) and battery electric vehicles (BEV)).
- Category 11: use of sold products (including CO₂ emissions released by consumers, in accordance with BIER guidance).
- Category 12: end of life treatment of sold products.
- Category 13: downstream leased assets (including the emissions generated from the electricity used by our hot and cold drink equipment at our customers' premises).

Approach to sustainability reporting and methodologies

The following Scope 3 categories are not included in CCEP's current SBTi target boundary. We will provide additional information in our 2024 CDP response, using estimated emission calculations:

- Category 1: purchased goods and services (additional purchased goods and services that are not included above).
- Category 2: capital goods.
- Category 11: use of sold products (including home chilling).
- Category 15: investments (including investments in joint venture recycling facilities and CCEP Ventures investments).

All other Scope 3 categories (9, 10, 14) are not currently applicable to CCEP.

Emissions from biologically sequestered carbon

Methodologies and boundaries

Emissions from biologically sequestered carbon are reported outside of the three Scopes of our reported GHG emissions, in line with WRI/WBCSD GHG Protocol guidance. CO₂ is used to carbonate our soft drinks, therefore we follow the BIER guidance on reporting CO₂ emissions from biogenic sources for fugitive losses and release by consumers.

Our scope for reporting emissions from biologically sequestered carbon includes:

- Biofuels (such as HVO100, Bio-CNG, wood) used in vehicles and sites
- Anaerobic biogas (where CO₂ is released from combustion of the biogas)
- Biofuel where blended with diesel/petrol (forecourt fuels)
- Biogenic-sourced CO₂ ingredient: we follow the BIER emissions sector guidance.

Each source of biologically sequestered carbon is calculated separately using appropriate biogenic carbon emission factors and then aggregated to provide our reported total.

Emissions from the production and transportation of biofuels are accounted for in Scope 3 as part of Category 5 WTT.

Emissions from conversion of biogenic CO₂ to a higher GWP GHG are accounted for in Scope 1 (i.e. anaerobic biogas where organic material is converted to biomethane, and not all of the biomethane fully combusted and is therefore not converted back to CO₂, these biomethane emissions are included under Scope 1).

CCEP uses the most up-to-date emission factors from DESNZ/DEFRA for biogenic CO₂ and anaerobic biogas and for biofuels and bio-blends.

Exclusions

Emissions from carbon removals within our value chain related to biomass feedstock production for bioenergy are well below the significance threshold for CCEP, so removals have yet to be estimated. If the level of significance changes in the future, CCEP will follow the latest guidance from the GHG Protocol on accounting for removals.

Biogenic emissions from electricity generation are excluded for CCEP. Carbon conversion factors are provided by DEFRA/DESNZ for electricity in the UK grid generated by biomass power stations. However, no similar carbon factors for all other CCEP countries is available from credible or reliable sources. Therefore, to be consistent, CCEP does not report these biogenic emissions for only one of our territories. It is hoped that an international data source (e.g. IEA) will provide these conversion factors in future.

Definitions

Biogenic CO₂ emissions are defined as CO₂ emissions related to the natural carbon cycle, as well as those resulting from the production, harvest, combustion, digestion, fermentation, decomposition, and processing of biologically based materials. Biologically based feedstocks, also referred as "biologically sequestered carbon," are non-fossilized and biodegradable organic materials originating from modern or contemporarily grown plants, animals, or microorganisms.

Biogenic emissions are inherently accounted for in the atmosphere's natural carbon cycle. Reporting them within Scopes 1, 2, or 3 would lead to double counting of emissions, as the sequestration of CO₂ during the growth of the biomass is not accounted for in these scopes.

Additional information on the methodology for all This is Forward indicators is available on cocacolaep.com/sustainability/download-centre.

Approach to sustainability reporting and methodologies continued

External assurance of our sustainability disclosures

CCEP appointed Ernst & Young LLP (EY) to provide limited assurance over selected sustainability metrics for the year ended 31 December 2023 marked with the α -sign. The assurance engagement was planned and performed in accordance with the International Federation of Accountants' International Standard for Assurance Engagements Other than Audits or reviews of Historical Financial Information (ISAE 3000 (Revised)).

A table of all sustainability metrics subject to assurance is available within the metrics and targets of our TCFD statement on page 60, the Long-Term Incentive Plan (LTIP) performance target table on page 133 (CO₂ reduction actual performance outcome) and our key performance data summary on pages 234–236.

The EY assurance statement is available on cocacolaep.com/sustainability/download-centre.

Risk factors

This section examines the risks Coca-Cola Europacific Partners (CCEP) faces as a business. These risks may change over time.

Business disruption

Global or regional catastrophic events could negatively impact our business and financial results.

Our business may be affected by prolonged internal and/or external disruptive events, including natural disasters such as hurricanes, floods, fires, earthquakes, and health crises such as pandemics, and man-made events such as wars and political turmoil, as well as cyber attacks or system failures that may have a material impact on our ability to operate the business, or on our suppliers or customers. Recent examples of disruptive events include the COVID-19 pandemic, the current conflicts between Russia and Ukraine, and Israel and Gaza, which have directly and indirectly impacted us and our consumers. Other potential disruptive events include the loss of critical assets and infrastructure, the loss of (or loss of access to) critical employees, including through government lockdowns or industrial disputes, major IT outages due to a cyber incident or similar, and the failure of third party supplied raw materials, critical services or utilities such as electricity, gas and water.

These disruptive events could have a material adverse impact on our sales volume, cost of sales, earnings, and overall financial condition.

Packaging and recycling

Waste and pollution, and the legal and regulatory responses to these issues, could adversely impact our business.

Waste and pollution, particularly plastic and packaging waste, is a global issue affecting our business. Although the vast majority of our packaging is fully recyclable, it is not always collected for recycling across our territories, and can end up as land or marine litter. Concerns regarding the environmental impacts of packaging have led to governments in countries we operate in implementing laws and regulations that aim to increase the collection and recycling of our packs; reduce packaging waste and litter, including through limiting the use of single use plastic; and introduce quotas for refillable packaging, as well as specific packaging design requirements.

The European Commission is working on a revision of the Packaging and Packaging Waste Directive, setting increasingly stringent mandatory reuse targets on soft drinks and carbonated alcoholic beverages in EU member states, takeaway beverages filled at the point of sale, recycled content targets for plastic packaging and a mandatory deposit return scheme (DRS) for single use plastic bottles and

metal containers of up to three litres. Regulations will likely be adopted by EU member states in 2024, with compliance dates between then and 2040.

In addition to initiatives at the EU level, several countries in which we operate also have or are planning other legislative or regulatory measures to reduce the use of single use plastics, including plastic beverage bottles, and/or increases to plastic collection and recycling. Such measures may include implementing a DRS under which a deposit fee is added to the consumer price, which is refunded if and when the bottle is returned. Other measures may include rules on recycled content, requirements to purchase packaging recovery notes (PRN) to show that we meet our responsibilities for recycling and recovery of packaging waste, individual collection or recycling targets, or a plastic tax. The adoption of new or more stringent rules could increase our costs and may have a material impact on the cost and efficiency of our operations.

If we fail to sufficiently address stakeholder concerns about packaging and recycling, or we are not able to adapt our business to new legislation and regulation on a timely or cost-effective basis, or at all, it could result in higher costs through packaging taxes, producer responsibility reform, regulatory fines, damage to corporate reputation or investor confidence, and a reduction of consumer acceptance of our products and packaging.

Health concerns regarding the contents of our packaging materials, and regulatory responses to those concerns, could increase our costs and harm our reputation.

We are also subject to regulations governing the contents of our packaging, and may become subject to more stringent regulations in that regard.

New recycling technologies may not work or may not be developed quickly enough.

We are exploring innovative ways to achieve the packaging targets that we have set ourselves and those imposed by legislation and regulation, for example by using plastic that has been recycled via enhanced/chemical recycling technologies. There is a risk that these new technologies may not be developed quickly enough or may not work as well as intended, which could limit our ability to mitigate the impact of restrictions on single use plastics. Also, these technologies may be more expensive than current solutions, potentially reducing our profitability.

Read more about packaging on pages 41-44

Risk factors continued

Legal, regulatory and tax

Future changes to tax laws in the countries in which we operate could adversely affect our business.

We are subject to multiple national, state, regional, and local taxes in the jurisdictions in which we operate, including corporate income tax and sales tax. Tax is a complex evolving area, leading to the risk of increased or unexpected tax costs, and/or additional tax reporting obligations. Tax laws could change on a prospective or retroactive basis. Any such changes could adversely affect our business and its affiliates, and there is no assurance that we would be able to maintain any particular worldwide effective corporate tax. An increase in our effective tax rate would negatively impact the results of our operations.

The Organisation for Economic Co-operation and Development (OECD) and the Inclusive Framework (IF) have agreed to work together to create a consistent and coordinated approach to reform the international taxation rules to address the tax challenges arising from the digitalisation of the economy and to ensure that multinational enterprises (MNEs) pay a fair share of tax wherever they operate and generate profits (a two pillar solution). In 2021, the Global Anti-Base Erosion Model Rules (Pillar Two) was published, providing for a minimum level of taxation on the income arising in each of the jurisdictions where large MNEs operate. The Pillar Two rules were enacted in the UK under the Finance (No.2) Act 2023 introducing a global minimum effective tax rate of 15%. The legislation implements a domestic top-up tax and a multinational top-up tax effective for accounting periods starting on or after 31 December 2023.

Additionally, direct or indirect taxes or other charges imposed on the sale of our products could increase costs or cause consumers to purchase fewer of them. Many countries in which we operate are looking to implement or increase such taxes. These may relate, for example, to the use of non-recycled plastic in beverage packaging, or the use of sugar or other sweeteners in our beverages. Such changes may arise through the raising of an existing tax or the imposition of a new one.

Additional taxes levied on us could harm our financial results.

Our tax filings for various periods are or may be subject to current or future audit by tax authorities. These audits have resulted, and may in the future result, in assessments of additional taxes, as well as interest and/or penalties, and could adversely affect our financial results. Changes in tax laws, regulations, court rulings, related interpretations, and tax accounting standards in countries in which we operate, or if we are unsuccessful in defending our tax positions, may adversely affect our financial results. Additionally, amounts we may need to repatriate for the payment of dividends, share buybacks, interest on debt, salaries and other costs may be subject to additional taxation when repatriated.

Legal changes could affect our status as a foreign corporation for US federal income tax purposes, or limit the US tax benefits we receive from engaging in certain transactions.

In general, for US federal income tax purposes, a corporation is considered a tax resident in the jurisdiction of its organisation or incorporation. Because CCEP is incorporated under the laws of England and Wales, it would generally be classified as a non-US corporation (and therefore a non-US tax resident) under these rules. However, section 7874 of the US Internal Revenue Code of 1986, as amended (IRC), provides an exception under which a non-US incorporated entity may, in certain circumstances, be treated as a US corporation for US federal income tax purposes.

These regulations are complex and there is limited guidance as to their application. In addition, changes to applicable regulations could adversely affect CCEP's status as a foreign corporation for US federal tax purposes, and any such changes could have prospective or retroactive application. If CCEP were to be treated as a US corporation for US federal income tax purposes, it could be subject to materially greater US tax liability than as a non-US corporation.

Risk factors continued

Legislative or regulatory changes that affect our operations, access to raw materials, products, distribution or packaging could reduce demand for our products or increase our costs.

Our business model depends on making our products and packages available in multiple channels and locations. Laws that restrict our ability to do so, including laws affecting the promotion and distribution of our products, imposing levies on products with sugar and sweeteners, and limiting our ability to design or market certain packages, could increase our costs, decrease demand for our products, and negatively impact our financial results.

For example, our products are subject to, and may in the future be subject to, additional marketing and commercial restrictions based on ultra-processed food or nutrition grounds, promotions or marketing to children, or pressure from customers or regulators to develop discriminatory front of pack labelling.

Additionally, we are subject to licensing and other regulatory requirements in the jurisdictions in which we operate, and changes in these rules could increase our compliance costs or impact our ability to operate.

We may be exposed to risks in relation to compliance with anti-corruption laws and other key regulations and economic sanctions programmes.

We and our subsidiaries are required to comply with the laws and regulations of the various countries in which we conduct business, as well as certain laws of other countries, including the US. In particular, our operations are subject to anti-corruption laws such as the US Foreign Corrupt Practices Act of 1977 (the FCPA), the UK Bribery Act 2010 (UKBA), the Spanish and Portuguese Criminal Codes and Sapin II, and other key regulations such as the corporate criminal offence provisions of the UK Criminal Finances Act 2017 and the General Data Protection Regulation (GDPR). We are also subject to economic sanction programmes, including those administered by the United Nations, the EU and the Office of Foreign Assets Control of the US Department of the Treasury (OFAC), and regulations set forth under the US Comprehensive Iran Sanctions, Accountability, and Divestment Act.

One of the purposes of data protection laws is to protect individuals' fundamental rights and freedom, particularly their right to protection of their personal data. In addition, EU personal data transfers to third countries are subject to significant and evolving compliance requirements, including risk assessments of foreign government surveillance, execution of standard contractual clauses with third parties and potential supplemental measures. Non-compliance with such transfer requirements would result in a GDPR violation.

The FCPA, UKBA, and other anti-corruption regulations are aimed at preventing bribery in dealings with foreign entities. These rules are complex and may reach our dealings with both public and private sector entities and officials. In our business dealings, we may deal with governments, state owned business enterprises, and private sector entities.

We do not currently operate in jurisdictions that are subject to territorial sanctions imposed by OFAC or other relevant sanction authorities. However, such economic sanction programmes restrict our ability to engage or confirm business dealings with certain sanctioned countries and with sanctioned parties.

Violations of the above, including anti-corruption, data protection laws, economic sanctions, competition law or other applicable laws and regulations, are punishable by civil and sometimes criminal penalties for individuals and companies. These penalties can include fines, denial of export privileges, injunctions, asset seizures, debarment from government contracts (and termination of existing contracts) to revocations or restrictions of licences, as well as criminal fines and imprisonment. Any violation within one of these compliance risk areas could have a negative impact on our reputation and on our ability to win future business.

Due to the fast pace of changing statutory and regulatory environment, we cannot guarantee that our compliance programmes, policies and procedures will be followed at all times, or that we will always detect and prevent violations of the applicable laws by our employees, consultants, agents or partners. Implementing new or additional internal compliance systems or oversights may also increase our operating costs.

Risk factors continued

Legal claims against our suppliers could affect their ability to provide us with products and services, which could negatively impact our financial results.

Many of our suppliers provide us with products and services that rely on certain intellectual property rights or other proprietary information, and are subject to other third party rights, laws and regulations. If these suppliers face legal claims brought by third parties or regulatory authorities, they could be required to pay large settlements or even cease providing us with products and services as well as expose us to risk.

These outcomes could require us to change suppliers or develop replacement solutions or be subject to third party claims. This could result in business inefficiencies, delays or higher costs, which could negatively impact our financial results.

Litigation or legal proceedings could expose us to significant liabilities and damage our reputation.

We are a party to various litigation claims and legal proceedings. We evaluate these claims and proceedings to assess the likelihood of unfavourable outcomes and to estimate, if possible, the amount of potential losses. Based on these assessments and estimates, we establish reserves or disclose the relevant claims or proceedings, as appropriate. These assessments and estimates are based on the information available to management at the time and involve a significant amount of management judgement. Actual outcomes or losses may differ materially from those in the current assessments and estimates. Recent EU legislation has increased the ability to bring claims, including of greenwashing, against CCEP.

Improper conduct by our employees could damage our reputation or lead to litigation or legal proceedings that could result in civil or criminal penalties, including substantial monetary fines, as well as disgorgement of profits.

Cyber and IT resilience

Cyber attacks, or a deficiency in our cybersecurity or a customer's or supplier's cybersecurity, could negatively impact our business.

As our reliance on IT increases, so will the risks posed to our internal and third party systems from cyber incidents.

A cyber incident is considered to be any adverse event that threatens the confidentiality, integrity or availability of our data or information systems. It could involve a third party gaining unauthorised access to systems, either unintentionally or through an intentional attack (such as activities due to war, state sponsored

cyber terrorism, criminal attack, hacking or a computer virus), which could disrupt operations, compromise or corrupt data, damage our brand reputation, threaten our Company or employees and negatively impact our financial results.

Our business processes require high levels of integration between our IT systems and the systems of third parties (suppliers, customers, business partners, systems providers) and companies that we invest in or acquire. A cyber incident at any of those entities could either spread to our systems or indirectly have a negative impact on our ability to operate. Similarly, cyber attacks in one country might impact our ability to do business in other countries due to the dependencies on information systems and applications.

Technology failures could disrupt our operations and negatively impact our business.

We rely extensively on IT systems to process, transmit, store and protect electronic information. For example, our production and distribution facilities and inventory management all use IT to maximise efficiencies and minimise costs. Communication between our employees, customers and suppliers also depends, to a large extent, on IT.

Our IT and operational technology systems may be vulnerable to interruptions due to implementation of new systems or systems upgrades (such as our system applications and product in data processing (SAP) and its modules) and events that may be beyond our control. These include, but are not limited to, natural disasters, telecommunications failures, power outages, hardware failures, human error and security issues, such as cyber attacks. Centralisation of IT systems might increase the impact of a failure of IT applications. We have IT security controls, processes and disaster recovery plans in place, but they may not be adequate or implemented effectively enough to ensure that our operations are not disrupted. If we miscalculate the level of investment needed, our software, hardware and maintenance practices could become out of date, and this could result in disruptions to our business. In addition, when we integrate new entities following investment or acquisition, the integration of IT systems and applications for those entities will increase the complexity and the risk level of our IT infrastructure.

Read more about our cyber security risk management on pages 77-78

Risk factors continued

Economic and political conditions

The deterioration of global and local economic and political conditions could adversely affect our business performance and share price.

Our performance is closely linked to the global economic cycle as well as macro and microeconomic conditions in the countries, regions and cities where we operate. Normally, slow economic growth or economic contraction decreases demand and drives down sales.

For example, adverse economic conditions decrease individuals' disposable income, potentially leading to the purchase of cheaper private label brands or avoiding buying beverage products altogether.

Currently, many major economies are going through monetary tightening to contain high inflation following a multi-year monetary and fiscal expansion and supply chain dislocations. The war in Ukraine is further increasing the uncertainty and volatility, mainly through energy prices and supply uncertainty.

The ongoing uncertainties around economic growth, employment, inflation, commodities, currencies, costs, and the availability of financial resources could directly impact our business, operating results, financial conditions, cash flows, liquidity requirements and share price. Geopolitical concerns are higher than last year, particularly with the ongoing war in Ukraine, the conflict in the Middle East, the global refugee crisis, and elections resulting in more populist or extremist parties gaining support and polarised coalition governments, creating a very volatile macroeconomic environment.

Other key external economic and political factors also have the potential to specifically impact API, including economic and political instability in Papua New Guinea (PNG) and the impact on foreign currency availability, tariffs and protectionism, geopolitical turbulence in the form of US-China trade wars and trade tension between Australia and China. Additionally, API is exposed to PNG liquidity risks and the associated impact on short-term profitability. Access to foreign exchange in PNG is limited due to a supply/demand imbalance of hard currency. The PNG kina (PGK) is considered to be overvalued. If the PNG government requires assistance from the International Monetary Fund to fund its budget deficit, it could require the PGK to be devalued, which could significantly impact API's financial results upon translation of PGK earnings and balance sheet into Australian dollars.

Increases in costs, limitation of supplies, or lower than expected quality of raw materials could harm our financial results.

The cost of our raw materials, ingredients, packaging materials or energy could increase over time. If that happens, and if we are unable to pass the increased costs on to our customers in the form of higher prices, our financial results could be adversely affected.

We use supplier pricing agreements and derivative financial instruments to manage volatility and market risk for certain commodities. Generally, these hedging instruments establish the purchase price before the time of delivery, which may lock us into prices that are ultimately higher or lower than the actual market price at the time of delivery.

We continue to experience volatility in commodity prices and foreign exchange mainly driven by central banks' global tightening policies; supply chain disruptions due to military conflicts; political uncertainty across key global powers; and increased protectionist policies.

Our suppliers could be adversely affected by a number of external events. These could include war, strikes, adverse weather conditions, speculation, abnormally high demand, governmental controls, new taxes, national emergencies, natural disasters, health crises, such as a pandemic, and insolvency. If this happens, and we are unable to find an alternative source for our materials, our cost of sales, revenues, and ability to manufacture and distribute our products could be adversely affected.

The quality of the materials or finished goods we receive could be lower than expected. If this happens, we may need to substitute those items for ones that meet our standards, or replace underperforming suppliers. This could disrupt our operations and adversely affect our business.

Changes in interest rates or our debt rating could harm our financial results and financial position.

We are subject to interest rate risk, and changes in our debt rating could have a material adverse effect on interest costs and debt financing sources. Our debt rating can be materially influenced by a range of factors, including our financial performance, acquisitions, and investment decisions, as well as the capital management activities of TCCC and changes in its debt rating. If our credit rating declines or interest rates continue to increase, as they have done in recent years, there is no guarantee that we will be able to access debt financing on favourable terms, or at all.

Risk factors continued

The deterioration in political unity within the EU could significantly impact our financial results and reduce our competitiveness in the marketplace.

There are concerns regarding the short-term and long-term stability of the euro and pound sterling and the euro's ability to serve as a single currency for a number of individual countries. These concerns could lead individual countries to revert, or threaten to revert, to local currencies. In more extreme circumstances, they could exit the EU, and the Eurozone could be dissolved entirely. Should this occur, the assets we hold in a country that reintroduces local currency could be subject to significant changes in value when expressed in euros. Furthermore, the full or partial dissolution of the euro, the exit of one or more EU member states from the EU or the full dissolution of the EU could cause significant volatility and disruption to the global economy. This could affect our ability to access capital at acceptable financing costs, the availability of supplies and materials, and demand for our products, all of which could adversely impact our financial results.

If it becomes necessary for us to use additional currencies, we would be subjected to additional earnings volatility as amounts in these currencies are translated into euros.

Default by or failure of one or more of our counterparty financial institutions could cause us to incur losses.

We are exposed to the risk of default by, or failure of, the counterparty financial institutions with which we do business. This risk may be heightened during economic downturns and periods of uncertainty in the financial markets.

If one of our counterparties became insolvent or filed for bankruptcy, our ability to recover amounts owed from or held in accounts with the counterparty may be limited. In this event we could incur losses, which could negatively impact our results and financial condition.

Market

We may not be able to respond successfully to changes in the marketplace.

We operate in the highly competitive beverage industry and face strong competition from other general and speciality beverage companies. The timing and effectiveness of our response to continued and increased competitor and customer consolidations and marketplace competition may result in lower than expected net pricing of our products. Additionally, the loss of key contracts or customers to our competitors may decrease our sales volume, revenues and profitability and damage our reputation.

Changes in our relationships with large customers may adversely impact our financial results.

A significant amount of our volume is sold through large retail chains, including supermarkets and wholesalers. Many of these customers are consolidating, or are forming buying groups, which increases their purchasing power. They may seek to use this to improve their profitability through lower prices, increased emphasis on generic and other private label brands, or increased promotional programmes and payment of rebates.

Competition from hard discount retailers and online retailers continues to challenge traditional retail outlets. This can increase the pressure on all customer margins, which may then be reflected in pressure on suppliers such as us.

In addition, from time to time, a customer or customers choose(s) to temporarily or permanently stop selling some of our products as a result of disputes with us.

These factors, can have a negative impact on the availability of our products, and our profitability.

Adverse weather conditions could limit the demand for our products.

Our sales are significantly influenced by weather conditions in the countries in which we operate. In particular, due to the seasonality of our business, cold or wet weather during the summer months may have a negative impact on the demand for our products and contribute to lower sales. This could have an adverse effect on our financial results.

Our business is vulnerable to products being imported from outside our territories, which adversely affects our sales.

Some of the territories in which we operate permit imports of products manufactured by bottlers from countries outside our territories. When these imports come from members of the European Economic Area, we are prohibited from taking action to stop such imports.

Climate change and water

Water scarcity and additional regulations on water supply or use could adversely impact our business.

Water is the primary ingredient in most of our products. It is also vital to our manufacturing processes and is needed to produce the agricultural ingredients that are essential to our business. Water scarcity or a deterioration in the quality of available water sources in our territories or to our supply chain, even if temporary, may result in increased production costs or capacity constraints, negative publicity, and a loss in consumer confidence.

Risk factors continued

Climate change, and the legal and regulatory responses, could adversely impact our business.

Climate change is resulting in global average temperature increases and increasingly frequent and severe extreme weather conditions around the world, and the effects of this change appear to be accelerating. More frequent extreme weather events, such as storms or floods in our territories, could disrupt our facilities and distribution network, further impacting our business. It may also lead to decreased agricultural productivity in certain regions of the world that limits the availability or increases the cost of key raw materials that we use to produce our products. Additional climate laws may affect other areas of our business, such as production, distribution, packaging or the cost of raw materials.

Concern over climate change has led to more environmental legislative and regulatory initiatives at an EU and national level. These include areas such as GHG emissions, water use and energy efficiency.

Governments and private parties are increasingly filing lawsuits or initiating regulatory action based on allegations that certain public statements regarding sustainability-related matters and practices by companies are greenwashing, i.e. misleading information or false claims overstating potential benefits. Threat of such actions and the negative publicity arising from them presents additional uncertainty regarding the extent to which we may face increased risk of liability stemming from our climate change or sustainability practices.

As part of our commitment to addressing our climate change impacts, we are investing in technologies that improve the energy efficiency of our operations and reduce GHG emissions related to our packaging, CDE and transportation. In general, the cost of these investments is greater than investments in less energy efficient technologies, and the period of return is often longer, and there is a risk that we may not achieve our desired returns.

Read more about climate and water on pages 37-40 and 45-47

Changes in customer and consumer buying trends and category perception Health concerns could reduce consumer demand for some of our products, impacting our financial performance.

There is concern that the public health consequences of obesity, particularly among young people, are increasing. Health advocates and dietary guidelines suggest that consumption of sugar sweetened beverages is a cause of increased obesity rates, and are encouraging consumers to reduce or eliminate consumption of such products. In addition, governments have introduced stronger regulations around the marketing, labelling, packaging, or sale of sugar sweetened beverages. These concerns and regulations could reduce demand for, or increase the cost of, our sugar sweetened beverages.

At the same time, there is additional scrutiny by the World Health Organisation, EFSA and national health authorities on sweeteners, with many studies and impact assessments on health ongoing. Some of these studies may lead to additional regulatory constraints or additional tax, like in France, where a soda tax applies to both products with sugar and those with sweeteners.

Consumer trends have also led to an increased demand for low-calorie soft drinks, water, enhanced water, isotonic, energy drinks, teas, coffees and beverages with natural ingredients. If we are unable to meet this demand by providing a broad enough range of products, our business and financial results could be negatively impacted.

Business transformation, integration and digital capability

We may not identify sufficient initiatives to realise our cost saving goals to stay competitive.

We continue to assess opportunities for improvements as part of the ongoing business strategy to enable us to remain competitive in the future. This strategic objective encompasses all the support functions, technology transformation, supply chain and commercial improvements and working efficiently with our partners and franchisors.

The initiatives are complex due to their multi functional and multi country nature. Ineffective coordination and control over single initiatives and interdependent initiatives could result in us failing to realise the expected benefits.

Risk factors continued

Restructuring could cause labour and union unrest.

Since our inception, we have restructured in all countries and functions, resulting in a combination of redeployment and layoffs. While we continue to look for opportunities to maintain and improve our position within the market, this might have a negative impact on our relationship with our employee representatives and social partners, and could cause labour and union unrest. Continual change might trigger change fatigue among our people or social unrest in the event that such changes result in industrial action.

In the past, we have sought to minimise union unrest through constructive social dialogue, e.g. on employability, which has not affected our ability to achieve our objectives. However, there is no guarantee that our efforts will continue to be successful or have the desired effect.

Miscalculation of our need for infrastructure investment could impact our financial results.

To support revenue growth, we are investing in our infrastructure, including CDE, fleet, technology, sales force, digital capability and production equipment. There is a risk that these investments will not generate the projected returns, either because of market or technological changes, or ineffective adoption of capabilities, or because the projected requirements of the investments differ from actual levels. This could adversely affect our financial results.

We may not be able to execute our strategy to pursue suitable acquisitions or may have difficulty integrating acquired businesses.

Our strategy involves, in part, pursuing disciplined and attractive investments, which are intended to create shareholder value. Our efforts to execute this strategy require us to identify suitable acquisition targets (such as Coca-Cola Beverages Philippines, Inc. (CCBPI)), negotiate, and close acquisition and development transactions. Further, to the extent that we are able to identify suitable investments, negotiations may not proceed as anticipated and management attention may be diverted by such opportunities. We may also encounter unexpected difficulties, joint venture partner disputes, cost or delays in restructuring and integrating acquired businesses or bottling operations into our operating, governance, sustainability and internal control structures, including extending our Company's internal control over financial reporting to newly acquired businesses, which may increase the risk of failure to prevent misstatements in our consolidated financial statements. There is no guarantee that these investments will ultimately be accretive, support our growth or achieve the intended result.

People and wellbeing

Failure to attract, retain and motivate existing and future employees.

Our ability to achieve our strategic objectives is reliant on having the right talent and people. The increasing importance of flexible working and future work topics brings the challenge of attracting, retaining and motivating existing and future employees who have the talent we need, the required technical skill set, and the expected levels of motivation to deliver. As a result, we could fail to achieve our strategic objectives and could experience a decline in employee engagement, industrial action, reputational damage or litigation.

Increases in the cost of wages and employee benefits could impact our financial results and cash flow.

The increases in the cost of wages and employee benefits, including retirement benefits, may affect our financial results and cash flow.

The increasing inflationary trend combined with the high employment levels we see globally will put pressure on future wage negotiations and the anticipated salary budget. We are engaged in a dialogue with social partners on this issue. However, we cannot guarantee that our efforts will be successful in creating consensus or that unions representing our employees will not take future actions that are disadvantageous to us.

Adverse effects on our people's health, wellbeing and safety could impact our business.

Failure to adequately manage workplace hazards or abide by our health and safety policies and guidelines could result in injuries and deaths among our people. In turn, this can have an adverse impact on employee engagement and productivity levels. The increase of stress and employees feeling burnt out may continue to affect the business with a higher degree of mental health issues and increased absence rates for employees. Wellbeing initiatives require new approaches to reach all employees, especially when restructuring takes place, which potentially increases the risk to us of long-term absence and loss of productivity levels.

Read more about our people in **Great people** on pages 20-27

Risk factors continued

Misconduct by third parties relating to human rights could lead to reputational and financial damage.

Supplier monitoring and due diligence of suppliers might fail or it may not be able to prevent suppliers' abuse of human rights including modern slavery, resulting in media and public attention. This could cause a reputational and financial impact on CCEP, including negative ratings in benchmarks, leading to an impact on investors becoming less likely to invest in CCEP.

Relationship with The Coca-Cola Company (TCCC) and other franchisors **Our business success, including our financial results, depends on our relationship with TCCC and other franchisors.**

Around 87% of our revenue for the year ended 31 December 2023 was derived from the distribution of beverages under agreements with TCCC. We make, sell and distribute these products through bottling agreements with TCCC, which typically include the following terms:

- We purchase our entire requirement of concentrates and syrups for Coca-Cola trademark beverages (sparkling beverages bearing the trademark Coca-Cola or the Coke brand name) and allied beverages (beverages of TCCC or its subsidiaries, but not Coca-Cola trademark beverages or energy drinks) from TCCC. Prices, terms of payment, and other terms and conditions of supply are determined from time to time by TCCC at its sole discretion.
- There are no limits on the prices that TCCC may charge for concentrate.
- Much of the marketing and promotional support that we receive from TCCC is at its discretion. Programmes may contain requirements, or be subject to conditions, established by TCCC that we may not be able to achieve or satisfy. The terms of most of the marketing programmes do not and will not contain an express obligation for TCCC to participate in future programmes or continue past levels of payments into the future.
- We are obligated to maintain sound financial capacity to perform our duties, as required and determined by TCCC at its sole discretion. These duties include, but are not limited to, making certain investments in marketing activities to stimulate the demand for products in our territories and making infrastructure improvements to ensure our facilities and distribution network are capable of handling the demand for these beverages.
- Disagreements with TCCC concerning business issues may lead TCCC to act adversely to our interests with respect to these relationships, which could have a material adverse effect on our business, results of operations, business and customers relationships, and reputation.

Other risks

TCCC and Olive Partners, S.A. (Olive Partners) hold significant shareholdings in CCEP, and their views may differ from those of our public shareholders.

Around 19% and 36% of CCEP's Shares are owned by European Refreshments (ER, a wholly owned subsidiary of TCCC) and Olive Partners respectively. Five of our Directors, including the Chairman, were nominated by Olive Partners, and two of our Directors were nominated by ER. As a result of their shareholdings and Board seats, TCCC and Olive Partners can influence matters requiring shareholder and Board approval, subject to our Articles of Association and the Shareholders' Agreement. The views and interests of TCCC and Olive Partners may not always align with each other or those of other shareholders.

Product quality

Our business could be adversely affected if we, TCCC or other franchisors and manufacturers of the products we distribute are unable to maintain a positive brand image as a result of product safety, product quality, food defence or food fraud issues.

Adequate and effective quality control methods are vital to ensure the safety and integrity of the products we manufacture. The food additives we use have been approved as safe by globally recognised authorities, including the Joint FAO/WHO Expert Committee on Food Additives (JECFA), the European Food Safety Authority (EFSA), the Food Standards Australia New Zealand (FSANZ), Indonesia National Agency of Food and Drug Control (BPOM) and National Department of Health, Papua New Guinea. We only use additives in our drinks when they are needed for preserving, colouring, sweetening or balancing acidity. In addition, all our employees are responsible for ensuring we only supply safe products and are required to follow all relevant policy guidelines, procedures and processes at our production facilities and across our entire supply chain. Factors such as improper handling, storage, or inadequate/inefficient sanitation practices during the manufacturing process can introduce contaminants, leading to adverse health effects for our consumers. Additionally, failure to meet stringent quality standards may result in product recalls, regulatory fines, and legal liabilities. Negative publicity surrounding safety and quality issues may jeopardise our Company's reputation, as it may erode consumer trust and loyalty, affecting our market share and long-term profitability.

Other Group information

Shareholder information

The Company was incorporated in England and Wales on 4 August 2015, as a private company under the Companies Act 2006 (the Companies Act). On 4 May 2016, the Company was registered as a public company limited by shares and changed its name from Coca-Cola European Partners Limited to Coca-Cola European Partners plc. On 10 May 2021, the Company changed its name from Coca-Cola European Partners plc to Coca-Cola Europacific Partners plc (CCEP). It is registered at Companies House, Cardiff, under company number 9717350. The business address for Directors and senior management is Pemberton House, Bakers Road, Uxbridge, UB8 1EZ, England.

The Company is resident in the UK for tax purposes. Its primary objective is to make, sell and distribute ready to drink beverages.

Annual General Meeting

It is intended that the Company's 2024 Annual General Meeting (AGM) will be held on 22 May 2024. However, shareholders will be notified if the Company is required to make alternative arrangements.

Registered shareholders will be sent a Notice of AGM, or notice of availability of the Notice of AGM, closer to the time of the AGM, and will be notified of any change affecting the AGM through an appropriate channel.

Directors and senior management

Biographies of the Directors and senior management are set out on pages 95-99. Sol Daurella and Alfonso Líbano Daurella are first cousins.

Service contracts and loss of office arrangements

It is the Remuneration Committee's policy that there should be no element of reward for failure. When considering payments in the event of a loss of office, it takes account of the individual circumstances, including the reason for the loss of office, Group and individual performance, contractual obligations of both parties as well as share and pension plan rules.

Service contracts for Executive Directors provide for a notice period of not more than 12 months from CCEP and not more than 12 months from the individual. The standard Executive Director service contract does not confer any right to additional payments in the event of termination. However, it does reserve the right for the Group to impose garden leave (i.e. leave with pay) on the Executive Director during any notice period. In the event of redundancy, benefits would be paid according to CCEP's redundancy guidelines for GB prevailing at that time. Executive Directors may be eligible for a pro rata bonus for the period served, subject to performance, but no bonus will be paid in the event of gross

misconduct. The treatment of unvested long-term incentive awards is governed by the rules of the relevant plan and depends on the reasons for leaving. The cost of legal fees spent on reviewing a settlement agreement on departure may be provided where appropriate. The Company also reserves the right to pay for outplacement services as appropriate.

The Non-executive Directors (NEDs), including the Chairman of the Board, do not have service contracts but have letters of appointment. NEDs are not entitled to compensation on leaving the Board.

Directors and senior management interest in shares

Other than Sol Daurella, Alfonso Líbano Daurella and José Ignacio Comenge, who indirectly owned 7.3% (33,385,110 Shares), 1.5% (6,701,540 Shares), and 1.7% (7,855,504 Shares) of the Shares outstanding as of 29 February 2024, respectively, no Director or member of senior management individually owned more than 1% of the Company's Shares as of 29 February 2024.

Table 1 shows the number of share options held by Directors and other members of senior management as at 29 February 2024, including the applicable exercise price and the date when the applicable exercise period ends.

Other employee-related matters

Note 17 to the consolidated financial statements provides a breakdown of employees by main category of activity. As at 31 December 2023, we had around 32,000 employees, of whom none were located in the US. A number of our employees in Europe and API are covered by collectively bargained labour agreements, most of which do not expire. However, in some countries, wage rates must be renegotiated at various dates throughout 2024. We believe we will be able to renegotiate these wage rates with satisfactory terms.

Table 1
Share options held by Directors and other members of senior management as at 29 February 2024

Name	Grant date	Expiry date	Exercise price	Total number of Shares subject to outstanding options including exercisable and unvested options
Damian Gammell	5 November 2015	5 November 2025	US\$39.00	324,643

Share capital

The Articles of Association of the Company (the Articles) contain no upper limit on the authorised share capital of the Company. Subject to certain limitations under the Shareholders' Agreement, the Board has the authority to offer, allot, grant options over or otherwise deal with or dispose of shares to such persons, at such times, for such consideration and upon such terms as the Board may decide, only if approved by ordinary resolution of our shareholders.

As at 31 December 2023, the Company had 459,200,818 Shares, nominal value €0.01 per share, issued and fully paid. As at 29 February 2024, the Company had 459,416,557 Shares issued and fully paid.

Under the Shareholders' Agreement and the Articles, the Company is permitted to issue, or grant to any person rights to be issued, securities, in one or a series of related transactions, in each case representing 20% or more of our issued share capital, only if approved in advance by special resolution of our shareholders.

Pursuant to this authority, our shareholders have passed resolutions allowing a maximum of a further 305,510,225 Shares (as of 29 February 2024) to be allotted and issued, subject to the restrictions set out below:

(1) pursuant to a shareholder resolution passed on 24 May 2023 regarding the authority to allot new shares, the Board is authorised to allot shares and to grant rights to subscribe for or convert any security into shares:

- a. up to a nominal amount of €1,527,551.12 (representing 152,755,112 Shares; such amount to be reduced by any allotments or grants made under paragraph 1(b) below in excess of such sum); and
 - b. comprising equity securities (as defined in the Companies Act) up to a nominal amount of €3,055,102.25 (representing 305,510,225 Shares; such amount to be reduced by any allotments or grants made under paragraph 1(a) above) in connection with an offer by way of a rights issue:
 - i. to ordinary shareholders in proportion (as nearly as may be practicable) to their existing holdings; and
 - ii. to holders of other equity securities as required by the rights of those securities or as the Board otherwise considers necessary,
 and so that the Board may impose any limits or restrictions and make any arrangements which it considers necessary or appropriate to deal with treasury shares, fractional entitlements, record dates, legal, regulatory or practical problems in, or under the laws of, any territory or any other matter; and
- (2) pursuant to a shareholder resolution passed on 24 May 2023 regarding authority to disapply pre-emption rights, the Board is authorised to allot equity securities (as defined in the Companies Act) for cash under the authority given by the shareholder resolution described in paragraph 1 above and/or to sell shares held by the Company as treasury shares for cash as if section 561 of the Companies Act did not apply to any such allotment or sale, such power to be limited:
- a. to the allotment of equity securities and sale of treasury shares in connection with an offer of, or invitation to apply for, equity securities (but in the case of the authority granted under paragraph 1(b) above, by way of a rights issue only):
 - i. to ordinary shareholders in proportion (as nearly as may be practicable) to their existing holdings; and
 - ii. to holders of other equity securities, as required by the rights of those securities, or as the Board otherwise considers necessary,
 - b. and so that the Board may impose any limits or restrictions and make any arrangements which it considers necessary or appropriate to deal with treasury shares, fractional entitlements, record dates, legal, regulatory or practical problems in, or under the laws of, any territory or any other matter; and
 - c. in the case of the authority granted under paragraph 1(a) above and/or in the case of any sale of treasury shares, to the allotment of equity securities or sale of treasury shares (otherwise than under paragraph 2(a) above) up to a nominal amount of €229,132.66 (representing 22,913,266 Shares).

Other Group information continued

Shares not representing capital

None.

Shares held by CCEP

We are not permitted under English law to hold our own Shares unless they are repurchased by us and held in treasury. At our 2023 AGM, our shareholders passed a special resolution that allows us to buy back our own Shares in the market as permitted by the Companies Act. On 13 February 2020, the Board announced a share buyback programme of up to €1 billion. All Shares repurchased as part of the buyback programme have been cancelled. Details of the Shares bought back are provided under Share buyback programme below. In light of macroeconomic uncertainty brought about by the outbreak of COVID-19, on 23 March 2020, the Company announced the suspension of the buyback programme until further notice.

Share-based payment awards

Table 2 shows the share-based payment awards outstanding under each of the CCE 2010 Incentive Award Plan (2010 Plan) and the Long-Term Incentive Plan 2016 (CCEP LTIP) as at 31 December 2023 and 29 February 2024.

 For more details about the share plans and awards granted see Note 21 to the consolidated financial statements on pages 209-210

History of share capital

Table 3 on page 255 sets out the history of our share capital for the period from 1 January 2021 until 29 February 2024.

Share buyback programme

The maximum number of Shares authorised for purchase at the 2023 AGM was 45,826,533 Shares, representing 10% of the issued Shares at 5 April 2023, reduced by the number of Shares purchased, or agreed to be purchased after 5 April 2023 and before 24 May 2023. No Shares have been purchased under the 2023 shareholder authority as at the date of this report. The existing authority to buy back Shares will expire at the 2024 AGM. We intend to seek shareholder approval to renew the authority to buy back Shares.

US shareholders

To the knowledge of the Company, 405 holders of record with an address in the US held a total of 459,287,301 Shares (or 99.97% of the total number of issued Shares outstanding) as at 29 February 2024. However, some Shares are registered in the names of nominees, meaning that the number of shareholders with registered addresses in the US may not be representative of the number of beneficial owners of Shares resident in the US.

Table 2

Outstanding share-based payment awards

Marketing

CCEP relies extensively on advertising and sales promotions to market its products. TCCC and other franchisors advertise in all major media to promote sales in the local areas we serve. We also benefit from regional, local and global advertising programmes conducted by TCCC and other franchisors. Certain advertising expenditures by TCCC and other franchisors are made pursuant to annual arrangements.

CCEP and TCCC engage in a variety of marketing programmes to promote the sale of TCCC's products in territories in which we operate. The amounts to be paid to us by TCCC under the programmes are determined annually and are periodically reassessed as the programmes progress. Marketing support funding programmes entered into with TCCC provide financial support, principally based on our product sales or on the completion of stated requirements, to offset a portion of the cost of our marketing programmes. Except in certain limited circumstances, TCCC has no specified contractual obligation to participate in expenditures for advertising, marketing and other support in our territories. The terms of similar programmes TCCC may have with other licensees and the amounts paid by TCCC under them could differ from CCEP's arrangements.

We take part in various programmes and arrangements with customers to increase the sale of products. These include arrangements under which allowances can be earned by customers for attaining agreed sales levels or for participating in specific marketing programmes.

Dependence on franchisors

As a franchise business, CCEP's business success, including its financial results, depends upon its relationships with TCCC and its other franchisors.

 **Read more about our relationships with franchisors, see the Risk factors** on pages 243-251

Competition

CCEP competes mainly in the manufacturing, sale and distribution of non-alcoholic ready to drink (NARTD) beverages industry and adjacencies, including squashes/cordials, hot beverages and low alcoholic ready to drink (ARTD) beverages. CCEP competes in the Western Europe and API segments, and primarily manufactures, sells and distributes the products of TCCC, as well as those of other franchisors such as Monster Energy.

CCEP competes mainly with:

- NARTD and non-alcoholic, non-ready to drink (for example squashes/cordials and hot beverages) brand and private label manufacturers, sellers and distributors.
- Alcoholic beverage manufacturers, sellers and distributors – in the sense that some of their products may be considered to be substitutes for CCEP's own products on certain consumer occasions. More recently, CCEP entered the ARTD segment with Jack Daniel's & Coca-Cola ready to drink (RTD) and intends to make further entrances with ARTD in the near future with launches such as Absolut Vodka & Sprite ARTD.

A small number of such companies may also be contracted by CCEP as manufacturers (e.g. co-packers) or commercial partners (e.g. on behalf of which CCEP sells and/or distributes, or which sells and/or distributes on CCEP's behalf).

CCEP sells and distributes to a wide range of customers, including both physical and online food and beverage retailers, wholesalers and out of retail customers. The market is highly competitive, and all CCEP customers and consumers may choose freely between products of CCEP and its competitors. Many of CCEP's customers are under increasing competitive pressure, including with the increasing market share of discounters, the growth of e-commerce food and beverage players, increase of private label, emergence of quick commerce and customer consolidation.

CCEP competes with respect to a wide range of commercial factors, including brand awareness, product and packaging innovations, supply chain efficacy, customer service, sales strategy, marketing, and pricing and promotions.

The level of competition faced by CCEP may be affected by, for example; changing customer and consumer product, brand, and packaging preferences, shifts in customers' industries, competitor strategy shifts, new competitor entrants, supplier dynamics, the weather, and social, economic, political or other external landscape shifts.

Key factors affecting CCEP's competitive strength include, for example; CCEP's strategic choices, investments, partnerships (e.g. with customers, franchisors and suppliers), people management, asset base (e.g. property, plant, fleet, and equipment), technological sophistication, and processes and systems.

Other Group information continued

Impact of governmental regulation

Our business is sensitive to the economic and political action and conditions in our countries of operation. The risks these can pose to our business are set out in our Principal risks on pages 68-78 and in our Risk factors on pages 243-251.

Material contracts

Neither the Company (nor any member of the Group) has entered into any material contracts, for the two years immediately preceding publication of this report, that are to be performed in whole or in part at or after the filing of this report, other than contracts entered into in the ordinary course of business.

Articles of Association

For a summary of certain principal provisions of the Company's Articles of Association (the Articles), see Other Information – Other Group information – Articles of Association of the 2018 Annual Report on Form 20-F, filed on 14 March 2019. A copy of the Company's Articles has been filed as Exhibit 1 to this Form 20-F.

Documents on display

CCEP is subject to the information requirements of the US Securities Exchange Act of 1934, as amended (the Exchange Act), applicable to FPIs. In accordance with these requirements, we file our Annual Report on Form 20-F and other related documents with the US Securities and Exchange Commission (SEC). It is possible to read and copy documents that we have filed with the SEC at the SEC's office. Filings with the SEC are also available to the public from commercial document retrieval services, and from the website maintained by the SEC at www.sec.gov.

Our Annual Report on Form 20-F is also available on our website at ir.cocacolaep.com/financial-reports-and-results/integrated-reports. Shareholders may also order a hard copy, free of charge – see Useful addresses on page 277.

Exchange controls

Other than those individuals and entities subject to economic sanctions that may be in force from time to time, we are not aware of any other legislative or legal provision currently in force in the UK, the US, the Netherlands or Spain restricting remittances to non-resident holders of CCEP's Shares or affecting the import or export of capital for the Company's use.

Taxation information for shareholders

US federal income taxation

US federal income tax consequences to US holders of the ownership and disposition of CCEP Shares

This section summarises the material US federal income tax consequences of owning Shares as capital assets for tax purposes. It is not, however, a comprehensive analysis of all the potential US tax consequences for such holders, and it does not discuss the tax consequences of members of special classes of holders which may be subject to other rules, including, but not limited to: tax exempt entities, life insurance companies, dealers in securities, traders in securities that elect a mark-to-market method of accounting for securities holdings, holders liable for alternative minimum tax, holders that, directly or indirectly, hold 10% or more (by vote or by value) of the Company's stock, holders that hold Shares as part of a straddle or a hedging or conversion transaction, holders that purchase or sell Shares as part of a wash sale for US federal income tax purposes, or US holders whose functional currency is not the US dollar. In addition, if a partnership holds Shares, the US federal income tax treatment of a partner will generally depend on the status of the partner and the tax treatment of the partnership and may not be described fully below. This summary does not address any aspect of US taxation other than US federal taxation (such as the estate and gift tax, the Medicare tax on net investment income or US state or local tax).

Investors should consult their tax advisors regarding the US federal, state, local and other tax consequences of owning and disposing of Shares in their particular circumstances.

This section is based on the IRC, its legislative history, existing and proposed regulations, published rulings and court decisions, and on the United Kingdom-United States Tax Treaty (the Treaty), all of which are subject to change, possibly on a retroactive basis.

A US holder is a beneficial owner of Shares that is, for US federal income tax purposes, (i) a citizen or individual resident of the US, (ii) a US domestic corporation, (iii) an estate whose income is subject to US federal income taxation regardless of its source, or (iv) a trust if a US court can exercise primary supervision over the trust's administration and one or more US persons are authorised to control all substantial decisions of the trust. A non-US holder is a beneficial owner of Shares that is neither a US holder nor a partnership for US federal income tax purposes.

Other Group information continued

Taxation of dividends

Subject to the passive foreign investment company (PFIC) rules discussed below, a US holder is subject to US federal income taxation on the gross amount of any dividend paid by CCEP out of the Company's current or accumulated earnings and profits (as determined for US federal income tax purposes). Dividends paid to a non-corporate US holder will generally constitute "qualified dividend income" and be taxable to the holder at a preferential rate, provided that (i) CCEP is eligible for the benefits of the Treaty, (ii) CCEP is not a PFIC (as discussed below) for either its taxable year in which the dividend is paid or the preceding taxable year and (iii) certain minimum holding period and other requirements are met. CCEP currently believes that dividends paid with respect to its Shares should constitute qualified dividend income for US federal income tax purposes if CCEP was not, in the year prior to the year in which the dividend was paid, and is not, in the year in which the dividend is paid, a PFIC for US federal income tax purposes and provided that the certain minimum holding period is met. US holders should consult their own tax advisors regarding the availability of the preferential dividend tax rate on dividends paid by CCEP.

For US federal income tax purposes, a dividend must be included in income when the US holder actually or constructively receives the dividend. Dividends paid by CCEP to corporate US holders will generally not be eligible for the dividends received deduction. For foreign tax credit purposes, dividends will generally be income from sources outside the US and will generally, be "passive" or "general" income for purposes of computing the foreign tax credit allowable to a US holder.

The amount of a dividend distribution (including any UK withholding tax) on Shares that is paid in a currency other than the US dollar will generally be included in ordinary income in an amount equal to the US dollar value of the currency received on the date such dividend distribution is includable in income, regardless of whether the payment is, in fact, converted into US dollars on such date. Generally, any gain or loss resulting from currency exchange fluctuations during the period from the date the dividend payment is includable in income to the date the payment is converted into US dollars will be treated as ordinary income or loss and will not be eligible for the preferential tax rate on qualified dividend income. Generally, the gain or loss will be income or loss from sources within the US for foreign tax credit purposes.

Distributions in excess of CCEP's earnings and profits, as determined for US federal income tax purposes, will be treated as a return of capital to the extent of the US holder's basis in its Shares and thereafter as capital gain, subject to taxation as described below.

Taxation of capital gains

Subject to the PFIC rules discussed below, a US holder will generally recognise gain or loss on any sale, exchange, redemption or other taxable disposition of Shares in an amount equal to the difference between the US dollar value of the amount realised on the disposition and the US holder's tax basis, determined in US dollars, in the Shares. Any such capital gain or loss will generally be a long-term gain or loss, subject to tax at a preferential rate for a non-corporate US holder, if the US holder's holding period for such Shares exceeds one year. Any gain or loss recognised by a US holder on the sale or exchange of Shares will generally be treated as income or loss from sources within the US for foreign tax credit limitation purposes. The deductibility of capital losses is subject to limitations.

PFIC status

A non-US corporation is a PFIC in any taxable year in which, after taking into account the income and assets of certain subsidiaries, either (i) at least 75% of its gross income is passive income or (ii) at least 50% of the quarterly average of its assets is attributable to assets that produce or are held to produce passive income. Currently, we do not believe that CCEP Shares will be treated as stock of a PFIC for US federal income tax purposes. However, we review this annually, and therefore this conclusion is subject to change. If CCEP was to be treated as a PFIC, unless a US holder elects to treat CCEP as a "qualified electing fund" (QEF) or to be taxed annually on a mark-to-market basis with respect to its Shares, any gain realised on the sale or exchange of such Shares would in general be treated as ordinary income rather than capital gain. Instead, a US holder would be treated as if he or she had realised such gain ratably over the holding period for Shares and generally would be taxed at the highest tax rate in effect for each such year to which the gain was allocated. In this case, an interest charge in respect of the tax attributable to each such year would apply. Certain distributions would be similarly treated if CCEP were treated as a PFIC. In addition, each US person that is a shareholder of a PFIC may be required to file an annual report disclosing its ownership of shares in a PFIC and certain other information.

We do not intend to provide to US holders the information required to make a valid QEF election.

Other Group information continued

Information reporting and backup withholding

In general, information reporting requirements will apply to dividends received by US holders of Shares, and the proceeds received on the disposition of Shares effected within the US (and, in certain cases, outside the US), in each case, other than US holders that are exempt recipients (such as corporations).

Backup withholding may apply to such amounts if the US holder fails to provide an accurate taxpayer identification number (generally on an IRS Form W-9 provided to the paying agent or the US holder's broker) or is otherwise subject to backup withholding.

Backup withholding is not an additional tax. Any amounts withheld under the backup withholding rules may be allowed as a refund or credit against a holder's US federal income tax liability, if any, provided the required information is given to the IRS on a timely basis.

Certain US holders may be required to report to the IRS on Form 8938 information relating to their ownership of foreign financial assets, such as the Shares, subject to certain exceptions (including an exception for Shares held in accounts maintained by certain financial institutions). US holders should consult their tax advisors regarding the effect, if any, of these rules on their obligations to file information reports with respect to the Shares.

US federal income tax consequences to non-US holders of the ownership and disposition of CCEP Shares

In general, a non-US holder of Shares will not be subject to US federal income tax or, subject to the discussion below under Information reporting and backup withholding, US federal withholding tax on any dividends received on Shares or any gain recognised on a sale or other disposition of Shares including any distribution to the extent it exceeds the adjusted basis in the non-US holder's Shares unless:

- the dividend or gain is effectively connected with such non-US holder's conduct of a trade or business in the US (and, if required by an applicable tax treaty, is attributable to a permanent establishment maintained by the non-US holder in the US); or
- in the case of gain only, such non-US holder is a non-resident alien individual present in the US for 183 days or more during the taxable year of the sale or disposition, and certain other requirements are met.

Special rules may apply to a non-US holder who was previously a US holder and who again becomes a US holder in a later year.

A non-US holder that is a corporation may also be subject to a branch profits tax at a rate of 30% (or such lower rate specified by an applicable tax treaty) on its effectively connected earnings and profits for the taxable year, as adjusted for certain items.

Information reporting and backup withholding

Dividends with respect to Shares and proceeds from the sale or other disposition of Shares received in the US or through certain US-related financial intermediaries by a non-US holder, may be subject to information reporting and backup withholding unless such non-US holder provides to the applicable withholding agent the required certification showing its non-US status, such as a valid IRS Form W-8BEN, IRS Form W-8BEN-E or IRS Form W-8ECI, or otherwise establishes an exemption, and otherwise complies with the applicable requirements of the backup withholding rules.

Backup withholding is not an additional tax. Any amounts withheld under the backup withholding rules may be allowed as a refund or credit against a holder's US federal income tax liability, if any, provided the required information is given to the IRS on a timely basis.

UK taxation consequences for US holders

The following summarises certain UK tax consequences of the ownership and disposition of Shares for US holders who are not resident in the UK for tax purposes and to which split year treatment does not apply, which do not carry on a trade, profession or vocation through a permanent establishment or branch or agency in the UK, and which are the absolute beneficial owners of their Shares and hold such Shares as a capital investment.

This information is a general discussion based on UK tax law and what is understood to be the practice of HMRC, all as in effect on the date of publication, and all of which are subject to differing interpretations and change at any time, possibly with retroactive effect. It is not a complete analysis of all potential UK tax considerations that may apply to a US holder. In addition, this discussion neither addresses all aspects of UK tax law that may be relevant to particular US holders nor takes into account the individual facts and circumstances of any particular US holder. Accordingly, it is not intended to be, and should not be construed as, tax advice.

Other Group information continued

Distributions on Shares

No UK tax is required to be withheld from cash distributions on Shares paid to US holders. In addition, US holders will not be subject to UK tax in respect of their receipt of cash distributions on their Shares.

Sale, exchange, redemption or other dispositions of Shares

US holders will not be subject to UK tax on capital gains in respect of any gain realised by such US holders on a sale, exchange, redemption or other disposition of their Shares (and the UK rules relating to non-resident taxation of disposals of shares in "UK property rich" companies are not expected to apply with respect to the Shares, and would in any event only apply to a non-UK holder who holds (together with connected persons) 25% or more of the shares in a relevant "UK property rich" company). Special rules may apply to individual US holders which have ceased to be resident in the UK for tax purposes and who make a disposition of their Shares whilst UK non-resident before becoming once again resident in the UK for tax purposes within five years from departure.

While Shares are held within the DTC clearance system, and provided that DTC satisfies various conditions specified in UK legislation and has not made an election for the alternative system of charge under Section 97A of the UK Finance Act 1986 which applies to the Shares (a Section 97A Election), electronic book entry transfers of such Shares should not be subject to UK stamp duty, and agreements to transfer such Shares should not be subject to Stamp Duty Reserve Tax (SDRT). Confirmation of this position was obtained by way of formal clearance by HMRC and we are not aware that any Section 97A Election has been made. Likewise, transfers of, or agreements to transfer, such Shares from the DTC clearance system into another clearance system (or into a depositary receipt system) should not, provided that the other clearance system or depositary receipt system satisfies various conditions specified in UK legislation and that DTC has not made a Section 97A Election, be subject to UK stamp duty or SDRT.

In the event that Shares have left the DTC clearance system, other than into another clearance system or depositary receipt system, any subsequent transfer of, or agreement to transfer, such Shares may, subject to any available exemption or relief, be subject to UK stamp duty or SDRT at a rate of 0.5% of the consideration for such transfer or agreement (in the case of UK stamp duty, rounded up to the next multiple of £5). Any such UK stamp duty or SDRT will generally be payable by the transferee and must be paid (and any relevant transfer document duly stamped by HMRC) before the transfer can be registered in the books of the Company. In the event that Shares that have left the DTC clearance system, other than into another clearance system or depositary receipt system, are subsequently transferred back into a clearance system or depositary receipt system, such transfer or agreement may, subject to any available exemption or relief, be subject to UK stamp duty or SDRT at a rate of 1.5% of the consideration for such transfer (or, where there is no such consideration, 1.5% of the value of such Shares). Notwithstanding the foregoing provisions of this paragraph, a transfer of securities may in certain circumstances be subject to UK stamp duty or SDRT based on the market value of the relevant securities if this is higher than the amount of the consideration for the relevant transfer.

This summary is not exhaustive of all possible tax consequences. It is not intended as legal or tax advice to any particular holder of shares and should not be so construed. Holders of shares should consult their own tax advisor with respect to the tax consequences applicable to them in their own particular circumstances.

Selected financial data

The following selected financial data has been extracted from, and should be read in conjunction with the consolidated financial statements of the Group and their accompanying notes.

The financial results presented herein for the period from 1 January 2021 through to the acquisition of CCL (the Acquisition) effective 10 May 2021 refer to Coca-Cola European Partners plc (Legacy CCEP) and its consolidated subsidiaries. The periods from the Acquisition to the year ended 31 December 2023 refer to the combined financial results of CCEP.

The financial information presented here has been prepared in accordance with UK adopted International Accounting Standards, International Financial Reporting Standards (IFRS) as adopted by the European Union and International Financial Reporting Standards as issued by the International Accounting Standards Board (IASB).

Operations review

Revenue

Revenue increased by €1.0 billion, or 5.5%, from €17.3 billion in 2022 to €18.3 billion in 2023. Refer to the Business and financial review for a discussion of significant factors that impacted revenue in 2023, as compared to 2022.

2022 vs 2021

Refer to Other Information – Other Group information – Operations review of the 2022 Annual Report on Form 20-F, filed on 17 March 2023.

Volume

Refer to the Business and financial review for a discussion of significant factors that impacted volume in 2023, as compared to 2022.

2022 vs 2021

Refer to Other Information – Other Group information – Operations review of the 2022 Annual Report on Form 20-F, filed on 17 March 2023.

Cost of sales

On a reported basis, cost of sales increased 4.5%, from €11.1 billion in 2022 to €11.6 billion in 2023. Refer to the Business and financial review for a discussion of significant factors that impacted cost of sales in 2023, as compared to 2022.

2022 vs 2021

Refer to Other Information – Other Group information – Operations review of the 2022 Annual Report on Form 20-F, filed on 17 March 2023.

Selling and distribution expenses and administrative expenses

The following table presents selling and distribution expenses and administrative expenses for the periods presented:

	2023	2022
	€ million	€ million
Selling and distribution expenses	3,178	2,984
Administrative expenses	1,310	1,250
Total	4,488	4,234

On a reported basis, total operating expenses increased by 6.0% from €4.2 billion in 2022 to €4.5 billion in 2023.

Selling and distribution expenses increased by €194 million, or 6.5%, versus 2022, primarily driven by increased inflation, partially offset by a continued focus on discretionary spend optimisation.

Administrative expenses increased by €60 million, or 5.0%, versus 2022, mainly reflecting increased inflation and the continuation of restructuring activity related to various transformation initiatives.

2022 vs 2021

Refer to Other Information – Other Group information – Operations review of the 2022 Annual Report on Form 20-F, filed on 17 March 2023.

Finance costs, net

Finance costs, net totalled €120 million and €114 million in 2023 and 2022, respectively. The following table summarises the primary items impacting our interest expense during the periods presented:

	2023	2022
Average outstanding debt balance (€ million)	11,761	12,431
Weighted average cost of debt during the year	1.6%	1.3%
Fixed rate debt (% of portfolio)	89%	90%
Floating rate debt (% of portfolio)	11%	10%

Non-operating items

Non-operating items represented an expense of €16 million in 2023 and an expense of €15 million in 2022. Non-operating expenses include remeasurement gains and losses related to currency exchange rate fluctuations on financing transactions denominated in a currency other than the subsidiary's functional currency. Non-operating items are shown on a net basis and reflect the impact of any derivative instruments utilised to hedge the foreign currency movements of the underlying financing transactions. Non-operating items also include the Group's share of the profit or loss after tax of equity accounted investments and impairments.

Tax expense

In 2023, our reported effective tax rate was 24.2%. The increase from 2022 is largely due to the increase in the UK statutory tax rate to a weighted average of 23.5% and the review of uncertain tax positions.

In 2022, our reported effective tax rate was 22.3%. The decrease from 2021 is largely due to the remeasurement of deferred tax positions following the enactment of tax rate changes in the United Kingdom, the Netherlands and Indonesia in the prior period.

Other Group information continued

Cash flow and liquidity review

Liquidity and capital resources

Our sources of capital include, but are not limited to, cash flows from operating activities, public and private issuances of debt and equity securities and bank borrowings. Based on information currently available, we do not believe we are at significant risk of default by our counterparties.

The Group satisfies seasonal working capital needs and other financing requirements with operating cash flow, cash on hand, short-term borrowings and a line of credit. In December 2023 the Group issued €700 million of 3.875% notes maturing in 2030. At 31 December 2023, the Group had €1,150 million in third party debt maturities in the next 12 months, €500 million in the form of euro denominated notes, €588 million of US dollar denominated notes swapped into euro and €62 million of Australian dollar denominated notes. No short-term commercial papers were issued at 31 December 2023. In addition to using operating cash flow and cash in hand, the Group may repay its short-term obligations by issuing more debt, which may take the form of commercial paper and/or longer-term debt. Further details regarding the level of borrowings at the year end are provided in Note 13 of the consolidated financial statements.

In line with our commitments to deliver long-term value to shareholders, in April and November 2023 the Board declared interim dividends of €0.67 and €1.17 per Share, respectively, maintaining annualised dividend payout ratio of approximately 50%. For the year ended 31 December 2023, dividend payments totalled €841 million.

There were no payments under the share buyback programme in 2023.

Credit ratings and covenants

The Group's credit ratings are periodically reviewed by rating agencies. The ratings outlook from Moody's and Fitch is stable and continue to be investment-grade as at end of 2023. Changes in the operating results, cash flows or financial position could impact the ratings assigned by the various rating agencies. The credit rating can be materially influenced by a number of factors including, but not limited to, acquisitions, investment decisions, and capital management activities of TCCC, and/or changes in the credit rating of TCCC. Should the credit ratings be adjusted downward, the Group may incur higher costs to borrow, which could have a material impact on the financial condition and results of operations.

Summary of cash flow activities

2023

During 2023, our primary sources of cash included: (1) €2,806 million from operating activities, net of cash payments related to restructuring programmes of €104 million and contributions to our defined benefit pension plans of €32 million; (2) proceeds from borrowings, net of issuance costs of €694 million; (3) proceeds of €69 million related to the settlement of debt-related cross currency swaps; (4) proceeds of €101 million primarily related to the sale of property; (5) proceeds of €37 million related to the sale of certain non-alcoholic ready to drink brands to TCCC and (6) proceeds of €35 million related to the sale of sub-strata and associated mineral rights in Australia.

Our primary uses of cash were: (1) repayments on borrowings of €1,159 million, repayments of principal on lease obligations of €148 million (refer to Financing activities below) and net interest payments of €124 million; (2) dividend payments of €841 million; (3) spend on property, plant and equipment of €672 million and software of €140 million; (4) investments in short-term financial assets of €342 million, and (5) acquisition of non-controlling interest of €282 million.

2022

During 2022, our primary sources of cash included: (1) €2,932 million from operating activities, net of cash payments related to restructuring programmes of €86 million and contributions to our defined benefit pension plans of €32 million; and (2) proceeds of €143 million related to the sale of certain non-alcoholic ready to drink brands to TCCC.

Our primary uses of cash were: (1) repayments on borrowings of €1,223 million, repayments of principal on lease obligations of €153 million (refer to Financing activities below); (2) net interest payments of €130 million; (3) dividend payments of €763 million; (4) spend on property, plant and equipment of €500 million and software of €103 million; and (5) investments in short-term financial assets of €207 million.

The discussion of our 2021 cash flow activities has not been included as this can be found under Other Information – Other Group information – Cash flow and liquidity review of the 2021 Annual Report on Form 20-F, filed on 15 March 2022.

Operating activities

2023 vs 2022

Our cash derived from operating activities totalled €2,806 million in 2023 versus €2,932 million in 2022. This decrease was primarily due to cycling the impact of working capital improvement initiatives.

Other Group information continued

2022 vs 2021

Refer to Other Information – Other Group information – Cash flow and liquidity review of the 2022 Annual Report on Form 20-F, filed on 17 March 2023.

Investing activities

2023 vs 2022

During 2023, proceeds related to the sale of property, plant and equipment totalled €101 million, primarily related to the sale of properties. Proceeds from the sale of certain non-alcoholic ready to drink brands to TCCC totalled €37 million. Proceeds related to the sale of sub-strata and associated mineral rights in Australia totalled €35 million. Net outflows related to short-term investments were €342 million.

Capital asset investments represent a primary use of cash for our investing activities. The following table summarises the capital investments for the periods presented:

	2023	2022
	€ million	€ million
Supply chain infrastructure	532	393
Cold drink equipment	110	83
Fleet and other	30	24
Total capital asset investments	672	500

Investments in supply chain infrastructure relate to investments in our manufacturing and distribution facilities. In addition, during 2023 the Group spent €140 million (2022: €103 million) on capitalised development activity, primarily in relation to the continuation of our business capability programme and further investments in technology and digitisation.

During 2024, we expect our capital expenditures to be invested in similar categories as those listed in the table above. While the level of capital expenditure is uncertain, we expect our operating cash flow, cash in hand and available short-term capital resources will be sufficient to fund future capital expenditures.

2022 vs 2021

Refer to Other Information – Other Group information – Cash flow and liquidity review of the 2022 Annual Report on Form 20-F, filed on 17 March 2023.

Financing activities

2023 vs 2022

Our net cash used in financing activities totalled €1,822 million in 2023. In 2022, net cash used in financing activities totalled €2,276 million.

The following table summarises our financing activities related to the issuances of and payments on debt for the periods presented (in € millions):

Issuances of debt	Maturity date	Rate	2023	2022
€700 million	December 2023	3.875%	694	—
Total issuances of debt, less short-term borrowings, net of issuance costs			694	—
Net issuances of short-term borrowings	—	(A)	—	—
Total issuances of debt, net			694	—
Payments on debt	Maturity date	Rate	2023	2022
\$850 million	May 2023	0.500%	(775)	—
US\$25 million	October 2023	4.340%	(17)	—
US\$25 million	October 2023	4.340%	(17)	—
€350 million	November 2023	2.625%	(350)	—
€700 million	February 2022	0.750%	—	(700)
A\$200 million	March 2022	3.375%	—	(134)
A\$30 million	July 2022	5.060%	—	(20)
A\$125 million	July 2022	3.125%	—	(84)
Lease obligations	—	—	(148)	(153)
Total repayments on third party borrowings, less short-term borrowings			(1,307)	(1,091)
Net payments of short-term borrowings	—	(A)	—	(285)
Total payments on debt			(1,307)	(1,376)

(A) These amounts represent short-term euro commercial paper with varying interest rates. In 2023, changes in short-term borrowings include €6,810 million of newly issued and €6,810 million of repaid EUR commercial paper. In 2022, changes in short-term borrowings included €2,464 million and €2,749 million of newly issued and repaid EUR commercial paper, respectively.

Our financing activities during 2023 included dividend payments totalling €841 million, based on a full year dividend rate of €1.84 per Share. In 2022, dividend payments totalled €763 million.

There were no payments under the share buyback programme in 2023 and 2022.

There were no drawdowns from our credit facility in 2023 and 2022. The facility was undrawn at 31 December 2023 and 31 December 2022, respectively.

Other Group information continued

During 2023 our financing activities also included the acquisition of non-controlling interest of €282 million. Further details are provided in Note 19 of the consolidated financial statements.

Lease obligations

During the year ended 31 December 2023 and 31 December 2022, total cash outflows from payments of principal on lease obligations were €148 million and €153 million, respectively.

2022 vs 2021

Refer to Other Information – Other Group information – Cash flow and liquidity review of the 2022 Annual Report on Form 20-F, filed on 17 March 2023.

Raw materials

CCEP purchases concentrates and syrups from TCCC and other franchisors to manufacture products. In addition, the Group purchases sweeteners, juices, coffee, mineral waters, finished product, carbon dioxide, fuel, pallets, ocean freight, haulage, virgin and recycled PET (plastic) preforms, glass, aluminium and plastic bottles, aluminium and steel cans, pouches, closures, post-mix and packaging materials. The Group generally purchases raw materials, other than concentrates, syrups and mineral waters, from multiple suppliers. The product licensing and bottling agreements with TCCC and agreements with some of our other franchisors provide that all authorised containers, closures, cases, cartons and other packages, and labels for their products must be purchased from manufacturers approved by the respective franchisor. The principal sweetener we use is sugar derived from sugar beets in Europe and sugar cane in API. Our sugar purchases are made from multiple suppliers. The Group does not separately purchase low-calorie sweeteners because sweeteners for low-calorie beverage products are contained in the concentrates or syrups we purchase.

The Group produces most of its plastic bottle requirements within the production facilities, approximately 60% from using preforms purchased from multiple suppliers and the remainder from self-manufactured preforms. The Group believes the self-manufacture of certain packages serves to ensure supply and to reduce or manage costs. The Group manages its continuity of materials and supplies closely, although the supply and price of specific materials or supplies are, at times, adversely affected by strikes, weather conditions, speculation, abnormally high demand, governmental controls, new taxes, national emergencies, natural disasters, price or supply fluctuations of their raw material components, and currency fluctuations.

Contractual obligations

The following table reflects the Group's contractual obligations as at 31 December 2023:

	Total € million	Less than 1 year € million	1 to 3 years € million	3 to 5 years € million	More than 5 years € million
Borrowings and interest obligations ^(A)	11,803	1,322	2,325	2,681	5,475
Lease obligations ^(B)	782	179	232	139	232
Purchase agreements ^(C)	238	94	83	41	20
	12,823	1,595	2,640	2,861	5,727

(A) These amounts represent the Group's scheduled debt maturities and estimated interest payments related to the Group's long-term debt obligations, excluding leases. Refer to Note 13 of the consolidated financial statements for further details about the borrowings of CCEP. Interest on fixed rate debt has been calculated based on applicable rates and payment dates. Interest on variable rate debt has been calculated using the forward interest rate curve. Refer to Note 26 of the consolidated financial statements for further details about financial risk management within CCEP.

(B) These amounts represent the Group's future lease payments including amounts representing interest, obligations related to lease agreements committed to but not yet commenced and lease payments due under non-cancellable short-term or low value lease agreements.

(C) These amounts represent non-cancellable purchase agreements with various suppliers that are enforceable and legally binding and that specify a fixed or minimum quantity that we must purchase. All purchases made under these agreements have standard quality and performance criteria. In addition to these amounts, the Group has outstanding capital expenditure purchase orders of approximately €165 million as at 31 December 2023. The Group also has other purchase orders raised in the ordinary course of business which are settled in a reasonably short period of time. These are excluded from the table above. The Group expects that the net cash flows generated from operating activities will be able to meet these liabilities as they fall due.

The above table does not include the impact of contractual obligations related to derivative financial instruments. A table containing this information is presented in Note 26 of the consolidated financial statements. Furthermore, the exact timing of our tax provisions is not certain and these have been excluded from the above table. Refer to Note 20 of the consolidated financial statements for further information.

The above table also does not reflect employee benefit liabilities of €199 million, which include current liabilities of €8 million and non-current liabilities of €191 million as at 31 December 2023. Refer to Note 15 of the consolidated financial statements for further information.

Other Group information continued

Properties

The Group's principal properties include production facilities, distribution and logistics centres, shared service centres, business unit headquarter offices and corporate offices.

The table below summarises the main properties which the Group uses as at 31 December 2023:

	Great Britain	France	Belgium/ Luxembourg	Netherlands	Norway	Sweden	Germany	Iberia	Iceland	Total

Total	1	1	1	3						

(A) All production facilities are a combination of production and warehouse facilities.

(B) Production facilities include NARTD, alcoholic beverage and other production facilities.

Other Group information continued

The Group uses two shared service centres, both located in Bulgaria.

The Group's principal properties cover approximately 5.6 million square metres in the aggregate of which 0.9 million square metres is leased and 4.7 million square metres is owned. The Group believes that its facilities are adequately utilised and sufficient to meet its present operating needs.

At 31 December 2023, the Group operated approximately 13,000 vehicles of various types, the majority of which are leased. The Group also owned approximately 1.4 million pieces of cold drink equipment, principally coolers and vending machines.

Disclosure controls and procedures

Evaluation of disclosure controls and procedures

The Group maintains "disclosure controls and procedures", as defined in Rule 13a-15(e) under the Exchange Act, which are designed to ensure that information required to be disclosed in reports filed or submitted under the Exchange Act is recorded, processed, summarised and reported within the time periods specified in the US SEC's rules and forms, and that such information is accumulated and communicated to the Group's management, including the Chief Executive Officer (CEO) and Chief Financial Officer (CFO), as appropriate to allow timely decisions regarding required disclosure. The Group's management, with the participation of the CEO and CFO, has evaluated the effectiveness of the Group's disclosure controls and procedures pursuant to Exchange Act Rule 13a-15(b) as at 31 December 2023. Based on that evaluation, the Group's CEO and CFO have concluded that the Group's disclosure controls and procedures were effective.

Management's report on internal control over financial reporting

The Group's management is responsible for establishing and maintaining adequate internal control over financial reporting for the Group, as defined in Rule 13a-15(f) under the Exchange Act. Internal control over financial reporting is a process designed under the supervision of the principal executive and financial officers to provide reasonable assurance regarding the reliability of financial reporting and the preparation of the Group's consolidated financial statements for external reporting purposes in accordance with IFRS issued by the IASB. The Group's internal control over financial reporting includes policies and procedures that (i) pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the Group's transactions and dispositions of assets; (ii) are designed to provide reasonable assurance that transactions are recorded as necessary to permit the preparation of the Group's consolidated financial statements in accordance with IFRS, and that receipts and expenditures are being made only in accordance with authorisations of management and the Directors of the Group; and (iii) provide reasonable assurance regarding prevention or timely detection of unauthorised acquisition, use or disposition of the Group's assets that could have a material effect on the Group's consolidated financial statements. Internal control systems, no matter how well designed, have inherent limitations and may not prevent or detect misstatements. Also, projections of any evaluation of effectiveness to future periods are subject to the risk that internal controls may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

Other Group information continued

Management, with the participation of the CEO and CFO, assessed the effectiveness of the Group's internal control over financial reporting as at 31 December 2023, using the criteria set forth in the Internal Control-Integrated Framework issued by The Committee of Sponsoring Organizations of the Treadway Commission. Based on this assessment, management has determined that the Group's internal control over financial reporting as at 31 December 2023 was effective. Ernst & Young LLP (EY), the Group's independent registered public accounting firm, has issued a report on the Group's internal control over financial reporting as at 31 December 2023, which is set out on page 161.

Changes in internal control over financial reporting

There has been no change in the Group's internal control over financial reporting (as defined in Rule 13a-15(f) under the Exchange Act) during 2023 that has materially affected, or is reasonably likely to materially affect, the Group's internal control over financial reporting.

Auditor's fees and services

The Audit Committee has established policies and procedures for the engagement of the independent registered public accounting firm, Ernst & Young LLP (Auditor Firm ID: 1438), to render audit, and, audit-related assurance services, other assurance services and other services. The policies provide for pre-approval by the Audit Committee of specifically defined audit, audit-related, tax and other services that are not prohibited by regulatory or other professional requirements. EY is engaged for these services when its expertise and experience of CCEP are important. Most of this work is of an audit nature.

Under the policy, pre-approval is given for specific services within the following categories: advice on accounting, auditing and financial reporting matters; internal accounting and risk management control reviews (excluding any services relating to information systems design and implementation); non-statutory audit; project assurance and advice on business and accounting process improvement (excluding any services relating to information systems design and implementation relating to CCEP's financial statements or accounting records); due diligence in connection with acquisitions, disposals and arrangements in which two or more parties have joint control (excluding valuation or involvement in prospective financial information); income tax and indirect tax compliance and advisory services; employee tax services (excluding tax services that could impair independence); provision of, or access to, EY publications, workshops, seminars and other training materials; provision of reports from data gathered on non-financial policies and information; and assistance with understanding non-financial regulatory requirements.

The Audit Committee evaluates the performance of the auditor each year. The Committee keeps under review the scope and results of audit work and the independence and objectivity of the auditor. External regulation and CCEP policy require the auditor to rotate its lead audit partner every five years. The audit fees payable to EY are reviewed by the Committee for cost effectiveness each year. Details of fees for services provided by the auditor are provided in Note 17 of the consolidated financial statements.

Exhibits

The following documents, which form a part of this Annual Report on Form 20-F, have been filed with the US Securities and Exchange Commission (SEC) via its EDGAR system and can be viewed on the SEC's website at www.sec.gov

Exhibit 1	Articles of Association of CCEP (incorporated by reference to Exhibit 99.1 to CCEP's Form 6-K filed with the SEC on May 30, 2019).
Exhibit 2	Description of rights attached to each class of CCEP securities registered under Section 12 of the Exchange Act as at 31 December 2023.
Exhibit 3	Shareholders' Agreement by and among the Company, Olive Partners, S.A., European Refreshments, Coca-Cola GmbH and Vivaqa Beteiligungs GmbH & Co. KG (incorporated by reference to Annex C to the proxy statement/prospectus contained in CCEP's Form F-4/A registration statement filed with the SEC on April 11, 2016).
Exhibit 4.1	Form of Bottler's Agreement entered into between The Coca-Cola Company and the bottling subsidiaries of CCEP (incorporated by reference to Exhibit 10.7 to the Company's Form F-4/A registration statement filed with the SEC on April 7, 2016).
Exhibit 4.2	Coca-Cola European Partners plc Long-Term Incentive Plan 2016 (incorporated by reference to Exhibit 4.1 to CCEP's Form S-8 registration statement filed with the SEC on June 1, 2016).
Exhibit 4.3	Coca-Cola Europacific Partners plc Long-Term Incentive Plan (incorporated by reference to Exhibit 4.1 to the Registrant's Form 6-K filed with the SEC on April 12, 2023).
Exhibit 4.4	Rules of the Coca-Cola Enterprises Belgium/Coca-Cola Enterprises Services Belgian and Luxembourg Share Savings Plan (incorporated by reference to Exhibit 4.3 to CCEP's Form S-8 registration statement filed with the SEC on June 1, 2016).
Exhibit 4.5	Trust Deed and Rules of Coca-Cola Enterprises UK Share Plan (incorporated by reference to Exhibit 4.2 to the Company's Form S-8 registration statement filed with the SEC on June 1, 2016).
Exhibit 4.6	The Coca-Cola Enterprises, Inc. 2010 Incentive Award Plan (as amended Effective February 7, 2012) (incorporated by reference to Exhibit 99.1 to Coca-Cola Enterprises, Inc.'s Current Report on Form 8-K filed on February 9, 2012).
Exhibit 4.7	Deed of Assumption and Replacement relating to Equity Awards of Coca-Cola Enterprises, Inc. (incorporated by reference to Exhibit 4.3 to the Company's Post-Effective Amendment No. 1 on Form S-8 to Form F-4 registration statement filed with the SEC on June 1, 2016).
Exhibit 8	List of Subsidiaries of the Company (included in Note 28 of the consolidated financial statements in this Annual Report on Form 20-F).
Exhibit 12.1	Rule 13a-14(a) Certification of Damian Gammell.
Exhibit 12.2	Rule 13a-14(a) Certification of Nik Jhangiani.
Exhibit 13	Rule 13a-14(b) Certifications.
Exhibit 15.1	Consent of Ernst & Young LLP, UK.
Exhibit 97	Coca-Cola Europacific Partners plc Policy on Recoupment of Incentive Compensation (approved by the Board on 18 October 2023).
Exhibit 101.INS	XBRL Instance Document.
Exhibit 101.SCH	XBRL Taxonomy Extension Schema Document.
Exhibit 101.CAL	XBRL Taxonomy Extension Calculation Linkbase Document.
Exhibit 101.DEF	XBRL Taxonomy Extension Definition Linkbase Document.
Exhibit 101.LAB	XBRL Taxonomy Extension Label Linkbase Document.
Exhibit 101.PRE	XBRL Taxonomy Extension Presentation Linkbase Document.

The total amount of long-term debt securities issued by the Company or any subsidiary under any one instrument which requires filing consolidated or unconsolidated financial statements does not exceed 10% of the total assets of the Company and its subsidiaries on a consolidated basis. The Company agrees to furnish a copy of any long-term debt security instrument which requires filing consolidated or unconsolidated financial statements to the SEC on request.

Signatures

The registrant hereby certifies that it meets all of the requirements for filing on Form 20-F and that it has duly caused and authorised the undersigned to sign the Annual Report on Form 20-F on its behalf.

Forward-looking statements

This document contains statements, estimates or projections that constitute "forward-looking statements" concerning the financial condition, performance, results, guidance and outlook, dividends, consequences of mergers, acquisitions, joint ventures, and divestitures, including the joint venture with Aboitiz Equity Ventures Inc. (AEV) and acquisition of Coca-Cola Beverages Philippines, Inc. (CCBPI), strategy and objectives of Coca-Cola Europacific Partners plc and its subsidiaries (together CCEP or the Group). Generally, the words "ambition", "target", "aim", "believe", "expect", "intend", "estimate", "anticipate", "project", "plan", "seek", "may", "could", "would", "should", "might", "will", "forecast", "outlook", "guidance", "possible", "potential", "predict", "objective" and similar expressions identify forward-looking statements, which generally are not historical in nature.

Forward-looking statements are subject to certain risks that could cause actual results to differ materially from CCEP's historical experience and present expectations or projections. As a result, undue reliance should not be placed on forward-looking statements, which speak only as of the date on which they are made. These risks include but are not limited to:

1. those set forth in the "Risk Factors" section of this 2023 Annual Report on Form 20-F;
2. risks and uncertainties relating to the global supply chain and distribution, including impact from war in Ukraine and increasing geopolitical tensions and conflicts including in the Middle East and Asia Pacific region, such as the risk that the business will not be able to guarantee sufficient supply of raw materials, supplies, finished goods, natural gas and oil and increased state-sponsored cyber risks;
3. risks and uncertainties relating to the global economy and/or a potential recession in one or more countries, including risks from elevated inflation, price increases, price elasticity, disposable income of consumers and employees, pressure on and from suppliers, increased fraud, and the perception or manifestation of a global economic downturn;
4. risks and uncertainties relating to potential global energy crisis, with potential interruptions and shortages in the global energy supply, specifically the natural gas supply in our territories. Energy shortages at our sites, our suppliers and customers could cause interruptions to our supply chain and capability to meet our production and distribution targets;
5. risks and uncertainties relating to potential water use reductions due to regulations by national and regional authorities leading to a potential temporary decrease in production volume; and

6. risks and uncertainties relating to the integration and operation of the joint venture with AEV and acquisition of CCBPI, including the risk that our integration of CCBPI's business and operations may not be successful or may be more difficult, time consuming or costly than expected.

Due to these risks, CCEP's actual future financial condition, results of operations, and business activities, including its results, dividend payments, capital and leverage ratios, growth, including growth in revenue, cost of sales per unit case and operating profit, free cash flow, market share, tax rate, efficiency savings, achievement of sustainability goals, including Net Zero emissions and recycling initiatives, capital expenditures, our agreements relating to and results of the joint venture with AEV and acquisition of CCBPI, and ability to remain in compliance with existing and future regulatory compliance, may differ materially from the plans, goals, expectations and guidance set out in forward-looking statements. These risks may also adversely affect CCEP's share price. Additional risks that may impact CCEP's future financial condition and performance are identified in filings with the SEC which are available on the SEC's website at www.sec.gov. CCEP does not undertake any obligation to publicly update or revise any forward-looking statements, whether as a result of new information, future events, or otherwise, except as required under applicable rules, laws and regulations. Any or all of the forward-looking statements contained in this filing and in any other of CCEP's public statements may prove to be incorrect.
