

ACTION ON SOCIETY

We'll be a force for good by championing inclusion and economic development in society — with our employees and our communities.

We'll foster a diverse and inclusive culture in our business and make sure that women hold at least 40% of our management positions.

We'll expand the contribution we make to society by increasing our employee volunteering and supporting local community partnerships.

We'll support initiatives which help young people gain the employability, skills and confidence they need to succeed.

**Baseline is 2010
and target date
is 2025 unless
otherwise stated**
